(d) *Options granted to certain shareholders.* (1) An employee stock purchase plan must by its terms provide that no employee can be granted an option if such employee, imediately after the option is granted, owns stock possessing 5 percent or more of the total combined voting power or value of all classes of stock of the employer corporation or its parent or subsidiary corporation. In determining whether the stock ownership of an employee equals or exceeds this 5 percent limit, the rules of section 425(d) (relating to attribution of stock ownership) shall apply, and stock which the employee may purchase under outstanding options (whether or not such options qualify for the special tax treatment afforded by section 421(a)) shall be treated as stock owned by the employee. An option is outstanding for purposes of section 423(b)(3) although under its terms it may be exercised only in installments or after the expiration of a fixed period of time. If an option is granted to an individual whose stock ownership (as determined under this paragraph for purposes of section 423(b)(3)) exceeds the limitation of section 423(b)(3), no portion of such option will be treated as having been granted under an employee stock purchase plan.

(2) The determination of the percentage of the total combined voting power or value of all classes of stock of his employer corporation (or a related corporation of such corporation) that is owned by the individual is made by comparing the voting power or value of the shares owned (or treated as owned) by the individual to the aggregate voting power or value of all shares actually issued and outstanding immediately after the grant of the option to such individual. The aggregate voting power or value of all shares actually issued and outstanding immediately after the grant of the option does not include the voting power or value of treasury shares or shares authorized for issue under outstanding options held by the individual or any other person.

(3) The application of this paragraph may be illustrated by the following examples:

*Example (1).* E, an employee of M Corporation, owns 6,000 shares of the common stock of M Corporation, the only class of M stock outstanding. M has 100,000 shares of its common stock outstanding. Since E owns 6 percent of the combined voting power or value of all classes of M Corporation stock, M cannot grant an option to E under M's employee stock purchase plan. If E's father and brother each owned 3,000 shares of M stock

and E owned no M stock in his own name, the result in this case would be the same, since under section 425(d) a person is treated as owning stock held by his father and his brother. Similarly, the result would be the same if, instead of actually owning 6,000 shares, E merely held an option on 6,000 shares of M stock, irrespective of whether the transfer of stock under such option could qualify for the special tax treatment of section 421, since section 423(b)(3) provides that stock which the employee may purchase under outstanding options shall be treated as stock owned by such employee.

*Example* (2). Assume the same facts as in example (1) and assume further that M is a subsidiary corporation of P Corporation. Irrespective of whether E owns any P stock, E cannot receive an option from P under P's employee stock purchase plan since he owns 5 percent of the total combined voting power of all classes of stock of a subsidiary of P Corporation, i.e., M Corporation. Thus, an individual who owns (or is treated as owning) stock in excess of the limitation of section 423(b)(3), in any corporation in a group of corporations, consisting of a parent and its subsidiary corporations, cannot receive an option under an employee stock purchase plan from any corporation in the group.

*Example* (3). F is an employee of R Corporation. R has only one class of stock, of which 100,000 shares are issued and outstanding. Assuming F owns no stock in R or in any parent or subsidiary of R for purposes of section 423(b)(3), R can grant an option to F under its employee stock purchase plan for 4,999 shares, since immediately after the grant of the option, F would not own 5 percent or more of the combined voting power or value of all classes of R stock actually issued and outstanding at such time. The 4,999 shares which F would be treated as owning under section 423(b)(3) would not be added to the 100,000 shares actually issued and outstanding immediately after the grant for purposes of determining whether F's stock ownership exceeds the limitation of section 423(b)(3).

*Example* (4). Assume the same facts as in example (3) and assume further than on June 1, 1965, R grants F an option, purportedly under its employee stock purchase plan, for 5,000 shares. No portion of this option will be treated as granted under an employee stock purchase plan.

(e) *Employees covered by plan.* (1) Subject to the limitations of section 423(b)(3) and (8), section 423(b)(4) requires that an employee stock purchase plan must, by its terms, provide that options are to be granted to all employees of any corporation which grants options to any of its employees by reason of their employment by such corporation, except that one or more of the following categories of employees may be excluded from the coverage of the plan: employees who have been employed less than 2 years; employees whose customary employment is 20 hours or less per week; employees whose customary employment is for not more than 5 months in any calendar year; and officers, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees. Thus, each offering under the plan must be open to all employees entitled to participate under the plan, other than employees who may be excluded under section 423(b)(4) and paragraph (e) of this section, and employees barred from participation by reason of section 423(b)(3) and (8), and paragraphs (d) and (i) of this section. If an employee to whom an option is required to be granted under this paragraph is wholly or partially barred from being granted an option or participating in an offering under a plan by reason of such employees' continuing participation in a prior grant or offering under such plan (or under an employee stock purchase plan of a parent or subsidiary corporation of the grantor corporation), such employee must be given the right to terminate his participation under the prior grant or offering in order to become eligible to participate in the most recent grant or offering under the plan. If an option is not granted to any employee who is entitled to the grant of an option under the terms of the plan or offering, none of the options granted under such offering will be treated as having been granted under an employee stock purchase plan.

(2) For purposes of section 423(b)(3) the existence of the employment relationship between an individual and the corporation participating under the plan will be determined under paragraph (h) of § 1.421–7 (relating to employment relationship).

(3) The application of this paragraph may be illustrated by the following examples:

*Example* (1). M Corporation has a stock purchase plan which meets all the requirements of section 423(b) except that by its terms, options are not required to be granted to employees whose weekly rate of pay is less than $100. As a matter of corporate practice, M grants options under its plan to all employees, irrespective of their weekly rate of pay. M's plan is not an employee stock purchase plan.

*Example* (2). Assume the same facts as in example (1) and assume further that the first offering under M's plan provides by its terms that options will be granted to all employees of M Corporation. With respect to options exercised under such offering the terms of such offering will be treated as part of the terms of M's plan. Accordingly, stock transferred pursuant to options exercised under such offering will be treated as stock transferred pursuant to the exercise of options granted under an employee stock purchase plan for purposes of section 421.

(f) *Equal rights and privileges.* (1) An employee stock purchase plan must, by its terms, provide that all employees granted options under such plan shall have the same rights and privileges; however, a plan will not fail to satisfy this requirement merely because the amount of stock which may be purchased by any employee under such plan is determined on the basis of a uniform relationship to the total compensation, or the basic or regular rate of compensation of employees, or because the plan provides that no employee may purchase more than a maximum amount of stock fixed under the plan. Thus, the provisions applying to one option under an offering (such as the provisions relating to the method of payment for the stock and the determination of the purchase price per share) must apply to all other options under such offering in the same manner. If all the options granted under a plan or offering do not, by their terms, give the respective optionees the same rights and privileges, none of such options shall be treated as having been granted under an employee stock purchase plan for purposes of section 421.

(2) The requirements of section 423(b)(5) and this paragraph do not prevent the maximum amount of stock which an employee may purchase from being determined on the basis of a uniform relationship to the total compensation, or the basic or regular rate of compensation, of all employees. For example, if an employee stock purchase plan provides that the maximum amount of stock which each employee may purchase under the offering is one share for each $100 of annual gross pay, options granted under such offering will be treated as meeting the requirement of section 423(b)(5). However, such a provision must not exclude employees from participation under the plan or offering. For example, a plan which provides for the grant of options based on one share for each $100 of annual gross pay in excess of $10,000 will not meet the requirements of section 423(b)(5).

(3) The application of this paragraph may be illustrated by the following example:

*Example.* Assume that N Corporation has an employee stock purchase plan, and that the first offering under such plan provides that an employee may participate under such offering only to the extent his contributions toward the purchase of shares under all employee stock purchase plans of N do not exceed 15 percent of his gross weekly pay. Assume further that the option price under such offering is 90 percent of the fair market value of N stock at exercise. The second offering under such plan contains a similar provision as to the maximum amount of contributions allowable toward the purchase of stock under all the employee stock purchase plans of N. Assume further that under the second offering, the option price is 85 percent of the fair market value of N stock at the time of exercise. In order to satisfy the requirements of section 423(b)(4) and (5), any employee who would be totally or partially barred from participating under N's second offering by reason of his participation under N's first offering to the full extent allowed by N (*i.e.*, 15 percent of his weekly pay), must be allowed to terminate his participation under N's first offering, and to participate in the second offering.

(g) *Option price.* (1) An employee stock purchase plan must, by its terms, provide that the option price will not be less than the lesser of—

(i) An amount equal to 85 percent of the fair market value of the stock at the time such option is granted, or

(ii) An amount which under the terms of the option may not be less than 85 percent of the fair market value of the stock at the time such option is exercised.

For definition of the term "option price", and general rules relating to such term, see paragraph (e) of § 1.421–7. For rules relating to the determination of when an option is granted, see paragraph (c) of § 1.421–7. Any option which does not meet the minimum pricing requirements of section 423(b)(6) and this paragraph will not be treated as granted under an employee stock purchase plan irrespective of whether the plan itself or the offering satisfies such requirements. If such an option is granted to an employee who is entitled to the grant of an option under the terms of the plan or offering, and such employee is not granted an option under such offering which qualifies as an option granted under an employee stock purchase plan, such offering will not meet the requirements of section 423(b)(4). Accordingly, none of the options granted under such offering will be eligible for the special tax treatment of section 423(b)(4).

(2) The option price may be stated either as a percentage or as a dollar amount. If the option price is stated as a dollar amount, the requirement of section 423(b)(6) and this paragraph can only be met by a plan or offering in which the price is fixed at not less than 85 percent of the fair market value of the stock at the time the option is granted. If the fixed price is less than 85 percent of the fair market value of the stock at grant, the option cannot meet the requirement of section 423(b)(6) even if a decline in the fair market value of the stock results in such fixed price being not less than 85 percent of the fair market value of the stock at the time the option is exercised, since such a result was not certain to occur under the terms of the option.

(3) The application of this paragraph may be illustrated by the following examples:

*Example* (1). M Corporation has an employee stock purchase plan which provides that the option price will be 85 percent of the fair market value of the stock at grant, or 85 percent of the stock at exercise, whichever amount is the lesser. Upon the exercise of an option issued under M's plan, M agrees to accept an amount which is less than the minimum amount allowable under the terms of such plan. Notwithstanding that the option was issued under an employee stock purchase plan, the transfer of stock pursuant to the exercise of such option does not satisfy the requirement of section 423(b)(6) and cannot qualify for the special tax treatment of section 421.

*Example* (2). Assume the same facts as in example (1) and assume further that at the time of grant, the fair market value of M Corporation stock is $100 per share and that the option price is set at 85 percent of the fair market value of M stock at exercise, but not less than $80 per share. The option satisfies the requirement of section 422(b)(6), and can qualify for the special tax treatment of section 421.

*Example* (3). Assume the same facts as in example (2), except assume that the option price is set at 85 percent of the fair market value of M stock at exercise, but not more than $80 per share. This option cannot satisfy the requirement of section 423(b)(6) irrespective of whether, at the time the option is exercised, 85 percent of the fair market value of M stock is $80 or less.

(h) *Option period.* An employee stock purchase plan must, by its terms, provide that options granted under such plan cannot be exercised after the expiration of 27 months from the date of grant unless, under the terms of such plan, the option price is to be not less than 85 percent of the fair market value of the stock at the time of the exercise of the option. If the option price is to be not less than 85 percent of the fair market value of the stock at the time the option is exercised, then the option period provided under the plan must not exceed 5 years from the date of grant. If the requirement of section 423(b)(7) is not met by the terms of the plan or offering, options issued under such plan or offering will not be treated as options granted under an employee stock purchase plan irrespective of whether such options, by their terms, are exercisable beyond the period allowable under section 423(b)(7) and this paragraph. An option which provides that the option price is to be not less than 85 percent of the fair market value of the stock at exercise may have an option period of 5 years irrespective of whether the fair market value of the stock at exercise is more or less than the fair market value of such stock at grant. However, if the option provides that the option price is to be 85 percent of the fair market value of the stock at exercise, but not more than some other fixed amount, then irrespective of the price paid on exercise, the option period must not be more than 27 months.

(i) *Restriction on amount of optioned stock.* (1) Under section 423(b)(8), an employee stock purchase plan must, by its terms, provide that no employee may be permitted to purchase stock under all the employee stock purchase plans of his employer corporation and its related corporations at a rate which exceeds $25,000 in fair market value of such stock (determined at the time the option is granted) for each calendar year in which any such option granted to such individual is outstanding at any time. In applying the limitation of section 423(b)(8)—

(i) The right to purchase stock under an option is deemed to accrue when the option (or any portion thereof) first becomes exercisable during the calendar year;

(ii) The right to purchase stock under an option accrues at the rate provided in the option, but in no case may such rate exceed $25,000 of fair market value of such stock (determined at the time such option is granted) for any one calendar year; and

(iii) A right to purchase stock which has accrued under one option granted pursuant to the plan may not be carried over to any other option.

If an option is granted under an employee stock purchase plan which satisfies the requirement of section 423(b)(8), but such option gives the optionee the right to buy stock in excess of the maximum rate allowable under such section and this paragraph, no portion of such option will be treated as having been granted under an employee stock purchase plan. Furthermore, if the option was granted to an employee entitled to the grant of an option under the terms of the plan or offering, and such employee is not granted an option under such offering which qualifies as an option granted under an employee stock purchase plan, such offering will not meet the requirements of section 423(b)(4). Accordingly, none of the options granted under such offering will be eligible for the special tax treatment of section 421.

(2) The limitation of section 423(b)(8) and this paragraph applies only to options granted under employee stock purchase plans and does not limit the amount of stock which an employee may purchase under qualified stock options (as defined in section 422(b)), restricted stock options (as defined in section 424(b)), or any other stock options (except those to which section 423 applies). Stock purchased under options to which section 423 does not apply will not limit the amount which an employee may purchase under an employee stock purchase plan, except for purposes of the 5-percent stock ownership provision of section 423(b)(3).

(3) Under the limitation of section 423(b)(8), an individual may purchase up to $25,000 of stock (based on the fair market value of such stock at the time the option was granted) in each calendar year during which an option granted to such individual under an employee stock purchase plan is outstanding. Alternatively, an individual may purchase more than $25,000 of stock (based on the fair market value of such stock at the time the option was granted) in a calendar year, so long as the total amount of stock which he purchases does not exceed $25,000 in fair market value of such stock (determined at the time the option was granted) for each calendar year in which the option was outstanding. If in any calendar year the individual holds two or more outstanding options granted under employee stock purchase plans of his employer corporation, or a related corporation of such corporation, his purchases of stock attributable to such year under all such options must not exceed $25,000 in fair market value of such stock (determined at the time such options were granted). Under an employee stock purchase plan, an individual may not purchase stock in anticipation that the option will be outstanding for some future year. Thus, the individual may purchase only the amount of stock which does not exceed the limitation of section 423(b)(8) for the year of the purchase and for preceding years during which the option was outstanding. Thus, the amount of stock which may be purchased under an option depends on the number of years in which the option is actually outstanding. The amount of stock which may be purchased under an employee stock purchase plan may not be increased by reason of the failure to grant an option in an earlier year under such plan, or by reason of the failure to exercise an earlier option. For example, if an option is granted to an individual and expires without having been exercised at all, the failure to exercise the option does not increase the amount of stock which such individual may be permitted to purchase under an option granted in a year following the year of such expiration. If an option granted under an employee stock purchase plan is outstanding in more than one calendar year, stock purchased pursuant to the exercise of such an option will be applied first, to the extent allowable under section 423(b)(8) and this paragraph, against the $25,000 limitation for the earliest year in which such option was outstanding, then, against the $25,000 limitation for each succeeding year, in order. For example, if an individual purchases $60,000 in fair market value of stock (determined at the time

the option was granted) by the exercise of an option granted under an employee stock purchase plan of his employer corporation, and if such option was outstanding in 3 calendar years, then $25,000 in fair market value of such stock (determined at the time the option was granted) will be attributed to the first calendar year in which such option was outstanding, another $25,000 in fair market value of such stock will be attributed to the second calendar year in which such option was outstanding, and the remaining $10,000 in fair market value of such stock will be attributed to the last calendar year in which such option was outstanding. Thus, the individual may receive a right under another option granted under such employee stock purchase plan (or under an employee stock purchase plan of a parent or subsidiary corporation of his employer corporation) entitling him to purchase another $15,000 in fair market value of such stock (determined as of the date such option is granted) for such last calendar year.

(4) The application of section 423(b)(8) and this paragraph may be illustrated by the following examples:

*Example (1).* Assume that P Corporation maintains an employee stock purchase plan and that E is employed by P. On June 1, 1964, P grants E an option under the plan to purchase a total of 750 shares of P stock at $85 per share. On such date, the fair market value of P stock is $100 per share. The option provides that it cannot be exercised after May 31, 1966. Under section 423(b)(8), the option must not permit E to purchase more than 250 shares of P stock during the calendar year 1964, since 250 shares are equal to $25,000 in fair market value of P stock determined at the time of grant. During the calendar year 1965, E may purchase under such option an amount of P stock equal to the difference between $50,000 in fair market value of P stock (determined at the time the option was granted) and the fair market value of P stock (determined at the time of grant of the option) purchased during 1964. During the calendar year 1966, E may purchase an amount of P stock equal to the difference between $75,000 in fair market value of such stock (determined at the time of grant of the option) and the total amount of the fair market value of such stock (determined at the time of grant of the option) purchased under such option during the calendar years 1964 and 1965. E may purchase $25,000 of stock for the year 1964 and $25,000 of stock for the year 1966, although the option was outstanding for only a part of each of such years. However, E may not be granted another option under an employee stock purchase plan of P or a related corporation to purchase stock of any of such corporations during the calendar years 1964, 1965, and 1966, so long as the option granted June 1, 1964, is outstanding. If this option permitted E to purchase only $15,000 of P's stock for each year it is outstanding, then E could be granted another option by P, or by a related corporation, in 1964, permitting him to purchase an additional $10,000 of stock for each year it is outstanding.

*Example (2).* Assume the same facts as in example (1), and assume further that the option granted to E in 1964 is terminated in 1965 without any part of such option having been exercised, and that subsequent to such termination and during 1965, E is granted another option under P's employee stock purchase plan. Under such option, E may be permitted to purchase $25,000 of stock for 1965. On the other hand, if, in 1966, E exercised the option granted to him in 1964 and purchased 600 shares of P stock, 500 shares, the maximum amount of stock which could have been purchased in 1965 under the option, is treated as having been purchased for the years 1964 and 1965. Thus, only 100 shares of the stock are treated as having been purchased for 1966, and E may be permitted under the new option to purchase for 1966 stock having a fair market value of $15,000 at the time the new option is granted.

(j) *Restriction on transferability.* An employee stock purchase plan must, by its terms, provide that options granted under such plan are not transferable by the optionee otherwise than by will or the laws of descent and distribution, and must be exercisable, during his lifetime, only by him. For general rules relating to the restriction on transferability required by section 423(b)(9), see paragraph (b)(2) of § 1.421-7. For a limited exception to the requirement of section 423(b)(9), see section 425(h)(3).

(k) *Special rule where option price is between 85 percent and 100 percent of value of stock.* (1)(i) If all the conditions necessary for the application of section 421(a) exist, section 423(c) provides additional rules which are applicable in cases where, at the time the option is granted, the option price per share is less than 100 percent (but not less than 85 percent) of the fair market value of such share. In such case, upon the disposition of such share by the individual after the expiration of the 2-year and the 6-month holding periods, or upon his death while owning such share (whether occurring before or after the expiration of such periods), there shall be included in the individual's gross income as compensation (and not as gain upon the sale or exchange of a capital asset) the lesser of—

(*a*) The amount, if any, by which the price paid under the option was exceeded by the fair market value of the share at the time the option was granted, or

(*b*) The amount, if any, by which the price paid under the option was exceeded by the fair market value of the share at the time of such disposition or death.

For purposes of applying the rules of section 423(c) and this paragraph, if the option price is not fixed or determinable at the time the option is granted, the option price will be computed as if the option had been exercised at such time. The amount of compensation resulting from the application of section 423(c) and this paragraph shall be included in the individual's gross income for the taxable year in which the disposition occurs, or for the taxable year closing with his death, whichever event results in the application of section 423(c).

(ii) The application of the special rules provided in section 423(c) shall not affect the rules provided in section 421(a) with respect to the individual exercising the option, the employer corporation, or its parent or subsidiary corporation. Thus, notwithstanding the inclusion of an amount as compensation in the gross income of an individual, as provided in section 423(c), no income results to the individual at the time the stock is transferred to him, and no deduction under section 162 is allowable at any time to the employer corporation or its parent or subsidiary with respect to such amount.

(iii) If, during his lifetime, the individual exercises an option granted under an employee stock purchase plan, but such individual dies before the stock is transferred to him pursuant to his exercise of the option, the transfer of such stock to the individual's executor, administrator, heir, or legatee is deemed, for the purpose of sections 421 and 423, to be a transfer of the stock to the individual exercising the option and a further transfer by reason of death from such individual to his executor, administrator, heir, or legatee.

(2) If the special rules provided in section 423(c) are applicable to the disposition of a share of stock by an individual, the basis of such share in the individual's hands at the time of such disposition, determined under section 1011, shall be increased by an amount equal to the amount includible as compensation in his gross income under section 423(c). However, the basis of a share of stock acquired after the death of an employee by the exercise of an option granted to such employee under an employee stock purchase plan shall be determined in accordance with the rules of section 421(c) and paragraph (c) of § 1.421-8. If the special rules provided in section 423(c) are applicable to a share of stock upon the death of an individual, the basis of such share in the hands of the estate or the person receiving the stock by bequest or inheritance shall be determined under section 1014, and shall not be increased by reason of the inclusion upon the decedent's death of any amount in his gross income under section 423(c). See example (9) of this paragraph with respect to the determination of basis of the share in the hands of a surviving joint owner.

(3) The application of this paragraph may be illustrated by the following examples:

*Example (1).* On June 1, 1964, the X Corporation grants to E, an employee, an option under X's employee stock purchase plan to purchase a share of X Corporation's stock for $85. The fair market value of the X Corporation stock on such date is $100 per share. On June 1, 1965, E exercises the option and on that date the X Corporation transfers the share of stock to E. On January 1, 1967, E sells the share for $150, its fair market value on that date. E makes his income tax return on the basis of the calendar year. The income tax consequences to E and X Corporations are as follows: (i) compensation in the amount of $15 is includible in E's gross income for 1967, the year of the disposition of the share. The $15 represents the difference between the option price ($85) and the fair market value of the share on the date the option was granted ($100), since such value is less than the fair market value of the share on the date of disposition ($150). For the purpose of computing E's gain or loss on the sale of the share, E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100. Since the share was sold for $150, E realizes a gain of $50, which is treated as long-term capital gain; (ii) the X Corporation is entitled to no deduction under section 162 at any time with respect to the share transferred to E.

*Example (2).* Assume the same facts as in example (1), except assume that E sells the share of X Corporation stock on January 1, 1968, for $75, its fair market value on that date. Since $75 is less than the option price ($85), no amount in respect of the sale is includible as compensation in E's gross income for 1968. E's basis for determining gain or loss on the sale is $85. Since E sold the share for $75, E realized a loss of $10 on the sale, which loss is treated as a long-term capital loss.

*Example (3).* Assume the same facts as in example (1), except assume that the option provides that the option price shall be 90 percent of the fair market value of the stock on the day the option is exercised. On June 1, 1965, when the option is exercised, the fair market value of the stock is $120 per share so that E pays $108 for the share of the stock at the time the option was $10 is includible in E's gross income for 1967, the year of the disposition of the share. This is determined in the following manner: The excess of the fair market value of the stock at the time of the disposition ($150) over the price paid for the share ($108) is $42; and the excess of the fair market value of the stock at the time the option was granted ($100) over the option price, computed as if the option had been exercised at such time ($90), is $10. Accordingly, $10, the lesser, is includible in gross income. In this situation, E's cost basis of $108 is increased by $10, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $118. Since the share was sold for $150, E realizes a gain of $32, which is treated as long-term capital gain.

*Example (4).* Assume the same facts as in example (1), except assume that instead of selling the share on January 1, 1967, E makes a gift of the share on that day. In such case, $15 is includible as compensation in E's gross income for 1967. E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100, which becomes the donee's basis, as of the time of the gift, for determining gain or loss.

*Example (5).* Assume the same facts as in example (2) except assume that instead of selling the share on January 1, 1968, E makes a gift of the share on that date. Since the fair market value of the share on that day ($75) is less than the option price ($85), no amount in respect of the disposition by way of gift is includible as compensation in E's gross income for 1968. E's basis for the share is $85, which becomes the donee's basis, as of the time of the gift, for the purpose of determining gain. The donee's basis for the purpose of determining loss, determined under section 1015(a), is $75 (fair market value of the share at the date of gift).

*Example (6).* Assume the same facts as in example (1), except assume that after acquiring the share of stock on June 1, 1965, E dies on August 1, 1966, at which time the share has a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death, such $15 being the difference between the option price ($85) and the fair market value of the share when the option was granted ($100), since such value is less than the fair market value at date of death ($150). The basis of the share in the hands of E's estate is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

*Example (7).* Assume the same facts as in example (6), except assume that E dies on August 1, 1965, at which time the share has a fair market value of $150. Although E's death occurred within six months after the transfer of the share to him, the income tax consequences are the same as in example (6).

*Example (8).* Assume the same facts as in example (1), except assume that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and that E and his wife sold the share on June 15, 1965, for $150, its fair market value on that date. Compensation in the amount of $15 is includible in E's gross income for 1966, the year of the disposition of the share. The basis of the share in the hands of E and his wife for the purpose of determining gain or loss on the sale is $100, that is, the cost of $85 increased by the amount of $15 includible as compensation in E's gross income. The gain of $50 on the sale is treated as long-term capital gain, and is divided equally between E and his wife.

*Example (9).* Assume the same facts as in example (1), except assume that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and that E predeceased his wife on August 1, 1966, at which time the share had a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death. See example (6). The basis of the share in the hands of E's wife as survivor is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

*Example (10).* Assume the same facts as in example (9), except assume that E's wife predeceased him on July 1, 1966. Section 423(c) does not apply in respect of her death. Upon the subsequent death of E on August 1, 1966, the income tax consequences in respect of E's taxable year closing with the date of his death, and in respect of the basis of the share in the hands of his estate, are the same as in example (6). If E had sold the share on July 15, 1966 (after the death of his wife), for $150, its fair market value at that time, the income tax consequences would be the same as in example (1).

### § 1.424 Statutory provisions; restricted stock options.

Sec. 424. *Restricted stock options*—(a) *In general.* Section 421(a) shall apply with respect to the transfer of a share of stock to an individual pursuant to his exercise after 1949 of a restricted stock option, if—

(1) No disposition of such share is made by him within 2 years from the date of the granting of the option nor within 6 months after the transfer of such share to him, and

(2) At the time he exercises such option—

(A) He is an employee of either the corporation granting such option, a parent or subsidiary corporation of such corporation, or a corporation or a parent or subsidiary corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies, or

(B) He ceased to be an employee of such corporations within the 3-month period preceding the time of exercise.

(b) *Restricted stock option.* For purposes of this part, the term "restricted stock option" means an option granted after February 26, 1945, and before January 1, 1964 (or, if it meets the requirements of subsection (c)(3), an option granted after December 31, 1963), to an individual, for any reason connected with his employment by a corporation, if granted by the employer corporation or its parent or subsidiary corporation, to purchase stock of any of such corporations, but only if—

(1) At the time such option is granted—

(A) The option price is at least 85 percent of the fair market value at such time of the stock subject to the option, or

(B) In the case of a variable price option, the option price (computed as if the option had been exercised when granted), is at least 85 percent of the fair market value of the stock at the time such option is granted;

(2) Such option by its terms is not transferable by such individual otherwise than by will or the laws of descent and distribution, and is exercisable, during his lifetime, only by him;

(3) Such individual, at the time the option is granted, does not own stock possessing more than 10 percent of the total combined voting power of all classes of stock of the employer corporation or of its parent or subsidiary corporation. This paragraph shall not apply if at the time such option is granted the option price is at least 110 percent of the fair market value of the stock subject to the option, and such option either by its terms is not exercisable after the expiration of 5 years from the date such option is granted or is exercised within one year after August 16, 1954. For purposes of this paragraph, the provisions of section 425(d) shall apply in determining the stock ownership of an individual; and

(4) Such option by its terms is not exercisable after the expiration of 10 years from the date such option is granted, if such option has been granted on or after June 22, 1954.

(c) *Special rules*—(1) *Options under which option price is between 85 percent and 95 percent of value of stock.* If no disposition of a share of stock acquired by an individual on his exercise after 1949 of a restricted stock option is made by him within 2 years from the date of the granting of the option nor within 6 months after the transfer of such share to him, but, at the time the restricted stock option was granted, the option price (computed under subsection (b)(1)) was less than 95 percent of the fair market value at such time of such share, then, in the event of any disposition of such share by him, or in the event of his death (whenever occurring) while owning such share, there shall be included as compensation (and not as gain upon the sale or exchange of a capital asset) in his gross income, for the taxable year in which falls the date of such disposition or for the taxable year closing with his death, whichever applies—

(A) In the case of a share of stock acquired under an option qualifying under subsection (b)(1)(A), an amount equal to the amount (if any) by which the option price is exceeded by the lesser of—

(i) The fair market value of the share at the time of such disposition or death, or

(ii) The fair market value of the share at the time the option was granted; or

(B) In the case of stock acquired under an option qualifying under subsection (b)(1)(B), an amount equal to the lesser of—

(i) The excess of the fair market value of the share at the time of such disposition or death over the price paid under the option, or

(ii) The excess of the fair market value of the share at the time the option was granted over the option price (computed as if the option had been exercised at such time).

In the case of a disposition of such share by the individual, the basis of the share in his hands at the time of such disposition shall be increased by an amount equal to the amount so includible in his gross income.

(2) *Variable price option.* For purposes of subsection (b)(1), the term "variable price option" means an option under which the purchase price of the stock is fixed or determinable under a formula in which the only variable is the fair market value of the stock at any time during a period of 6 months which includes the time the option is exercised; except that in the case of options granted after September 30, 1958, such term does not include any such option in which such formula provides for determining such price by reference to the fair market value of the stock at any time before the option is exercised if such value may be greater than the average fair market value of the

stock during the calendar month in which the option is exercised.

(3) *Certain options granted after December 31, 1963.* For purposes of subsection (b), an option granted after December 31, 1963, meets the requirements of this paragraph if granted pursuant to—

(A) A binding written contract entered into before January 1, 1964, or

(B) A written plan adopted and approved before January 1, 1964, which (as of January 1, 1964, and as of the date of the granting of the option)—

(i) Met the requirements of paragraphs (4) and (5) of section 423(b), or

(ii) Was being administered in a way which did not discriminate in favor of officers, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees.

[Sec. 424 as added by sec. 221(a), Rev. Act 1964 (78 Stat. 63)]

**§ 1.424–1 Applicability of section 421 (a).**

(a) *In general.* (1) Subject to the provisions of section 424(c), the special rules of income tax treatment provided in section 421(a) apply with respect to the transfer of a share of stock to an individual pursuant to his exercise after 1949 of a restricted stock option provided that—

(i) The individual makes no disposition of such share within 2 years from the date of the granting of the option, nor within 6 months after the transfer of such share to him; and

(ii) At the time he exercised such option—

(*a*) The individual is an employee of either the corporation granting the option, a related corporation of such corporation, or a corporation or a related corporation of such corporation issuing or assuming a stock option in a transaction to which section 425(a) applies, or

(*b*) The individual ceased to be an employee of such corporations within the 3-month period preceding the time of such exercise.

(2) For general rules relating to the employment relationship, see paragraph (h) of § 1.421–7. For rules relating to the employment relationship when there has been a transaction described in section 425(a) (relating to corporate reorganizations, liquidations, etc.) see § 1.425–1. For rules relating to the effect of a disqualifying disposition, see section 421(b) and paragraph (b) of § 1.421–8. For definition of the term "disposition", see section 425(c) and paragraph (c) of § 1.425–1.

(b) *Examples.* The application of this section may be illustrated by the following examples:

*Example (1).* On June 1, 1958, X Corporation grants a restricted stock option to A, an employee of X Corporation, to purchase a share of X stock. A continues to be employed by X Corporation until February 1, 1964, when X sells the plant where A is employed to M Corporation, an unrelated corporation. On such date, A becomes employed by M. A continues to be employed by M Corporation until June 1, 1964, when A exercises his option on X Corporation. Section 421 is not applicable to this exercise, because on June 1, 1964, A was not employed by the corporation which granted the option or by a related corporation of such corporation, nor was he employed by any of such corporations within three months before June 1, 1964.

*Example (2).* Assume the facts to be the same as in example (1), except that when A was employed by M Corporation, the option to purchase X stock was terminated, and was replaced by an option to buy M stock in such circumstances that M Corporation is treated as a corporation issuing an option under section 425(a). If A exercises the option to purchase the share of M stock on June 1, 1964, section 421 is applicable, for A is then employed by a corporation which issued an option under section 425(a).

*Example (3).* Assume that P Corporation owns all of the stock of S Corporation and grants a restricted stock option to E, an employee of S Corporation. If E exercises the option, section 421 is applicable since E is employed by a corporation which is a subsidiary of the corporation which granted the restricted stock option.

**§ 1.424–2 Restricted stock option.**

(a) *Restricted stock option defined.* (1) A "restricted stock option" is an option granted after February 26, 1945, and before January 1, 1964 (or, if it meets the requirements of section 424(c)(3), an option granted after December 31, 1963), to an individual, for any reason connected with his employment by a corporation, if granted by the employer corporation or a related corporation, to purchase stock of any such corporations, but, except in the case of options described in subparagraph (2) of this paragraph, only if—

(i) At the time such option is granted the option price is at least 85 percent of the fair market value at such time of the stock subject to the option;

(ii) Such option by its terms is not transferable by such individual otherwise than by will or by the laws of descent and distribution, and is exercisable, during his lifetime, only by him;

(iii) Such individual, at the time the option is granted, does not own stock possessing more than 10 percent of the total combined voting power of all classes of stock either of the employer corporation or of its parent or subsidiary corporation; and

(iv) In the case of options granted after June 21, 1954, such option by its terms is not exercisable after the expiration of ten years from the date on which such option was granted.

For purposes of applying the rule of subdivision (i) of this subparagraph to a variable price option (as defined by section 424(c)(2) and paragraph (c) of this section) under which the option price is determined by a formula described in paragraph (c) of this section, the option price shall, notwithstanding any provision of the option, be computed as if such option is exercised on the day when it is granted. For example, if on June 15, 1959, an option is granted providing that the option price shall be $10 under the average fair market value of the stock during the month in which the option is exercised or the average fair market value of the stock during the preceding month, whichever is lower, and if on June 15, 1959, the value of the stock subject to the option is $100 a share, to determine if the option meets the requirement of subdivision (i) of this subparagraph, it is necessary to determine the average fair market value of the stock during the months of May and June 1959. If such lower average fair market value is $95 or more, the option meets the requirement of subdivision (i) of this subparagraph.

(2) Regardless of the extent to which the individual to whom the option is granted owns stock of either the employer corporation, or of a related corporation, an option is a restricted stock option if—

(i) Such option is granted after February 26, 1945, to such individual, for any reason connected with his employment by a corporation, if granted by the employer corporation or a related corporation, to purchase stock of any of such corporations;

(ii) At the time such option is granted the option price is at least 110 percent of the fair market value at such time of the stock subject to the option;

(iii) Such option by its terms is not transferable by such individual otherwise than by will or by the laws of descent and distribution, and is exercisable, during his lifetime, only by him; and

(iv) Such option by its terms is not exercisable after the expiration of ten years from the date on which such option was granted.

(3) In determining the amount of stock owned by an individual for the purpose of applying the 10 percent test of section 424(b)(3), the rules of section 425(d) (relating to attribution of stock ownership) shall apply. See § 1.425–1.

(4) For general rules relating to the employment relationship, see paragraph (h) of § 1.421–7. For general rules relating to the restriction on transferability required by section 424(b)(2) and this paragraph, see paragraph (b)(2) of § 1.421–7. For a limited exception to the requirement of section 424(b)(2), see section 425(h)(3).

(b) *Special rule where option price is between 85 percent and 95 percent of value of stock.* (1)(i) If all the conditions necessary for the application of section 421(a) exist, section 424(c)(1) provides additional rules which are applicable in cases where, at the time the restricted stock option is granted, the option price per share is less than 95 percent (but not less than 85 percent) of the fair market value of such share. In such case, upon the disposition of such share by the individual after the expiration of the 2-year and the 6-month holding periods, or upon his death while owning such share (whether occurring before or after the expiration of such periods), there shall be included in the individual's gross income as compensation (and not as gain upon the sale or exchange of a capital asset) an amount determined in the following manner. If, at the time the option was granted, the option price was fixed or determinable, and was at least 85 percent of the fair market value of the stock subject to such option, such amount shall be the amount, if any, by which the option price is exceeded by the lesser of the fair market value of the share at the time the option was granted or the fair market value of the share at the time of such disposition or death. However, in the case of a variable price option (as defined by section 424(c)(2) and paragraph (c) of this section) under which the option price (computed as if the option had been exercised when granted) at the time the option was granted was at least 85 percent of the fair market value of the stock subject to such option, such amount shall be whichever of the following amounts is the lesser:

(*a*) The excess of the fair market value of the share at the time of such disposition or death over the price paid under the option, or

(*b*) The excess of the fair market value of the share at the time the option was granted over the option price, computed as if the option had been exercised at such time.

The amount of such compensation shall be included in the individual's gross income for the taxable year in which the disposition occurs or for the taxable year closing with his death, whichever event results in the application of section 424(c)(1) and this paragraph.

(ii) The application of the special rules provided in section 424(c) shall not affect the rules provided in section 421(a) with respect to the individual exercising his option, the employer corporation, or a related corporation. Thus, notwithstanding the inclusion of an amount as compensation in the gross income of an individual, as provided in section 424(c)(1), no income results to the individual at the time the stock is transferred to him, and no deduction under section 162 is allowable at any time to the employer corporation or a related corporation with respect to such amount.

(iii) If the individual exercises a restricted stock option during his lifetime and dies before the stock is transferred to him pursuant to his exercise of the option, the transfer of such stock to the individual's executor, administrator, heir, or legatee.

(2) If the special rules provided in section 424(c) are applicable to the disposition of a share of stock by an individual, the basis of such share in the individual's hands at the time of such disposition, determined under section 1011, shall be increased by an amount equal to the amount includible as compensation in his gross income under section 424(c)(1). However, in the case of a share of stock acquired by the exercise of a restricted stock option after the death of the employee to whom the option was granted, the basis of such share shall be determined in accordance with the rules of section 421(c) and paragraph (c) of § 1.421–8. If the special rules provided in section 424(c)(1) are applicable to a share of stock upon the death of an individual, the basis of such share in the hands of the estate or the person receiving the stock by bequest or inheritance shall be determined under section 1014, and shall not be increased by reason of the inclusion upon the decedent's death of any amount in his gross income under section 424(c)(1). See example (9) of this paragraph with respect to the determination of basis of the share in the hands of a surviving joint owner.

(3) The application of this paragraph may be illustrated by the following examples:

*Example (1).* On June 1, 1959, the X Corporation grants to E, an employee, a restricted stock option to purchase a share of X Corporation's stock for $85. The fair market value of the X Corporation stock on such date is $100 per share. On June 1, 1965, E exercises the option and on that date the X Corporation transfers the share of stock to E. On January 1, 1967, E sells the share for $150, its fair market value on that date. E makes his income tax return on the basis of the calendar year. The income tax consequences to E and X Corporation are as follows: (i) Compensation in the amount of $15 is includible in E's gross income for 1967, the year of the disposition of the share. The $15 represents the difference between the option price ($85) and the fair market value of the share on the date the option was granted ($100), since such value is less than the fair market value of the share on the date of disposition ($150). For the purpose of computing E's gain or loss on the sale of the share, E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100. Since the share was sold for $150, E realizes a gain of $50, which is treated as long-term capital gain; (ii) the X Corporation is entitled to no deduction under section 162 at any time with respect to the share transferred to E.

*Example (2).* Assume the same facts as in example (1), except assume that E sells the share of X Corporation stock on January 1, 1968, for $75, its fair market value on that date. Since $75 is less than the option price ($85), no amount in respect of the sale is includible as compensation in E's gross income for 1968. E's basis for determining gain or loss on the sale is $85. Since E sold the share for $75, E realized a loss of $10 on the sale, which loss is treated as a long-term capital loss.

*Example (3).* Assume the same facts as in example (1), except assume that the option provides that the option price shall be 90 percent of the fair market value of the stock on the day the option is exercised. On June 1, 1965, when the option is exercised, the fair market value of the stock is $120 per share so that E pays $108 for the share of stock. Compensation in the amount of $10 is includible in E's gross income for 1967, the year of the disposition of the share. This is determined in the following manner. The excess of the fair market value of the stock at the time of the disposition ($150) over the price paid for the share ($108) is $42; and the excess of the fair market value of the stock at the time the option was granted ($100) over the option price, computed as if the option had been exercised at such time ($90), is $10. Accordingly, $10, the lesser, is includible in gross income. In this situation, E's cost basis of $108 is increased by $10, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $118. Since the share was sold for $150, E realizes a gain of $32, which is treated as long-term capital gain.

*Example (4).* Assume the same facts as in example (1), except assume that instead of selling the share on January 1, 1967, E makes a gift of the share on that day. In such case, $15 is includible as compensation in E's gross income for 1967. E's cost basis of $85 is increased by $15, the amount includible in E's gross income as compensation. Thus, E's basis for the share is $100, which becomes the donee's basis, as of the time of the gift, for determining gain or loss.

*Example (5).* Assume the same facts as in example (2) except assume that instead of selling the share on January 1, 1968, E makes a gift of the share on that date. Since the fair market value of the share on that day ($75) is less than the option price ($85), no amount in respect of the disposition by way of gift is includible as compensation in E's gross income for 1968. E's basis for the share is $85, which becomes the donee's basis, as of the time of the gift, for the purpose of determining gain. The donee's basis for the purpose of determining loss, determined under section 1015(a), is $75 (fair market value of the share at the date of gift).

*Example (6).* Assume the same facts as in example (1), except assume that after acquiring the share of stock on June 1, 1965, E dies on August 1, 1966, at which time the share has a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death, such $15 being the difference between the option price ($85) and the fair market value of the share when the option was granted ($100), since such value is less than the fair market value at date of death ($150). The basis of the share in the hands of E's estate is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

*Example (7).* Assume the same facts as in example (6), except assume that E dies on August 1, 1965, at which time the share has a fair market value of $150. Although E's death occurred within six months after the transfer of the share to him, the income tax consequences are the same as in example (6).

*Example (8).* Assume the same facts as in example (1), except assume that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and that E and his wife sold the share on June 15, 1956, for $150, its fair market value on that date. Compensation in the amount of $15 is includible in E's gross income for 1966, the year of the disposition of the share. The basis of the share in the hands of E and his wife for the purpose of determining gain or loss on the sale is $100, that is, the cost of $85 increased by the amount of $15 includible as compensation in E's gross income. The gain of $50 on the sale is treated as long-term capital gain, and is divided equally between E and his wife.

*Example (9).* Assume the same facts as in example (1), except assume that the share of stock was issued in the names of E and his wife jointly with right of survivorship, and that E predeceased his wife on August 1, 1966, at which time the share had a fair market value of $150. Compensation in the amount of $15 is includible in E's gross income for the taxable year closing with his death. See example (6). The basis of the share in the hands of E's wife as survivor is determined under section 1014 without regard to the $15 includible in the decedent's gross income.

*Example (10).* Assume the same facts as in example (9), except assume that E's wife predeceased him on July 1, 1966. Section 423(c) does not apply in respect of her death. Upon the subsequent death of E on August 1, 1966, the income tax consequences in respect of E's taxable year closing with the date of his death, and in respect of the basis of the share in the hands of his estate, are the same as in example (6). If E had sold the share on July 15, 1966 (after the death of his wife), for $150, its fair market value at that time, the income tax consequences would be the same as in example (1).

(c) *Variable price option defined.* (1) For purposes of section 424 and this section, the term "variable price option" means an option under which the option price is determined by a formula in which the only variable is the fair mar-

ket value of the stock at any time during a period of six consecutive months which includes the day on which such option

the fair market value of the stock 30 days before the date on which the option is exercised, but not more than $85, will

of January 1, 1964, and as of the date of the granting of the option)—

(*a*) Met the requirements of section

paragraph, a plan (which is not otherwise discriminatory) will not be considered discriminatory merely because, for example, options are granted only to

to him on his exercise of such option. A similar rule shall be applied in the case of a series of such distributions.

(c) *Disposition*—(1) *In general.* Except

(i) The fair market value of such stock on the date of the original granting of the option,

(ii) The fair market value of such stock on

ket value of the stock at any time during a period of six consecutive months which includes the day on which such option is exercised. Except as provided in subparagraph (2) of this paragraph, such formula may provide for determining such price by reference to such value on any particular day in such 6-month period, or by reference to an average value of the stock over either the whole of such 6-month period or over any shorter period included in such 6-month period. Such 6-month period may begin with, end with, or in any other manner span the day on which such option is exercised. Such formula may also depend upon factors other than such value of the stock, but such other factors must not be variable and must be fixed in the option when granted. For example, such formula may provide that the option price shall be 85 percent of the value of the stock on the day the option is exercised, but such price shall not be less than $85, nor more than $110. Another example of a formula which meets the requirements of this paragraph is a provision that the option price shall be 95 percent of the fair market value of the stock on the day the option is exercised but not more than $95. However, the requirements of this paragraph are not met by a formula which provides that if the profits of the employer for the year do not exceed $100,000, the option price shall be $15 under the fair market value of the stock the option is exercised, but if such profits exceeds $100,000, the option price shall be $20 under such value of the stock. For an example of how to determine whether an option which contains a formula meeting the requirements of this paragraph also meets the requirement that the option price must be at least 85 percent of the fair market value of the stock at the time the option is granted, see paragraph (a)(1) of § 1.424–2.

(2) In the case of an option granted after September 30, 1958, the term "variable price option" does not include any option in which the formula provides for determining the option price by reference to the fair market value of the stock at any time before the option is exercised if such value may be greater than the average fair market value of the stock during the calendar month in which the option is exercised. Whether an option meets the requirement of this paragraph shall be determined solely by reference to the terms of the option, and the circumstances existing at the time the option is granted or exercised are immaterial. Thus, an option, granted after September 30, 1958, and containing a pricing formula which takes into consideration the value of the stock at any time before the option is exercised, is subject to the new limitation and does not meet the requirement of this paragraph, even though the option price is not actually based upon such prior fair market value either at the time the option is exercised or at the time the option price is computed as if it were exercised for the purpose of applying the 85 percent test of section 424(b)(1). For example, a formula which provides that the option price is to be 45 percent of the fair market value of the stock 30 days before the date on which the option is exercised, but not more than $85, will not qualify under this paragraph since under this formula the price may be determinable by reference to a higher prior value. On the other hand, a formula which provides that the option price is to be 90 percent of the average value of the stock during the month the option is exercised or the average value of the stock during the preceding month, whichever is lower, will qualify. In the case of an option granted after September 30, 1958, the only way that a formula which provides for determining the option price by reference to the fair market value of the stock at a time before the option is exercised can come within the requirement of this paragraph is to provide that the option price is to be determined by reference to such fair market value only if such fair market value is not greater than the average fair market value of the stock during the month in which the option is exercised. If under the terms of an option the price is to be determined by reference to the fair market value of the stock at a time before the option is exercised, whether such value is higher or lower than the average fair market value of the stock during the month the option is exercised, such option will not be considered a restricted stock option since the option price may be based upon the prior value of the stock when such value exceeds the average fair market value of the stock during the month the option is exercised. However, if an option provides for determining the option price by reference to a prior fair market value of the stock only when such value is lower than such average value of the stock, such option can qualify as a restricted stock option. The average fair market value of the stock during the month in which the option is exercised means such value during the calendar month the option is exercised and not merely during a 30- or 31-day period including the time the option is exercised. To compute the average fair market value of the stock for the month, it will be necessary to ascertain the fair market value of the stock for each day during the month, including those days which are not business days. In ascertaining the fair market value of the stock for each day, the generally accepted principles for ascertaining such value will be applied.

(d) *Certain options granted after December 31, 1963.* (1) In general, the term "restricted stock option" means only a stock option which is granted after February 26, 1945, and before January 1, 1964, and which meets the requirements of section 424(b) and paragraph (a) of this section. However, section 424(c)(3) provides that if an option is granted after December 31, 1963, and such option meets the requirements of section 424(b) and this section, the option will be treated as a restricted stock option, provided such option is granted pursuant to—

(i) A binding written contract entered into before January 1, 1964, or

(ii) A written plan adopted and approved before January 1, 1964, which (as of January 1, 1964, and as of the date of the granting of the option)—

(*a*) Met the requirements of section 423(b)(4) and (5) and paragraphs (e) and (f) of § 1.423–2 (relating to employees covered by the plan, and equal rights and privileges, respectively), or

(*b*) Was being administered in a way which did not discriminate in favor of officers, persons whose principal duties consist of supervising the work of other employees, or highly compensated employees.

In determining whether an option is granted pursuant to a plan described in subdivision (ii) of this subparagraph, the terms of any written offering that was made on or before January 1, 1964, will be treated as a part of the terms of the plan.

(2) For purposes of section 424(c)(3)(A) and this paragraph, a binding written contract means only a written contract under which the employee has an enforceable right to compel the grant or modification (as defined by section 425(h) and paragraph (e) of § 1.425–1) of a restricted stock option, or to obtain damages upon the breach of such contract. A contract which provides that the individual's right to a restricted stock option is contingent upon the happening of an event (including the passage of time) may satisfy the requirements of section 424(c)(3)(A). However, if the event itself, or the determination of whether the event has occurred, rests with the board of directors or any other individual or group (other than an arbitrator), the contract will not be treated as giving the employee an enforceable right for purposes of section 424(c)(3)(A) or this paragraph.

(3)(i) For purposes of applying section 424(c)(3)(B) with respect to options granted after December 19, 1964, the adoption and approval of a plan required by such section and this paragraph is the same as that required in respect of an employee stock purchase plan under section 423(b)(2) except that the adoption and approval required by section 424(c)(3)(B) and this paragraph need not occur within 12 months of one another. Accordingly, such approval must be expressed in the manner provided by paragraph (c)(1) of § 1.423–2. For purposes of applying section 424(c)(3)(B) with respect to options granted on or before December 19, 1964, the adoption and approval need not meet the requirements of paragraph (c)(1) of § 1.423–2 provided the plant was adopted and approved in the manner required by the applicable law of the state of incorporation. For example, an option granted on or before December 19, 1964, pursuant to a written plan which was not approved by the stockholders of the granting corporation, but which was adopted by an authorized executive committee and approved by the board of directors of the granting corporation before January 1, 1964, may meet the requirements of section 424(c)(3)(B), provided that the granting of options pursuant to such a plan is not contrary to the applicable state law.

(ii) In applying section 424(c)(3)(B)(ii) and subparagraph (1)(ii)(*b*) of this paragraph, a plan (which is not otherwise discriminatory) will not be considered discriminatory merely because, for example, options are granted only to full-time employees (rather than employees working 20 hours per week or more), or because employees with less than 6 months employment per taxable year are omitted (rather than employees whose annual employment is for not more than 5 months per taxable year). However, if a plan, as of January 1, 1964, or as of the date of the grant of the option, excluded any employees (other than employees in favor of whom a plan must not discriminate) from its coverage because their basic or regular salary or wage rate was below a certain specified minimum; because of their coverage under some other stock option plan or plan of deferred compensation of the grantor corporation (or a parent or subsidiary of such corporation); because of the method by which their pay is determined; or because of their membership in any group for purposes of collective bargaining, such plan cannot meet the requirements of section 424(c)(3)(B) and (1)(ii)(*b*) of this paragraph.

(4) An option issued or assumed in a transaction to which section 425(a) applies is treated as a continuation of the option previously held by such individual. Accordingly, if the option previously held by the individual was a restricted stock option (whether or not such restricted stock option was granted before, on, or after December 31, 1963), the option received in the transaction to which section 425(a) applies will be treated as a restricted stock option irrespective of whether such option meets the requirements of section 424(c)(3).

**§ 1.425 Statutory provisions; definitions and special rules.**

Sec. 425. *Definitions and special rules*—(a) *Corporate reorganizations, liquidations, etc.* For purposes of this part, the term "issuing or assuming a stock option in a transaction to which section 425(a) applies" means a substitution of a new option for the old option, or an assumption of the old option, by an employer corporation, or a parent or subsidiary of such corporation, by reason of a corporate merger, consolidation, acquisition of property or stock, separation, reorganization, or liquidation, if—

(1) The excess of the aggregate fair market value of the shares subject to the option immediately after the substitution or assumption over the aggregate option price of such shares is not more than the excess of the aggregate fair market value of all shares subject to the option immediately before such substitution or assumption over the aggregate option price of such shares, and

(2) The new option or the assumption of the old option does not give the employee additional benefits which he did not have under the old option.

For purposes of this subsection, the parent-subsidiary relationship shall be determined at the time of any such transaction under this subsection.

(b) *Acquisition of new stock.* For purposes of this part, if stock is received by an individual in a distribution to which section 305, 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036) applies, and such distribution was made with respect to stock transferred to him upon his exercise of the option, such stock shall be considered as having been transferred to him on his exercise of such option. A similar rule shall be applied in the case of a series of such distributions.

(c) *Disposition*—(1) *In general.* Except as provided in paragraph (2), for purposes of this part, the term "disposition" includes a sale, exchange, gift, or a transfer of legal title, but does not include—

(A) A transfer from a decedent to an estate or a transfer by bequest or inheritance;

(B) An exchange to which section 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036) applies; or

(C) A mere pledge or hypothecation.

(2) *Joint tenancy.* The acquistion of a share of stock in the name of the employee and another jointly with the right of survivorship or a subsequent transfer of a share of stock into such joint ownership shall not be deemed a disposition, but a termination of such joint tenancy (except to the extent such employee acquires ownership of such stock) shall be treated as a disposition by him occurring at the time such joint tenancy is terminated.

(d) *Attribution of stock ownership.* For purposes of this part, in applying the percentage limitations of sections 422(b)(7), 423(b)(3), and 424(b)(3)—

(1) The individual with respect to whom such limitation is being determined shall be considered as owning the stock owned, directly or indirectly, by or for his brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal descendants; and

(2) Stock owned, directly or indirectly, by or for a corporation, partnership, estate, or trust, shall be considered as being owned proportionately by or for its shareholders, partners, or beneficiaries.

(e) *Parent corporation.* For purposes of this part, the term "parent corporation" means any corporation (other than the employer corporation) in an unbroken chain of corporations ending with the employer corporation if, at the time of the granting of the option, each of the corporations other than the employer corporation owns stock possessing 50 percent or more of the total combined voting power of all classes of stock in one of the other corporations in such chain.

(f) *Subsidiary corporation.* For purposes of this part, the term "subsidiary corporation" means any corporation (other than the employer corporation) in an unbroken chain of corporations beginning with the employer corporation if, at the time of the granting of the option, each of the corporations other than the last corporation in the unbroken chain owns stock possessing 50 percent or more of the total combined voting power of all classes of stock in one of the other corporations in such chain.

(g) *Special rule for applying subsections (e) and (f).* In applying subsections (e) and (f) for purposes of section 422(a)(2), 423(a)(2), and 424(a)(2), there shall be substituted for the term "employer corporation" wherever it appears in subsections (e) and (f) the term "grantor corporation", or the term "corporation issuing or assuming a stock option in a transaction to which section 425(a) applies", as the case may be.

(h) *Modification, extension, or renewal of option*—(1) *In general.* For purposes of this part, if the terms of any option to purchase stock are modified, extended, or renewed, such modification, extension, or renewal shall be considered as the granting of a new option.

(2) *Special rules for sections 423 and 424 options.* (A) In the case of the transfer of stock pursuant to the exercise of an option to which section 423 or 424 applies and which has been so modified, extended, or renewed, then, except as provided in subparagraph (B), the fair market value of such stock at the time of the granting of such option shall be considered as whichever of the following is the highest:

(i) The fair market value of such stock on the date of the original granting of the option,

(ii) The fair market value of such stock on the date of the making of such modification, extension, or renewal, or

(iii) The fair market value of such stock at the time of the making of any intervening modification, extension, or renewal.

(B) Subparagraph (A) shall not apply with respect to a modification, extension, or renewal of a restricted stock option before January 1, 1964 (or after December 31, 1963, if made pursuant to a binding written contract entered into before January 1, 1964), if the aggregate of the monthly average fair market values of the stock subject to the option for the 12 consecutive calendar months before the date of the modification, extension, or renewal, divided by 12, is an amount less than 80 percent of the fair market value of such stock on the date of the original granting of the option or the date of the making of any intervening modification, extension, or renewal, whichever is the highest.

(3) *Definition of modification.* The term "modification" means any change in the terms of the option which gives the employee additional benefits under the option, but such term shall not include a change in the terms of the option—

(A) Attributable to the issuance or assumption of an option under subsection (a);

(B) To permit the option to qualify under sections 422(b)(6), 423(b)(9), and 424(b)(2); or

(C) In the case of an option not immediately exercisable in full, to accelerate the time at which the option may be exercised.

If a restricted stock option is exercisable after the expiration of 10 years from the date such option is granted, subparagraph (B) shall not apply unless the terms of the option are also changed to make it not exercisable after the expiration of such period.

(i) *Stockholder approval.* For purposes of this part, if the grant of an option is subject to approval by stockholders, the date of grant of the option shall be determined as if the option had not been subject to such approval.

(j) *Cross references.* For provisions requiring the reporting of certain acts with respect to a qualified stock option, options granted under employer stock purchase plans, or a restricted stock option, see section 6039.

[Sec. 425 as added by sec. 221(a), Rev. Act 1964 (78 Stat. 63)]

**§ 1.425–1 Definitions and special rules applicable to statutory options.**

(a) *Corporate reorganizations, liquidations, etc.* (1)(i) The term "issuing or assuming a stock option in a transaction to which section 425(a) applies" means, for purposes of sections 421 through 425, a substitution of a new option for an old option, or an assumption of such old option, by an employer corporation, or a related corporation of such corporation, by reason of a corporate transaction (as defined by subdivision (ii) of this subparagraph), if—

(*a*) The excess of the aggregate fair market value of the shares subject to the option immediately after the substitution or assumption over the aggregate option price of such shares is not more than the excess of the aggregate fair market value of all shares subject to the option immediately before such substitution or assumption over the aggregate option price of such shares, and

(*b*) The new option or the assumption of the old option does not give the employee additional benefits which he did

(iii) Section 425(a) applies only when the assumption or substitution occurs by reason of a corporate transaction as de-

by E, an employee of S. Assume that E's S option had 8 years to run on the date of the substitution. If the P option granted to E in substitution for his S option runs for more

been granted the option which the employer corporation, or parent or subsidiary thereof, is issuing or assuming. An

methods described in § 20.2031–2 of this chapter (the Estate Tax Regulations). In the case of stock listed on a stock ex-

expiration of the holding period required with respect to the original stock acquired pursuant to the exercise of the option, the special tax treatment provided by section

(b) The new option or the assumption of the old option does not give the employee additional benefits which he did not have under the old option.

(ii) For purposes of this section, the term "corporate transaction" means any merger of a corporation into another corporation, any consolidation of two or more corporations into another corporation, any purchase or acquisition of property or stock by any corporation, any separation of a corporation (including a spin-off or other distribution of stock or property by a corporation), any reorganization of a corporation (whether or not such reorganization comes within the definition of such term in section 368), or any partial or complete liquidation by a corporation, if such action by such corporation results in a significant number of employees being transferred to a new employer or discharged, or in the creation or severance of a parent-subsidiary relationship.

(2) (i) A change in the terms of an option attributable to the issuance or assumption of an option by reason of a corporate transaction (as defined under section 425 (a) and subparagraph (1) (ii) of this paragraph) is not a modification of such option. See section 425(h)(3) and paragraph (e) of this section. Thus, section 425(a), in effect, provides rules under which a new employer, or a parent or subsidiary of a new employer, may by reason of a corporate transaction assume a statutory option granted by the former employer or parent or subsidiary thereof, or issue a new statutory option in place of the option granted by the former employer or parent or subsidiary thereof, without having such assumption or substitution being considered as a modification of the option. For example, section 425(a) may apply where there is a merger of X Corporation into Y Corporation and Y Corporation wishes to employ the employees of X Corporation and to assume statutory options which had been granted to them by their former employer, X Corporation. Another example is where X Corporation forms a new subsidiary, Y Corporation, and transfers to it certain assets and employees, and where Y Corporation wishes to grant to such employees a statutory option to purchase its stock in place of the statutory option which they had to purchase stock of X Corporation.

(ii) Section 425(a) also provides rules under which a new parent or subsidiary corporation of the employer corporation may by reason of a corporate transaction assume a statutory option granted by the employer or parent or subsidiary thereof, or issue a new statutory option in place of the option granted by the employer or parent or subsidiary thereof, without having such assumption or substitution considered a modification of the option. Section 425(a) may apply, for example, where X Corporation acquires a new subsidiary, Y Corporation, by purchase of stock and desires to grant to the employees of Y Corporation a statutory option to buy stock of X Corporation in place of a statutory option which they have to purchase the stock of Y Corporation.

(iii) Section 425(a) applies only when the assumption or substitution occurs by reason of a corporate transaction as defined in this paragraph. Thus, section 425(a) may apply where as a result of a corporate transaction a statutory option can no longer be exercised, or if exercised, section 421 would not apply (see the first example in subdivision (i) of this subparagraph). Moreover, section 425(a) may apply in any case where the reason for the assumption or substitution grows out of a corporate transaction even though there could have been a valid exercise under section 421 of the original option (see the second example in subdivision (i) of this subparagraph and the example in subdivision (ii) of this subparagraph). However, a corporation which has issued an option may not substitute a new option for such option under section 425(a). See, however, paragraph (e) of this section.

(3) For section 425(a) to apply, it is not necessary to show that the corporation assuming or substituting the option is under any obligation to do so. In fact, section 425(a) may apply where the option which is being assumed or replaced expressly provides that it will terminate upon the occurrence of certain corporate transactions. However, section 425(a) cannot be applied to revive a statutory option which, for reasons not related to the corporate transaction, expires before it can properly be assumed or replaced under section 425(a). For section 425 (a) to apply, the assumed or substituted option must qualify as a statutory option.

(4) (i) Section 425(a) does not apply if the terms of the assumed or substituted option confer on the employee more favorable benefits than he had under the old option. Section 425(a) can apply to a corporate transaction only if, on a share by share comparison, the ratio of the option price to the fair market value of the stock subject to the option immediately after the substitution or assumption is no more favorable to the optionee than the ratio of the option price to the fair market value of the stock subject to the old option immediately before such substitution or assumption. The number of shares subject to an option issued or assumed may be adjusted to compensate for any change in the aggregate spread between the aggregate option price and the aggregate fair market value of the stock subject to the option immediately after the substitution or assumption as compared to the aggregate spread between the option price and the aggregate fair market value of the stock subject to the option immediately before such substitution or assumption. Such an adjustment will not prevent section 425(a) from applying to such substitution or assumption.

(ii) The application of this subparagraph may be illustrated by the following examples:

*Example (1).* On June 1, 1965, P Corporation acquires 100 percent of the stock of S Corporation and on such date S becomes a subsidiary of P Corporation. Also on such date, P Corporation substitutes a qualified stock option to purchase P stock for a qualified stock option to purchase S stock held by E, an employee of S. Assume that E's S option had 3 years to run on the date of the substitution. If the P option granted to E in substitution for his S option runs for more than 3 years from the date of the substitution, section 425(a) cannot apply, since the effect of such an option would be to give E an additional benefit which he did not enjoy under his S option.

*Example (2).* E is an employee of S Corporation. E holds a qualified stock option which was granted to him by S to purchase 60 shares of S stock at $12 per share. On June 1, 1967, S Corporation is merged into P Corporation, and on such date P substitutes a qualified stock option to purchase P stock for E's qualified stock option to purchase S stock. Immediately before the substitution, the fair market value of S stock was $32 per share; immediately after the substitution, the fair market value of P stock is $24 per share. The new option entitles E to buy P stock at $9 per share. Since on a share by share comparison the ratio of the new option price ($9 per share) to the fair market value of P stock immediately after the substitution ($24 per share) is not more favorable to E than the ratio of the old option price ($12 per share) to the fair market value of S stock immediately before the substitution ($32 per share) (9/24=12/32) the requirement of subparagraph (4)(i) of this paragraph is met. The number of shares subject to E's option to purchase P stock is set at 80. Since the excess of the aggregate fair market value over the aggregate option price of the stock subject to E's new option to purchase P stock, $1,200 (80 x $24 minus 80 x $9), is not greater than the excess of the aggregate fair market value over the aggregate option price of the stock subject to E's old option to purchase S stock, $1,200 (60×$32 minus 60×$12), the requirement of subparagraph (1)(i)(a) of this paragraph is met. Thus, section 425(a) may apply to the substitution.

*Example (3).* Assume the same facts as in example (2), except assume that the fair market value of S stock immediately before the substitution was $8 per share and that the option price was $10 per share, and that the fair market value of P stock immediately after the substitution is $12 per share. P sets the new option price at $15 per share. Since on a share by share comparison the ratio of the new option price ($15 per share) to the fair market value of P stock immediately after the substitution ($12 per share) is not more favorable to E than the ratio of the old option price ($10 per share) to the fair market value of S stock immediately before the substitution ($8 per share) ($15/12=10/8$), the requirement of subparagraph (4)(i) of this paragraph is met. Assume further that the number of shares subject to E's P option is set at 20 as compared to 60 shares under E's old option to buy S stock. Immediately after the substitution, 2 shares of P stock are worth $24, which is what 3 shares of S stock were worth immediately before the substitution ($2\times\$12=3\times\$8$). Thus, to completely replace E's S option, E should have received an option to purchase 40 shares of P stock, i.e., 2 shares of P for each 3 shares of S which E could have purchased under his old option ($\frac{2}{3}=\frac{40}{60}$). Since E's new option covers 20 shares of P stock, it is clear that P has replaced only ½ of E's stock option. The portion of E's stock option which was not replaced by P is an outstanding stock option to purchase stock of a predecessor corporation of P Corporation for purposes of section 422(b)(5) and (c)(2).

(5) For the purpose of applying section 425(a), the assumption or substitution shall be considered to occur at the time that the optionee would, except for section 425(a), be considered to have been granted the option which the employer corporation, or parent or subsidiary thereof, is issuing or assuming. An assumption or substitution which occurs by reason of a corporate transaction may occur before or after the corporate transaction.

(6) In order to have a substitution of an option under section 425(a) the optionee must, in connection with the corporate transaction, lose his rights under the old option. There cannot be a substitution of a new option for an old option within the meaning of section 425 (a) if it is contemplated that the optionee may exercise both the old option and the new option. It is not necessary, however, to have a complete substitution of a new option for the old option. However, if the old option was a qualified or restricted stock option, any portion of such option which is not substituted or assumed in a transaction to which section 425(a) applies will be treated as an outstanding option to purchase stock of a predecessor corporation of the new employer or grantor corporation. See section 422 (b)(5) and (c)(2) and paragraph (f) of § 1.422–2. For example, assume that X Corporation forms a new corporation, Y Corporation, by a transfer of certain assets and distributes the stock of Y Corporation to the shareholders of X Corporation. Assume further that E, an employee of X Corporation, is thereafter an employee of both X Corporation and Y Corporation. Y Corporation wishes to substitute an option to purchase some of its stock for the statutory option which E has, entitling him to purchase 100 shares of the stock of X Corporation. The option to purchase the stock of X Corporation, at $50 a share, was granted when the stock had a fair market value of $50 a share, and the stock was worth $100 a share just before the distribution of the new corporation's stock to the shareholders of X Corporation. The stock of X Corporation and of Y Corporation is worth $50 a share just after such distribution, which also is the time of the substitution. On these facts an option to purchase 200 shares of stock of Y Corporation at $25 a share could be given to the employee in complete substitution for the old option. It would also be permissible to give the employee an option to purchase 100 shares of stock of Y Corporation at $25 a share in substitution for his right to purchase 50 of the shares covered by the old option. However, if the option to purchase X stock was a qualified or restricted stock option, then to the extent the old option is not assumed or a new option issued in substitution therefor in a transaction to which section 425(a) applies, such old option will be treated as an outstanding option under section 422(c)(2) for purposes of section 422(b)(5). See paragraph (f) of § 1.422–2.

(7) Any reasonable methods may be used to determine the fair market value of the stock subject to the option immediately before the assumption or substitution and the fair market value of the stock subject to the option immediately after the assumption or substitution. Such methods include the valuation methods described in § 20.2031–2 of this chapter (the Estate Tax Regulations). In the case of stock listed on a stock exchange, the fair market value may be based on the last sale before and the first sale after the assumption or substitution if such sales clearly reflect the fair market value of the stock, or may be based upon an average selling price during a longer period, such as the day or week before, and the day or week after, the assumption or substitution. If the stocks are not listed, or if they are newly issued, it will be reasonable to base the determination on experience over even longer periods. In the case of a merger, consolidation, or other reorganization which is arrived at by arm's-length negotiations, the fair market value of the stocks subject to the option before and after the assumption or substitution may be based upon the values assigned to the stock for purposes of the reorganization. For example, if in the case of a merger the parties treat each share of the merged company as being equal in value to a share of the surviving company, it will be reasonable to assume that the stocks are of equal value so that the substituted option may permit the employee to purchase at the same price one share of the surviving company for each share he could have purchased of the merged company.

(8) For the purpose of applying section 425(a) and this paragraph, the determination of whether the parent-subsidiary relationship exists shall be based upon circumstances existing immediately after the corporate transaction.

(b) *Acquisition of new stock.* (1) Section 425(b) provides that the rules provided by sections 421 through 425 which are applicable with respect to stock transferred to an individual upon his exercise of an option, shall likewise be applicable with respect to stock acquired by a distribution or an exchange to which section 305, 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036) applies. Stock so acquired shall, for purposes of sections 421 through 425, be considered as having been transferred to the individual upon his exercise of the option. A similar rule shall be applied in the case of a series of such acquisitions. With respect to such acquisitions, section 425(b) does not make inapplicable any of the provisions of section 305, 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036).

(2) The application of this paragraph may be illustrated by the following example:

*Example.* If, with respect to stock transferred pursuant to the timely exercise of a statutory option, there is a distribution of new stock to which section 305(a) is applicable, and if there is a disposition of such new stock before the expiration of the applicable holding period required with respect to the stock originally acquired pursuant to the exercise of such option, such disposition makes section 421 inapplicable to the transfer of the original stock pursuant to the exercise of the option to the extent that the disposition effects a reduction of the individual's total interest in the old and new stock. However, if the new stock, as well as the old stock, is not disposed of before the expiration of the holding period required with respect to the original stock acquired pursuant to the exercise of the option, the special tax treatment provided by section 421 is applicable to both the original shares and the shares acquired by virtue of the distribution to which section 305(a) applies.

(c) *Disposition of stock.* (1) For purposes of sections 421 through 425, the term "disposition" includes a sale, exchange, gift, or any transfer of legal title, but does not include—

(i) A transfer from a decedent to his estate or a transfer by bequest or inheritance; or

(ii) An exchange to which is applicable section 354, 355, 356, or 1036 (or so much of section 1031 as relates to section 1036); or

(iii) A mere pledge or hypothecation. However, a disposition of the stock pursuant to a pledge or hypothecation is a disposition by the individual, even though the making of the pledge or hypothecation is not such a disposition.

(2) If an individual exercises a statutory option, a share of stock acquired pursuant to such exercise is not considered disposed of by the individual if such share is taken in the name of the individual and another person jointly with right of survivorship, or is subsequently transferred into such joint ownership, or is retransferred from such joint ownership to the sole ownership of the individual. However, any termination of such joint ownership is a disposition of such share, except to the extent that the individual reacquires ownership of the share. For example, if such individual and his joint owner transfer such share to another person, the individual has made a disposition of such share. Likewise, if a share of stock held in the joint names of such individual and another person is transferred to the name of such other person, there is a disposition of such share by the individual. If an individual exercises a statutory option and a share of stock is transferred to another or is transferred to such individual in his name as trustee for another, the individual has made a disposition of such share.

(3) The application of this paragraph may be illustrated by the following examples:

*Example (1).* On June 1, 1964, the X Corporation grants to E, an employee, a qualified stock option to purchase 100 shares of X Corporation stock at $100 per share, the fair market value of X Corporation stock on that date. On June 1, 1965, while employed by X Corporation, E exercises the option in full and pays X Corporation $10,000, and on that day X Corporation transfers to E 100 shares of its stock having a fair market value of $12,000. Before June 1, 1968, E makes no disposition of the 100 shares so purchased. E realizes no income on June 1, 1965, with respect to the transfer to him of the 100 shares of X Corporation stock. X Corporation is not entitled to any deduction at any time with respect to its transfer to E of the stock. E's basis for such 100 shares is $10,000.

*Example (2).* Assume the same facts as in example (1), except assume that on August 1, 1968, three years and two months after the transfer of the shares to him, E sells the 100 shares of X Corporation stock for $13,000 which is the fair market value of the stock on that date. For the taxable year

in which the sale occurs, E realizes a gain of $3,000 ($13,000 minus E's basis of $10,000), which is treated as long-term capital gain.

*Example* (3). Assume the same facts as in example (2), except assume that on August 1, 1968, E makes a gift of the 100 shares of Y Corporation stock to his son. Such disposition results in no realization of gain to E either for the taxable year in which the option is exercised or the taxable year in which the gift is made. E's basis of $10,000 becomes the donee's basis for determining gain or loss.

*Example* (4). Assume the same facts as in example (1), except assume that on May 1, 1968, two years and 11 months after the transfer of the shares to him, E sells the 100 shares of X Corporation stock for $13,000. The special rules of section 421(a) are not applicable to the transfer of the stock by X Corporation to E, because disposition of the stock was made by E within three years from the date the shares were transferred to him.

*Example* (5). Assume the same facts as in example (1), except assume that E dies on September 1, 1965, owning the 100 shares of X Corporation stock acquired by him pursuant to his exercise on June 1, 1965, of the qualified stock option. On the date of death, the fair market value of the stock is $12,500. No income is realized by E by reason of the transfer of the 100 shares to his estate. If the stock is valued as of the date of E's death for estate tax purposes, the basis of the 100 shares in the hands of the executor is $12,500.

(d) *Attribution of stock ownership.* Section 425(d) provides that in determining the amount of stock owned by an individual for purposes of applying the percentage limitations of section 422(b)(7), 423(b)(3), and 424(b)(3), stock of the employer corporation or of a related corporation which is owned (directly or indirectly) by or for such individual's brothers and sisters (whether by the whole or half blood), spouse, ancestors, and lineal descendants, shall be considered as owned by such individual. Also, for such purpose, if a domestic or foreign corporation, partnership, estate, or trust owns (directly or indirectly) stock of the employer corporation or of its parent or subsidiary, such stock shall be considered as being owned proportionately by or for the shareholders, partners, or beneficiaries of the corporation, partnership, estate, or trust.

(e) *Modification, extension, or renewal of option.* (1) Section 425(h) provides the rules for determining whether a share of stock transferred to an individual upon his exercise of an option, after the terms thereof have been modified, extended, or renewed, is transferred pursuant to the exercise of a statutory option. Such rules and the rules of this section are applicable to modifications, extensions, or renewals (or to changes which are not treated as modifications) of an option in any taxable year of the optionee which begins after December 31, 1963, except that section 425(h)(1) and this paragraph shall not apply to any change made before January 1, 1965, in the terms of an option granted after December 31, 1963, to permit such option to meet the requirements of section 422(b)(3), (4), or (5), and the regulations thereunder. See paragraphs (d), (e), and (f), of § 1.422–2, relating to period for exercising options, option price, and prior outstanding options, respectively, in the case of qualified stock options.

(2) Any modification, extension, or renewal of the terms of an option to purchase stock shall be considered as the granting of a new option.

(3) Except as otherwise provided in subparagraph (4) of this paragraph, in case of a modification, extension, or renewal of an option, the highest of the following values shall be considered to be the fair market value of the stock at the time of the granting of such option for purposes of applying the rules of sections 423(b)(6), and 424(b)(1)—

(i) The fair market value on the date of the original granting of the option,

(ii) The fair market value on the date of the making of such modification, extension, or renewal, or

(iii) The fair market value at the time of the making of any intervening modification, extension, or renewal.

(4)(i) In the case of a modification, extension, or renewal of a restricted stock option before January 1, 1964 (or after December 31, 1963, if made pursuant to a binding written contract entered into before January 1, 1964), the rules of subparagraph (3) of this paragraph do not apply if the aggregate of the monthly average fair market values of the stock subject to the option for the 12 consecutive calendar months preceding the month in which the modification, extension, or renewal occurs, divided by 12, is an amount less than 80 percent of the fair market value of such stock on the date of the original granting of the option or the date of the making of any intervening modification, extension, or renewal, whichever is the highest. In such case, any modification, extension, or renewal of the option is treated as the granting of a new option but only the fair market value of the stock subject to the option at the time of the modification, extension, or renewal is considered in determining whether the option is a restricted stock option. In the case of stocks listed on a stock exchange, the average fair market value of the stock for any month may be determined by adding the highest and lowest quoted selling prices during such month and dividing the sum by two. The method used for determining the average fair market value of the stock for any month must be used for all twelve months, except where it is shown that such method cannot be used for any month or does not clearly reflect the average fair market value of the stock for any such month.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following example:

*Example.* On June 1, 1962, a restricted stock option was granted to purchase before July 1, 1965, a share of stock for $85. The fair market value of such stock on June 1, 1962, was $100. On June 15, 1963, when the fair market value of the stock is $60, such option is extended so that it is exercisable at any time before July 1, 1966, at $55 a share. The average fair market value of the stock subject to the option for each of the 12 calendar months preceding June 1963, is as follows:

| 1962 | | 1963 | |
|---|---|---|---|
| June | $100 | January | $90 |
| July | 90 | February | 80 |
| August | 80 | March | 70 |
| September | 70 | April | 60 |
| October | 80 | May | 60 |
| November | 80 | | |
| December | 90 | | |

The aggregate of such values is $950. When this sum is divided by 12, the result is $79.17, which is an amount less than 80 percent of the fair market value of the stock ($100) when the option was granted. Accordingly, when the option is extended on June 15, 1963, the option price could have been reduced as low as $51 (85 percent of the fair market value of the stock on such day) without disqualifying the option as a restricted stock option. If the aggregate fair market values of the stock so ascertained had amounted to $960 or more, the rules of subparagraph (3) of this paragraph would have been applicable with the result that any reduction in the option price would have disqualified the option as a restricted stock option.

(5)(i) The time or date when an option is modified, extended, or renewed shall be determined, insofar as applicable, in accordance with the rules governing determination of the time or date of granting an option provided in paragraph (c) of § 1.421–7. For purposes of sections 421 through 425, the term "modification" means any change in the terms of the option which gives the optionee additional benefits under the option. For example, a change in the terms of the option, which shortens the period during which the option is exercisable, is not a modification. However, a change which provides more favorable terms for the payment for the stock purchased under the option, is a modification. Where an option is amended solely to increase the number of shares subject to the option, such increase shall not be considered as a modification of the option, but shall be treated as the grant of a new option for the additional shares.

(ii)(*a*) A change in the number or price of the shares of stock subject to an option merely to reflect a stock dividend, or stock split-up, is not a modification of the option.

(*b*) A change in the number or price of the shares of stock subject to an option to reflect a corporate transaction (as defined by paragraph (a)(1)(ii) of this section) is not a modification of the option provided that the excess of the aggregate fair market value (determined immediately after such corporate transaction) of the shares subject to the option immediately after such change over the aggregate new option price of such shares is not more than the excess of the aggregate fair market value of the shares subject to the option immediately before the transaction over the aggregate former option price of such shares, and provided that the option after such change does not give the employee additional benefits which he did not have before such change. The ratio of the option price immediately after the change to the fair market value of the stock subject to the option immediately after the corporate transaction must not be more favorable to the optionee on a share by share comparison than the ratio of the old option price to the fair market value of the stock subject to the option immediately before such transaction. A reduction in the option price of an option, other than as specifically provided for in this section, is a modification of such option.

(c) The application of (*b*) of this subdivision may be illustrated by the following example:

*Example.* E, an employee of P Corporation, holds a qualified stock option granted to him by P to buy 90 shares of P stock at $36 per share. P Corporation is a party to a corporate transaction (as defined by paragraph (a)(1)(ii) of this section) which results in a decline in the fair market value of P stock. Immediately before such transaction the fair market value of P stock was $64 per share. Immediately after such transaction, the fair market value of P stock is $48 per share. Two weeks after such transaction, P proposes to amend E's option in order to reflect the decline in the fair market value of P stock attributable to the transaction. At such time, the fair market value of P stock is $50 per share. However, since the change was not made at the time of the transaction, the fair market value of P stock at the time of the change is irrelevant for purposes of determining whether the change comes under the rule of (*b*) of this subdivision. P changes the terms of E's option to lower the option price to $27 per share and to increase the number of shares subject to the option to 120. No other terms of the option are changed. The aggregate fair market value (determined immediately after the corporate transaction) of the shares subject to the option immediately after the change is $5,760 ($48 x 120). The aggregate option price of the shares subject to the option immediately after the change is $3,240 ($27 x 120). Thus, the excess of such fair market value over such option price is $2,520 ($5,760−$3,240). The aggregate fair market value of the stock subject to the option immediately before the corporate transaction is $5,760 ($64 x 90). The aggregate option price for the stock subject to the option immediately before the change is $3,240 ($36 x 90). Thus, the excess of such fair market value over such option price is $2,520 ($5,760−$3,240). Accordingly, the excess after the change does not exceed the excess before the corporate transaction. Moreover, the ratio of the option price immediately after the change ($27 per share) to the fair market value of P stock immediately after the transaction ($48 per share) is not more favorable to E on a share by share comparison than the ratio of the old option price ($36 per share) to the fair market value of P stock immediately before the transaction ($64) (27/48=36/64). For purposes of section 425(h), the changes made do not confer additional benefits on E which he did not have before the change. Accordingly, the changes do not constitute a modification of E's option.

(iii) Any change in the terms of an option for the purpose of qualifying the option as a statutory option grants additional benefits and, therefore, is a modification. However, if the terms of an option are changed to provide that the optionee cannot transfer the option except by will or by the laws of descent and distribution in order to meet the requirements of section 422(b)(6), 423(b)(9), or 424(b)(2), such change is not a modification, provided that in any case where the purpose of the change is to meet the requirements of section 424(b)(2) the option is at the same time changed so that it is not exercisable after the expiration of ten years from the date the option was granted. Where an option is not immediately exercisable in full, a change in the terms of such option to accelerate the time at which the option (or any portion thereof) may be exercised is not a modification for purposes of section 425(h) and this section.

(iv) An extension of an option refers to the granting by the corporation to the optionee of an additional period of time within which to exercise the option beyond the time originally prescribed. A renewal of an option is the granting by the corporation of the same rights or privileges contained in the original option on the same terms and conditions. The rules of this paragraph apply as well to successive modifications, extensions, and renewals.

(6) A statutory option may, as a result of a modification, extension, or renewal, thereafter cease to be a statutory option, or any option may, by modification, extension, or renewal, thereafter become a statutory option.

(7) The application of this paragraph may be illustrated by the following examples:

*Example* (1). On June 1, 1964, the X Corporation grants to an employee an option under X's employee stock purchase plan to purchase 100 shares of the stock of X Corporation at $90 per share, such option to be exercised on or before June 1, 1966. At the time the option is granted, the fair market value of the X Corporation stock is $100 per share. On February 1, 1965, before the employee exercises the option, X Corporation modifies the option to provide that the price at which the employee may purchase the stock shall be $80 per share. On February 1, 1965, the fair market value of the X Corporation stock is $90 per share. Under section 425(h), the X Corporation is deemed to have granted an option to the employee on February 1, 1965. Such option shall be treated as an option to purchase at $80 per share 100 shares of stock having a fair market value of $100 per share, that is, the higher of the fair market value of the stock on June 1, 1964, or on February 1, 1965. The exercise of such option by the employee after February 1, 1965, is not the exercise of a statutory option.

*Example* (2). On June 1, 1964, the X Corporation grants to an employee an option under X's employee stock purchase plan to purchase 100 shares of X Corporation stock at $90 per share, exercisable after December 31, 1965, and on or before June 1, 1966. On June 1, 1964, the fair market value of X Corporation's stock is $100 per share. On February 1, 1965, X Corporation modifies the option to provide that the option shall be exercisable on or before September 1, 1966. On February 1, 1965, the fair market value of X Corporation stock is $110 per share. Under section 425(h), X Corporation is deemed to have granted an option to the employee on February 1, 1965, to purchase at $90 per share 100 shares of stock having a fair market value of $110 per share, that is, the higher of the fair market value of the stock on June 1, 1964, or on February 1, 1965. The exercise of such option by the employee is not the exercise of a statutory option.

*Example* (3). The facts are the same as in example (1), except that the employee exercised the option to the extent of 50 shares on January 15, 1965, before the date of the modification of the option. Any exercise of the option after February 1, 1965, the date of the modification, is not the exercise of a statutory option. See example (1) in this subparagraph. The exercise of the option on January 15, 1965, pursuant to which 50 shares were acquired, is the exercise of a statutory option.

*Example* (4). On June 1, 1964, the X Corporation grants to an employee an option to purchase 100 shares of the stock of X Corporation at $80 per share, such option to be exercised on or before June 1, 1966. At the time the option is granted, the fair market value of the X Corporation stock is $100 per share. On February 1, 1965, before the employee exercises the option, the X Corporation modifies the option to provide that the number of shares of stock which the employee may purchase at $80 per share will be 250. On February 1, 1965, the fair market value of X Corporation stock is $80 per share. Under these facts, the X Corporation has granted two options, one option (not a statutory option) with respect to 100 shares having been granted on June 1, 1964, and the other option (a qualified stock option) with respect to the additional 150 shares having been granted on February 1, 1965. In the absence of facts identifying which option is exercised first, the employee will be deemed to have exercised the options in the order in which they were granted.

PAR. 8. Section 1.691(c) is amended by revising section 691(c)(2)(B) and by adding a historical note. These amended and added provisions read as follows:

**§ 1.691(c) Statutory provisions; recipients of income in respect of decedents; deduction for estate tax.**

Sec. 691. *Recipients of income in respect of decedents.* • • •

(c) *Deduction for estate tax.* • • •

(2) *Method of computing deduction.* • • •

(B) The net value for estate tax purposes of all the items described in subsection (a)(1) shall be the excess of the value for estate tax purposes of all the items described in subsection (a)(1) over the deductions from the gross estate in respect of claims which represent the deductions and credit described in subsection (b). Such net value shall be determined with respect to the provisions of section 421(c)(2), relating to the deduction for estate tax with respect to stock options to which part II of subchapter D applies.

• • • • •

[Sec. 691(c) as amended by sec. 221(c)(2), Rev. Act 1964 (78 Stat. 75)]

PAR. 9. Paragraph (c)(1) and example (1) of paragraph (d) of § 1.691(c)–1 are amended to read as follows:

**§ 1.691(c)–1 Deduction for estate tax attributable to income in respect of a decedent.**

• • • • •

(c) *Amounts deemed to be income in respect of a decedent.* • • •

(1) The value for estate tax purposes of stock options in respect of which amounts are includible in gross income under section 421(b), in the case of taxable years ending before January 1, 1964, or under section 422(c)(1), 423(c), or 424(c)(1), whichever is applicable, in the case of taxable years ending after December 31, 1963. See section 421(d)(6), in the case of taxable years ending before January 1, 1964, and section 421(c)(2), in the case of taxable years ending after December 31, 1963.

• • • • •

(d) *Examples.* • • •

*Example (1).* X, an attorney who kept his books by use of the cash receipts and disbursements method, was entitled at the date of his death to a fee for services rendered in a case not completed at the time of his death, which fee was valued in his estate at $1,000, and to accrued bond interest, which was valued in his estate at $500. In all, $1,500 was included in his gross estate in respect of income described in section 691(a)(1). There were deducted as claims against his estate $150 for business expenses for which his estate was liable and $50 for taxes accrued on certain property which he owned. In all, $200 was deducted for claims which represent amounts described in section 691(b) which are allowable as deductions to his estate or to the beneficiaries of his estate. His gross estate was $185,000 and, considering deductions of $15,000 and an exemption of $60,000, his taxable estate amounted to $110,000. The estate tax on this amount is $23,700 from which is subtracted a $75 credit for State death taxes leaving an estate tax liability of $23,625. In the year following the closing of X's estate, the fee in the amount of $1,200 was collected by X's son, who was the sole beneficiary of the estate. This amount was included under section 691(a)(1)(C) in the son's gross income. The son may deduct, in computing his taxable income for such year, $260 on account of the estate tax attributable to such income, computed as follows:

| | |
|---|---|
| (1) (i) Value of income described in section 691(a)(1) included in computing gross estate | $1,500 |
| (ii) Deductions in computing gross estate for claims representing deductions described in section 691(b) | 200 |
| (iii) Net value of items described in section 691(a)(1) | 1,300 |
| (2) (i) Estate tax | 23,625 |
| (ii) Less: Estate tax computed without including $1,300 (item (1)(iii)) in gross estate | 23,235 |
| (iii) Portion of estate tax attributable to net value of items described in section 691(a)(1) | 390 |
| (3) (i) Value in gross estate of items described in section 691(a)(1) received in taxable year (fee) | 1,000 |
| (ii) Value in gross estate of all income items described in section 691(a)(1) (item (1)(i)) | 1,500 |
| (iii) Part of estate tax deductible on account of receipt of $1,200 fee (1,000/1,500 of $390) | 260 |

Although $1,200 was later collected as the fee, only the $1,000 actually included in the gross estate is used in the above computations. However, to avoid distortion, section 691(c) provides that if the value included in the gross estate is greater than the amount finally collected, only the amount collected shall be used in the above computations. Thus, if the amount collected as the fee were only $500, the estate tax deductible on the receipt of such amount would be 500/1,500 of $390, or $130. With respect to taxable years ending before January 1, 1964, see paragraph (d)(3) of § 1.421–5 for a similar example involving a restricted stock option. With respect to taxable years ending after December 31, 1963, see paragraph (c)(3) of §1.421–9 for a similar example involving a stock option subject to the provisions of part II of subchapter D.

• • • • •

PAR. 10. Paragraph (d) of § 1.1012–1 is amended to read as follows:

**§ 1.1012–1 Basis of property—cost.**

• • • • •

(d) *Special rules.* For special rules for determining the basis for gain or loss in the case of vessels acquired through the Maritime Commission (or its successor), see sections 510 and 511 of the Merchant Marine Act of 1936 (46 U.S.C. 1160, 1161). For special rules for determining the unadjusted basis of property recovered in respect of war losses, see section 1336. For special rules with respect to taxable years beginning before January 1, 1964, for determining the basis for gain or loss in the case of a disposition of a share of stock acquired pursuant to the timely exercise of a restricted stock option where the option price was between 85 percent and 95 percent of the fair market value of the stock at the time the option was granted, see paragraph (b) of § 1.421–5. See sections 423(c)(1) or 424(c)(1), whichever is applicable, for special rules with respect to taxable years ending after December 31, 1963 for determining the basis for gain or loss in the case of the disposition of a share of stock acquired pursuant to the timely exercise of a stock option described in such sections. See section 422(c)(1) for special rule with respect to taxable years ending after December 31, 1963, for determining the basis for gain or loss in the case of an exercise of a qualified stock option.

PAR. 11. Paragraph (c) of § 1.1014–1 is amended to read as follows:

**§ 1.1014–1 Basis of property acquired from a decedent.**

• • • • •

(c) *Property to which section 1014 does not apply.* Section 1014 shall have no application to the following classes of property:

(1) Property which constitutes a right to receive an item of income in respect of a decedent under section 691; and

(2) Restricted stock options described in section 421 which the employee has not exercised at death if the employee died before January 1, 1957. In the case of employees dying after December 31, 1956, see paragraph (d)(4) of § 1.421–5. In the case of employees dying in a taxable year ending after December 31, 1963, see paragraph (c)(4) of § 1.421–9 with respect to an option described in part II of subchapter D.

PAR. 12. There are inserted immediately after § 1.6038–2 the following new sections:

**§ 1.6039 Statutory provisions; returns required in connection with certain stock options.**

Sec. 6039. *Information required in connection with certain options*—(a) *Requirement of reporting.* Every corporation—

(1) Which in any calendar year transfers a share of stock to any person pursuant to such person's exercise of a qualified stock option or a restricted stock option, or

(2) Which in any calendar year records (or has by its agent recorded) a transfer of the legal title of a share of stock—

(A) Acquired by the transferor pursuant to his exercise of an option described in section 423(c) (relating to special rule where option price is between 85 percent and 100 percent of value of stock), or

(B) Acquired by the transferor pursuant to his exercise of a restricted stock option described in section 424(c)(1) (relating to options under which option price is between 85 percent and 95 percent of value of stock),

shall, for such calendar year, make a return at such time and in such manner, and setting forth such information, as the Secretary or his delegate may by regulations prescribe. For purposes of the preceding sentence, any option which a corporation treats as a qualified stock option, a restricted stock option, or an option granted under an employee stock purchase plan, shall be deemed to be such an option. A return is required by reason of a transfer described in paragraph (2) of a share only with respect to the first transfer of such share by the person who exercised the option.

(b) *Statements to be furnished to persons with respect to whom information is furnished.* Every corporation making a return under subsection (a) shall furnish to each person whose name is set forth in such return a written statement setting forth such information as the Secretary or his delegate may by regulations prescribe. The written statement required under the preceding sentence shall be furnished to the person on or before January 31 of the year following the calendar year for which the return under subsection (a) was made.

(c) *Identification of stock.* Any corporation which transfers any share of stock pursuant to the exercise of an option described in subsection (a)(2) shall identify such stock in a manner adequate to carry out the purposes of this section.

(d) *Cross references.* For definition of—

(1) The term "qualified stock option", see section 422(b).

(2) The term "employee stock purchase plan", see section 423(b).

(3) The term "restricted stock option", see section 424(b).

[Sec. 6039 as added by sec. 221(b)(1), Rev. Act 1964 (78 Stat. 73)]

**§ 1.6039–1 Information returns required of corporations with respect to certain stock option transactions occurring on or after January 1, 1964.**

(a) *Requirement of return under section 6039(a)(1).* Every corporation which transfers stock to any person pursuant to such person's exercise on or after January 1, 1964, of a qualified stock option described in section 422(b), or a restricted stock option described in section 424(b), shall make, for each calendar year in which such a transfer occurs, an information return with respect to the transfers made during such year. The return shall include the following information:

(1) The name, address and employer identification number of the corporation transferring the stock;

(2) The name, address and identifying number of the person to whom the share or shares of stock were transferred;

(3) The name and address of the corporation the stock of which is the subject of the option (if other than the corporation transferring the stock);

(4) The date the option was granted;

(5) The date the option was exercised;

(6) The date the shares were transferred to the person exercising the option;

(7) The option price per share;

(8) The fair market value of the stock at the time the option was granted;

(9) The fair market value of the stock at the time the option was exercised;

(10) The number of shares of stock transferred pursuant to the option; and

(11) Such other information as may be required by the return or by the instructions issued with respect thereto.

(b) *Requirement of return under section 6039(a)(2).* (1) Every corporation which records, or has by its agent recorded, a transfer of the title to stock acquired by the transferor pursuant to his exercise on or after January 1, 1964, of

(i) An option granted under an employee stock purchase plan which meets the requirements of section 423(b), and with respect to which the special rule of section 423(c) applies, or

(ii) A restricted stock option which meets the requirements of section 424(b), and with respect to which the special rule of section 424(c)(1) applies,

shall make, for each calendar year in which such a recorded transfer of title to such stock occurs, an information return containing the information required by subparagraph (2) of this paragraph.

(2) The return required by subparagraph (1) of this paragraph shall contain the following information:

(i) The name and address of the corporation whose stock is being transferred;

(ii) The name, address, and identifying number of the transferor;

(iii) The date such stock was issued to the transferor; and

(iv) The number of shares to which title is being transferred.

(3) If the return required by this paragraph is made by the authorized "transfer agent" of the corporation, it shall be deemed to have been made by the corporation. The term "transfer agent", as used in this paragraph, means any designee authorized to keep the stock ownership records of a corporation and to record a transfer of title of the stock of such corporation on behalf of such corporation.

(4) Where a corporation is required by this paragraph to make an information return for the calendar year, such return will only have to supply information relating to the first recorded transfer of title to the share or shares of stock. Thus, for example, if the owner has record title to a share or shares of stock transferred to a recognized broker or financial institution and the stock is subsequently sold by such broker or institution (on behalf of the owner) the corporation is only required to report information relating to the transfer of record title to the broker or financial institution. Similarly, a return is required when a share of stock is transferred by the optionee to himself and another person or persons as joint tenants or tenants in common. However, when stock is originally issued to the optionee and another person or persons as joint tenants, or as tenants by the entirety, and a stock certificate was not previously actually issued to the optionee as a sole owner, the return required by this paragraph shall be made (at such time and in such manner as is provided by this section with respect to a transfer by the optionee) in respect of the first transfer of the title to such stock by the optionee.

(5) Every corporation which transfers any share of stock pursuant to the exercise of an option described in this paragraph shall identify such stock in a manner sufficient to enable the accurate reporting of the transfer of record title to such shares. Such identification may be accomplished by assigning to the certificates of stock issued pursuant to the exercise of such options a special serial number, or color.

(c) *Time and place for filing.* (1) The returns required by this section shall be filed with the district director for the district where the income tax return of the corporation required to file such return is filed. Such return must be filed on or before February 28 of the year following the calendar year for which such return is required, and must be signed by the person required to file the return or its duly authorized agent.

(2) If a return is made by the authorized "transfer agent" of the corporation, as described in paragraph (b)(3) of this section, it shall be filed with the district director for the district where the income tax return of the principal corporation is filed after the close of the calendar year for which the return is required, but on or before February 28th of the following calendar year.

(3) For provisions relating to the extension of time for filing the returns required by this section, see § 1.6081–1.

(4) For provisions relating to the time for performance of an act when the last day prescribed for performance falls on Saturday, Sunday, or a legal holiday, see § 301.7503–1 of this chapter (Regulations on Procedure and Administration).

(d) *Stock to which this section applies.* The rules of this section shall apply to stock acquired pursuant to the exercise of any option which the employer corporation, or a parent or subsidiary corporation of such corporation, treats as a qualified stock option, restricted stock option, or as an option granted under an employee stock purchase plan, irrespective of whether the transfer of stock pursuant to such exercise qualifies for the special tax treatment of section 421 and the regulations thereunder. In addition, the rules of paragraph (b) of this section shall apply to any full shares of stock received in respect of stock which was originally acquired pursuant to the exercise of an option described in the preceding sentence. See section 425(b). A return is required under paragraph (b) of this section irrespective of whether the transfer of title constitutes a disposition of such stock as defined by section 425(c).

**§ 1.6039–2 Statements to persons with respect to whom information is furnished.**

(a) *Requirement and form of statement.* Every corporation required to make a return under section 6039(a) and § 1.6039–1 shall furnish to each person whose identifying number is (or should be) shown on such return a written statement containing the information required to be shown on the information return required by paragraph (a) or (b) of this section, whichever is applicable. A statement shall be considered to be furnished to a person within the meaning of this section if it is mailed to such person as his last known address.

(b) *Time for furnishing statements*—(1) *In general.* Each statement required by this section to be furnished to any person for a calendar year shall be furnished to such person on or before January 31 of the year following the year for which the statement is required.

(2) *Extension of time.* For good cause shown upon written application of the corporation required to furnish statements under this section, the district director may grant an extension of time not exceeding 30 days in which to furnish such statements. The application shall be addressed to the district director with whom the income tax returns of the applicant-corporation are filed and shall contain a full recital of the reasons for requesting the extension to aid the district director in determining the period of the extension, if any, which will be granted. Such a request in the form of a letter to the district director signed by the applicant (or its agent) will suffice as an application. The application shall be filed on or before the date prescribed in subparagraph (1) of this paragraph for furnishing the statements required by this section.

(3) *Last day for furnishing statement.* For provisions relating to the time for performance of an act when the last day prescribed for performance falls on Saturday, Sunday, or a legal holiday, see § 301.7503–1 of this chapter (Regulations on Procedure and Administration).

(c) *Penalty.* For provisions relating to the penalty provided for failure to furnish a statement under this section, see § 301.6678–1 of this chapter (Regulations on Procedure and Administration).

PAR. 13. Paragraph (c) of § 1.6071–1 is amended to read as follows:

**§ 1.6071–1 Time for filing returns and other documents.**

• • • • •

(c) *Time for filing certain information returns.* (1) For provisions relating to the time for filing returns of partnership income, see paragraph (e)(2) of § 1.6031–1.

(2) For provisions relating to the time for filing information returns by banks with respect to common trust funds, see § 1.6032–1.

(3) For provisions relating to the time for filing information returns by certain organizations exempt from taxation under section 501(a), see paragraph (e) of § 1.6033–1.

(4) For provisions relating to the time for filing returns by trusts claiming charitable deductions under section 642(c), see paragraph (c) of § 1.6034–1.

(5) For provisions relating to the time for filing information returns by officers, directors, and shareholders of foreign personal holding companies, see §§ 1.6035–1 and 1.6035–2.

(6) For provisions relating to the time for filing information returns with respect to certain stock option transactions, see paragraph (c) of § 1.6039–1.

(7) For provisions relating to the time for filing information returns by persons making certain payments, see § 1.6041–6.

(8) For provisions relating to the time for filing information returns regarding payments of dividends, see paragraph (d) of § 1.6042–1, and paragraph (c) of § 1.6042–2 (relating to returns for calendar years after 1962).

(9) For provisions relating to the time for filing information returns by corporations with respect to contemplated dissolution or liquidations, see paragraph (a) of § 1.6043–1.

(10) For provisions relating to the time for filing information returns by corporations with respect to distributions in liquidation, see paragraph (a) of § 1.6043–2.

(11) For provisions relating to the time for filing information returns with respect to payments of patronage dividends, see paragraph (b) of § 1.6044–1, and paragraph (d) of § 1.6044–2 (relating to returns for calendar years after 1962).

(12) For provisions relating to the time for filing information returns with respect to formation or reorganization of foreign corporations, see § 1.6046–1.

(13) For provisions relating to the time for filing information returns regarding certain payments of interest, see paragraph (c) of § 1.6049–1.

PAR. 14. Paragraph (b) of § 1.6091–1 is amended to read as follows:

**§ 1.6091–1 Place for filing returns or other documents.**

* * * * *

(b) *Place for filing certain information returns.* (1) For the place for filing returns of partnership income, see paragraph (e)(1) of § 1.6031–1.

(2) For the place for filing information returns by banks with respect to common trust funds, see § 1.6032–1.

(3) For the place for filing information returns by certain organizations exempt from taxation under section 501(a), see paragraph (e) of § 1.6033–1.

(4) For the place for filing information returns by trusts claiming charitable deductions under section 642(c), see paragraph (c) of §1.6034–1.

(5) For the place for filing information returns by officers, directors, and shareholders of foreign personal holding companies, see paragraph (d) of § 1.6035–1 and paragraph (d) of § 1.6035–2.

(6) For the place for filing information returns relating to certain stock option transactions, see paragraph (c) of § 1.6039–1.

(7) For the place for filing returns of information reporting certain payments on Forms 1099 and 1096, see § 1.6041–6.

(8) For the place for filing returns of information regarding payments of dividends, see paragraph (d) of § 1.6042–1 and paragraph (c) of § 1.6042–2 (relating to returns for calendar years after 1962).

(9) For the place for filing information returns by corporations relating to contemplated dissolution or liquidation, see paragraph (a) of § 1.6043–1.

(10) For the place for filing information returns by corporations relating to distributions in liquidation, see paragraph (a) of § 1.6043–2.

(11) For the place for filing returns of information regarding payments of patronage dividends, see paragraph (b) of § 1.6044–1, and paragraph (d) of § 1.6044–2 (relating to returns for calendar years after 1962).

(12) For the place for filing information returns relating to formation or reorganization of foreign corporations, see paragraph (e) of § 1.6046–1.

(13) For the place for filing information returns regarding certain payments of interest, see paragraph (c) of § 1.6049–1.

PAR. 15. Section 301.6652 is amended by revising section 6652(a), and by adding a historical note. These amended and added provisions read as follows:

**§ 301.6652 Statutory provisions; failure to file certain information returns.**

Sec. 6652. *Failure to file certain information returns*—(a) *Returns relating to payments of dividends, etc., and certain transfers of stock.* In the case of each failure—

(1) To file a statement of the aggregate amount of payments to another person required by section 6042(a)(1) (relating to payments of dividends aggregating $10 or more), section 6044(a)(1) (relating to payments of patronage dividends aggregating $10 or more), or section 6049(a)(1) (relating to payments of interest aggregating $10 or more),

(2) To make a return required by section 6039(a) (relating to reporting information in connection with certain options) with respect to a transfer of stock or a transfer of legal title to stock, or

(3) To make a return required by section 6052(a) (relating to reporting payment of wages in the form of group-term life insurance) with respect to group-term life insurance on the life of an employee, on the date prescribed therefor (determined with regard to any extension of time for filing), unless it is shown that such failure is due to reasonable cause and not to willful neglect, there shall be paid (upon notice and demand by the Secretary or his delegate and in the same manner as tax), by the person failing to file a statement referred to in paragraph (1) or failing to make a return referred to in paragraph (2) or (3), $10 for each such failure, but the total amount imposed on the delinquent person for all such failures during any calendar year shall not exceed $25,000.

* * * * *

[Sec. 6652 as amended by sec. 85, Technical Amendments Act 1958 (72 Stat. 1664); sec. 19(d), Rev. Act 1962 (76 Stat. 1057); sec. 221(b)(2), Rev. Act 1964 (78 Stat. 74)]

PAR. 16. The last sentence of paragraph (a)(1) of § 301.6652–1 is revised, and paragraphs (c), (d) and (e) of § 301.6652–1 are deleted, and new paragraphs (c), (d), (e), (f) and (g) are added thereto. These revised and added provisions read as follows:

**§ 301.6652–1 Failure to file certain information returns.**

(a) *Returns with respect to payments made in calendar years after 1962*—(1) *Payments of dividends, interest, or patronage dividends aggregating $10 or more.* In the case of each failure to file a statement required by—

(i) Section 6042(a)(1), relating to information returns with respect to payments of dividends aggregating $10 or more in a calendar year, in effect with respect to payments made after December 31, 1962,

(ii) Section 6044(a)(1), relating to information returns with respect to certain payments by cooperatives aggregating $10 or more in a calendar year, in effect with respect to payments made on or after the first day of the first taxable year of the cooperative beginning after December 31, 1962, with respect to patronage occurring on or after such first day, or

(iii) Section 6049(a)(1), relating to information returns with respect to payments of interest aggregating $10 or more in a calendar year, in effect with respect to payments made after December 31, 1962, and the regulations under such section, within the time prescribed for filing such statement (determined with regard to any extension of time for filing), there shall be paid by the person failing to so file the statement $10 for each such statement not so filed. However, the total amount imposed on the delinquent person for all such failures under section 6652(a) and this section during any calendar year shall not exceed $25,000.

* * * * *

(c) *Returns with respect to reporting payments of wages in the form of group-term life insurance provided in a calendar year after December 31, 1963.* In the case of each failure to file a return required by section 6052(a), relating to reporting payment of wages in the form of group-term life insurance provided for any employee on his life in a calendar year after December 31, 1963, and the regulations under such section, within the time prescribed for filing such return (determined with regard to any extension of time for filing), there shall be paid by the person failing to so file such return $10 for each such return not so filed. However, the total amount imposed on the delinquent person for all such failures under section 6652(a) and this section during any calendar year shall not exceed $25,000.

(d) *Returns with respect to transfer of stock or record title thereto pursuant to options exercised on or after January 1, 1964.* In the case of each failure to file a statement of the transfer of stock or of record title thereto as required by section 6039(a) and the regulations under such section within the time prescribed for filing such statement (determined with regard to any extension of time for filing), there shall be paid by the corporation failing to so file such statement, $10 for each such statement not so filed. However, the total amount imposed on the delinquent corporation for all such failures under section 6652(a) and this section during any calendar year shall not exceed $25,000.

(e) *Manner of payment.* The penalty imposed under section 6652 and this section on any person shall be paid in the same manner as tax upon the issuance of a notice and demand therefor.

(f) *Showing of reasonable cause.* The penalty imposed by section 6652 shall not apply with respect to a failure to file a statement within the time prescribed if it is established to the satisfaction of the district director or the director of the regional service center that such failure was due to reasonable cause and not to willful neglect. An affirmative showing of reasonable cause must be made in the form of a written statement, containing a declaration that it is made under the penalties of perjury, setting forth all the facts alleged as a reasonable cause.

(g) *Alcohol and tobacco taxes.* For penalties for failure to file certain information returns with respect to alcohol and tobacco taxes, see, generally, subtitle E of the Code.

PAR. 17. Section 301.6678 is amended by revising section 6678 and by adding a historical note. These amended and added provisions read as follows:

**§ 301.6678 Statutory provisions; failure to furnish certain statements.**

Sec. 6678. *Failure to furnish certain statements.* In the case of each failure to furnish a statement under section 6039(b), 6042(c), 6044(e), 6049(c) and 6052(b) on the date prescribed therefor to a person with respect to whom a return has been made under section 6039(a), 6042(a)(1), 6044(a)(1), 6049(a)(1), or 6052(a), respectively, unless it is shown that such failure is due to reasonable cause and not to willful neglect, there shall be paid (upon notice and demand by the Secretary or his delegate and in the same manner as tax), by the person failing to so furnish the statement, $10 for each such statement not so furnished, but the total amount imposed on the delinquent person for all such failures during any calendar year shall not exceed $25,000.

[Sec. 6678 as added by sec. 19(e), Rev. Act 1962 (76 Stat. 1058) and as amended by secs. 204(c)(2), 221(b)(3), Rev. Act 1964 (78 Stat. 37, 75)]

PAR. 18. Paragraph (a) of § 301.6678–1 is amended by adding thereto new subparagraphs (4) and (5). These added provisions read as follows:

**§ 301.6678–1 Failure to furnish statements.**

(a) *In general.* * * *

(4) Under section 6039(b) and § 1.6039–2 to a person with respect to whom a return has been made under section 6039(a), relating to information returns with respect to certain stock option transactions occurring in a calendar year, or

(5) Under section 6052(b) and § 1.6052–2 to a person with respect to whom a return has been made under section 6052(a), relating to information returns with respect to payment of wages in the form of group-term life insurance provided for an employee on his life.

# DEPARTMENT OF AGRICULTURE

## Agricultural Marketing Service

## [ 7 CFR Part 1030 ]

[Docket No. AO–101–A29]

## MILK IN CHICAGO, ILL., MARKETING AREA

### Notice of Extension of Time for Completing the Referendum Provided for in the Decision of the Secretary

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), notice is hereby given that the time for completing the referendum pursuant to the referendum order in the Assistant Secretary's decision which was issued November 30, 1964 (29 F.R. 16395) with respect to a proposed marketing agreement and order regulating the handling of milk in the Chicago, Ill., marketing area is hereby extended to be completed on or before January 18, 1965.

Signed at Washington, D.C., on December 16, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[F.R. Doc. 64–13072; Filed, Dec. 18, 1964; 8:51 a.m.]

## [ 7 CFR Part 1036 ]

[Docket No. AO–179–A24]

## MILK IN NORTHEASTERN OHIO MARKETING AREA

### Decision on Proposed Amendments to Tentative Marketing Agreement and to Order

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held at Cleveland, Ohio, on October 20–21, 1964, pursuant to notice thereof issued on September 24, 1964 (29 F.R. 13483).

Upon the basis of the evidence introduced at the hearing and the record thereof, the Associate Administrator on November 27, 1964 (29 F.R. 16197; F.R. Doc. 64–12364) filed with the Hearing Clerk, United States Department of Agriculture, his recommended decision containing notice of the opportunity to file written exceptions thereto.

The material issues on the record of the hearing relate to:

1. Diversion of producer milk;
2. Qualifications for attaining pool plant status;
3. Accounting for bulk tank milk under certain specified conditions;
4. Classification provisions;
5. The Class I milk price;
6. The Class II milk price;
7. Location differentials;
8. Seasonal incentive payments; and
9. Miscellaneous and conforming changes.

This decision is concerned only with that portion of Issue No. 5 relating to the use of market statistics of the North Central Ohio milk order (Part 1037) in the computation of the supply-demand adjustment under the Northeastern Ohio milk order. Other aspects of the Class I pricing provisions and the remaining issues of the hearing will be considered in a further decision.

*Findings and conclusions.* The following findings and conclusions on the material issue are based on evidence presented at the hearing and the record thereof:

The use of North Central Ohio order (Order 37) supplies and sales data in the Northeastern Ohio supply-demand adjustment provision should be discontinued and the "standard utilization percentages" adjusted to compensate for the elimination of such data.

The supply-demand adjustment is computed by comparing the "current utilization percentage" (i.e., the ratio of combined producer receipts to combined Class I sales during the second and third months preceding the pricing month) with a standard utilization percentage or "norm" applicable for the pricing month. The Class I price adjustment is based on the deviation of the current utilization percentage above or below this norm. At the present time the supply-demand adjustor is reducing the Northeastern Ohio Class I price.

On November 13, 1964, a decision was issued which would consolidate the North Central Ohio and Toledo, Ohio orders into a single regulation (tentatively designated as the Northwestern Ohio order). This decision also would expand the marketing area and provide for a marketwide pooling provision.[1] From the effective date of the Northwestern Ohio order, the supplies and sales data for the North Central Ohio order will no longer be available for use in the Order 36 supply-demand computation in the manner provided in the present order.

There was no testimony offered on the record of this hearing as to whether market data for the consolidated and expanded order should be included in the Order 36 supply-demand computation. In any event, a decision on this matter would be premature without some experience under the consolidated order.

The individual-handler pool market of North Central Ohio historically has maintained a higher Class I utilization than Northeastern Ohio. To avoid unwarranted price changes through the elimination of Order 37 data, the standard utilization percentages should be increased four percentage points in each month of the year.

Proponent cooperative associations testified that an increase of five percentage points in the standard utilization percentages would be necessary to maintain the present price level. A handler representative stated that an increase of three percentage points would accomplish this end.

The "current utilization percentages" used to compute the supply-demand adjustment averaged 158 during 1963. Excluding data for North Central Ohio, such percentages would have averaged 163, or five points higher than the actual average percentages. For the 11-month period of January–November 1964 (data for December are not yet available) the current utilization percentages used to compute the supply-demand adjustment averaged 149. Excluding Order 37 data, such percentages would have averaged 153, or four points higher than the actual percentages. Increasing the standard utilization percentages four percentage points and eliminating Order 37 data

[1] Official notice is taken of the final decision on this matter which was issued on November 13, 1964 (29 F.R. 15416).

would not have changed the Class I price in any month during this 23-month period. An increase of five points, however, would have caused a 7-cent higher Class I price in one month (January 1964). An increase of four percentage points will offset the exclusion of North Central Ohio producer receipts and Class I sales, and thus maintain the present annual Class I price level.

Other proposed amendments to the Class I pricing provisions were offered at the hearing. However, to expedite the decision on the above matter, the remaining proposals will be considered in a later decision. Accordingly, no further changes are proposed at this time, and the present level and seasonality of the Class I price are retained.

*Rulings on proposed findings and conclusions.* Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

*General findings.* The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) The tentative marketing agreement and the order as hereby proposed to be amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(b) The parity prices of milk as determined pursuant to section 2 of the Act are not reasonable in view of the price of feeds, available supplies of feeds, and other economic conditions which affect market supply and demand for milk in the marketing area, and the minimum prices specified in the proposed marketing agreement and the order, as hereby proposed to be amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest; and

(c) The tentative marketing agreement and the order, as hereby proposed to be amended, will regulate the handling of milk in the same manner as, and will be applicable only to persons in the respective classes of industrial and commercial activity specified in, a marketing agreement upon which a hearing has been held.

*Rulings on exceptions.* In arriving at the findings and conclusions, and the regulatory provisions of this decision, each of the exceptions received was carefully and fully considered in conjunction with the record evidence pertaining thereto. To the extent that the findings and conclusions, and the regulatory provisions of this decision are at variance with any of the exceptions, such exceptions are hereby overruled for the reasons previously stated in this decision.

*Marketing agreement and order.* Annexed hereto and made a part hereof are two documents entitled respectively, "Marketing Agreement Regulating the Handling of Milk in the Northeastern Ohio Marketing Area" and "Order Amending the Order Regulating the Handling of Milk in the Northeastern Ohio Marketing Area", which have been decided upon as the detailed and appropriate means of effectuating the foregoing conclusions.

*It is hereby ordered,* That all of this decision, except the attached marketing agreement, be published in the FEDERAL REGISTER. The regulatory provisions of said marketing agreement are identical with those contained in the order as hereby proposed to be amended by the attached order which will be published with this decision.

*Determination of representative period.* The month of October 1964 is hereby determined to be the representative period for the purpose of ascertaining whether the issuance of the attached order, as amended and as hereby proposed to be amended, regulating the handling of milk in the Northeastern Ohio marketing area, is approved or favored by producers, as defined under the terms of the order, as amended and as hereby proposed to be amended, and who, during such representative period, were engaged in the production of milk for sale within the aforesaid marketing area.

Signed at Washington, D.C., on December 15, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

*Order [1] Amending the Order Regulating the Handling of Milk in the Northeastern Ohio Marketing Area*

**§ 1036.0 Findings and determinations.**

The findings and determinations hereinafter set forth are supplementary and in addition to the findings and determinations previously made in connection with the issuance of the aforesaid order and of the previously issued amendments thereto; and all of said previous findings and determinations are hereby ratified and affirmed, except insofar as such findings and determinations may be in conflict with the findings and determinations set forth herein.

(a) *Findings upon the basis of the hearing record.* Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900), a public hearing was held upon certain proposed amendments to the tentative marketing agreement and to the order regulating the handling of milk in the Northeastern Ohio marketing area. Upon the basis of the evidence introduced at such hearing and the record thereof, it is found that:

(1) The said order as hereby amended, and all of the terms and conditions thereof, will tend to effectuate the declared policy of the Act;

(2) The parity prices of milk, as determined pursuant to section 2 of the Act, are not reasonable in view of the price of feeds, available supplies of feeds and other economic conditions which affect market supply and demand for milk in the said marketing area, and the minimum prices specified in the order as hereby amended, are such prices as will reflect the aforesaid factors, insure a sufficient quantity of pure and wholesome milk, and be in the public interest;

(3) The said order as hereby amended, regulates the handling of milk in the same manner as, and is applicable only to persons in the respective classes of industrial or commercial activity specified in, a marketing agreement upon which a hearing has been held.

*Order relative to handling.* It is therefore ordered, that on and after the effective date hereof, the handling of milk in the Northeastern Ohio marketing area shall be in conformity to and in compliance with the terms and conditions of the aforesaid order, as amended and as hereby amended, as follows:

Subparagraphs (1) and (2) of § 1036.51 (a) are revised to read as follows:

**§ 1036.51 Class I milk prices.**

* * * * * *

(a) * * *

(1) Divide the total quantity of producer milk during the second and third months preceding by the gross quantity of milk utilized as Class I (adjusted to eliminate duplications due to interhandler transfers) at pool plants in the same two months, multiply the result by 100, and round to the nearest whole number. The result shall be known as the "current utilization percentage".

(2) Compute a "deviation percentage" by subtracting from the current utilization percentage as computed in subparagraph (1) of this paragraph, the "standard utilization percentage" shown below:

| *Month for which the price is being computed* | *Standard utilization percentage* |
|---|---|
| January | 130 |
| February | 129 |
| March | 129 |
| April | 130 |
| May | 131 |
| June | 132 |
| July | 141 |
| August | 149 |
| September | 142 |
| October | 128 |
| November | 126 |
| December | 128 |

[F.R. Doc. 64-13024; Filed, Dec. 18, 1964; 8:47 a.m.]

[1] This order shall not become effective unless and until the requirements of § 900.14 of the rules of practice and procedure governing proceedings to formulate marketing agreements and marketing orders have been met.

## SECOND CLASS MAILING PRIVILEGES

### Revocation of Notice of Proposed Rule Making

Under date of November 24, 1964, there was published in the FEDERAL REGISTER at page 15772 a notice of proposed rule making affecting § 22.2(b)(5) of Title 39, Code of Federal Regulations. The notice proposed a revision of the cited section for the purpose of establishing standards and procedures respecting subscriptions, to second-class publications, that are paid for by subscribers in connection with and as a part of membership dues paid, or contributions or pledges made, to organizations or institutions. Although the procedures in 39 CFR 22.2(b)(5) relate to a proprietary function of the Government, patrons of the postal service were given an opportunity to present to the Department written views concerning the proposed revision, within thirty days after publication of the notice in the FEDERAL REGISTER.

Upon further consideration, the Department desires at this time to cancel the subject notice of proposed rule making. Accordingly, said notice is hereby revoked.

(R.S. 161, as amended; 5 U.S.C. 22, 39 U.S.C. 501, 4351-4370)

LOUIS J. DOYLE,
*General Counsel.*

[F.R. Doc. 64-13143; Filed, Dec. 18, 1964; 11:29 a.m.]

# FEDERAL AVIATION AGENCY

**[ 14 CFR Part 39 [New] ]**

[Docket No. 6391]

## AIRWORTHINESS DIRECTIVE

### Boeing Models 707 and 720 Aircraft Rudder Power Control Unit Linkage

The Federal Aviation Agency has under consideration a proposal to amend Part 39 [New] of the Federal Aviation Regulations to include an airworthiness directive for Boeing Models 707 and 720 aircraft. It has been shown that if the input rod or attachments to the rudder power control unit valve should fail while the rudder is being deflected, the valve slide will remain in the last selected position. If the valve is open, the rudder will continue to the fully deflected position or until the rudder boost is turned off and mechanical rudder control is used. To correct this condition, this AD requires a modification to provide temporary hydraulic control until the rudder boost is turned off in the event of failure of the input rod or attachments to the rudder power unit valve.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the docket number and be submitted in duplicate to the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C., 20553. All communications received on or before January 18, 1965, will be considered by the Administrator before taking action upon the proposed rule. The proposals contained in this notice may be changed in the light of comments received. All comments will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

This amendment is proposed under the authority of sections 313(a), 601 and 603 of the Federal Aviation Act of 1958 (72 Stat. 752, 775, 776; 49 U.S.C. 1354(a), 1421, 1423).

In consideration of the foregoing, it is proposed to amend § 39.13 of Part 39 [New] (14 CFR Part 39 [New]), by adding the following airworthiness directive:

BOEING. Applies to Models 707 and 720 aircraft, Serial Numbers 7009 through 7011, 17586 through 17612, 17614 through 17652, 17658 through 17690, 17692 through 17724, 17903 through 17905, 17907 through 17930, 18012 through 18037, 18041 through 18050, 18054 through 18087, 18154 through 18167, 18240 through 18246, 18248 through 18251, 18334 through 18339, 18351 through 18357, 18372 through 18397, 18400 through 18409, 18411 through 18425, 18451 through 18463, 18579 through 18591, 18685 through 18694, 18707 through 18718, 18737 through 18738, 18746 through 18749, and 18764.

Compliance required within 6,000 hours' time in service after the effective date of this AD, unless already accomplished.

To provide temporary hydraulic control until the rudder boost is turned off in the event of failures of the input rod or attachments to the rudder power control unit valve, accomplish the following:

Modify the rudder power unit by reworking the input arm and input link and installing dual control linkage in accordance with Part 3 "Modification Data" of Boeing Service Bulletin No. 1930 or an equivalent approved by the Aircraft Engineering Division, FAA Western Region.

(Boeing Service Bulletin No. 1930 covers this same subject.)

Issued in Washington, D.C., on December 15, 1964.

C. W. WALKER,
*Acting Director,*
*Flight Standards Service.*

[Airspace Docket No. 64-CE-81]

## CONTROL ZONES, TRANSITION AREAS AND CONTROL AREA EXTENSIONS

### Proposed Alteration, Designation and Revocation

The Federal Aviation Agency is considering an amendment to Part 71 [New] of the Federal Aviation Regulations to alter controlled airspace in the Chicago, Ill., terminal area.

The following controlled airspace is presently designated in the Chicago, Ill., terminal area:

1. The Chicago Midway Airport control zone is designated as that airspace within a 6-mile radius of Chicago-Midway Airport (latitude 41°47'04" N., longitude 87°45'12" W.); and within 2 miles either side of the Chicago-Midway ILS localizer SE course extending from the 6-mile radius zone to the Chicago Heights, Ill., VOR 044° radial, and within 2 miles either side of the Chicago-Midway ILS localizer NW course extending from the 6-mile radius zone to 12 miles NW of the Chicago-Midway OM, excluding the portion within the O'Hare International Airport, Chicago, Ill., control zone.

2. The Chicago O'Hare Airport control zone is designated as that airspace within a 6-mile radius of Chicago-O'Hare International Airport (latitude 41°59'10" N., longitude 87°54'28" W.); and within 2 miles either side of the Chicago-O'Hare VOR 331° radial extending from the 6-mile radius zone to the INT of the Northbrook, Ill., VOR 195° and the Chicago-O'Hare VOR 331° radials, and within 2 miles either side of the Chicago-O'Hare Runway 14-R ILS localizer NW course, extending from the 6-mile radius zone to Runway 14-R OM, excluding the portion NE of a line between the INTs of the 6-mile radius and the 5-mile radius of Glenview, Ill., control zone.

3. The Chicago Meigs Airport control zone is designated as that airspace within a 3-mile radius of Meigs Airport (latitude 41°51'30" N., longitude 87°-36'30" W.), from 0600 to 2200 hours local time, daily, excluding the portion W of longitude 87°37'00" W.

4. The Glenview, Ill., control zone is designated within a 5-mile radius of NAS Glenview (latitude 42°05'21" N., longitude 87°49'07" W.); and within a 1-mile radius of Chicagoland Airport, Wheeling, Ill. (latitude 42°11'35" N., longitude 87°56'05" W.), and within 2 miles either side of the Northbrook, Ill., VORTAC 138° and 159° radials extending from the Glenview 5-mile and the Chicago-O'Hare, Ill., 6-mile radius zones to the VORTAC, excluding the portion within the Chicago-O'Hare control zone.

5. The Joliet, Ill., control zone is designated as that airspace within a 5-mile radius of Joliet Municipal Airport (latitude 41°31'05" N., longitude 88°10'30" W.) and within 2 miles either side of the Joliet VORTAC 104° and 284° radials, extending from the 5-mile radius zone to the 12 miles W of the VORTAC.

6. The St. Charles, Ill., control zone is designated as that airspace within a 3-mile radius of DuPage County Airport, St. Charles, Ill. (latitude 41°54'45" N., longitude 88°14'35" W.), and within 2 miles either side of the DuPage VOR 069° radial extending from the 3-mile radius zone to the VOR, from 0600 to 2200 hours, local time, daily.

7. That portion of the Bradford, Ill., control area extension within a 15-mile radius of the Bradford VOR north of latitude 41°10'00" N.

8. The Chicago control area extension is designated as that airspace within a

30-mile radius of the Midway Airport, Chicago, Ill. (latitude 41°47'05" N., longitude 87°45'05" W.), and within a 15-mile radius of the Chicago Heights, Ill., VORTAC; that airspace NE, E, and SE bounded by a line beginning at the INT of the E boundary of V–7 and the S boundary of V–84, thence E along the S boundary of V–84 to its INT with the South Bend, Ind., VORTAC 314° radial, thence SE along this radial to its INT with the N boundary of V–100, thence E along V–100 to its INT with the arc of a 35-mile radius circle centered on the Battle Creek, Mich., VORTAC, thence counterclockwise along this arc to latitude 41°57'30" N., longitude 85°44'30" W., thence to latitude 41°41'00" N., longitude 85°49'40" W., thence counterclockwise along the arc of a 15-mile radius circle centered on the Goshen, Ind., VOR to its INT with the W boundary of V–55 W, thence S along this boundary to its INT with the N boundary of V–38, thence W along this boundary to its INT with the E boundary of V–7, thence along this boundary to the point of beginning.

9. That portion of the Danville, Ill., control area extension northeast of Danville and north of latitude 40°45'00" N. bounded on the NE by V–53 and on the W by V–171.

10. That portion of the Fort Wayne, Ind., control area extension west of Fort Wayne within a 40-mile radius of the Fort Wayne VORTAC, north of latitude 41°00'00" N., and west of longitude 85°50'00" W.

11. That portion of the Lafayette, Ind., control area extension within a 25-mile radius of the Purdue University Airport north of latitude 40°45'00" N.

12. That portion of the Milwaukee, Wis., control area extension south of latitude 42°30'00" N., bounded on the S by V–84 east of Northbrook, Ill., VORTAC and V–100 west of Northbrook VORTAC.

13. That portion of the Moline, Ill., control area extension east of longitude 89°50'00" W. within 5 miles either side of a direct line extending from the Polo, Ill., VORTAC to the INT of the Quad City, Ill., ILS localizer E course and the 318° radial of the Bradford, Ill., VOR.

14. The Peotone, Ill., control area extension is designated as that airspace SE of Peotone bounded on the E by V–7, on the SW by V–491, on the W by V–53 and on the N by V–38.

15. That portion of the Peru, Ind., control area extension northwest of Peru north of a line extending from latitude 41°00'00" N., longitude 85°57'00" W.; to latitude 41°00'00" N., longitude 86°33'00" W.; to latitude 40°45'00" N., longitude 86°33'00" W.; to latitude 40°45'00" N., longitude 87°04'00" W., bounded on the S by the Lafayette, Ind., control area extension, on the W by V–7, on the N by V–38 and on the E by the Fort Wayne control area extension.

16. That portion of the Pontiac, Ill., control area extension north of latitude 40°45'00" N. and west of longitude 88°40'00" W. within a 15-mile radius of the Pontiac VOR.

Having completed a comprehensive review of airspace requirements in the Chicago, Ill., terminal area, including studies attendant to the implementation of the provisions of Amendments 60–21 and 60–29 of the Civil Air Regulations, the Federal Aviation Agency proposes to take the following airspace actions:

1. Redesignate the Chicago Midway Airport control zone to comprise that airspace within a 5-mile radius of Chicago Midway Airport (latitude 41°47'04" N., longitude 87°45'12" W.); and within 2 miles each side of the Chicago Midway ILS localizer SE course extending from the 5-mile radius zone to 8 miles SE of the Kedzie RBN; and within 2 miles each side of the Chicago Midway ILS localizer NW course extending from the 5-mile radius zone to the OM.

2. Redesignate the Chicago O'Hare control zone to comprise that airspace within a 5-mile radius of Chicago O'Hare International Airport (latitude 41°59'-10" N., longitude 87°54'28" W.); within 2 miles each side of the Chicago O'Hare Runway 14R and 14L ILS localizer NW courses, extending from the 5-mile radius zone to 7 miles NW of the airport, and within 2 miles each side of the Chicago O'Hare Runway 32R and 32L ILS localizer SE courses, extending from the 5-mile radius zone to 7 miles SE of the airport excluding the portion NE of a line between the INT's of the 5-mile radius zone and the 5-mile radius zone of Glenview, Ill., control zone.

3. Redesignate the Chicago Meigs control zone to comprise that airspace within a 3 mile radius of Meigs Airport (latitude 41°51'30" N., longitude 87°-36'30" W.) from 0600 to 2200 hours, local time, daily.

4. Redesignate the Glenview control zone to comprise that airspace within a 5-mile radius of NAS Glenview (latitude 42°05'21" N., longitude 87°49'07" W.); and within 2 miles each side of the Northbrook, Ill., VORTAC 128° and 159° radials extending from the Glenview 5-mile and the Chicago-O'Hare, Ill., 5-mile radius zones to 1 mile SE and SW of the VORTAC; and within 2 miles either side of the Northbrook VORTAC 071° radial extending from 1 mile E of the VORTAC to 6 miles E of the VORTAC; and within 2 miles each side of the 002° bearing from the Glenview RBN extending from the 5-mile radius zone to 12 miles N of the RBN.

5. Redesignate the Joliet, Ill., control zone to comprise that airspace within a 5-mile radius of Joliet Municipal Airport (latitude 41°31'05" N., longitude 88°10'30" W.) and within 2 miles each side of the Joliet VORTAC 104° radial, extending from the 5-mile radius zone to the Joliet VORTAC.

6. Designate the Chicago transition area as that airspace extending upward from 700 feet above the surface within the area bounded by a line beginning at latitude 41°31'00" N., longitude 87°47'-00" W.; to latitude 41°29'00" N., longitude 87°34'00" W.; to latitude 41°29'00" N., longitude 87°19'00" W.; to latitude 41°55'00" N., longitude 87°19'00" W.; to latitude 42°30'00" N., longitude 87°35'-00" W.; to latitude 42°38'00" N., longitude 87°52'00" W.; to latitude 42°30'00" N., longitude 87°59'00" W.; to latitude 42°25'00" N., longitude 88°10'00" W.; to latitude 42°15'00" N., longitude 88°-10'00" W.; to latitude 42°15'00" N., longitude 88°25'00" W.; to latitude 41°-55'00" N., longitude 88°25'00" W.; to latitude 41°53'00" N., longitude 88°31'00" W.; to latitude 41°50'00" N., longitude 88°31'00" W.; thence counterclockwise via the arc of a 5-mile radius circle centered on the Aurora Municipal Airport (latitude 41°46'14" N., longitude 88°28'-16" W.) to latitude 41°48'00" N., longitude 88°52'50" W. to latitude 41°50'00" N., longitude 88°12'00" W. to point of beginning and that airspace extending upward from 1,200 feet above the surface within the area bounded by a line beginning at latitude 41°55'00" N., longitude 89°50'00" W. to latitude 41°55'00" N., longitude 88°30'00" W. to latitude 42°30'00" N., longitude 88°30'00" W. to latitude 42°30'00" N., longitude 87°00'-00" W. to latitude 41°20'00" N., longitude 87°00'00" W. to latitude 41°20'00" N., longitude 85°50'00" W. to latitude 41°00'00" N., longitude 85°50'00" W. to latitude 40°45'00" N., longitude 86°33'-00" W. to latitude 40°45'00" N., longitude 88°40'00" W. to latitude 41°10'00" N., longitude 88°40'00" W. to latitude 41°10'00" N., longitude 89°50'00" W. thence north to point of beginning.

7. Designate the Morris, Ill., transition area as that airspace extending upward from 700 feet above the surface within a 4-mile radius of the Morris Municipal Airport (latitude 41°25'46" N., longitude 88°25'12" W.) and within 2 miles each side of the Joliet, Ill., VORTAC 213° radial extending from the 5-mile radius area to the VORTAC.

8. Designate the Kankakee, Ill., transition area as that airspace extending upward from 700 feet above the surface within a 5-mile radius of the Greater Kankakee Airport (latitude 41°04'17" N., longitude 87°50'56" W.), and within 2 miles each side of the Peotone, Ill., VORTAC 192° radial extending from the 5-mile radius area to the VORTAC; and within 2 miles each side of the 042° and 222° bearings from the Greater Kankakee Airport extending from the 5-mile radius area to 8 miles NE and SW of the airport.

9. Designate the Sterling, Ill., transition area as that airspace extending upward from 700 feet above the surface within a 5-mile radius of Whiteside County Airport and 2 miles either side of the 168° bearing from the Whiteside County Airport extending from the 5-mile radius area to 8 miles south of the Whiteside County Airport.

10. Designate the Dixon, Ill., transition area as that airspace extending upward from 700 feet above the surface within a 5-mile radius of Charles R. Walgreen Field, Dixon, Ill. (latitude 41°50'03" N., longitude 89°26'37" W.), and within 2 miles each side of the Polo, Ill., VORTAC 155° radial extending from the 5-mile radius area to the VORTAC.

11. Revoke the Chicago, Bradford, Danville, Fort Wayne, Lafayette, Pontiac, Milwaukee, Moline, Peotone and Peru control area extensions.

The floors of the airways that would traverse the transition areas proposed herein would automatically coincide with the floors of the transition areas.

The proposed alterations to the Chicago Midway, O'Hare, Meigs control zones and the Glenview and Joliet control zones would provide protection for aircraft executing the prescribed instrument approach and departure procedures at the airports within these control zones. The St. Charles control zone would be retained as currently designated.

The actions proposed herein would raise the floor of controlled airspace beyond the immediate vicinity of Greater Chicago from 700 feet to 1,200 feet above the surface and, as a result, would make such airspace available for other uses. However, sufficient controlled airspace with floors of 700 feet above the surface would be retained to provide adequate protection for aircraft executing prescribed instrument approach, departure and radar vectoring procedures at Midway, O'Hare, Meigs, Gary, Glenview, Fort Sheridan, Waukegan, Chicagoland, Sky Harbor, Pal-Waukee, Crystal Lake, Elgin, DuPage County, Aurora, Joliet, Morris, Dixon, Kankakee, and Whiteside County Airports. The proposed transition areas eliminate the necessity for the Chicago, Bradford, Danville, Fort Wayne, Lafayette, Pontiac, Milwaukee, Moline, Peotone and Peru control area extensions.

Certain minor revisions to prescribed instrument procedures would accompany the actions proposed herein, but operational complexity would not be increased nor would aircraft performance characteristics or established landing minimums be adversely affected.

In addition to complimenting the control zones and the transition areas extending from 700 feet above the surface, the transition area extending upward from 1200 feet above the surface would provide protection for aircraft utilizing the Chicago, Illinois, Air Route Traffic Control Center's long range radar vectoring service which is provided through use of long range radar outlets located near McCook, Illinois, LaGrange, Indiana, and West Branch, Iowa.

Specific details of the changes to procedures and minimum instrument flight rule altitudes that would be required may be examined by contacting the Chief, Airspace Branch, Air Traffic Division, Central Region, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Mo., on December 9, 1964.

HENRY L. NEWMAN,
*Acting Director, Central Region.*

[Airspace Docket No. 64–CE–94]

## CONTROL ZONE AND TRANSITION AREA

### Proposed Alteration

The Federal Aviation Agency is considering amendments to Part 71 [New] of the Federal Aviation Regulations which would alter the controlled airspace in the Menominee, Mich., terminal area.

As a result of prior studies attendant to the implementation of the provisions of Amendments 60–21 and 60–29 of Part 60 of the Civil Air Regulations, the following controlled airspace is presently designated in the Menominee, Mich., terminal area:

1. The Menominee control zone is designated within a 5-mile radius of Menominee County Airport (latitude 45°-07'25" N., longitude 87°38'20" W.) and within 2 miles either side of the Menominee VOR 351° radial, extending from the 5-mile radius zone to 8 miles N of the VOR from 0700 to 2300 hours, local time, daily.

2. The Menominee transition area is designated as that airspace extending upward from 700 feet above the surface within a 5-mile radius of the Menominee County Airport (latitude 45°07'25" N., longitude 87°38'20" W.) and within 2 miles each side of the Menominee VOR 351° radial, extending from the 5-mile radius area to 8 miles N of the VOR; and that airspace extending upward from 1200 feet above the surface within 5 miles E and 8 miles W of the Menominee VOR 351° and 171° radials, extending from 12 miles N to 3 miles S of the VOR.

The Federal Aviation Agency, having completed a comprehensive review of the terminal airspace structural requirements in the Menominee terminal area, proposes the following airspace actions:

1. Designate the Menominee control zone to comprise that airspace within a 5-mile radius of Menominee County Airport (latitude 45°07'25" N., longitude 87°38'20" W.) within 2 miles each side of the Menominee VOR 351° radial, extending from the 5-mile radius zone to 8 miles NW of the airport. This control zone shall be effective during the times established by a Notice to Airmen and published continuously in the Airman's Information Manual.

2. Designate the Menominee transition area as that airspace extending upward from 700 feet above the surface within a 5-mile radius of Menominee County Airport (latitude 45°07'25" N., longitude 87°38'20" W.) within 2 miles each side of the Menominee VOR 351° radial, extending from the 5-mile radius area to 8 miles NW of the airport and that airspace extending upward from 1200 feet above the surface within 5 miles E and 8 miles W of the Menominee VOR 351° and 171° radials, extending from 12 miles N to 3 miles S of the VOR and within 5 miles SW and 8 miles NE of the 320° bearing from the Menominee County Airport extending from the airport to 12 miles NW of the airport.

The proposed alteration of the Menominee control zone will provide protection for aircraft executing the "Special" instrument approach procedure approved for use by North Central Airlines for Runway 14 at Menominee County Airport and others under contract with them. This control zone will be effective during the hours of operation of the weather reporting service to be provided by duly certificated personnel of North Central Airlines. Initially, weather observations and the dissemination of weather information will be from 0700 to 2300 hours, local time, daily. In the event of airline schedule changes, these hours may vary. Normally, thirty days notice will be given prior to any change by a Notice to Airmen and continuously published in the Airman's Information Manual.

The proposed extension of the Menominee 1200 foot transition area will provide protection for aircraft executing the procedure turn portion of the "Special" instrument approach procedure. The proposed extension of the Menominee 700 foot transition area will provide protection for aircraft executing the "Special" instrument approach procedure during the hours that the control zone is not in effect.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The pro-

posal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Missouri, on December 9, 1964.

HENRY L. NEWMAN,
*Acting Director, Central Region.*

[F.R. Doc. 64-13004; Filed, Dec. 18, 1964; 8:45 a.m.]

## [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 63-SW-64]

## CONTROL ZONE, CONTROL AREA EXTENSION AND TRANSITION AREA

### Proposed Alteration, Revocation and Designation

The Federal Aviation Agency is considering an amendment to Part 71 [New] of the Federal Aviation Regulations, which would alter the controlled airspace in the Laredo, Tex., terminal area.

The following controlled airspace is presently designated in the Laredo, Tex., terminal area:

1. The Laredo, Tex., control zone is designated as that airspace within a 10-mile radius of Laredo AFB and within 2 miles either side of the Laredo VORTAC 147° radial extending from the 10-mile radius zone to 10 miles SE of the VORTAC, excluding the portion outside the United States.

2. The Laredo, Tex., control area extension is designated as that airspace over United States territory within a 35-mile radius of the Laredo AFB, RBN.

The Federal Aviation Agency having completed a comprehensive review of the terminal airspace structure requirements in the Laredo, Tex., terminal area, including studies attendant to the implementation of the provisions of CAR Amendments 60-21/60-29, proposes the following airspace actions:

1. Redesignate the Laredo, Tex., control zone as that airspace within a 5-mile radius of Laredo AFB (latitude 27°32'35'' N., longitude 99°27'40'' W.); within 2 miles each side of the 327° bearing from the Laredo AFB RBN extending from the 5-mile radius zone to 7 miles NW of the RBN; excluding that portion outside the United States.

2. Revoke the Laredo, Tex., control area extension.

3. Designate the Laredo, Tex., transition area as that airspace extending upward from 700 feet above the surface within a 9-mile radius of Laredo AFB (latitude 27°32'35'' N., longitude 99°27'40'' W.); within 2 miles each side of the Laredo VORTAC 147° radial extending from the 9-mile radius area to 12 miles SE of the VORTAC, and within 2 miles each side of the 327° bearing from the Laredo AFB RBN extending from the 9-mile radius area to 12 miles NW of the RBN; and that airspace extending upward from 1,200 feet above the surface bounded by the arc of a 35-mile radius circle centered on the Laredo RBN; excluding that portion outside the United States; and that airspace extending upward from 4,500 feet MSL within an area bounded by a line beginning at latitude 27°44'00'' N., longitude 98°27'00'' W.; to latitude 28°07'00'' N., longitude 98°27'00'' W.; to latitude 28°05'00'' N., longitude 98°48'00'' W.; to latitude 28°06'00'' N., longitude 99°08'00'' W.; to latitude 28°08'20'' N., longitude 99°18'20'' W.; to latitude 28°32'00'' N., longitude 99°28'00'' W.; to latitude 28°52'00'' N., longitude 99°25'00'' W.; to latitude 28°20'00'' N., at the United States/Mexico border; thence SE along the United States/Mexico border to the NW portion of the arc of a 35-mile radius circle centered at the Laredo RBN; thence clockwise along this arc to latitude 27°39'10'' N., to point of beginning, excluding the portion extending upward from 4,500 feet MSL within Federal Airways.

The floors of the airways that would traverse the transition area proposed herein would automatically coincide with the floor of the transition area with the exception of those within the 4,500 foot MSL portion.

The proposed alterations to the Laredo control zone would provide protection for aircraft executing prescribed instrument approach and departure procedures. The proposed designation of the 1,200 foot floor of the Laredo transition area and the revocation of the Laredo control area extension would raise the floor of controlled airspace beyond the immediate vicinity of the Laredo AFB from 700 to 1,200 feet above the surface, yet the transition area proposed herein would provide protection for aircraft executing prescribed instrument holding, arrival and departure procedures within the Laredo terminal area. The portion of the transition area proposed with a floor of 4,500 feet MSL would provide protection for aircraft executing the higher altitude portion of standard instrument departure procedures from Laredo AFB.

Certain minor revisions to prescribed instrument procedures would be effected in conjunction with the actions proposed herein, but operational complexity would not be increased nor would aircraft performance characteristics or established landing minimums be adversely affected.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Chief, Air Traffic Division, Southwest Region, Federal Aviation Agency, Post Office Box 1689, Fort Worth, Tex., 76101. All communications received within 45 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Chief, Air Traffic Division. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Office of the Regional Counsel, Southwest Region, Federal Aviation Agency, Fort Worth, Tex. An informal Docket will also be available for examination at the Office of the Chief, Air Traffic Division.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Fort Worth, Tex., on December 9, 1964.

ARCHIE W. LEAGUE,
*Director, Southwest Region.*

[Airspace Docket No. 63-SW-102]

## TRANSITION AREAS

### Alterations; Supplemental Notice of Proposed Rule Making

In a notice of proposed rule making published in the FEDERAL REGISTER on September 12, 1964 (29 F.R. 12879), it was stated, in part, that the Federal Aviation Agency proposed to designate transition areas at San Antonio and Johnson City, Tex.

Subsequent to the publication of the notice, the Federal Aviation Agency has determined that the proposed transition areas require alteration to accommodate current IFR operations. Therefore, it is proposed herein to expand the 1,200 foot floor portion of the San Antonio transition area east of San Antonio for en route transitioning and radar vectoring requirements at minimum altitudes between San Antonio and Houston, Tex.; to delete a portion of the 6,500 foot floor portion of the San Antonio transition area; to increase the Johnson City transition area from a 5 to 7 mile radius to provide protection for aircraft climbing to 1,200 feet above the surface.

Accordingly, the notice is hereby amended, in part, to:

1. Propose the San Antonio transition area as that airspace extending upward from 700 feet above the surface bounded by a line beginning at latitude 29°22'30'' N., longitude 97°47'00'' W., thence W via latitude 29°22'30'' N. to and clockwise along the arc of a 23-mile radius circle centered at latitude 29°31'50'' N., longitude 98°28'12'' W., to latitude 29°46'30'' N., E of longitude 98°30'00'' W.; thence to latitude 29°43'00'' N., longitude 98°-01'30'' W., thence to point of beginning, and within 5 miles NE and 8 miles SW of the 149° bearing from the Randolph AFB RBN extending from the RBN to 12 miles SE, within 5 miles NE and 8 miles SW of the La Vernia VOR 149° radial extending from the VOR to 12 miles SE, within 2 miles each side of the 189° bearing from the Kelly AFB OM extending from the OM to 23 miles S, and within 2 miles each side of the Kelly VOR 189° radial extending from the VOR to 26 miles S; and that airspace extending upward from 1,200 feet above the surface bounded by a line beginning at latitude 30°33'30'' N., longitude 98°31'30'' W.; thence to latitude 29°45'30'' N., longitude 98°06'00'' W.; to latitude 29°-50'08'' N., longitude 97°25'45'' W.; to latitude 29°54'00'' N., longitude 96°49'00'' W.; to latitude 29°30'00'' N., longitude 96°39'30'' W.; to latitude 29°30'00'' N., longitude 97°26'00'' W.; to latitude 29°19'45'' N., longitude 97°26'00'' W.; to latitude 29°00'00'' N., longitude 97°43'00'' W.; to latitude 28°43'30'' N., longitude 98°17'30'' W.; to latitude 28°54'00'' N., longitude 99°05'00'' W.; to latitude 30°10'40'' N., longitude 99°18'40'' W.; thence to point of beginning; and that airspace extending upward from 4,500 feet MSL bounded by a line beginning at latitude 29°24'00'' N., and the arc of a 75-mile radius circle centered at latitude 29°38'37.7'' N., longitude 98°27'39.7'' W.; thence clockwise along this arc to longitude 98°33'00'' W.; thence to latitude 30°33'30'' N., longitude 98°31'30'' W.; to latitude 30°10'40'' N., longitude 99°18'40'' W.; to latitude 29°19'50'' N., longitude 99°10'30'' W.; thence to point of beginning; and that airspace extending upward from 6,500 feet MSL bounded by a line beginning at latitude 29°30'00'' N., longitude 97°26'00'' W.; to latitude 29°30'00'' N., longitude 96°39'30'' W.; to latitude 29°08'00'' N., longitude 97°00'00'' W.; to latitude 29°00'00'' N., longitude 97°17'00'' W.; to latitude 29°00'00'' N., longitude 97°43'00'' W.; to latitude 29°19'45'' N., longitude 97°26'00'' W.; thence to a point of beginning; excluding the portions of the transition area with floors of 4,500 and 6,500 feet MSL that lie within federal airways.

2. Propose the Johnson City transition area as that airspace extending upward from 700 feet above the surface within a 7-mile radius of the Johnson City, Tex. airport (latitude 30°15'20'' N., longitude 98°37'15'' W.); and within 2 miles each side of the 175° bearing from the Johnson City RBN extending from the 7-mile radius area to 8 miles S of the RBN.

In order to provide interested persons time to adequately evaluate this proposal, as modified herein, and an opportunity to submit additional written data, views or arguments, the date for filing such material is extended to 45 days after the date of publication of this supplemental notice in the FEDERAL REGISTER.

Communications should be submitted in triplicate to the Chief, Air Traffic Division, Southwest Region, Federal Aviation Agency, Post Office Box 1689, Fort Worth, Tex., 76101.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Fort Worth, Tex., on December 9, 1964.

ARCHIE W. LEAGUE,
*Director, Southwest Region.*

[F.R. Doc. 64-13006; Filed, Dec. 18, 1964; 8:46 a.m.]

## [ 14 CFR Part 71 [New] ]

[Airspace Docket No. 64-CE-78]

## TRANSITION AREA

### Proposed Designation

The Federal Aviation Agency is considering an amendment to Part 71 [New] of the Federal Aviation Regulations to designate controlled airspace in the Auburn, Ind., terminal area.

Having completed a comprehensive review of airspace requirements at Auburn, Ind., including studies attendant to the implementation of the provisions of Amendments 60-21 and 60-29 of the Civil Air Regulations, the Federal Aviation Agency proposes to establish a transition area at Auburn, Ind.

The proposed Auburn transition area would be designated to comprise that airspace extending upward from 700 feet above the surface within a 5-mile radius of the Auburn Airport (latitude 41°19'00'' N., longitude 85°04'00'' W.) and within 2 miles each side of the Fort Wayne, Ind., VORTAC 015° radial extending from the 5-mile radius area to 7 miles S of the Auburn Airport.

Instrument approach and departure procedures for the Auburn, Ind., Airport are presently executed within the controlled airspace of VOR Federal Airways. However, the implementation of Amendments 60-21 and 60-29 of the Civil Air Regulations in the Fort Wayne, Ind., area (Airspace Docket No. 63-CE-127) will result in the floor of the airspace in the Auburn, Ind., area being raised to 1,200 feet above the surface. The designation of a transition area with a floor of 700 feet at Auburn, Ind., will provide protection of aircraft executing instrument approach and departure procedures at Auburn Airport.

Specific details of the changes to procedures that would be required may be examined by contacting the Chief, Airspace Branch, Air Traffic Division, Central Region, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views, or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Mo., on December 3, 1964.

EDWARD C. MARSH,
*Director, Central Region.*

# Notices

## DEPARTMENT OF COMMERCE

### National Bureau of Standards

### STANDARD FREQUENCY AND TIME BROADCASTS BY NBS RADIO STATIONS

#### Notice of Changes

I. The Bureau International de l'Heure (B.I.H.) has announced that the fractional offset from nominal of coordinated transmissions for 1965 will be:

$$-150\times10^{-10}$$

Accordingly, the frequencies of HF transmissions and VLF transmissions from NBS stations WWV, WWVH, and WWVL, will be offset by this amount from standard frequencies controlled by the United States Frequency Standard (USFS).

This offset for 1965 remains the same as that for 1964.

As in the past, signal pulses which are emitted from WWV and WWVH will be in synchronism, to within one millesecond, with those from other U.S. and foreign stations. These signals are approximately within 0.1 second of UT2. UT2 is closely associated with the rotation of the earth on its axis.

II. On January 1, 1965, the standard carrier broadcasts from the National Bureau of Standards LF station, WWVB, will be maintained without offset with respect to the USFS at the frequency of 60.0 kHz within a tolerance limit of $\pm2\times10^{-11}$.

As in the past, time pulses which are emitted from WWVB will be produced by amplitude modulation of the carrier. Each pulse is initiated at the same relative phase of a cycle of the carrier. The pulses will be repeated at intervals of 60 kilocycles of the 60 kHz carrier, that is, once a second. In this way the international unit of time, the second, will be made directly available to listeners.

The phase of these periodic time pulses relative to the carrier phase will be shifted by a step adjustment of 200 ms no more often than once each month in order to remain within approximately 100 ms of the UT2 scale. Adjustments will always be carried out at 0000 UT on the first of each month.

Keyed Morse Code announcements, which provide the time difference: UT2 minus time of pulse, will be broadcast from WWVB in the way used for WWV and WWVH. During the identification period on the hour and every 20 minutes thereafter there will be broadcast from WWVB in International Morse Code:

UT2 AD

or:

UT2 SU

followed by a 3-digit number. This three-digit number is the difference in milliseconds. To obtain UT2, add the difference to the time indicated by the time pulse if the AD is broadcast. Subtract if SU is broadcast. These differences will be revised daily, the new value appearing for the first time during the day after 0 hours Universal Time continuing as indicated for the following 24-hour period. Daily UT2 information is obtained from weekly forecasts of UT2 provided by the U.S. Naval Observatory in accordance with the close cooperation maintained between the two agencies.

Advance announcements in the FEDERAL REGISTER will be made each month stating whether a step adjustment is to be made or not on the first of the following month, so that listeners can be adequately prepared.

These actions are in accordance with the NBS mission and follow the recent action of the International Committee of Weights and Measures which designated the frequency characteristic of a certain energy transition made by the Cesium atom to be used temporarily as the basis for the physical measure of time. They will also lead to information pertaining to the answer to a question concerning methods for providing both the epoch of UT2 and the international unit of time interval proposed by the U.S. Study Group VII of the CCIR (International Radio Consultative Committee).

A. V. ASTIN,
*Director,*
*National Bureau of Standards.*

[F.R. Doc. 64-13009; Filed, Dec. 18, 1964; 8:46 a.m.]

### UNIVERSAL TIME SIGNALS

#### Adjustment in Phase

An adjustment in the transmission of Universal Time Signals is announced jointly by the U.S. Naval Observatory and the National Bureau of Standards, U.S. Department of Commerce. The clocks at the radio stations will be retarded 100 milliseconds 1 January 1965 at zero hours, Universal Time (7:00 p.m., e.s.t., of 31 December).

The adjustment becomes necessary because of changes in speed of rotation of the earth, as determined by astronomical observation. Such adjustments are made following an international agreement, according to a plan whereby the times of emission of Universal Time signals are synchronized to about 1 millisecond and are maintained within about 100 ms of the Universal Time scale, UT2. The last previous adjustment in phase of Universal Time signal pulses was made 1 September 1964.

The countries participating in the coordination of Universal Time signal transmissions are Argentina, Australia, Canada, Czechoslovakia, France, Italy, Japan, South Africa, Switzerland, United Kingdom, and the United States.

The U.S. stations include the NBS stations WWV, Greenbelt, Md.; and WWVH, Maui, Hawaii; and the U.S. Navy stations NBA, Canal Zone; NPG, San Francisco, Calif.; NPM, Lualualei, Hawaii; NPN, Guam, Mariana Islands; and NSS, Annapolis, Md.

A. V. ASTIN,
*Director,*
*National Bureau of Standards.*

T. S. BASKETT,
*Captain, U.S. Navy, Superintendent, U.S. Naval Observatory.*

[F.R. Doc. 64-13010; Filed, Dec. 18, 1964; 8:46 a.m.]

### TIME SIGNALS BROADCAST BY NBS RADIO STATION WWVB, FORT COLLINS, COLO.

#### Adjustment in Phase

An adjustment in the phase of time signals from radio station WWVB is announced by the National Bureau of Standards. On 1 January 1965, the clock at the station will be retarded by 200 ms at 0000 hours UT (7:00 p.m., e.s.t., of 31 December).

This adjustment initiates a service, announced elsewhere in this issue of the FEDERAL REGISTER, whereby the international unit of time, the second will be made directly available to listeners. The phase adjustment merely insures that the time pulses will remain within about 100 ms of the UT2 scale. It is made necessary because of changes in the speed of rotation of the earth, with which the UT2 scale is associated.

Daily UT2 information, which enables the predictions to be made of this and future adjustments, is furnished weekly to the NBS by the Naval Observatory in accordance with the close cooperation maintained between the two agencies.

A. V. ASTIN,
*Director,*
*National Bureau of Standards.*

## ATOMIC ENERGY COMMISSION

[Docket No. 50-220]

### NIAGARA MOHAWK POWER CORP.

#### Application for Provisional Construction Permit; Order and Notice of Hearing

1. Notice is hereby given that the hearing upon the above application will be commenced at 10:00 a.m. on Tuesday, January 19, 1965 in the main courtroom of the County Courthouse, East Oneida Street, Oswego, N.Y. The issues to be considered at the hearing are those stated in the Atomic Energy Commission's notice of hearing which was published on November 13, 1964 at 29 F.R. 15267. Pursuant to the law and published regulations cited in the above notice, certain procedures governing the hearing were clarified and defined at the Prehearing Conference which was held at Oswego, N.Y. on December 15, 1964 in conformity with the Atomic Safety and Licensing Board's order and notice as published on December 4, 1964 at 29 F.R. 16266.

2. Procedures for intervention and for limited participation in this proceeding by interested persons are set out in the above-cited notice of hearing and in the Commission's rules of practice there cited. In view of the postponement of the hearing, and in conformity with the notice of hearing, it is now specified that the time for filing petitions for leave to intervene is extended to December 31, 1964.

*It is ordered,* This 17th day of December 1964 that this Order and Notice of Hearing be promptly published in the FEDERAL REGISTER.

Issued: December 17, 1964, Germantown, Md.

ATOMIC SAFETY AND LICENSING BOARD,
J. D. BOND,
*Chairman.*

## CIVIL AERONAUTICS BOARD

[Docket No. 15677]

### ALL NIPPON AIRWAYS CO., LTD.

#### Notice of Hearing

Application of All Nippon Airways Company, Ltd., for an amendment of its foreign air carrier permit to authorize it to engage in foreign air transportation of persons, property, and mail over a regular route between a point or points in Japan and Naha, Okinawa.

Notice is hereby given, pursuant to the Federal Aviation Act of 1958, as amended, that the above-entitled proceeding is hereby assigned for hearing on January 13, 1965, at 10 a.m., in room 607, Universal Building, Connecticut and Florida Avenues NW., Washington, D.C., before Examiner Ralph L. Wiser.

Without limiting the scope of the issues raised by the pleadings in this proceeding, particular attention will be directed to the following matters:

1. Will the air transportation proposed in the application be in the public interest?

2. Is the applicant fit, willing, and able properly to perform the air transportation proposed in its application and to conform to the provisions of the Federal Aviation Act of 1958, as amended, and the rules, regulations, and requirements of the Board thereunder?

3. If the application is granted, what terms, conditions, and limitations, if any, should be imposed?

4. Is substantial ownership and effective control of the applicant vested in nationals of Japan?

For further details with respect to the issues in this proceeding, interested persons are referred to the documents filed by the parties and the examiner's report of prehearing conference served December 4, 1964, which are on file with the Docket Section of the Civil Aeronautics Board.

Notice is further given that any person other than parties of record desiring to be heard in this proceeding shall file with the Board on or before January 6, 1965, a statement setting forth the issues of fact or law raised by this proceeding which he desires to controvert.

Dated at Washington, D.C., December 15, 1964.

# FEDERAL AVIATION AGENCY

[OE Docket No. 64-SW-5, amended]

## LANFORD TELECASTING CO., INC. (KALB-TV)

### Determination of No Hazard to Air Navigation

The Federal Aviation Agency issued a determination of no hazard to air navigation on September 29, 1964, with regard to a proposal by Lanford Telecasting Co., Inc. (KALB-TV), Alexandria, La., to construct a television antenna structure at latitude 31°02'14" north, longitude 92°29'44" west, near Forest Hill, Louisiana. The overall height of the structure would be 1,749 feet above mean sea level (1,589 feet above ground).

Subsequent to the issuance of the determination, the proponent advised that due to property availability it was necessary to adjust the site approximately 100 feet north and 100 feet east of the approved location. The elevations would remain the same.

The Agency has reviewed the effects the new site would have on the safe and efficient utilization of the navigable airspace. The review has disclosed that the amended proposal would have no greater effect upon aeronautical operations, procedures or minimum flight altitudes than the original proposal.

Therefore, pursuant to the authority delegated to me by the Administrator, Federal Aviation Agency's OE Docket No. 64-SW-5 is hereby revised to amend the coordinates from latitude 31°02'14" north, longitude 92°29'44" west, to latitude 31°02'15.1" north, longitude 92°29'-43" west.

This amended determination is effective as of the date of issuance.

Issued in Washington, D.C., on December 11, 1964.

GEORGE R. BORSARI,
*Chief, Obstruction Evaluation Branch.*

# FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 15249, 15250; FCC 64M-1246]

## CLEVELAND TELECASTING CORP. AND SUPERIOR BROADCASTING CORP.

### Order Continuing Prehearing Conference

In re applications of Cleveland Telecasting Corp., Cleveland, Ohio, Docket No. 15249, File No. BPCT-3191; The Superior Broadcasting Corp., Cleveland, Ohio, Docket No. 15250, File No. BPCT-3243; for construction permits for new television broadcast stations.

The Hearing Examiner having under consideration a request, filed on December 11, 1964 by Cleveland Telecasting Corp., for continuance to January 6, 1965 of the further session of the prehearing conference in the above-entitled proceeding, presently scheduled for December 15, 1964; and

It appearing, that because of a death in the family of one of the attorneys for the applicant Cleveland Telecasting Corp., and because of the pressure of heavy workloads for both attorneys, it will not be possible for either of them to be present at the prehearing conference as presently scheduled; and

It further appearing, That counsel for The Superior Broadcasting Corp. and for the Broadcast Bureau have informally agreed to a waiver of the four-day requirement of the Commission's Rules and indicated that they have no objection to a grant of the instant request for continuance;

*It is ordered,* This 14th day of December 1964, that the request be and it is hereby granted; and the further session of the prehearing conference in the above-entitled proceeding, presently scheduled for December 15, 1964 at 10:00 a.m., be and it is hereby rescheduled for January 6, 1965, at 10:00 a.m., in Washington, D.C.

Released: December 14, 1964.

A prehearing conference having been held on December 11, 1964, and it appearing from the record made therein that certain agreements were reached and certain rulings made which should be formalized by order:

*It is ordered,* This 14th day of December 1964, that:

(1) The direct affirmative case of Warner Bros. Pictures, Inc. on issues 3, 4 and 5 shall be entirely in the form of sworn written exhibits;

(2) The parties' direct affirmative cases on issues 1, 2, 6 and 7 shall be presented orally, provided that on or before January 11, 1965, the parties may file with the Hearing Examiner a written stipulation to the effect that all or any part of their direct affirmative cases are to be presented in the form of sworn written exhibits;

(3) Copies of the applicants' exhibits directed to issues 3, 4 and 5 shall be exchanged on or before March 11, 1965, and, in the event the parties stipulate to present any of their cases on issues 1, 2, 6 and 7 in writing, copies of the exhibits directed to such issues shall be exchanged on or before March 1, 1965;

(4) In the event the parties exchange any exhibits directed to issues 1, 2, 6 and 7, a hearing session shall be convened on March 15, 1965, commencing at 10:00 a.m. in the offices of the Commission at Washington, D.C., for the purpose of offering such exhibits into evidence and entertaining any objections thereto; and,

(5) In any event, a hearing session for the purpose of offering into evidence the Warner Bros. exhibits directed to issues 3, 4 and 5 and entertaining any objections thereto shall convene on April 1, 1965, at 10:00 a.m., said hearing session to be consolidated with the hearing session in Docket 15667, et al.

# FEDERAL HOME LOAN BANK BOARD

[No. 18,667]

## MEMBERS OF FEDERAL SAVINGS AND LOAN ASSOCIATIONS

### Notice Concerning Annual Meetings on Inauguration Day

DECEMBER 16, 1964.

Resolved That the Federal Home Loan Bank Board, upon the basis of consideration by it of the advisability of publishing its policy concerning the treatment of Inauguration Day as a "legal holiday" for purposes of section 1 of the Prescribed Bylaws, hereby adopts the following statement concerning the holding of the annual meetings of members of Federal savings and loan associations on Inauguration Day:

(a) For the purpose of compliance with section 1 of the Prescribed Bylaws, Inauguration Day shall be deemed a "legal holiday" in the District of Columbia metropolitan area, as defined in Public Law 85–1, approved January 11, 1957. A Federal association within this area may hold its annual meeting on the first business day thereafter.

(b) A Federal association located outside the District of Columbia metropolitan area, as defined in Public Law 85–1, may treat Inauguration Day as a "legal holiday" for the purpose of section 1 of the Prescribed Bylaws, and may hold its annual meeting on the first business day thereafter.

Resolved further That the Secretary to the Board is directed to transmit the foregoing to the Office of the Federal Register for publication.

By the Federal Home Loan Bank Board.

## UNITED STATES ATLANTIC AND GULF-SANTO DOMINGO CONFERENCE

### Notice of Agreement Filed for Approval

Notice is hereby given that the following Agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733; 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1321 H Street NW., Room 301. Comments including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, not later than December 22, 1964. A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the comments should indicate that this has been done.

Notice of Agreement Filed for Approval by:

Mr. C. D. Marshall, Chairman,
United States Atlantic & Gulf-Santo Domingo Conference,
11 Broadway,
New York, N.Y. 10004.

Agreement No. 6080–12 between the member lines of the United States Atlantic & Gulf-Santo Domingo Conference has been filed with the Commission for approval to preface Item 6a of the basic agreement, as amended, which presently reads:

All freights and charges on southbound cargo must be prepaid in the United States in United States Currency at the time such freight or charges shall become due and payable and no part thereof shall be directly or indirectly, illegally or unlawfully, refunded or remitted in any manner or by any device. The Carrier may extend credit in those cases where evidence of financial responsibility has been furnished the Carrier.

with the following:

Except as may be otherwise unanimously agreed and provided in the governing tariff.

Dated: December 18, 1964.

By order of the Federal Maritime Commission.

# FEDERAL POWER COMMISSION

[Docket No. CP65–162]

## CITIES SERVICE GAS CO.

### Notice of Application

DECEMBER 14, 1964.

Take notice that on December 7, 1964, Cities Service Gas Co. (Applicant), Oklahoma City, Okla., filed an application in Docket No. CP65–162 pursuant to sections 7 (b) and (c) of the Natural Gas Act for permission and approval to abandon certain facilities and for a certificate of public convenience and necessity authorizing the construction and operation of certain transmission and compressor facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant proposes the following:

(A) Construction of approximately 25 miles of 26-inch pipeline and one mile of 16-inch pipeline between Applicant's Tonganoxie Compressor Station, Leavenworth County, Kans., and The Gas Service Co.'s distribution systems, Platte County, Mo. and Wyandotte County, Kans.

(B) Replacement of approximately 9.7 miles of the existing Lawrence-Tonganoxie 16-inch pipeline with 26-inch pipeline, Douglas and Leavenworth Counties, Kans.

(C) Construction of approximately .6 mile of 20-inch pipeline to connect Applicant's Ottawa-Lawrence 20-inch pipeline with its North Topeka 16-inch pipeline, Douglas County, Kans.

(D) Reclamation of one 2,000 horsepower compressor unit at the Marion Compressor Station, Marion County, Kans., and reinstallation of said unit at the Americus Compressor Station, Lyon County, Kans.

(E) Construction of approximately 1.45 miles of 8-inch pipeline to serve the town of Humboldt, Kans.; replacement of approximately 96 mile of the existing Humboldt 5½-inch pipeline with 8-inch pipeline; and reclamation of approximately 1.68 miles of the existing Humboldt 8-inch pipeline and regulator setting, all in Allen County, Kans.

(F) Looping of approximately 8 miles of the Hugoton Station 30-inch intake pipeline with 26-inch pipeline, Grant County, Kans.

(G) Reclamation of two 1,000 horsepower compressor units at the Pampa Compressor Station in Gray County, Tex., and reinstallation of said units, together with two new 2,000 horsepower units, at a proposed Burnett Compressor Station, Carson County, Tex.

(H) Installation of 230 additional horsepower at both the White Deer and Hughey Field Compressor Stations, Carson and Gray Counties, Tex.

The application states that the proposed facilities are necessary to either (1) provide for new delivery facilities into its major Kansas City market area and to maintain balanced delivery pat-

terns to distribution company customers in the area; (2) maintain system inputs into its transmission system and ratable taking from producing areas connected to its system, by offset, declining wellhead pressures; (3) increase deliverability of its transmission system by more fully utilizing existing compressor facilities; or (4) replace facilities which have become physically deteriorated to the extent replacement is deemed necessary.

The estimated total cost of Applicant's proposed construction is $5,409,000, and will be financed with funds on hand; said estimated cost reflects the cost of removal and salvage credit for facilities to be abandoned.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate and permission and approval for the proposed abandonment are required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

## CITIES SERVICE GAS CO. ET AL.

### Notice of Further Extension of Time

DECEMBER 14, 1964.

Cities Service Gas Co., Docket No. RP64-9; Area Rate Proceeding, et al. (Hugoton Anadarko Area), Docket No. AR64-1, et al.; Columbian Fuel Corp., Docket No. RI61-316, RI61-518, RI62-49; Cities Service Oil Co., Docket No. RI63-485 and RI65-269.

Upon consideration of the motion filed on December 2, 1964 by counsel for Cities Service Oil Co. and Columbian Fuel Corp. for an extension of time within which to file their prepared direct testimony and exhibits on the affiliated purchased gas cost issue in the above-designated matter;

Notice is hereby given that the time is further extended to and including: February 19, 1965 within which Cities Service Gas Co., Cities Service Oil Co., and Columbian Fuel Corp. shall serve upon all parties of record their prepared testimony and exhibits; April 30, 1965 within which Staff Counsel shall file their testimony and exhibits upon all parties; and May 14, 1965 within which intervenors proposing to present evidence on the aforementioned issue shall file their prepared testimony and exhibits upon all parties.

Further, notice is hereby given that the prehearing conference presently scheduled to be held on March 23, 1965 is postponed to May 25, 1965 at 10:00 a.m. in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D.C.

## KNOXVILLE UTILITIES BOARD, INC., ET AL.

### Notice of Extension of Time

DECEMBER 14, 1964.

Knoxville Utilities Board, et al., Complainant, v. East Tennessee Natural Gas Co., Defendant; Docket No. RP65-4.

Upon consideration of the request filed on December 2, 1964 by counsel for East Tennessee Natural Gas Co. for an extension of time within which to serve its prepared testimony and exhibits comprising its direct case;

Notice is hereby given that the time is extended to and including: January 8, 1965 within which East Tennessee Natural Gas Co. shall serve upon all parties its prepared testimony and exhibits comprising its direct case; and January 29, 1965 within which staff counsel and all other parties to this proceeding proposing to present evidence herein shall serve on all parties their prepared testimony and exhibits.

Further, the prehearing conference presently scheduled to commence at 10:00 a.m. on January 12, 1965 is postponed to February 9, 1965 at 10:00 a.m., e.s.t., in a hearing room of the Federal Power Commission, 441 G Street NW., Washington, D.C., 20426.

[Docket Nos. CP65-84, CP65-85]

## MANUFACTURERS LIGHT AND HEAT CO. AND TEXAS EASTERN TRANSMISSION CORP.

### Notice of Applications

DECEMBER 15, 1964.

Take notice that on September 30, 1964, The Manufacturers Light and Heat Co. (Manufacturers), 800 Union Trust Building, Pittsburgh, Pa., 15219, filed in Docket No. CP65-84, and Texas Eastern Transmission Corp. (Texas Eastern), Southern National Bank Building, Houston, Tex., filed in Docket No. CP65-85, their respective applications pursuant to section 7 of the Natural Gas Act for certificates of public convenience and necessity authorizing the construction and operation of facilities, and the sale and delivery of natural gas, all as more fully set forth in the applications on file with the Commission and open to public inspection.

Manufacturers proposes to provide an additional delivery point for the sale and delivery of a volume of natural gas to United Gas Improvement Co. (UGI) ranging from 46,800 Mcf annually in 1965 to 74,300 Mcf annually in 1969, for resale in the Borough of Bally, Pa., and surrounding area.

Texas Eastern proposes (1) to construct and operate measuring and regulating facilities on its 30-inch Penn-Jersey pipeline at said delivery point in Berks County, Pa., and make additional deliveries to UGI for the account of Manufacturers, (2) to increase its maximum daily deliveries of natural gas to the City of Pulaski, Tenn. by 600 Mcf, (3) reduce and convert the maximum daily quantity of firm gas allocated to the City Gas Co. of New Jersey (City Gas)[1] from 4080 Mcf daily under Rate Schedule SGS-D to 1285 Mcf daily under Rate Schedule GS-D and 857 Mcf daily under Rate Schedule WS for a total reduction of 1938 Mcf, and (4) reduce the volume of gas authorized to be sold to Equitable Gas Co. by the amount contracted for by Waynesburg Gas Co. prior to the merger of Waynesburg with Equitable, i.e., 2,195 Mcf daily under Texas Eastern's Rate Schedule GS and of 337 Mcf daily under Texas Eastern's Rate Schedule WS for a total reduction to Equitable of 2,532 Mcf daily.

The cost of the measuring and regulating facilities to be constructed by Texas Eastern is estimated to be $27,000.00. Manufacturers will reimburse Texas Eastern for the cost thereof.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 6, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on these applications if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the requested authorizations are required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

[1] Modification of the order of the Commission issued in Docket No. G-9784 on October 9, 1956, in connection with Opinion No. 296, authorizing an increase of Maximum Daily Quantity to City Gas Co. of New Jersey under Texas Eastern's SGS-D Rate Schedule up to 4,000 Mcf daily.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-13040; Filed, Dec. 18, 1964; 8:48 a.m.]

[Docket No. CP65-86]

## MICHIGAN GAS STORAGE CO.

### Notice of Application

DECEMBER 15, 1964.

Take notice that on September 30, 1964, as supplemented on December 2, 1964, Michigan Gas Storage Co. (Applicant), Jackson, Mich., filed in Docket No. CP65-86 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to construct and operate (1) approximately 31 miles of 26-inch pipeline, extending from a point of connection with Applicant's Main Line in Gratiot County, Mich., to a proposed point of interchange (to be known as Saginaw Junction) with the so-called "North Line" of Panhandle Eastern Pipe Line Co. (Panhandle) in Saginaw County, Mich.; and (2) a new interchange or delivery point with Panhandle at the eastern end of the proposed 26-inch pipeline, at Saginaw Junction.

The application, as supplemented, states that the proposed facilities are required in order to increase the peak day deliverability of Applicant's facilities to Consumers Power Co. (Consumers) for the Saginaw Bay City Area. Consumers peak day capability in the area at present is approximately 171,400; the proposed facilities will enable Consumers to meet anticipated peak day requirements of approximately 186,000 Mcf during the 1965-66 heating season, and anticipated peak day requirements of 284,000 Mcf by 1969-70.

The estimated cost of Applicant's proposed construction is $2,995,000, and will be financed with internally generated funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-13041; Filed, Dec. 18, 1964; 8:48 a.m.]

[Docket No. RI65-292 etc.]

## H. J. MOSSER ET AL.

### Order Permitting Substitution of Rate Filing, Providing for Hearing on and Suspension of Proposed Change in Rate

DECEMBER 14, 1964.

H. J. Mosser, Docket No. RI65-292; J. C. Trahan, Drilling Contractor, Inc., Docket No. RI65-293; Jonnell Gas, Incorporated (Operator), et al., Docket No. RI65-331.

Each of the above-designated Respondents filed proposed increased rates from 17.24 cents to 18.74 cents per Mcf for jurisdictional sales of natural gas to Tennessee Gas Transmission Company from Texas District No. 4, which by orders issued October 30, 1964, in Docket Nos. RI65-292 and RI65-293 and November 27, 1964, in Docket Nos. RI65-292, RI65-293 and RI65-331[1] were respectively suspended and consolidated for immediate hearing.

On November 17, 1964, J. C. Trahan, Drilling Contractor, Inc. (Trahan) tendered for filing a proposed change in its presently effective rate schedule for sales of natural gas subject to the jurisdiction of the Commission. By the proposed change Trahan proposes to substitute the instant increased rate for the 18.74 cents per Mcf rate, designated as Supplement No. 7 to Trahan's Rate Schedule No. 17, which is under suspension at the present time in Docket No. RI65-293. The proposed change is contained in the following designated filing:

Description: Notice of Change, dated November 17, 1964.
Purchaser and producing area: Tennessee Gas Transmission Co. (Lopeno Field, Zapata County, Tex.) (R.R. District No. 4).
Rate schedule designation: Supplement No. 8 to Trahan's FPC Gas Rate Schedule No. 17.
Effective date: November 14, 1964.[2]
Amount of annual increase: $3,438.
Effective rate: 17.24 cents.[3]
Proposed rate: 18.0 cents per Mcf.[3]
Pressure base: 14.65 psia.

The proposed substitute increase to 18 cents tendered by Trahan represents a portion of the contractually due periodic increase. Since the proposed 18 cent rate does not pierce the 18 cent triggering level in Texas District No. 4, there is no necessity for holding an immediate hearing in this case. We shall therefore sever Docket No. RI65-293 from the above consolidated proceedings which are set for immediate hearing and cancel the immediate hearing previously ordered insofar as it relates to Docket No. RI65-293. We also consider it appropriate here to make the suspension period for Trahan's substitute rate filing the same as the suspension period provided for the original notice which has now been superseded.

Trahan's proposed increased rate and charge exceeds the applicable area price level for increased rates as set forth in the Commission's Statement of General Policy No. 61-1, as amended (18 CFR, Chapter I, Part 2, § 2.56).

The proposed changed rate and charge may be unjust, unreasonable, unduly discriminatory, or preferential, or otherwise unlawful.

The Commission finds:

(1) Good cause exists for permitting Trahan to substitute its proposed increased rate of 18 cents per Mcf, designated as Supplement No. 8 to Trahan's FPC Gas Rate Schedule No. 17, for the proposed rate of 18.74 cents suspended in the proceeding in Docket No. RI65-293, and for suspending the substitute proposed rate in said docket until April 14, 1965, the expiration date of the suspension period ordered for Trahan's previous filing.

(2) It is necessary and proper in the public interest and to aid in the enforcement of the provisions of the Natural Gas Act that the Commission enter upon a hearing concerning the lawfulness of the instant proposed change, and that Supplement No. 8 to Trahan's FPC Gas Rate Schedule No. 17 be suspended and the use thereof deferred as hereinafter ordered.

(3) Docket No. RI65-293 should be severed from the consolidated proceedings in Docket No. RI65-292 and RI65-331 and the immediate hearing previously ordered in Docket No. RI65-293 should be cancelled.

The Commission orders:

(A) Supplement No. 8 to Trahan's FPC Gas Rate Schedule No. 17 is hereby substituted for the previous rate filed in Docket No. RI65-293 and Supplement No. 7 to Trahan's FPC Gas Rate Schedule No. 17 is hereby deemed to be superseded.

(B) Pursuant to the authority of the Natural Gas Act, particularly sections 4 and 15 thereof, the Commission's rules of practice and procedure, and the regulations under the Natural Gas Act (18 CFR, Chapter I), a public hearing shall be held upon a date to be fixed by notice from the Secretary concerning the lawfulness of the proposed increased rate and charge contained in Supplement No. 8 to Trahan's FPC Gas Rate Schedule No. 17.

(C) Pending such hearing and decision thereon, Supplement No. 8 to Trahan's FPC Gas Rate Schedule No. 17 is hereby suspended and the use thereof deferred until April 14, 1965, and there-

[1] Jonnell Gas, Incorporated (Operator), et al. filed two increased rate proposals, one to 18.74 cents per Mcf and the other to 18.0 cents per Mcf, which were suspended in Docket No. RI65-331. It was noted in the aforementioned order of November 27, 1964, that had these producers filed "fractured" increased rates not in excess of 18 cents per Mcf, there would have been no necessity for setting these matters for immediate hearing.

[2] Effective date proposed by Trahan.

[3] Rates subject to downward Btu adjustment.

after until such further time as it is made effective in the manner prescribed by the Natural Gas Act.

(D) Neither the supplement hereby suspended, nor the rate schedule sought to be altered thereby, shall be changed until this proceeding has been disposed of or until the period of suspension has expired, unless otherwise ordered by the Commission.

(E) Docket No. RI65–293 is hereby severed from the consolidated proceedings in Docket Nos. RI65–292 and RI65–331 and the immediate hearing scheduled in Docket No. RI65–293 is hereby cancelled.

(F) Notices of intervention or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 and 1.37(f)) on or before January 25, 1965.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[Docket No. CP65–164]

## NORTHERN NATURAL GAS CO.

### Notice of Application

DECEMBER 15, 1964.

Take notice that on December 8, 1964, Northern Natural Gas Co. (Applicant), 2223 Dodge Street, Omaha, Nebr., filed in Docket No. CP65–164 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain facilities in Dakota County, Minn., all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks permission and approval to abandon measuring and regulating facilities and appurtenances originally installed to enable Minneapolis Gas Co. (Minneapolis) to serve the Orest and Crystal View Heights Housing Associations (Orest) in Dakota County, Minn.

The application states that due to current highway construction Minneapolis extended its distribution system in order to avoid interruption of service to Orest, and is presently serving the area through another existing measuring station, located approximately one mile south of the Orest Station. Since Minneapolis is no longer utilizing the Orest Station, Applicant requests permission and approval to abandon and remove this station.

The application further states that Minneapolis contributed the entire cost of constructing the Orest Station, and that Applicant will, therefore, refund to Minneapolis the original cost of the station less depreciation and the cost of removal. The adjusted refund to Minneapolis is stated to be $1,804.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that permission and approval for the proposed abandonment are required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE, *Secretary.*

[Docket No. CP65–163]

## PLAINS GAS FARMERS' CO-OPERATIVE SOCIETY OF HEREFORD, TEX.

### Notice of Application

DECEMBER 15, 1964.

Take notice that on December 7, 1964, Plains Gas Farmers' Co-operative Society of Hereford, Tex. (Applicant), Deaf Smith County, Tex., filed in Docket No. CP65–163 an application pursuant to section 7(a) of the Natural Gas Act for an order of the Commission directing Transwestern Pipeline Co. (Transwestern) to establish physical connection of its natural gas transmission facilities with the facilities of Applicant, and to sell and deliver natural gas to Applicant, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant requests an order directing Transwestern to establish physical connection in order to tie on already existing gas lines owned by members of Applicant, upon which there are presently located approximately 100 irrigation wells and a few residences, and seeks further authorization to make such other taps onto the line of Transwestern as may be necessary or expedient to serve the members of Applicant.

The estimated annual and peak day requirements of Applicant are stated to be 196,200 and 1,204 Mcf respectively.

The application states that the only initial cost to be incurred by Applicant is approximately $750 for each of four taps to be made onto the Transwestern line.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that an order is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE, *Secretary.*

[F.R. Doc. 64–13044; Filed, Dec. 18, 1964; 8:48 a.m.]

[Docket No. CP65–75]

## UNITED GAS PIPE LINE CO.

### Notice of Application

DECEMBER 15, 1964.

Take notice that on September 16, 1964, as supplemented on November 4, 1964, United Gas Pipe Line Co. (Applicant), 1525 Fairfield Avenue, Shreveport, La., filed in Docket No. CP65–75 an application pursuant to section 7(b) of the Natural Gas Act for permission and approval to abandon certain facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks permission and approval to abandon a total of approximately 4.76 miles of 2-inch pipe, along with appurtenant facilities, heretofore utilized to serve eight heater stations of Hess Pipe Line Co., formerly Gulf Refining Co. (Hess), located in Forrest, Perry and George Counties, Miss., and Mobile County, Ala. The application states that Hess has not operated these heaters since 1960, and that by letter agreement dated December 19, 1963, the parties agreed to the cancellation of the contract under which deliveries had been made.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity.

If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE, *Secretary.*

[Docket No. CP65–88]

## UNITED GAS PIPE LINE CO.

### Notice of Application

DECEMBER 14, 1964.

Take notice that on October 1, 1964, United Gas Pipe Line Co. (Applicant), 1525 Fairfield Avenue, Shreveport, La., filed in Docket No. CP65–88 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to construct and operate approximately 400 feet of two-inch pipeline and a sales meter and regulator station and appurtenant equipment, all in Hinds County, Miss., for the purpose of enabling Applicant to make deliveries of natural gas pursuant to an agreement between the parties dated September 3, 1964, to Stanton Prestressed Concrete Products Division of Service Construction Co., Inc. (Stanton), to meet Stanton's fuel requirements for the operation of its precast concrete products plant located near Byram, Hinds County, Miss.

Stanton's requirements for the initial three year period are estimated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 20,000 | 20,000 | 24,800 |
| Peak day (Mcf) | 64 | 64 | 80 |

The estimated cost of Applicant's proposed construction is $3,658, and will be financed with current funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commisson on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE, *Secretary.*

[Docket No. CP65–90]

## UNITED GAS PIPE LINE CO.

### Notice of Application

DECEMBER 14, 1964.

Take notice that on October 2, 1964, United Gas Pipe Line Co. (Applicant), 1525 Fairfield Avenue, Shreveport, La., filed in Docket No. CP65–90 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the transportation of natural gas, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to transport natural gas for Spencer Chemical Division (Spencer) of Gulf Oil Corp., pursuant to an agreement between the parties dated August 31, 1964. Applicant proposes to receive, in Lisbon Field, Claiborne Parish, La., natural gas belonging to Spencer, and transport and deliver such gas to Spencer's Vicksburg Chemical Plant in Warren County, Miss.

Estimated annual and peak day transportation for the initial three year period is stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 3,650,000 | 3,650,000 | 3,650,000 |
| Peak day (Mcf) | 15,000 | 15,000 | 15,000 |

The application states that no construction by Applicant will be involved inasmuch as the proposed transportation will take place by means of existing facilities.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

[Docket No. CP65–111]

## UNITED GAS PIPE LINE CO.

### Notice of Application

DECEMBER 15, 1964.

Take notice that on October 26, 1964, as supplemented on November 13, 1964, United Gas Pipe Line Co. (Applicant), 1525 Fairfield Avenue, Shreveport, La., filed in Docket No. CP65–111 an application pursuant to section 7(c) of the Natural Gas Act for a certificate of public convenience and necessity authorizing the construction and operation of natural gas facilities, all as more fully set forth in the application on file with the Commission and open to public inspection.

Specifically, Applicant seeks authorization to construct and operate approximately .8 mile of 6-inch pipe line, .7 mile of 4-inch pipe line, and a sales meter and appurtenant facilities, located in Harrison County, Miss., for the purpose of enabling Applicant to deliver natural gas to Richhold Chemicals, Inc. for use in its chemical plant near Gulfport, Harrison County, Miss.

Estimated annual and peak day requirements for the initial three year period are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 201,600 | 302,000 | 403,200 |
| Peak day (Mcf) | 700 | 1,400 | 1,400 |

The estimated cost of Applicant's construction is $56,456, which will be financed with current working funds.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on this application if no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter finds that a grant of the certificate is required by the public convenience and necessity. If a protest or petition for leave to intervene is timely filed, or if the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

# FOREIGN-TRADE ZONES BOARD

[Foreign-Trade Zone 2, Order 64]

## NEW ORLEANS, LA.

### Expansion of Foreign-Trade Zone

Pursuant to the authority granted in the Foreign-Trade Zones Act of June 18, 1934, as amended (48 Stat. 998–1003; 19 U.S.C. 81a–81u), the Foreign-Trade Zones Board has adopted the following order, which is promulgated for the information and guidance of all concerned:

Whereas, the Board of Commissioners of the Port of New Orleans, as Grantee of Foreign-Trade Zone No. 2, filed an application dated August 28, 1964, for permission to extend the boundary of the zone to include an area to the east, and to close an indentation in the boundary to the north, all of which will expand the size of the zone by 3.20 acres.

Whereas, the expansion will provide space for future development as well as benefit in handling certain cargoes moving in and out of the zone via direct water transportation.

Now, therefore, the Foreign-Trade Zones Board, after consideration, hereby orders:

That the boundaries of Foreign-Trade Zone No. 2 be, and they are hereby modified to include an area to the east adjacent to the Napoleon Avenue Wharf, and to close an indentation in the north side of the zone boundary, in conformity with Exhibits Nos. 1, 3, 8, 10(b), and 13 filed with the Board, and subject to settlement locally with the District Collector of Customs and the District Army Engineer, regarding requirements for physical security and protection of the revenue.

It is found that compliance with the notice, public rule making procedure, and effective date requirements of the Administrative Procedure Act (5 U.S.C. 1003) is unnecessary in connection with the issuance of this Order, because its application is restricted to one foreign-trade zone, and is of a nature that it imposes no burden on the parties of interest. The effective date of this Order is, therefore, upon publication in the FEDERAL REGISTER.

Signed at Washington, D.C., this 15th day of December 1964.

[SEAL] LUTHER H. HODGES,
*Secretary of Commerce, Chairman and Executive Officer, Foreign-Trade Zones Board.*

Attest: RICHARD H. LAKE,
*Executive Secretary,*
*Foreign-Trade Zones Board.*

# SECURITIES AND EXCHANGE COMMISSION

[File No. 24NY-5325]

## WESTMORE, INC.

### Order Temporarily Suspending Exemption, Statement of Reasons Therefor, and Notice of Opportunity for Hearing

DECEMBER 14, 1964.

I. Westmore, Inc. (Westmore), 137 South Avenue, Fanwood, N.J., a New Jersey corporation, filed with the Commission on December 1, 1960, a notification on Form 1–A and an offering circular, relating to a proposed public offering of 150,000 shares of its 40¢ par value common stock at $2.00 per share for an aggregate of $300,000 for the purpose of obtaining an exemption from the registration requirements of the Securities Act of 1933, as amended, pursuant to the provisions of section 3(b) thereof, and Regulation A promulgated thereunder.

II. The Commission has reasonable cause to believe that:

A. The terms and conditions of Regulation A have not been complied with in that:

1. The issuer failed to amend the notification and offering circular to reflect:

(a) A cash deficit which it incurred before the date of the offering circular;

(b) Certain loans which the named underwriter made to the issuer to help the latter meet its day-to-day expenses;

(c) The retention of A. T. Brod & Co. as an underwriter;

(d) Certain proposed mergers which were being negotiated as of the date of the offering.

2. The issuer filed a false and misleading report of sales on Form 2–A which:

(a) Falsely stated that the issuer continued to be in the business described in the offering circular when the issuer's sales were in totally unrelated lines;

(b) Falsely stated that Vincent, James & Co., Inc., New York, New York, was the sole underwriter when A. T. Brod & Co. performed that function and sold a major portion of the shares offered;

(c) Falsely stated the expenses of the underwriting by failing to disclose certain payments to persons who promoted the underwriting;

(d) Failed to disclose that the issuer had attempted to effect mergers with two corporations with proceeds from the underwriting; and

(e) Falsely stated that the number of shares held by each director was the same as that described in the offering circular.

B. The issuer purchased from a director non-exempted Westmore stock which was to be held in escrow for a period of one year from the date of the offering circular pursuant to Rule 17 CFR 230.253(c) of Regulation A, and hence it did not comply with the terms and conditions of said regulation.

C. The offering circular contains untrue statements of material facts and omits to state material facts necessary in order to make the statements made, in the light of the circumstances under which they were made, not misleading, particularly with respect to:

1. The educational background of the president and vice-president of Westmore;

2. The proposed use of proceeds of the offering in that the proceeds were expended on payments to and for the benefit of Westmore's officers; and

3. The actual source of Westmore's sales and the nature of its business, which was the distribution of sundry automobile accessories and not the development of scientific testing equipment.

D. The offerings was made in violation of section 17(a) of the Securities Act of 1933, as amended, and section 10(b) of the Securities Exchange Act of 1934 and Rule 10(b)(5) promulgated thereunder.

III. It appearing to the Commission that it is in the public interest and for the protection of investors that the exemption of the issuer under Regulation A be temporarily suspended:

*It is ordered*, Pursuant to Rule 261(a) of the general rules and regulations under the Securities Act of 1933, as amended, that the exemption under Regulation A be, and it hereby is, temporarily suspended.

Notice is hereby given that any person having any interest in the matter may file with the Secretary of the Commission a written request for hearing within thirty days after the entry of this order; that within twenty days after receipt of such request the Commission will, or at any time upon its own motion may, set the matter down for hearing at a place to be designated by the Commission for the purpose of determining whether this order of suspension should be vacated or made permanent, without prejudice, however, to the consideration and presentation of additional matters at the hearing; that if no hearing is requested and none is ordered by the Commission, this order shall become permanent on the thirtieth day after its entry and shall remain in effect unless or until it is modified or vacated by the Commission; and that notice of the time and place for any hearing will be promptly given by the Commission.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[F.R. Doc. 64-13012; Filed, Dec. 18, 1964; 8:47 a.m.]

# SMALL BUSINESS ADMINISTRATION

## SMALL BUSINESS SIZE STANDARDS IN EFFECT ON OCTOBER 22, 1962

Under the provisions of section 213(a) of the War Claims Act of 1948, as amended, and § 121.3–13(a) of the Small Business Size Standards Regulation, as amended, successful claimants before the Foreign Claims Settlement Commission are entitled to priority of payment if they had been, on the date of loss, damage, or destruction, small business concerns under the Small Business Size Standards in effect on October 22, 1962.

For the convenience of the public, notice is hereby given that the following pertinent Small Business Size Standards Regulations were in effect on October 22, 1962:

§ 121.3–2 *Definition of terms used in this part.*

(a) "Affiliates." Concerns are affiliates of each other when either directly or indirectly (1) one concern (other than an investment company licensed under the Small Business Investment Act of 1958 or registered under the Investment Company Act of 1940, as amended), controls or has the power to control the other, or (2) a third party or parties (other than an investment company licensed under the Small Business Investment Act of 1958 or registered under the Investment Company Act of 1940, as amended), controls or has the power to control both. In determining whether concerns are independently owned and operated and whether or not affiliation exists, consideration shall be given to all appropriate factors including common ownership, common management, and contractual relationships.

(b) "Annual sales or annual receipts" means the annual sales or annual receipts, less returns and allowances, of a concern and its affiliates during its most recently completed fiscal year.

• • • • •

(e) "Crude-oil capacity" means the maximum daily average crude through-put of a refinery in complete operation, with allowance for necessary shut-down time for routine maintenance, repairs, etc. It approximates the maximum daily average crude runs to stills that can be maintained for an extended period.

• • • • •

(i) "Convalescent or nursing home" means those facilities for the accommodation of convalescents or other persons who are not scutely ill or not in need of hospital care but who may require nursing care and related medical services, which facility is privately owned and operated for the purpose of obtaining profits which shall inure to the benefit of its owners, stockholders, or members.

(j) "Gross leasable area" means the total floor area designed for tenant occupancy and exclusive use, including basements, mezzanines, and upper floors, if any, expressed in square feet measured from the center line of a joint partition and from outside wall faces.

(k) "Hospital" means a health facility duly licensed as a hospital providing in-patient medical or surgical care of the sick or injured, including obstetrics, which facility is privately owned and operated for the purpose of obtaining profits which shall inure to the benefits of its owners, stockholders, or members.

(l) "Medical and dental laboratory" means those facilities which provide services to doctors, dentists, hospitals, and similar health facilities, which facilities are privately owned and operated for the purpose of obtaining profits which shall inure to the benefit of its owners, stockholders, or members.

• • • • •

(n) A concern is "not dominant in its field of operation" when it does not exercise a controlling or major influence in a kind of business activity in which a number of business concerns are primarily engaged. In determining whether dominance exists, consideration shall be given to all appropriate factors including volume of business, number of employees, financial resources, competitive status or position, ownership or control of materials, processes, patents, and license agreements, facilities, sales territory, and nature of business activity.

(o) "Number of employees" means the average employment of any concern, including the employees of its domestic and foreign affiliates, based on the number of persons employed on a full-time, part-time, temporary, or other basis during the pay period ending nearest the 15th day of the third month in each calendar quarter for the preceding four quarters. If a concern has not been in existence for four full calendar quarters, "number of employees" means the average employment of such concern and its affiliates during the period such concern has been in existence based on the number of persons employed during the pay period ending nearest the 15th day of each month.

• • • • •

(s) "Shopping center" means a group of commercial establishments planned, developed, owned, and managed as a unit with off-street parking provided on the property.

(t) "Size determination" means a ruling by SBA that a concern is or is not a small business within the meaning of this part.

• • • • •

§ 121.3–10 *Definition of small business for SBA business loans.*

A small business concern for the purpose of receiving an SBA loan is a concern, including its affiliates, which is independently owned and operated, is not dominant in its field of operation, and can further qualify under the criteria set forth below. If an applicant for an SBA business loan is engaged in the production of a number of products or the providing of a variety of services which are classified into different industries or fields of operation, the appropriate standard to be used is that which has been established for the industry or activity in which it is primarily engaged. An applicant's primary activity is that which produced the greatest percentage of gross sales or receipts for the past fiscal year. When computing the size status of an applicant, its affiliates, number of employees, annual sales or receipts, or other applicable standards shall be included.

(a) *Construction.* Any concern primarily engaged in construction is small if its average annual receipts do not exceed $5 million for the preceding three fiscal years.

(b) *Manufacturing.* Any concern primarily engaged in manufacturing is classified:

(1) As small if its number of employees does not exceed 250 persons;

(2) As large if its number of employees exceeds 1,000 persons;

(3) Either as small or large depending on its industry and in accordance with the employment size standards set forth in Schedule "A" of this part, if its number of employees exceeds 250 persons, but not more than 1,000 persons;

(4) As small if it is primarily engaged in the food canning and preserving industry and its number of employees does not exceed 500 persons exclusive of agricultural labor as defined in subsection (k) of the Federal Unemployment Tax Act, 68A Stat. 454, 26 U.S.C. (I.R.C. 1954) 3306.

(c) *Retail.* Any concern primarily engaged in retailing is classified:

(1) As small if its annual sales do not exceed $1 million;

(2) As small if it is primarily engaged in making retail sales of groceries and fresh meats and its annual sales do not exceed $2 million;

(3) As small if it is primarily engaged in making retail sales of new or used motor vehicles and its annual sales do not exceed $3 million.

(d) *Services.* Any concern primarily engaged in service industries is classified:

(1) As small if its annual receipts do not exceed $1 million;

(2) As small if it is primarily engaged in the hotel and motel industry and its annual receipts do not exceed $2 million;

(3) As small if it is primarily engaged in the power laundry industry and its annual receipts do not exceed $2 million;

(4) As small if it is primarily engaged in the trailer courts and parks industry and its annual receipts do not exceed $100,000: *Provided*, That a minimum of 50 percent of the annual receipts is derived from the rental of space to tourist trailers for periods not in excess of 30 days;

(5) As small if it is primarily engaged in owning and operating a hospital and its capacity does not exceed 100 beds (excluding cribs and bassinets);

(6) As small if it is primarily engaged in owning and operating a convalescent or nursing home and its annual receipts do not exceed $1 million;

(7) As small if it is primarily engaged in owning and operating a medical or dental laboratory and (i) it is operated in connection with an eligible proprietary hospital, or (ii) it is not operated in connection with an eligible proprietary hospital and its annual receipts do not exceed $1 million.

(e) *Shopping Centers.* (1) Any concern engaged in operating shopping centers is small if it does not have assets exceeding $5 million, (2) it does not have net worth in excess of $2½ million, (3) it does not have an average net income, after Federal income taxes, for the preceding two fiscal years in excess of $250,000 (average net income to be computed without benefit of any carryover loss), and (4) it does not lease more than 25 percent of the gross leasable area to concerns which do not meet the small business definitions contained in this section. For the purpose of size determinations, shopping center operators will not be considered affiliated with their tenants merely because of lease agreements.

(f) *Transportation.* Any concern primarily engaged in passenger and freight transportation is classified:

(1) As small if its annual receipts do not exceed $1 million;

(2) As small if it is primarily engaged in the air transportation industry and its number of employees does not exceed 1,000 persons;

(3) As small if it is primarily engaged in trucking and/or warehousing (local and long distance) and its annual receipts do not exceed $3 million.

NOTE: Pending further study of the relationship between large interstate van lines and small household movers, freight forwarders, booking and hauling agents and similar enterprises, no such concern will be denied an SBA business loan solely because of its relationship with an interstate van line, provided that its annual receipts have not exceeded $3 million during the concern's most recently completed fiscal year. Applications for SBA business loans submitted by household movers, freight forwarders, booking and hauling agents and similar enterprises must state the amount, if any, of such annual receipts which are directly attributable to the applicant's relationship with an interstate van line.

(g) *Wholesale.* Any concern primarily engaged in wholesaling is small if its annual sales do not exceed $5 million. Any wholesale concern also engaged in manufacturing is not a "small business concern" unless it so qualifies under both the manufacturing and wholesaling standards.

• • • • •

SCHEDULE A—EMPLOYMENT SIZE STANDARDS FOR CONCERNS PRIMARILY ENGAGED IN MANUFACTURING

(The following size standards are to be used when determining the size status of SBA business loan applicants)

| Census classification code | Industry | Employment size standard (number of employees) [1] |
|---|---|---|
| 23 | Apparel and related products | 250 |
| | Chemicals and allied products: | |
| 2894 | Acids, fatty | 500 |
| 2879 | Agricultural chemicals, n.e.c.[2] | 500 |
| 2812 | Alkalies and chlorine | 1,000 |
| 2831 | Biological products | 250 |
| 2823 | Cellulosic man-made fibers | 1,000 |
| 2895 | Carbon, black | 750 |
| 2899 | Chemical products, n.e.c | 250 |
| 2842 | Cleaning and polishing products, except soaps and detergents | 500 |
| 2816 | Color pigments, inorganic | 1,000 |
| 2815 | Colors, organic, and intermediates | 1,000 |
| 2814 | Cyclic (coal-tar) crudes | 500 |
| 2892 | Explosives | 1,000 |
| 2871 | Fertilizers | 500 |
| 2872 | Fertilizers (mixing only) | 500 |
| 2824 | Fibers, synthetic, except cellulosic | 1,000 |
| 2891 | Glue and gelatin | 250 |
| 2861 | Gum and wood chemicals | 250 |
| 2813 | Industrial gases | 750 |
| 2893 | Ink, printing | 250 |
| 2819 | Inorganic chemicals, industrial, n.e.c | 750 |
| 2833 | Medicinal chemicals, including botanicals | 750 |
| 2818 | Organic chemicals, industrial, n.e.c | 1,000 |
| 2851 | Paints and varnishes | 250 |
| 2873 | Pesticides, agricultural | 500 |
| 2834 | Pharmaceutical preparations | 750 |
| 2821 | Plastic materials, synthetic resins, and nonvulcanizable elastomers | 750 |
| 2822 | Rubber, synthetic (vulcanizable elastomers) | 1,000 |
| 2841 | Soap and other detergents | 1,000 |
| 2843 | Surface active agents | 250 |
| 2844 | Toilet preparations, perfumes and cosmetics | 500 |
| 2852 | Putty, caulking compounds, and allied products | 250 |
| | Electrical machinery: | |
| 3630 | Appliances, electrical household | 750 |
| 3692 | Batteries, primary (dry and wet) | 1,000 |
| 3691 | Batteries, storage | 500 |
| 3624 | Carbon and graphite products | 750 |
| 3622 | Controls, industrial | 500 |
| 3669 | Electrical products, n.e.c | 500 |
| 3679 | Electronic components and accessories, n.e.c | 500 |
| 3694 | Engine electrical equipment | 750 |
| 3633 | Household laundry equipment | 1,000 |
| 3629 | Industrial apparatus, electrical, n.e.c | 500 |
| 3641 | Lamps, electric (bulbs) | 1,000 |
| 3642 | Lighting fixtures | 250 |
| 3611 | Measuring instruments and test equipment, electrical | 500 |
| 3621 | Motors and generators | 750 |
| 3652 | Phonograph records | 750 |
| 3651 | Radios and television receiving sets | 750 |
| 3662 | Radio and television transmitting, signaling and detection equipment | 500 |
| 3613 | Switchgear and switchboard apparatus | 500 |
| 3661 | Telephone and telegraph equipment | 1,000 |
| 3612 | Transformers (power, distribution, and specialty) | 750 |
| 3619 | Transmission and distribution equipment, n.e.c | 500 |
| 3671 | Tubes, and TV receiving type electron tubes | 1,000 |
| 3672 | Tubes, cathode ray | 1,000 |
| 3673 | Tubes, transmitting, industrial, and special purpose | 1,000 |
| 3623 | Welding apparatus, electrical | 250 |
| 3643 | Wiring devices, current carrying | 500 |
| 3644 | Wiring devices, noncurrent carrying | 500 |
| 3693 | X-ray apparatus and tubes | 500 |
| | Fabricated metal products: | |
| 3449 | Architectural and misc. metal work | 250 |
| 3491 | Barrels, drums and pails, metal | 500 |
| 3443 | Boiler shop products | 250 |
| 3452 | Bolts, nuts, washers, screws and rivets | 500 |
| 3479 | Coating, engraving and allied services, n.e.c | 250 |
| 3421 | Cutlery | 500 |
| 3442 | Doors, sash and trim, metal | 250 |
| 3471 | Electroplating, plating, polishing, anodizing and coloring | 250 |
| 3498 | Fabricated pipe and fabricated pipe fittings | 250 |
| 3497 | Foil, metal and leaf | 500 |

See footnotes at end of table.

| Census classification code | Industry | Employment size standard (number of employees) [1] |
|---|---|---|
| | Fabricated metal products—Continued | |

# INTERSTATE COMMERCE COMMISSION

## FOURTH SECTION APPLICATIONS FOR RELIEF

DECEMBER 16, 1964.

Protests to the granting of an application must be prepared in accordance with Rule 1.40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

### LONG-AND-SHORT HAUL

FSA 39462: *Commodities between points in Texas.* Filed by Texas-Louisiana Freight Bureau, agent (No. 527), for interested rail carriers. Rates on animal or poultry feed, in carloads, from, to, and between points in Texas, over interstate routes through adjoining states.

Grounds for relief: Intrastate rates and maintenance of rates from and to points in other states not subject to the same conditions.

Tariff: Supplement 24 to Texas-Louisiana Freight Bureau, agent, tariff I.C.C. 998.

FSA 39464: *Starch or Dextrine to Charlotte, N.C.* Filed by Illinois Freight Association, agent (No. 266), for interested rail carriers. Rates on starch or dextrine, in carloads, from Chicago, Ill., and points grouped therewith, to Charlotte, N.C.

Grounds for relief: rate relationship.

Tariff: Supplement 109 to Illinois Freight Association, agent, tariff I.C.C. 979.

FSA 39465: *T.O.F.C. rates to points in Southwestern Territory.* Filed by Southwestern Freight Bureau, agent (No. B–8654), for interested rail carriers. Rates on paper and paper articles and ground wood papers, loaded in trailers and transported on railroad flat cars, from points in Minnesota and Wisconsin to points in southwestern territory.

Grounds for relief: Modified short-line distance formula and grouping.

Tariff: Supplement 130 to Southwestern Freight Bureau, agent, tariff I.C.C. 4480.

FSA 39466: *T.O.F.C. rates from and to Lewisburg, Tenn.* Filed by Southwestern Freight Bureau, agent (No. B–8655), for interested rail carriers. Rates on property moving on class and commodity rates loaded in trailers and transported on railroad flat cars, between Lewisburg, Tenn., on the one hand, and points in southwestern territory, on the other.

Grounds for relief: Short-line distance formula and grouping.

Tariff: Supplement 28 to Southwestern Freight Bureau, agent, tariff I.C.C. 4577.

FSA 39467: *T.O.F.C. rates from points in Florida.* Filed by Southwestern Freight Bureau, agent (No. B–8656), for interested rail carriers. Rates on foodstuffs and beverages, loaded in trailers and transported on railroad flat cars, from specified points in Florida to points in southwestern territory.

Grounds for relief: Motor-truck competition.

Tariff: Supplement 28 to Southwestern Freight Bureau, agent, tariff I.C.C. 4577.

FSA 39468: *Flaxseed screenings from points in North Dakota.* Filed by Great Northern Railway Company (No. 1090), for itself and interested rail carriers. Rates on screenings, from flaxseed or other seeds, ground or unground, as described in the application, in carloads, from specified points in North Dakota to Duluth, Minneapolis, Minnesota Transfer, St. Paul, Minn., Superior, Wis., and points taking same rates.

Grounds for relief: Motor-truck competition.

Tariff: Supplement 54 to Great Northern Railway Company tariff I.C.C. A–9048.

FSA 39469: *Corn and soybeans from points in North Dakota.* Filed by Great Northern Railway Company (No. 1091), for itself and interested rail carriers. Rates on Corn (not popcorn), soybeans, and direct products of corn, in carloads, from Emerado, Hamar, Manvel and Warwick, N. Dak., to Duluth, Minneapolis, Minnesota Transfer, St. Paul, Minn., Superior, Wis., and points taking same rates.

Grounds for relief: Motor-truck competition.

Tariff: Supplement 54 to Great Northern Railway Company tariff I.C.C. A–9048.

FSA 39470: *Liquid caustic soda to points in Georgia and South Carolina.* Filed by O. W. South, Jr., agent (No. A4608), for interested rail carriers. Rates on liquid caustic soda, in tank-car loads, subject to minimum shipment of four tank-car loads per day, from Charleston, Tenn., Evans City, McIntosh, Redstone Arsenal, Ala., and Saltville, Va., to Graniteville, S.C., also from Saltville, Va., to Nixon and Westover, Ga.

Grounds for relief: Market competition.

Tariff: Supplements 102, 162 and 3 to Southern Freight Association, agent, tariffs I.C.C. S–207, S–194 and S–484, respectively.

### AGGREGATE-OF-INTERMEDIATES

FSA 39463: *Commodities between points in Texas.* Filed by Texas-Louisiana Freight Bureau, agent (No. 528), for interested rail carriers. Rates on ethylene oxide and liquid caustic soda, in tank-car loads, also animal or poultry feed, in carloads, from, to, and between points in Texas, over interstate routes through adjoining states.

Grounds for relief: Maintenance of depressed rates published to meet intrastate competition without use of such rates as factors in constructing combination rates.

Tariff: Supplement 24 to Texas-Louisiana Freight Bureau, agent, tariff I.C.C. 998.

By the Commission.

[Notice 9]

## FINANCE APPLICATIONS

DECEMBER 16, 1964.

The following publications are governed by the Interstate Commerce Commission's General Requirements governing notice of filing of applications under sections 20a except (12) and 214 of the Interstate Commerce Act. The Commission's order of May 20, 1964, providing for such publication of notice, was published in the FEDERAL REGISTER issue of July 31, 1964 (29 F.R. 11126) and became effective October 1, 1964.

All hearings and prehearing conferences, if any, will be called at 9:30 a.m., U.S. standard time unless otherwise specified.

F.D. No. 23409—By application filed December 4, 1964, The Texas and Pacific Railway Company, Fidelity Union Tower, 1507 Pacific Ave., Dallas, Tex., 75201, seeks authority under Section 20 of the Interstate Commerce Act to assume obligation and liability in respect of $2,700,000 aggregate principal amount of its Serial Equipment Trust Certificates, Series Y, comprising the first installment of a proposed two installment issue not exceeding $6,900,000 principal amount. Applicant's Attorney: M. M. Hennelly, Vice President—Law. The Texas and Pacific Railway Company, 210 N. 13th St., St. Louis, Mo., 63103. Protests must be filed no later than 15 days from date of publication in the FEDERAL REGISTER.

F.D. No. 23410—By application filed December 4, 1964, Missouri Pacific Railroad Company, 210 N. 13th St., St. Louis, Mo., 63103, seeks authority under Section 20a of the Interstate Commerce Act to assume obligation and liability in respect of $4,350,000 aggregate principal amount of its Serial Equipment Trust Certificates, Series V, comprising the first installment of a proposed two installment issue not exceeding $9,600,000 principal amount. Applicant's Attorney: Karl F. Kraus, Assistant General Counsel, Missouri Pacific Railroad Company, 210 N. 13th St., St. Louis, Mo., 63103. Protests must be filed no later than 15 days from date of publication in the FEDERAL REGISTER.

F.D. No. 23411—By application filed December 7, 1964, Southern Railway Company, P.O. Box 1808, Washington, D.C., 20013, seeks authority under Section 20a of the Interstate Commerce Act to assume obligation and liability in respect of $5,700,000 principal amount of Southern Railway Equipment Trust No. 1 of 1965 Certificates, being the first installment of a proposed issue of $11,400,000 principal amount of said certificates. Applicant's attorneys: Seddon G. Boxley, General Solicitor and R. Allan Wimbish, Solicitor, Southern Railway Company, P.O. Box 1808, Washington, D.C., 20013. Protests must be filed no later than 15 days from date of publication in the FEDERAL REGISTER.

F.D. No. 23417—By application filed December 10, 1964, Green Mountain Railroad Corporation, P.O. Box 71, Bellows Falls, Vt., seeks authority under Section 20a of the Interstate Commerce Act to issue 750 shares of Common Capital Stock of the par value of $100 per share. Applicant's attorney: Thomas P. Salmon, Atty., 39 Square, Bellows Falls, Vt., 05101. Protests must be filed no later than 15 days from date of publication in the FEDERAL REGISTER.

By the Commission.

[Rev. S.O. 562; Taylor's I.C.C. Order 136, Amdt. 16]

## RUTLAND RAILROAD CORP.

### Rerouting of Traffic

Upon further consideration of Taylor's I.C.C. Order No. 136 (Rutland Railroad Corporation) and good cause appearing therefor:

*It is ordered,* That, Taylor's I.C.C. Order No. 136 be, and it is hereby, amended by substituting the following paragraph (g) for paragraph (g) thereof:

(g) *Expiration date.* This order shall expire at 11:59 p.m., March 31, 1965, unless otherwise modified, changed, suspended or annulled.

*It is further ordered,* That this amendment shall become effective at 11:59 p.m., December 31, 1964, and that this order shall be served upon the Association of American Railroads, Car Service Division, as agent of all railroads subscribing to the car service and per diem agreement under the terms of that agreement, and by filing it with the Director, Office of the Federal Register.

Issued at Washington, D.C., December 15, 1964.

INTERSTATE COMMERCE COMMISSION,
[SEAL] CHARLES W. TAYLOR,
*Agent.*

## MOTOR CARRIER TRANSFER PROCEEDINGS

DECEMBER 15, 1964.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested per-

son may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC–FC 66788. By order of December 11, 1964, the Transfer Board approved the transfer to Thruway Transfer, Inc., West Haven, Conn., of the operating rights in Certificates Nos. MC 55830 and MC 55830 Sub 3, issued January 6, 1954, and April 25, 1961, respectively, to Freight Transfer, Incorporated, West Haven, Conn., authorizing the transportation, over regular routes, of general commodities, excluding household goods, commodities in bulk, and other specified commodities, between New Haven, Conn., and New York, N.Y., and over irregular routes, junk, between points in Connecticut, on the one hand, and, on the other, points in Massachusetts, New York, and New Jersey; and nonferrous scrap metals, loose (and not in containers), from New Haven, Conn., to Philadelphia, Pa. William J. Cousins, 129 Church Street, New Haven 10, Conn., attorney for transferee. William D. Traub, 10 East 40th Street, New York 16, N.Y., representative for transferor.

No. MC–FC 67402. By order of December 11, 1964, the Transfer Board approved the transfer to Whitehurst Transport, Inc., Richmond, Va., of the operating rights in Certificate No. MC 123790 Sub 2, issued November 15, 1962, to Whitehurst Paving Company, Incorporated, Richmond, Va., authorizing the transportation, over irregular routes, of: Liquid asphalt, in bulk, in tank vehicles, from Richmond and Bellwood, Va., to points in a specified portion of North Carolina, subject to certain restrictions. Jno. C. Goddin, 10 South Tenth Street, Richmond, Va., attorney for applicants.

No. MC–FC 67403. By order of December 11, 1964, the Transfer Board approved the transfer to Ward Rugh, Inc., Ellensburg, Wash., of the operating rights in Certificate No. MC 113587, issued April 21, 1961, to Ward Rugh, Ellensburg, Wash., authorizing the transportation, over irregular routes, of: Fibreboard boxes, and parts therefor, starch, and paper and pulpboard, between points in Idaho, Washington, and Oregon. Joseph O. Earp, 411 Lyon Bldg., Seattle, Wash., 98104, representative for applicants.

No. MC–FC 67405. By order of December 11, 1964, the Transfer Board approved the transfer of the Certificate of Registration in No. MC 98677 Sub 1, to Carson Valley Freight Lines, Inc., Reno, Nev., evidencing a right to engage in interstate or foreign commerce, solely within the State of Nevada, in the transportation of general commodities, issued December 3, 1963, to Gerald Underwood, doing business as Carson Valley Freight Lines, Inc., Reno, Nev. Leslie B. Gray, One East First St., Reno, Nev., attorney for applicants.

No. MC–FC 67406. By order of December 11, 1964, the Transfer Board approved the transfer to Robbins Distributing Company, Racine, Wis., of the operating rights in Certificate No. MC 118457, issued July 7, 1959, to Thomas W. Robbins, and Raymond S. Pulda, doing business as Robbins Distributing Company, Racine, Wis., authorizing the transportation, over irregular routes, of: Frozen foods, and empty containers therefor, between specified points in Illinois and Wisconsin. William C. Dineen, 710 N. Plankton Ave., Milwaukee, Wis., 53203, attorney for applicants.

[SEAL] HAROLD D. McCOY,
*Secretary.*

[F.R. Doc. 64–13029; Filed, Dec. 18, 1964; 8:48 a.m.]

## CUMULATIVE CODIFICATION GUIDE—DECEMBER

**The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published to date during December.**

**GUIDE TO RECORD RETENTION REQUIREMENTS**

[Revised as of January 1, 1964]

Compiled from U.S. Statutes, and from regulations issued by the various Federal agencies, the "Guide" contains 873 digests detailing the retention periods for the many types of records required to be kept under Federal laws and rules. It tells the user (1) what records must be kept, (2) who must keep them, and (3) how long they must be kept. Each digest also includes a reference to the full text of the basic law or regulation governing such retention.

Price: 40 cents

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration

Order from Superintendent of Documents, United States Government Printing Office, Washington, D.C., 20402

FEDERAL REGISTER

Area Code 202 Phone 963-3261

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration (mail address National Archives Building, Washington, D.C. 20408), pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

## Title 21—FOOD AND DRUGS

**Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare**

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

**PART 19—CHEESES, PROCESSED CHEESES, CHEESE FOODS, CHEESE SPREADS, AND RELATED FOODS**

**Order Promulgating Definitions and Standards of Identity for Mozzarella Cheese, Scamorza Cheese; Part-Skim Mozzarella Cheese, Part-Skim Scamorza Cheese**

In the matter of establishing definitions and standards of identity for mozzeralla cheese, scamorza cheese; part-skim mozzarella cheese, part-skim scamorza cheese:

Notice of the filing of a petition setting forth proposed definitions and standards of identity for mozzarella cheese, scamorza cheese, part-skim mozzarella cheese, part-skim scamorza cheese was published in the FEDERAL REGISTER of January 23, 1957 (22 F.R. 428). By order published in the FEDERAL REGISTER of October 4, 1957 (22 F.R. 7906) the proposals were rejected. To this order objections were filed and a hearing was scheduled to take evidence on the proposals (22 F.R. 9731; 23 F.R. 1012, 1796).

Findings of fact and a tentative order in this matter were published July 22, 1961 (26 F.R. 6599). On the basis of the evidence received at the hearing, and pursuant to the authority vested in the Secretary of Health, Education, and Welfare by the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701; 52 Stat. 1046, 1055 as amended; 70 Stat. 919; 21 U.S.C. 341, 371) and delegated by the Secretary to the Commissioner of Food and Drugs (21 CFR 2.90; 29 F.R. 471) and after consideration of written arguments, suggested findings, and exceptions to the tentative order, which are adopted in part and rejected in part as is apparent from the detailed findings herein made, the following order is issued:

*Findings of fact.*[1] 1. Many years ago there originated in Italy a soft, uncured, moist, light-colored, bland, milky cheese of the pasta-filata type which acquired the name "mozzarella." Originally this cheese was made from the milk of water buffaloes. In more recent years cow's milk was used either in whole or in part. The curd was stretched in hot water and formed into various shapes, generally somewhat rounded. One shape acquired the name "scamorza," but with the passage of time the name "scamorza" came to be used alternatively with the name "mozzarella." Mozzarella cheese has continued to be made in Italy. An excerpt from the Italian book "Legislation on Foods, Farm Products and Products for Farm Uses, 6th Edition, March 1958" shows mozzarella and scamorza under the general category of "pasta filata cheese from cow's milk," and this reference shows that such cheese is required to have a minimum butterfat on the dry basis of 44 percent. An excerpt from another Italian book "Food Products—Analysis—Legislation" describes pasta-filata type (drawn curd) cheeses currently made in Italy and lists mozzarella and scamorza. The fat content for mozzarella is prescribed as: "Minimum in dry matter 45%."

(R. 16–19, 57, 132–133, 173, 301, 488, 516–517, 608, 862, 866, 882–884, 1057, 1317; Ex. 9, 38, 39)

2. Italian immigrants coming to the United States and settling in eastern cities, particularly New York, accounted for the development of a demand in this country for mozzarella cheese. Since mozzarella is a high-moisture, soft, uncured cheese it was not practical to import it from the old country. As early as 1900 and earlier, cheesemakers among the Italian immigrants began producing mozzarella cheese in this country. Here they used cow's milk, and they followed in general the procedures that had been developed in Italy. In many instances these procedures were handed down from father to son. In more recent years there have been some developments that represent deviations from the older practices. One of these developments is a greater mechanization in the factories. Another development is pasteurization of the milk to comply with requirements of state and local laws. Also, the practice of using partly skimmed milk has developed, so that some producers distribute two or three so-called grades of mozzarella, depending on whether the starting mix consists of whole milk, or part-skim milk. These cheesemakers located in New York State and some other Eastern States were represented at the hearings by the Italian Fresh Cheese Manufacturers Association, and their products were sometimes characterized as "eastern type."

(R. 142, 157, 174, 402, 403, 488, 713, 753–755, 801–803, 860–866, 888, 889, 1059, 1099, 1135, 1162, 1199, 1236, 1237, 1274; Ex. 9)

3. The steps in making mozzarella cheese from whole milk, as this cheese is made in the Eastern States, are as follows:

Whole milk, which in many instances is not adjusted to any particular fat content but which in some cases is adjusted by separating part of the fat or by adding skim milk or cream, is pasteurized. At a temperature of approximately 88° F. it is inoculated with a relatively small amount of starter, a culture of harmless lactic-acid-producing bacteria. It may be slightly acidified with vinegar. A small amount of liquid rennet may be added. After the curd forms, it is cut and then stirred to aid in separating the whey. The whey is drained, and cold water may be added and then drained off. The curd is collected and as drainage progresses the curd ripens further, the rate depending in part upon the temperature. The temperature may be controlled by using ice or holding the curd under refrigeration. The curd may be cut. It is warmed in hot water or steam and is kneaded and stretched and then molded into the desired shape. The units are firmed by immersion in cold water and may be brined and drained.

(R. 9, 699–702, 713–715, 746, 767, 1067, 1081, 1148–1161, 1237–1238, 1270, 1314, 1344; Ex. 6–9, 30)

4. The mozzarella cheese made in the Eastern States is relatively high in moisture content. As a cheese that is used to some extent for table use, the high moisture content is one of its important characteristics. The moisture falls in the range of from 52 percent up to as high as 60 percent. The milk fat content varies with the fat of the starting mix. In most natural cheeses made from whole milk, the solids of the cheese contain not less than 50 percent fat. However, where cheeses or kneaded and stretched in hot water there is some loss of fat, and for such cheeses it is reasonable to require that the finished food shall have not less than 45 percent of milk fat, calculated on the solids basis. The standard for provolone cheese, which is also a stretched-curd cheese made from cow's milk, requires not less than 45 percent of milk fat on the solids basis. The method for determining the moisture and the fat content of cheese, as set out in the definition and standard of identity for cheddar cheese (21 CFR 19.500), is applicable to mozzarella cheese.

(R. 126, 167, 177–178, 211–212, 228, 308–309, 436–443, 458, 720, 755, 781, 796, 865, 904, 1148–1149, 1245, 1253, 1294, 1299, 1308, 1350; 21 CFR 19.500, 19.590; Ex. 7, 9, 10, 31, 32, 38, 39)

5. In rare instances the fat content of cheese is expressed on an "as is" basis, that is, on the basis of the entire weight of the cheese including its moisture. However, cheese standards generally prescribe the minimum fat content on the "dry" basis, that is, as the percent of fat in the solids of the cheese. The "dry" basis has the advantage that prescribing the minimum fat in the solids of the mozzarella cheese at the value which results from using whole milk starting mix (see finding 4) differentiates mozzarella cheese from cheese made from part-skim milk. Witnesses for the Italian Fresh Cheese Manufacturers Association recommended that the mozzarella cheese standard should prescribe the minimum milk fat requirement on an "as is" basis at 18 percent. To follow the recommendation of these witnesses

[1] The citations following each finding of fact refer to the pages of the transcript of testimony and the exhibits received in evidence at the hearing.

would have the disadvantage of permitting cheese made by the procedure set out in finding 3, and having a moisture content of 52 percent or slightly more, to be made from part-skim milk but to be labeled "mozzarella cheese" rather than "part-skim mozzarella cheese" (see finding 6). When the moisture content of a cheese is known, the fat content can be converted from the "as is" basis to the "dry" basis by a simple calculation. For example, if a mozzarella cheese with 60 percent moisture contains 18 percent fat on the "as is" basis it contains 18 parts of fat in 40 parts of solids and this amounts to 45 percent fat on the "dry" basis.

(R. 18, 22–24, 50–51, 165–167, 191–192, 197–198, 211–217, 226, 257–258, 306–311, 354, 754, 893–895, 914, 1050, 1058, 1114, 1239, 1245–1246, 1252–1253, 1280, 1294, 1299, 1308; Ex. 10, 30, 31, 38, 39)

6. In addition to the mozzarella made from whole milk, either with or without adjustment, cheesemakers have developed a mozzarella made by the same procedure but using part-skim milk as the starting mix. Generally, the fat content of the starting mix is reduced to about 2 percent, which is substantially lower than the fat content of whole milk. Representatives of eastern manufacturers reported that the content of milk fat in the whole milk they use runs 3.3 percent or higher. The proportion of milk fat to nonfat solids in a starting mix testing 2 percent fat is such that the part-skim mix yields a mozzarella having a fat content of 30 percent or higher on the "dry" basis. The product made in the Eastern States from part-skim milk is similar in its high moisture content to the mozzarella made from whole milk; that is, the moisture ranges between 52 and 60 percent. It is reasonable for the standard, in specifying the name for the article made from part-skim milk, to prescribe that the words "part-skim" be included in the name.

(R. 22, 50, 126, 152, 164, 295, 310, 613, 676–677, 753–755, 792, 801, 816, 883, 1067, 1114–1115, 1148–1149, 1181, 1201, 1245, 1294, 1299, 1311, 1349, 1351, 1369; Ex. 9, 31)

7. It is in the interest of consumers to require that the milk or the part-skim milk used be pasteurized for the purpose of destroying pathogenic micro-organisms. Testimony by a public health expert showed that some pathogens survive when milk is held for 30 minutes at 143° F. but are destroyed with the same holding period if the temperature is maintained at not less than 145° F. Most plants use so-called flash pasteurizers in which the milk is heated for a much shorter time but at a temperature sufficiently higher to be equally effective in destroying micro-organisms. An appropriate test for pasteurization is the phosphatase destruction test (provolone modification) as set out in detail in the standard for cheddar cheese (21 CFR 19.500), and it is reasonable to prescribe that the finished cheese shall be deemed not to have been made from pasteurized milk when this test shows for 0.25 gram of the cheese a phenol equivalent of more than 3 micrograms.

(R. 26, 42, 47–48, 157, 364, 392, 407, 416–417, 468–476, 519, 531, 538, 760–761, 809, 889, 1149, 1244, 1354. 21 CFR 19.500; Ex. 11)

8. Until after World War II, the demand for mozzarella cheese in this country was not great except among segments of the population of eastern cities having an Italian background. This demand was supplied by the eastern producers. Then there developed throughout the country a striking growth in popularity of a food item known by the name "pizza," which is the Italian word for pie. Cheese of a soft, bland, "stretching", pastafilata type is a preferred cheese ingredient for pizza, and so the demand for such cheese grew with the growth in popularity of pizza. To supply this geographically widened and substantially increased demand, cheesemakers in Wisconsin and some other Midwestern States rapidly built up their production of cheese suitable for making pizza.

(R. 20–21, 56–57, 100–101, 132, 215, 221, 295, 354, 489, 500–501, 517–518, 521–522, 806, 822, 847, 876, 1163, 1317; Ex. 18, 33–36)

9. This cheese for pizza as made in the Midwest differed in some respects from eastern-type mozzarella cheese. It tended to be somewhat more like an uncured provolone cheese. Its moisture content was intermediate between the lower range for mozzarella, as that cheese had been made for many years in New York State, and the maximum of 45 percent permitted by the standard for provolone cheese. In the standards advocated by midwestern producers, several of the provisions to which objections were taken by eastern producers corresponded to provisions in the standard for provolone cheese. Among these were the provision for reheating, after cutting the curd, to reduce the moisture content of the cheese; the provision permitting use of 0.02 percent of calcium chloride and rennet paste or extract of rennet paste; the provision permitting reconstituted skim milk to be used in adjusting the starting mix; and the provision that has been called the "alternative make" provision, which permits other procedures to be used, provided the finished cheese has the same physical and chemical properties that it would have if the procedures recited in the standard are followed. The provision for optional use of unspecified enzyme preparations for curing and developing flavor, as permitted by the provolone standard, is not an appropriate provision for inclusion in a standard for cheese for pizza because cheese for that usage is expected to be bland and not highly flavored. The proposals sponsored by midwestern producers provided for two products, a whole-milk cheese and a part-skim milk cheese, the former to have not less than 45 percent fat on the "dry" basis and the latter to be lower in fat but to have not less than 30 percent fat on the "dry" basis. Finding 7 concerning pasteurization is applicable to both products.

(R. 15, 22–23, 27, 40–50, 54–55, 60–83, 132–133, 248, 264–266, 313, 365, 367, 436–443, 490, 523, 535, 544, 563, 581, 612–613, 897, 1148–1158, 1246, 1249–1250, 1280, 1323, 1365; Ex. 4, 10)

10. Cheese made by the procedure recited in finding 3 has been designated by the name "mozzarella cheese" (or "scamorza cheese") throughout the years it has been sold in this country. A significant characteristic of this cheese is its high moisture content which has been observable by purchasers when they bought it at neighborhood cheese shops and when they used it as a table cheese.

The cheese referred to in finding 8, when first made by a midwestern producer of Italian-type cheese, was designated as "scamorza"; however, when this cheese was produced in much greater volume to meet the demand resulting from the postwar popularity of pizza, it was generally represented to be and labeled as "mozzarella." Labels used on the small units for retail sale often showed that this cheese was for use in making pizzas. In some cases, especially in the New York area, large loaves (5 pounds or larger) were sold to commercial pizza producers as "pizza cheese." To these commercial purchasers this designation probably meant a low-moisture, mozzarella-type cheese.

The difference between the type of cheese made in the East for many years and the type more recently developed in the Midwest are such as to call for distinctive labeling in order to promote honesty and fair dealing in the interest of consumers. Witnesses at the hearing suggested various names to distinguish between the two types. Some proposed that the eastern type should be designated "Italian style mozzarella" or "High moisture mozzarella." Others proposed that the midwestern type should be designated "American style mozzarella" or "low moisture mozzarella." The terms "Italian style" and "American style" give no indication that, as between the two types, the difference in moisture content is significant. The terms "high moisture" and "low moisture" are forthright and meaningful. The promotion of the interest of consumers does not require that both designations, "high moisture" for one type and "low moisture" for the other type, be prescribed. As between the two types the name "mozzarella" has been used much longer for the eastern-type cheese and, accordingly, it is logical for it to continue to be so designated and for the midwestern type to be designated "low moisture mozzarella cheese."

(R. 15, 16, 58, 84, 92–94, 102, 118, 122, 132, 196, 206–209, 217, 232, 272, 297–298, 313, 315, 346, 354–355, 369, 376, 478, 484, 521, 664, 814, 844, 847–848, 854, 874, 878, 1021, 1142, 1144, 1178, 1180, 1199, 1205, 1242, 1252, 1324, 1335, 1365; Ex. 23, 26–28)

*Conclusions.* On the basis of the foregoing findings of fact, and taking into consideration the substantial evidence of the entire record, it is concluded that it will promote honesty and fair dealing in the interest of consumers to establish definitions and standards of identity as follows:

**§ 19.600 Mozzarella cheese, scamorza cheese; identity.**

(a) Mozzarella cheese, scamorza cheese is the food prepared from milk and other ingredients specified in this section, by the procedure set forth in paragraph (b) of this section. It may be molded into various shapes. It contains more than 52 percent but not more than 60 percent of moisture, and its milk fat content, calculated on the solids basis, is not less than 45 percent, as determined by the methods prescribed in § 19.500(c).

(b) Milk, which is pasteurized, is warmed to approximately 88° F. and subjected to the action of harmless lactic-acid-producing bacteria, which may be added thereto as starter. The milk may be acidified with vinegar. Liquid rennet may be added to aid in setting the milk to a semisolid mass. The mass is cut, and it may be stirred to facilitate separation of whey from the curd. The whey is drained and the curd may be washed with cold water and the water drained off. The curd may be collected in bundles for further drainage and for ripening. The curd may be iced, it may be held under refrigeration, and it may be permitted to warm to room temperature and ripen further. The curd may be cut. It is immersed in hot water or heated with steam and is kneaded and stretched until smooth and free of lumps. Then it is cut and molded. The molded curd is firmed by immersion in cold water and may be salted in brine and drained.

(c) For the purposes of this section:

(1) The word "milk" means cow's milk, which may be adjusted by separating part of the fat therefrom or by adding cream or skim milk or both.

(2) Milk shall be deemed to have been pasteurized if it has been held at a temperature of not less than 145° F. for a period of not less than 30 minutes, or for a time and temperature equivalent thereto in phosphatase destruction. The finished food shall be deemed not to have been made from pasteurized milk if 0.25 gram shows a phenol equivalent of more than 3 micrograms when tested by the method prescribed in § 19.500(f), provolone modification.

**§ 19.601 Part-skim mozzarella cheese, part-skim scamorza cheese; identity.**

Part-skim mozzarella cheese, part-skim scamorza cheese conforms to the definition and standard of identity as prescribed for mozzarella cheese by § 19.600, except that its milk fat content, calculated on the solids basis, is less than 45 percent but not less than 30 percent.

**§ 19.605 Low moisture mozzarella cheese, low moisture scamorza cheese; identity.**

(a) Low moisture mozzarella cheese is the food prepared from milk and other ingredients specified in this section, by the procedure set forth in paragraph (b) of this section, or by another procedure which produces a finished cheese having the same physical and chemical properties as the cheese produced when the procedure set forth in paragraph (b) of this section is used. It may be molded into various shapes. Its moisture content is more than 45 percent but not more than 52 percent, and its milk fat content, calculated on the solids basis, is not less than 45 percent, as determined by the method prescribed in § 19.500(c).

(b) Milk, which is pasteurized, and which may be clarified or homogenized or both, and which may be warmed, is subjected to the action of harmless lactic-acid-producing bacteria, which may be added thereto as starter. The milk may be acidified with vinegar. Rennet, rennet paste, or extract of rennet paste (with or without purified calcium chloride in a quantity not more than 0.2 percent, calculated as anhydrous calcium chloride, of the weight of the milk) is added to aid in setting the milk to a semisolid mass. The mass is cut, stirred, and allowed to stand. It may be reheated and again stirred. The whey is drained, and the curd may be cut and piled to promote further separation of whey. It may be washed with cold water and the water drained off. The curd may be collected in bundles for further drainage and ripening. The curd may be iced, it may be held under refrigeration, and it may be permitted to warm to room temperature and ripen further. The curd may be cut. It is immersed in hot water or heated with steam and is kneaded and stretched until smooth and free of lumps. Then it is cut and molded. In molding, the curd is kept sufficiently warm to cause proper sealing of the surface. The molded curd is firmed by immersion in cold water and may be salted in brine and drained.

(c) For the purposes of this section:

(1) The word "milk" means cow's milk, which may be adjusted by separating part of the fat therefrom or by adding thereto one or more of the following: Cream, skim milk, concentrated skim milk, nonfat dry milk, and water in a quantity sufficient to reconstitute any concentrated skim milk or nonfat dry milk used.

(2) Milk shall be deemed to have been pasteurized if it has been held at a temperature of not less than 145° F. for a period of 30 minutes or for a time and temperature equivalent thereto in phosphatase destruction. The finished food shall be deemed not to have been made from pasteurized milk if 0.25 gram shows a phenol equivalent of more than 3 micrograms when tested by the method prescribed in § 19.500(f), provolone modification.

**§ 19.606 Low moisture part-skim mozzarella cheese, low moisture part-skim scamorza cheese; identity.**

Low moisture part-skim mozzarella cheese conforms to the definition and standard of identity as prescribed for low moisture mozzarella cheese by § 19.605, except that its milk fat content, calculated on the solids basis, is less than 45 percent but not less than 30 percent.

*Effective date.* This order shall become effective 120 days from the date of its publication in the FEDERAL REGISTER.

(Secs. 401, 701; 52 Stat. 1046, 1055 as amended 70 Stat. 919; 21 U.S.C. 341, 371)

Dated: December 15, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

## PART 20—FROZEN DESSERTS

### Miscellaneous Amendments of Definitions and Standards of Identity re Optional Ingredients and Labeling Requirements

In the matter of amending the definitions and standards of identity for frozen desserts: (1) To provide for use of phosphoric acid as an acidulant permitted in the fruit ingredients used in each of the foods; (2) to permit the use of the optional ingredients skim milk (in concentrated or dried form) modified by treatment with calcium hydroxide and disodium phosphate, concentrated cheese whey, and dried cheese whey in ice cream, frozen custard, ice milk, and fruit sherbets; (3) to change the designation of the optional permitted ingredients "Irish moss" and "extract of Irish moss" to read "carrageenan" and "salts of carrageenan," respectively; (4) to permit the use of furcelleran and salts of furcelleran as optional ingredients in each of the foods standardized; (5) to permit the use of propylene glycol and glycerin as carriers of the optional stabilizing ingredients; (6) to delete the requirement for label declaration of optional whey ingredients and natural flavorings, when used; (7) to expand the list of stabilizing ingredients for use in fruit sherbets and water ices to include propylene glycol ether of methylcellulose; and (8) provide for other labeling changes.

Notices announcing the filing of petitions proposing amendments of the standards for frozen desserts were published in the FEDERAL REGISTER of February 10, 1962 (27 F.R. 1274) and May 7, 1964 (29 F.R. 6016).

Two petitions proposed that the list of dairy ingredients should be expanded to include a modified skim milk product and to include the whey ingredients, concentrated whey and dried whey. The order establishing standards for frozen desserts was based on public hearings. At the hearings, witnesses referred to the modified skim milk product by the proprietary name "Nutrimix." Their testimony left doubt in the record concerning the composition of "Nutrimix." The petition proposing that this modified skim milk product be listed as a permitted dairy ingredient prescribes that it is made by treating concentrated skim milk with calcium hydroxide and disodium phosphate and sets specifications to guard against the use of soured dairy ingredients. The order promulgated July 27, 1960, did not include whey ingredients among the optional dairy ingredients of ice cream. The hearings on which the order was based were held before United States grade standards for dried whey were announced and before whey ingredients had been adequately tested in commercial ice cream. Since the hearings, ice cream makers have been able, by using appropriate specifications, to obtain good quality whey ingredients (formerly available only in limited quantity) and have found them to be suitable dairy ingredients to supply up to one-fourth of the nonfat milk solids of ice cream. Such use of whey ingredi-

ents makes no perceptible difference in the ice cream. The other dairy ingredients of ice cream are not designated for label declaration, and it would be illogical to single out concentrated whey and dried whey as dairy ingredients required to be named on the labels.

Proposals were made for amending the provisions concerning the stabilizing ingredients permitted in frozen desserts. The witnesses at the hearings used the name "Irish moss," and "extract of Irish moss" for the stabilizers of seaweed origin. Since the hearings, food additive regulations have designated these ingredients by the names "carrageenan" and "salts of carrageenan." It is appropriate to use these established names in the frozen dessert standards to replace the designations "Irish moss" and "extract of Irish moss."

Food additive regulations have been established for stabilizers derived from other species of seaweeds. In their functional effectiveness these stabilizers are similar to carrageenan and its salts. They are designated "furcelleran" and "salts of furcelleran." It is reasonable to adopt the proposed amendment for adding furcelleran and salts of furcelleran to the lists of permitted stabilizers.

A petition requested that the list of stabilizing ingredients for use in fruit sherbets and water ices be expanded to include propylene glycol ether of methylcellulose. It included evidence that this stabilizer has advantages in improving the whippability of the mixes used in freezing sherbets and water ices. The name used for this ingredient in the food additive regulation is "hydroxypropyl methylcellulose."

As promulgated, the frozen dessert order listed only dextrin as a carrier for the stabilizing ingredients. A petition proposed that the liquid carriers propylene glycol and glycerin be listed also. These ingredients facilitate the incorporation of stabilizers in a fluid form in frozen dessert mixes.

In the frozen dessert order, the finding concerning fruit ingredients states that they may be acidulated before use. The standards list only citric and ascorbic acids as optional acidifying ingredients. A petition proposed that phosphoric acid be permitted also. It included a showing that phosphoric acid functions effectively and has been extensively used as an acidifying ingredient for fruits used in frozen desserts.

Of the labeling changes requested in the petitions, the principal one was a proposed revision of the paragraph prescribing the requirements for label declaration of the flavor characterizing ingredients of ice cream (§ 20.1(g)). For ice cream characterized by blends of artificial and natural flavoring ingredients, the proposed revision called for different labeling, depending upon whether the natural or the artificial flavoring predominates. Where artificial flavoring predominates or is the only flavoring used, the name would be preceded by the term "artificial" or "artificially flavored." Where the natural flavoring predominates, the name of the characterizing flavor would be followed by the word "flavored" and the label would also bear the declaration "artificial flavor added." This proposal included requirements for size of type to be used and provisions to show when artificial flavoring is deemed to predominate in fruit ice cream, nut ice cream, and ice cream characterized by the flavor of vanilla. The proposal sets out the labeling requirements for ice cream in more definite terms and in greater detail than they are set out in the paragraph of the standard to be replaced.

The petitions also proposed that the standard for fruit sherbet be amended to delete the label declaration requirement for whey ingredients. Sherbets are generally made by blending plain ice cream mix with fruit ingredients.

The frozen dessert order as promulgated did not permit whey ingredients to be used in ice cream mix. In that order it was logical to designate for label declaration whey ingredients when specially used in making fruit sherbets. Amending the ice cream standard to permit whey ingredients in ice cream mix changes the situation. With the amendment of the ice cream standard, it is consistent to delete the label declaration requirement for whey ingredients in fruit sherbets.

The standards for fruit sherbets and water ices now require label declaration of any natural flavors used with fruit ingredients. It was proposed that this labeling requirement be deleted. Comments received point out that these standards require the use of not less than 2 percent of citrus fruits, 6 percent of berry fruits, and 10 percent of other fruits. In consideration of these requirements and of the fact that such flavorings as citrus oils left in citrus juices produce the same flavor effects as if they were added separately, it is reasonable to adopt the proposed amendment.

Polyoxyethylene (20) sorbitan tristearate and polysorbate 80 were recognized by food additive regulations in §§ 121.1008 and 121.1009 as permissible for limited use in ice cream, frozen custard, and ice milk. Propylene glycol alginate was recognized by food additive regulation § 121.1015 as permissible for limited use in ice cream, frozen custard, ice milk, fruit sherbets, and water ices. In the identity standards for the frozen desserts, these three permitted ingredients have been referred to only by a cross-reference footnote. This has been found to be unsatisfactory. Accordingly, in the revision of the standards for the frozen desserts hereinafter set forth these three ingredients are specifically named as permitted optional ingredients. Since this is an editorial change it is not subject to the filing of objections and requests for a hearing. Also, other minor editorial changes are made. The references to coloring as an optional ingredient are changed to "coloring, including artificial coloring." In § 20.1 this reference is relocated at the end of paragraph (a) and a footnote is used to call attention to the labeling exemption made by section 403(k) of the Federal Food, Drug, and Cosmetic Act for artificial coloring in ice cream.

On the basis of the information furnished in the petitions proposing the amendments, the comments filed, and other data available, it is concluded that it will promote honesty and fair dealing in the interests of consumers to amend the standards as hereinafter set forth. Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (secs. 401, 701, 52 Stat. 1046, 1055, as amended 70 Stat. 919, 72 Stat. 948; 21 U.S.C. 341, 371) and under the authority delegated to the Commissioner of Food and Drugs by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471); *It is ordered*, That the definitions and standards of identity for ice cream, frozen custard, ice milk, fruit sherbets, and water ices (21 CFR 20.1, 20.2, 20.3, 20.4, 20.5) be amended as follows:

1. Section 20.1 is amended to provide in paragraph (b)(4) for: (1) The use of phosphoric acid as an acidulant permitted in optional fruit ingredients used; (2) to provide in paragraph (c) that skim milk (in concentrated or dried form) modified by treatment with calcium hydroxide and disodium phosphate, concentrated cheese whey, and dried cheese whey may be used as optional dairy ingredients; (3) to provide in paragraph (f)(2) that the designations "Irish moss" and "extract of Irish moss" be changed to "carrageenan" and "salts of carrageenan," respectively; that "furcelleran" and "salts of furcelleran" be included in the list; and that propylene glycol and glycerin be recognized as ingredients permitted for use as carriers of the optional stabilizing ingredients; and (4) substitution for paragraph (g), wherein labeling requirements are prescribed, a new paragraph (g) as proposed in the notice published May 7, 1964 (29 F.R. 6016).

As revised, § 20.1 reads as follows:

**§ 20.1 Ice cream; identity; label statement of optional ingredients.**

(a) Ice cream is the food prepared by freezing, while stirring, a pasteurized mix composed of one or more of the optional ingredients specified in paragraph (c) of this section, sweetened with one or more of the optional sweetening ingredients specified in paragraph (d) of this section. One or more of the optional characterizing ingredients specified in paragraph (b) of this section and one or more of the optional ingredients specified in paragraph (d) (5) to (10) may be used to characterize the ice cream. One or more of the optional caseinates specified in paragraph (e) and one or more of the optional ingredients specified in paragraph (f) of this section may be used, subject to the conditions hereinafter set forth. The mix may be seasoned with salt, and may be homogenized. The kind and quantity of optional dairy ingredients used, as specified in paragraph (c) of this section, and the content of milk fat and nonfat milk solids therein, are such that the weights of milk fat and total milk solids are not less than 10 percent and 20 percent, respectively, of the weight of the finished ice cream; but in no case shall the content of milk solids not fat be less than 6 percent, except that when one or more of the bulky optional ingredients as specified in paragraph (b) (3) to (8), inclusive, of this section, are used, the weights of milk fat and total milk solids (exclusive of such fat and solids in any malted milk used) are not less than 10 percent and 20 percent, respectively, of the remainder obtained by subtracting the weight of such optional ingredients, modified as prescribed below, from the weight of the finished ice cream; but in no case is the weight of milk fat or total milk solids less than 8 percent and 16 percent, respectively, of the weight of the finished ice cream. The optional caseinates specified in paragraph (e) of this section are not deemed to be milk solids. In calculating the reduction of milk fat and total milk solids from the use of bulky optional ingredients, chocolate and cocoa solids used shall be considered the bulky ingredients of paragraph (b)(3) of this section. In order to make allowance for additional sweetening ingredients needed when bulky ingredients are used, the weight of chocolate or cocoa solids may be multiplied by 2.5; the weight of fruit or nuts used may be multiplied by 1.4; and the weight of partially or wholly dried fruits or fruit juices may be multiplied by appropriate factors to obtain the original weights before drying and this weight multiplied by 1.4. The finished ice cream contains not less than 1.6 pounds of total solids to the gallon and weighs not less than 4.5 pounds to the gallon. Artificial flavoring in any chocolate, cocoa, confectionery, or other ingredient used is an optional ingredient of the finished ice cream. Coloring, including artificial coloring, may be added.[1]

(b) The optional characterizing ingredients referred to in paragraph (a) of this section are:

(1) Ground spice, ground vanilla beans, infusion of coffee or tea, or any natural food flavoring.

(2) Artificial food flavoring.

(3) Chocolate or cocoa, which may be added as such or as a suspension in sirup, and which may contain disodium phosphate or sodium citrate in such quantity that the finished ice cream contains not more than 0.2 percent by weight of disodium phosphate or sodium citrate. For the purposes of this section, the term "cocoa" means one or any combination of two or more of the following: Cocoa, breakfast cocoa, low-fat cocoa, and the unpulverized residual material prepared by removing part of the fat from ground cacao nibs.

(4) Mature fruit or the juice of mature fruit, either of which may be fresh, frozen, canned, concentrated, or partially or wholly dried. The fruit may be whole, shredded, or comminuted; it may be sweetened, thickened with pectin or with one or more of the ingredients named in paragraph (f)(2) of this section, subject to the restriction on the total quantity of such substances in ice cream prescribed in that paragraph, and it may be acidulated with citric acid, ascorbic acid, or phosphoric acid. The fruit is prepared by the removal of pits, seeds, skins, and cores, where such removal is usual in preparing that kind of fruit for consumption as fresh fruit. In the case of fruit or fruit juice from which part of the water is removed, the substances contributing flavor volatilized during water removal may be condensed and reincorporated in the concentrated fruit or fruit juice. In the case of the citrus fruits the whole fruit, including the peel but excluding the seeds, may be used, and in the case of citrus juice or concentrated citrus juice, cold-pressed citrus oil may be added in an amount not exceeding that which would have been obtained if the peel from the whole fruit had been used. For the purposes of this section, the flesh of the coconut shall be considered a fruit.

(5) Nut meats, which may be roasted, cooked in an edible fat or oil, or preserved in sirup, and which may be salted.

(6) Malted milk.

(7) Confectionery. For the purposes of this section, the term "confectionery" means candy, cakes, cookies, and glacéed fruits.

(8) Properly prepared and cooked cereal.

(9) Distilled alcoholic beverage, including liqueurs or wine, in an amount not to exceed that required for flavoring the ice cream.

(c) The optional dairy ingredients referred to in paragraph (a) of this section are: Cream, dried cream, plastic cream (sometimes known as concentrated milk fat), butter, butter oil, milk, concentrated milk, evaporated milk, sweetened condensed milk, superheated condensed milk, dried milk, skim milk, concentrated skim milk, evaporated skim milk, condensed skim milk, superheated condensed skim milk, sweetened condensed skim milk, sweetened condensed partskim milk, nonfat dry milk, sweet cream buttermilk, condensed sweet cream buttermilk, dried sweet cream buttermilk, skim milk that has been concentrated and from which part of the lactose has been removed by crystallization, skim milk in concentrated or dried form which has been modified by treating the concentrated skim milk with calcium hydroxide and disodium phosphate, concentrated cheese whey, and dried cheese whey. Water may be added, or water may be evaporated from the mix. The sweet cream buttermilk and the concentrated sweet cream buttermilk or dried sweet cream buttermilk, when adjusted with water to a total solids content of 8.5 percent, has a titratable acidity of not more than 0.17 percent, calculated as lactic acid. The term "milk" as used in this section means cow's milk. Any concentrated cheese whey and dried cheese whey used contribute not more than 25 percent by weight of the total nonfat milk solids content of the finished food. Dried cheese whey is uniformly light in color, free from brown and black scorched particles, and has an alkalinity of ash, not more than 225 milliliters 0.1*N* HCl per 100 grams, a bacterial count of not more than 50,000 per gram, and, as adjusted with water to a total solids content of 6.5 percent, a titratable acidity of not more than 0.16 percent, calculated as lactic acid. Concentrated cheese whey has an alkalinity of ash, not more than 115 milliliters 0.1*N* HCl per 100 grams, a bacterial count of not more than 50,000 per gram, and, as adjusted with water to a total solids content of 6.5 percent, a titratable acidity of not more than 0.18 percent, calculated as lactic acid. The modified skim milk, when adjusted with water to a total solids content of 9 percent, is substantially free of lactic acid as determined by titration with 0.1*N* NaOH and it has a pH value in the range of 8.0 to 8.3.

(d) The optional sweetening ingredients referred to in paragraph (a) of this section are:

(1) Sugar (sucrose) or sugar sirup.

(2) Dextrose.

(3) Invert sugar (in paste or sirup form).

(4) Corn sirup, dried corn sirup, glucose sirup, dried glucose sirup.

(5) Maple sirup, maple sugar.

(6) Honey.

(7) Brown sugar.

(8) Malt sirup, maltose sirup, malt extract.

(9) Dried malt sirup, dried maltose sirup, dried malt extract.

(10) Refiner's sirup.

(11) Molasses (other than blackstrap).

(12) Lactose.

(13) Fructose.

(e) The optional caseinates referred to in paragraph (a) of this section which may be added to ice cream mix containing not less than 20 percent total milk solids are: Casein prepared by precipitation with gums, ammonium caseinate, calcium caseinate, potassium caseinate, and sodium caseinate. Caseinates may be added in liquid or dry form, but must be free of excess alkali.

(f) Other optional ingredients referred to in paragraph (a) of this section are:

(1) Liquid eggs, frozen eggs, dried eggs, egg yolks, frozen egg yolks, and dried egg yolks. Any egg ingredient used is added to the mix before it is pasteurized. The total weight of egg yolk solids in the finished ice cream from one or a combination of two or more such ingredients is less than the minimum prescribed for frozen custard by § 20.2 of this chapter (1.4 percent).

(2) Agar-agar, algin (sodium alginate), calcium sulfate, gelatin, gum acacia, guar seed gum, gum karaya, locust bean gum, oat gum, gum tragacanth, carrageenan, salts of carrageenan, furcelleran, salts of furcelleran, lecithin, psyllium seed husk, sodium carboxymethylcellulose. The total weight of the solids of any such ingredient used singly or of any combination of two or more such ingredients used (including any such ingredient and pectin added separately to the fruit ingredient) is not more than 0.5 percent of the weight of the finished ice cream. Such ingredients may be added in admixture with dextrin, propylene glycol, or glycerin.

(3) Monoglycerides or diglycerides or both of fat-forming fatty acids. The total weight of such ingredients is not more than 0.2 percent of the weight of

[1] Section 403(k) of the Federal Food, Drug, and Cosmetic Act grants label declaration exemption for artificial coloring in ice cream.

the finished ice cream. If the preparation used is one having a high proportion of monoglycerides (over 90 percent), it may be preblended with edible fat, but the amount of such fat does not exceed 20 percent by weight of the blend, and the total amount of the blend used does not exceed 0.2 percent of the weight of the finished ice cream.

(4) Polyoxethylene (20) sorbitan tristearate, polysorbate 80, or both (complying with the provisions of § 121.1008 and § 121.1009 of this chapter including the limit on either used separately or both used in combination of not more than 0.1 percent by weight of the finished frozen dessert).

(5) Propylene glycol alginate (complying with the provisions of § 121.1015 of this chapter including the limit of not more than 0.5 percent by weight of the finished frozen dessert).

(g) (1) The name of the food is "ice cream."

(2) (i) If the food contains no artificial flavor, the label shall bear the common or usual name of the characterizing flavor, e.g., "vanilla," in letters not less than one-half the height of the letters used in the name of the food.

(ii) If the food contains both a natural characterizing flavor and an artificial flavor simulating it, and if the natural flavor predominates, the label shall bear, wherever the name of the food appears so conspicuously as to be easily seen under customary conditions of purchase, the common name of the characterizing flavor, in letters not less than one-half the height of the letters used in the name of the food, followed by the word "flavored," in letters not less than one-half the height of the letters in the name of the characterizing flavor, e.g., "VANILLA flavored," or "PEACH flavored," or "VANILLA flavored and STRAWBERRY flavored".

(iii) If the food contains both a natural characterizing flavor and an artificial flavor simulating it, and if the artificial flavor predominates, or if artificial flavor is used alone, the label shall bear, wherever the name of the food appears so conspicuously as to be easily seen under customary conditions of purchase, the common name of the characterizing flavor, in letters not less than one-half the height of the letters used in declaring the name of the food, preceded by "artificial" or "artificially flavored," in letters not less than one-half the height of the letters in the name of the characterizing flavor, e.g., "artificial VANILLA," or "artificially flavored STRAWBERRY" or "artificially flavored VANILLA and artificially flavored STRAWBERRY."

(3) If the food is subject to the requirements of subparagraph (2)(ii) of this paragraph or if it contains any artificial flavor not simulating the characterizing flavor, the label shall also bear the words "artificial flavor added" or "artificial -------- flavor added," the blank being filled with the common name of the flavor simulated by the artificial flavor in letters of the same size and prominence as the words that precede and follow it. Wherever the name of the characterizing flavor appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the words prescribed by this subparagraph shall immediately and conspicuously precede or follow such name, in a size reasonably related to the prominence of the name of the characterizing flavor and in any event the size of the type is not less than 6-point on packages containing less than 1 pint, not less than 8-point on packages containing at least 1 pint but less than one-half gallon, not less than 10-point on packages containing at least one-half gallon but less than 1 gallon, and not less than 12-point on packages containing 1 gallon or over; *Provided, however,* That where the characterizing flavor and a trade mark or brand are presented together, other written, printed, or graphic matter that is a part of or is associated with the trade mark or brand, may intervene if the required words are in such relationship with the trade mark or brand as to be clearly related to the characterizing flavor; *and provided further,* That if the finished product contains more than one flavor of ice cream subject to the requirements of this subparagraph, the statements required by this subparagraph need appear only one in each statement of characterizing flavors present in such ice cream, e.g., "VANILLA flavored, CHOCOLATE and STRAWBERRY flavored, artificial flavors added."

(4) If the food contains both a natural characterizing flavor and an artificial flavor simulating the characterizing flavor, any reference to the natural characterizing flavor shall, except as otherwise authorized by this paragraph, be accompanied by a reference to the artificial flavor, displayed with substantially equal prominence, e.g., "strawberry and artificial strawberry flavor."

(5) An artificial flavor simulating the characterizing flavor shall be deemed to predominate:

(i) In the case of vanilla beans or vanilla extract used in combination with vanillin, if the amount of vanillin used is greater than 1 ounce per 13.35 ounces of vanilla beans or than one unit of vanilla constitutent, as that term is defined in § 22.1(c) of this chapter.

(ii) In the case of fruit or fruit juice used in combination with artificial fruit flavor, if the quantity of the fruit or fruit juice used is such that, in relation to the weight of the finished ice cream, the weight of the fruit or fruit juice, as the case may be (including water necessary to reconstitute partially or wholly dried fruits or fruit juices to their original moisture content) is less than 2 percent in the case of citrus ice cream, 6 percent in the case of berry or cherry ice cream, and 10 percent in the case of ice cream prepared with other fruits.

(iii) In the case of nut meats used in combination with artificial nut flavor, if the quantity of nut meats used is such that, in relation to the finished ice cream, the weight of the nut meats is less than 2 percent.

(iv) In the case of two or more fruits or fruit juices, or nut meats, or both, used in combination with artificial flavors simulating the natural flavors and dispersed throughout the food, if the quantity of any fruit or fruit juice, or nut meat is less than one-half the applicable percentage specified in subdivision (ii) or (iii) of this subparagraph, e.g., 5 percent banana plus 1 percent almond would qualify for "BANANA flavored and ALMOND flavored"; 5 percent pineapple plus 3 percent strawberry would qualify for "PINEAPPLE flavored and STRAWBERRY flavored"; 3 percent raspberry plus 1 percent orange would qualify for "RASPBERRY flavored and ORANGE flavored."

(6) If two or more flavors of ice cream are distinctively combined in one package, e.g., "Neapolitan" ice cream, the applicable provisions of this paragraph shall govern each flavor of ice cream comprising the combination.

Because of the cross-references employed, the amendments ordered in the standard for ice cream (§ 20.1) become applicable to the standards for frozen custard (§ 20.2) and ice milk (§ 20.3).

2. In § 20.3 *Ice milk* * * *, paragraph (h) is amended by changing the word "flavorings" to "flavoring".

3. Section 20.4 is amended (1) in paragraph (b) to provide for the use of phorphoric acid as an acidulant permitted in optional fruit ingredients used; (2) to provide in paragraph (c) that the designations for the permitted whey ingredients be reworded as "concentrated cheese whey" and "dried cheese whey."; (3) to provide in paragraph (e)(2) that the designations "Irish moss" and "extract of Irish moss" be changed to "carrageenan" and "salts of carrageenan," respectively; that "furcelleran," "salts of furcelleran," and "hydroxypropyl methylcellulose" be included in the list; and that propylene glycol and glycerin be recognized as ingredients permitted for use as carriers of the optional stabilizing ingredients; and (4) by deleting from paragraph (g) the provisions prescribing labeling requirements for optional whey ingredients and natural flavoring, when used. As revised, this section reads as follows:

**§ 20.4 Fruit sherbets; identity; label statement of optional ingredients.**

(a) Fruit sherbets are the foods each of which is prepared by freezing, while stirring, a mix composed of one or more of the optional characterizing fruit ingredients specified in paragraph (b) of this section and one or more of the optional ingredients specified in paragraph (c) of this section, sweetened with one or more of the optional sweetening ingredients specified in paragraph (d) of this section. One or more of the optional ingredients specified in paragraph (e) of this section may be used, subject to the conditions hereinafter set forth. The mix of combined dairy ingredients, with or without other ingredients, is pasteurized. The titratable acidity of the finished fruit sherbet, calculated as lactic acid, is not less than 0.35 percent. The mix with or without added water may be seasoned with salt, and may be homogenized. The optional dairy ingredients used and the content of milk fat and nonfat milk solids therein are such that the weight of milk fat is not less than 1 percent and not more than 2 percent, and the weight of total milk solids is not less than 2 percent and not more than 5 percent of the weight of the finished fruit sherbet. The optional caseinates specified in paragraph (e)(5) of this section are not deemed to be milk solids. The finished fruit sherbet weighs not less than 6 pounds to the gallon.

(b) The optional fruit characterizing ingredients referred to in paragraph (a) of this section are any mature fruit or the juice of any mature fruit. The fruit or fruit juice used may be fresh, frozen, canned, concentrated, or partially or wholly dried. The fruit may be thickened with pectin or other of the optional ingredients named in paragraph (e)(2) of this section, subject to the restriction on the total quantity of such substances in fruit sherbets prescribed in that paragraph. The fruit is prepared by the removal of pits, seeds, skins, and cores, where such removal is usual in preparing that kind of fruit for consumption as fresh fruit. The fruit may be screened, crushed, or otherwise comminuted. It may be acidulated with citric acid, ascorbic acid, or phosphoric acid. In the case of concentrated fruit or fruit juices, from which part of the water is removed, substances contributing flavor volatilized during water removal may be condensed and reincorporated in the concentrated fruit or fruit juice. In the case of citrus fruits, the whole fruit, including the peel but excluding the seeds, may be used, and in the case of citrus juice or concentrated citrus juices, cold-pressed citrus oil may be added thereto in an amount not exceeding that which would have been obtained if the whole fruit had been used. The quantity of fruit ingredients used is such that, in relation to the weight of the finished sherbet, the weight of fruit or fruit juice, as the case may be (including water necessary to reconstitute partially or wholly dried fruits or fruit juices to their original moisture content), is not less than 2 percent in the case of citrus sherbets, 6 percent in the case of berry sherbets, and 10 percent in the case of sherbets prepared with other fruits. For the purposes of this section, tomatoes and rhubarb are considered as kinds of fruit.

(c) The optional dairy ingredients referred to in paragraph (a) of this section are: Cream, dried cream, plastic, cream (sometimes known as concentrated milk fat), butter, butter oil, milk, concentrated milk, evaporated milk, superheated condensed milk, sweetened condensed milk, dried milk, skim milk, concentrated skim milk, evaporated skim milk, condensed skim milk, superheated condensed skim milk, sweetened condensed skim milk, sweetened condensed part-skim milk, nonfat dry milk, sweet cream buttermilk, condensed sweet cream buttermilk, dried sweet cream buttermilk, skim milk that has been concentrated and from which part of the lactose has been removed by crystallization, concentrated cheese whey, and dried cheese whey. Water may be added, or water may be evaporated from the mix. The sweet cream buttermilk and the concentrated sweet cream buttermilk or dried sweet cream buttermilk, when adjusted with water to a total solids content of 8.5 percent, has a titratable acidity of not more than 0.17 percent, calculated as lactic acid. The term "milk" as used in this section means cow's milk. Dried cheese whey is uniformly light in color, free from brown and black scorched particles, and has an alkalinity of ash, not more than 225 milliliters 0.1N HCl per 100 grams, a bacterial count of not more than 50,000 per gram, and, as adjusted with water to a total solids content of 6.5 percent, a titratable acidity of not more than 0.16 percent calculated as lactic acid. Concentrated cheese whey has an alkalinity of ash, not more than 115 milliliters 0.1N HCl per 100 grams, a bacterial count of not more than 50,000 per gram, and, as adjusted with water to a total solids content of 6.5 percent, a titratable acidity of not more than 0.18 percent, calculated as lactic acid.

(d) The optional sweetening ingredients referred to in paragraph (a) of this section are: Sugar (sucrose), dextrose, invert sugar (paste or sirup), glucose sirup, dried glucose sirup, corn sirup, dried corn sirup, malt sirup, malt extract, dried malt sirup, dried malt extract, maltose sirup, dried maltose sirup.

(e) Other optional ingredients referred to in paragraph (a) of this section are:

(1) Liquid eggs, frozen eggs, dried eggs, egg yolks, frozen yolks, dried yolks; but the weight of egg yolk solids therein is less than 0.5 percent of the weight of the finished fruit sherbet.

(2) Agar-agar, algin (sodium alginate), calcium sulfate, egg white, gelatin, gum acacia, guar seed gum, gum karaya, locust bean gum, oat gum, gum tragacanth, hydroxypropyl methylcellulose, carrageenan, salts of carrageenan, furcelleran, salts of furcelleran, lecithin, pectin, psyllium seed husk, sodium carboxymethylcellulose. The total weight of the solids of any such ingredient used singly or of any combination of two or more such ingredients used (including any such ingredient added separately to the fruit ingredient) is not more than 0.5 percent of the weight of the finished fruit sherbet. Such ingredients may be added in admixture with dextrin, propylene glycol, or glycerin.

(3) Monoglycerides or diglycerides or both of fat-forming fatty acids. The total weight of such ingredients is not more than 0.2 percent of the weight of the finished fruit sherbet. If the preparation used is one having a high proportion of monoglycerides (over 90 percent), it may be preblended with edible fat, but the amount of such fat does not exceed 20 percent by weight of the blend, and the total amount of the blend used does not exceed 0.2 percent of the weight of the finished fruit sherbet.

(4) Polyoxyethylene (20) sorbitan tristearate, polysorbate 80, or both (complying with the provisions of § 121.1008 and § 121.1009 of this chapter including the limit on either used separately or both used in combination of not more than 0.1 percent by weight of the finished frozen dessert).

(5) Propylene glycol alginate (complying with the provisions of § 121.1015 of this chapter including the limit of not more than 0.5 percent by weight of the finished frozen dessert).

(6) Citric acid, tartaric acid, malic acid, lactic acid, ascorbic acid, phosphoric acid, or any combination of two or more of these in such quantity as seasons the finished food.

(7) Casein prepared by precipitation with gums, ammonium caseinate, calcium caseinate, potassium caseinate, sodium caseinate.

(8) Any natural food flavoring.

(9) Any artificial flavoring.

(10) Coloring, including artificial coloring.

(f) The name of each such fruit sherbet is "---------- sherbet," the blank being filled in with the common name of the fruit or fruits from which the fruit ingredients used are obtained. When the names of two or more fruits are included, such names shall be arranged in order of predominance, if any, by weight of the respective fruit ingredients used.

(g) When the optional ingredients artificial coloring, or artificial flavoring, are used in fruit sherbet they shall be named on the labels as follows:

(1) The label shall designate artificial coloring by the statement "artificially colored," "artificial coloring added," "with added artificial coloring," or "---------- an artificial color added," the blank being filled in with the name of the artificial coloring used.

(2) The label shall designate artificial flavoring by the statement "artificially flavored," "artificial flavoring added," "with added artificial flavoring," or "---------- an artificial flavor added," the blank being filled in with the name of the artificial flavoring used.

(3) Whenever artificial flavoring is not added as such but as a component of some other ingredient, the label shall include the statement "---------- artificially flavored," the blank being filled in with the name of such other ingredient. Label statements may be combined, as for example, "with added artificial flavoring and artificial coloring."

(h) Where one or more of the optional ingredients artifical coloring or artificial flavoring are used and there appears on the label any representation as to the fruit or fruits in the sherbet, such representation shall be immediately and conspicuously accompanied by appropriate label statements as prescribed in paragraph (g) of this section, showing the optional ingredients used.

(i) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the statements specified in this section, showing the optional ingredients used, shall immediately and conspicuously precede or follow such name without intervening written, printed, or graphic matter.

4. Section 20.5 is amended to provide in paragraph (d)(2) for the use of phosphoric acid as an acidulant; in paragraph (d)(1) that the designations "Irish moss" and "extract of Irish moss" be changed to "carrageenan" and "salts of carrageenan," respectively; that "fur-

celleran," "salts of furcelleran," and "hydroxypropyl methylcellulose" be included in the list; and that propylene glycol and glycerin be recognized as ingredients permitted for use as carriers of the optional stabilizing ingredients; and to delete from paragraph (f) the requirement for label declaration of natural flavorings, when used. As revised, this section reads as follows:

**§ 20.5 Water ices; identity; label statement of optional ingredients.**

(a) Water ices are the foods, each of which is prepared by freezing, while stirring, a mix composed of one or more of the optional characterizing fruit ingredients specified in paragraph (b) of this section, sweetened with one or more of the optional sweetening ingredients specified in paragraph (c) of this section. One or more of the optional ingredients specified in paragraph (d) of this section may be used, subject to the conditions hereinafter set forth. The titratable acidity of the finished water ice, calculated as lactic acid, is not less than 0.35 percent. The mix, with or without added water, may be seasoned with salt, and may be homogenized. The finished water ice weighs not less than 6 pounds to the gallon.

(b) The optional fruit ingredients referred to in paragraph (a) of this section are any mature fruit or the juice of any mature fruit. The fruit or fruit juice used may be fresh, frozen, canned, concentrated, or partially or wholly dried. The fruit may be thickened with pectin or other of the optional ingredients named in paragraph (d)(1) of this section subject to the restriction on the total quantity of such substances in water ices prescribed in that paragraph. The fruit is prepared by the removal of pits, seeds, skins, and cores where such removal is usual in preparing that kind of fruit for consumption as fresh fruit. The fruit may be screened, crushed, or otherwise comminuted. It may be acidulated with citric acid, ascorbic acid, or phosphoric acid. In the case of fruit or fruit juices from which part of the water is removed, substances contributing flavor volatilized during water removal may be condensed and reincorporated in the concentrated fruit or fruit juice. In the case of citrus fruits, the whole fruit, including the peel but excluding the seeds, may be used, and in the case of citrus juice or concentrated citrus juices, cold-pressed citrus oil may be added thereto in an amount not exceeding that which would have been obtained if the whole fruit had been used. The quantity of fruit ingredients used is such that in relation to the weig ht of the finished water ice, the weight of fruit or fruit juice as the case may be (including water necessary to reconstitute partially or wholly dried fruits or fruit juices to their original moisture content) is not less than 2 percent in the case of citrus ices, 6 percent in the case of berry ices, and 10 percent in the case of ices prepared with other fruits.

(c) The optional sweetening ingredients referred to in paragraph (a) of this section are: Sugar (sucrose), dextrose, invert sugar (paste or sirup), glucose sirup, dried glucose sirup, corn sirup, dried corn sirup, malt sirup, malt extract, dried malt sirup, dried malt extract, maltose sirup, dried maltose sirup.

(d) Other optional ingredients referred to in paragraph (a) of this section are:

(1) Agar-agar, algin (sodium alginate), egg white, gelatin, gum acacia, guar seed gum, gum karaya, locust bean gum, oat gum, gum tragacanth, hydroxypropyl methylcellulose, carrageenan, salts of carrageenan, furcelleran, salts of furcelleran, propylene glycol alginate, pectin, psyllium seed husk, sodium carboxymethylcellulose. The total weight of the solids of any such ingredient used singly, or of any combination of two or more such ingredients used (including any such ingredient added separately to the fruit ingredient), is not more than 0.5 percent of the weight of the finished water ice. Such ingredients may be added in admixture with dextrin, propylene glycol, or glycerin.

(2) Citric acid, tartaric acid, malic acid, lactic acid, ascorbic acid, phosphoric acid, or any combination of two or more of these in such quantity as seasons the finished food.

(3) Any natural flavoring.

(4) Any artificial flavoring.

(5) Coloring, including artificial coloring.

(e) The name of each such water ice is "_____ ice," the blank being filled in with the common name of the fruit or fruits from which the fruit ingredient used is obtained. When the names of two or more fruits are included, such names shall appear in the order of predominance, if any, by weight of the respective fruit ingredients used.

(f) When the optional ingredients artificial coloring, and artificial flavoring are used in water ices they shall be named on the labels as follows:

(1) The label shall designate artificial coloring by the statement "artificially colored," "artificial coloring added," "with added artificial coloring," or "_____, an artificial color added," the blank being filled in with the name of the artificial coloring used.

(2) The label shall designate artificial flavoring by the statement "artificially flavored," "artificial flavoring added," "with added artificial flavoring," or "_____, and artificial flavor added," the blank being filled in with the name of the artificial flavoring used.

Label statements may be combined, as for example, "flavoring and artificial coloring added."

(g) Where one or more of the optional ingredients artificial coloring or artificial flavoring are used and there appears on the labeling any representation as to the fruit or fruits in the ice, such representation shall be immediately and conspicuously accompanied by appropriate label statements as prescribed in paragraph (f) of this section, showing the optional ingredients used.

(h) Wherever the name of the food appears on the label so conspicuously as to be easily seen under customary conditions of purchase, the statements set out in this section showing the optional ingredients used shall immediately and conspicuously precede or follow such name, without intervening written, printed, or graphic matter.

Any person who will be adversely affected by the foregoing order may at any time within 30 days following the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C. 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing, and such objections must be supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall become effective 180 days from the date of its publication in the FEDERAL REGISTER, except as to any provisions that may be stayed by the filing of proper objections. Notice of the filing of objections or lack thereof will be announced by publication in the FEDERAL REGISTER.

(Secs. 401, 701, 52 Stat. 1046, 1055, as amended 70 Stat. 948; 21 U.S.C. 341, 371)

Dated: December 15, 1964.

JOHN L. HARVEY,
*Deputy Commissioner, of Food and Drugs.*

# Title 26—INTERNAL REVENUE

## Chapter I—Internal Revenue Service, Department of the Treasury

### SUBCHAPTER A—INCOME TAX

[T.D. 6779]

### PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

### Gain on Stock of Certain Foreign Corporations

On July 30, 1964, notice of proposed rule making with respect to the amendment of the Income Tax Regulations (26 CFR Part 1) to conform the regulations to section 1248 of the Internal Revenue Code of 1954, as added by section 15 of the Revenue Act of 1962 (76 Stat. 1041), relating to gain on stock of certain foreign corporations, was published in the FEDERAL REGISTER (29 F.R. 10588). After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the amendment of the regulations as proposed is hereby adopted, subject to the changes set forth below:

PARAGRAPH 1. Section 1.1248-1, as set forth in the notice of proposed rule making, is changed by revising paragraph (d)(2) and by adding a new paragraph (f).

PAR. 2. Section 1.1248-2, as set forth in the notice of proposed rule making, is changed by revising paragraph (d)(1).

PAR. 3. Section 1.1248-3, as set forth in the notice of proposed rule making, is changed by revising paragraph (b)(1), paragraph (c)(4), example (1) of paragraph (d)(5), and paragraph (d)(6).

PAR. 4. Section 1.1248-4, as set forth in the notice of proposed rule making, is changed by revising paragraph (d)(1) and (2) and paragraph (e)(3).

PAR. 5. Section 1.1248-7, as set forth in the notice of proposed rule making, is changed by revising paragraph (a)(1)(i), so much of paragraph (d)(1) as precedes subdivision (i) thereof, so much of paragraph (d)(2) as precedes subdivision (i) thereof, and paragraph (e).

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

Approved: December 16, 1964.

STANLEY S. SURREY,
*Assistant Secretary of the Treasury.*

In order to conform the Income Tax Regulations (26 CFR Part 1) to section 1248 of the Internal Revenue Code of 1954, as added by section 15 of the Revenue Act of 1962 (76 Stat. 1041), there are inserted immediately after § 1.1244(e)-1 the following new sections:

**§ 1.1248 Statutory provisions; gain from certain sales or exchanges of stock in certain foreign corporations.**

SEC. 1248. *Gain from certain sales or exchanges of stock in certain foreign corporations*—(a) *General rule.* If—

(1) A United States person sells or exchanges stock in a foreign corporation, or if a United States person receives a distribution from a foreign corporation which, under section 302 or 331, is treated as an exchange of stock, and

(2) Such person owns, within the meaning of section 958(a), or is considered as owning by applying the rules of ownership of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such foreign corporation at any time during the 5-year period ending on the date of the sale or exchange when such foreign corporation was a controlled foreign corporation (as defined in section 957), then the gain recognized on the sale or exchange of such stock shall be included in the gross income of such person as a dividend, to the extent of the earnings and profits of the foreign corporation attributable (under regulations prescribed by the Secretary or his delegate) to such stock which were accumulated in taxable years of such foreign corporation beginning after December 31, 1962, and during the period or periods the stock sold or exchanged was held by such person while such foreign corporation was a controlled foreign corporation.

(b) *Limitation on tax applicable to individuals.* In the case of an individual, if the stock sold or exchanged is a capital asset (within the meaning of section 1221) and has been held for more than 6 months, the tax attributable to an amount included in gross income as a dividend under subsection (a) shall not be greater than a tax equal to the sum of—

(1) A pro rata share of the excess of—

(A) The taxes that would have been paid by the foreign corporation with respect to its income had it been taxed under this chapter as a domestic corporation (but without allowance for deduction of, or credit for, taxes described in subparagraph (B)), for the period or periods the stock sold or exchanged was held by the United States person in taxable years beginning after December 31, 1962, while the foreign corporation was a controlled foreign corporation, adjusted for distributions and amounts previously included in gross income of a United States shareholder under section 951, over

(B) The income, war profits, or excess profits taxes paid by the foreign corporation with respect to such income; and

(2) An amount equal to the tax that would result by including in gross income, as gain from the sale or exchange of a capital asset held for more than 6 months, an amount equal to the excess of (A) the amount included in gross income as a dividend under subsection (a), over (B) the amount determined under paragraph (1).

(c) *Determination of earnings and profits*—(1) *In general.* For purposes of this section, the earnings and profits of any foreign corporation for any taxable year shall be determined according to rules substantially similar to those applicable to domestic corporations, under regulations prescribed by the Secretary or his delegate.

(2) *Earnings and profits of subsidiaries of foreign corporations.* If—

(A) Subsection (a) applies to a sale or exchange by a United States person of stock of a foreign corporation and, by reason of the ownership of the stock sold or exchanged, such person owned within the meaning of section 958(a)(2) stock of any other foreign corporation; and

(B) Such person owned, within the meaning of section 958(a), or was considered as owning by applying the rules of ownership of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such other foreign corporation at any time during the 5-year period ending on the date of the sale or exchange when such other foreign corporation was a controlled foreign corporation (as defined in section 957),

then, for purposes of this section, the earnings and profits of the foreign corporation the stock of which is sold or exchanged which are attributable to the stock sold or exchanged shall be deemed to include the earnings and profits of such other foreign corporation which—

(C) Are attributable (under regulations prescribed by the Secretary or his delegate) to the stock of such other foreign corporation which such person owned within the meaning of section 958(a)(2) (by reason of his ownership within the meaning of section 958(a)(1)(A) of the stock sold or exchanged) on the date of such sale or exchange; and

(D) Were accumulated in taxable years of such other corporation beginning after December 31, 1962, and during the period or periods—

(i) Such other corporation was a controlled foreign corporation, and

(ii) Such person owned within the meaning of section 958(a)(2) the stock of such other foreign corporation.

(d) *Exclusions from earnings and profits.* For purposes of this section, the following amounts shall be excluded, with respect to any United States person, from the earnings and profits of a foreign corporation.

(1) *Amounts included in gross income under section 951.* Earnings and profits of the foreign corporation attributable to any amount previously included in the gross income of such person under section 951, with respect to the stock sold or exchanged, but only to the extent the inclusion of such amount did not result in an exclusion of an amount from gross income under section 959.

(2) *Gain realized from the sale or exchange of property in pursuance of a plan of complete liquidation.* If a foreign corporation adopts a plan of complete liquidation in a taxable year of a foreign corporation beginning after December 31, 1962, and if section 337(a) would apply if such foreign corporation were a domestic corporation, earnings and profits of the foreign corporation attributable (under regulations prescribed by the Secretary or his delegate) to any net gain from the sale or exchange of property.

(3) *Less developed country corporations.* Earnings and profits accumulated by a foreign corporation while it was a less developed country corporation (as defined in section 902(d)), if the stock sold or exchanged was owned for a continuous period of at least 10 years, ending with the date of the sale or exchange, by the United States person who sold or exchanged such stock. In the case of stock sold or exchanged by a corporation, if United States persons who are individuals, estates, or trusts (each of whom owned within the meaning of section 958(a), or were considered as owning by applying the rules of ownership of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such corporation) owned, or were considered as owning, at any time during the 10-year period ending on the date of the sale or exchange more than 50 percent of the total combined voting power of all classes of stock entitled to vote of such corporation, this paragraph shall apply only if such United States persons owned, or were considered as owning, at all times during the remainder of such 10-year period more than 50 percent of the total combined voting power of all classes of stock entitled to vote of such corporation. For purposes of this paragraph, stock owned by a United States person who is an individual, estate, or trust which was acquired by reason of the death of the predecessor in interest of such United States person shall be considered as owned by such United States person during the period such stock was owned by such predecessor in interest, and during the period such stock was owned by any other predecessor in interest if between such United States person and such other predecessor in interest there was no transfer other than by reason of the death of an individual.

(4) *United States income.* Any item includible in gross income of the foreign corporation under this chapter as income derived from sources within the United States of a foreign corporation engaged in trade or business in the United States.

(5) *Amounts included in gross income under section 1247.* If the United States person whose stock is sold or exchanged was a qualified shareholder (as defined in section 1247(c)) of a foreign corporation which was a foreign investment company (as described in section 1246(b)(1)), the earnings and profits of the foreign corporation for taxable years in which such person was a qualified shareholder.

(e) *Sales or exchanges of stock in certain domestic corporations.* Under regulations prescribed by the Secretary or his delegate, if—

(1) A United States person sells or exchanges stock of a domestic corporation, or receives a distribution from a domestic corporation which, under section 302 or 331, is treated as an exchange of stock, and

(2) Such domestic corporation was formed or availed of principally for the holding, directly or indirectly, of stock of one or more foreign corporations,

such sale or exchange shall, for purposes of this section, be treated as a sale or exchange of the stock of the foreign corporation or corporations held by the domestic corporation.

(f) *Exceptions.* This section shall not apply to—

(1) Distributions to which section 303 (relating to distributions in redemption of stock to pay death taxes) applies;

(2) Gain realized on exchanges to which section 356 (relating to receipt of additional consideration in certain reorganizations) applies; or

(3) Any amount to the extent that such amount is, under any other provision of this title, treated as—

(A) A dividend,

(B) Gain from the sale of an asset which is not a capital asset, or

(C) Gain from the sale of an asset held for not more than 6 months.

(g) *Taxpayer to establish earnings and profits.* Unless the taxpayer establishes the amount of the earnings and profits of the foreign corporation to be taken into account under subsection (a), all gain from the sale or exchange shall be considered a dividend under subsection (a), and unless the taxpayer establishes the amount of foreign taxes to be taken into account under subsection (b), the limitation of such subsection shall not apply.

[Sec. 1248 as added by sec. 15, Rev. Act 1962 (76 Stat. 1041)]

### § 1.1248–1 Treatment of gain from certain sales or exchanges of stock in certain foreign corporations.

(a) *In general.* (1) If a United States person (as defined in section 7701(a)(30)) recognizes gain on a sale or exchange after December 31, 1962, of stock in a foreign corporation, and if in respect of such person the conditions of subparagraph (2) of this paragraph are satisfied, then the gain shall be included in the gross income of such person as a dividend to the extent of the earnings and profits of such corporation attributable to such stock under § 1.1248–2 or 1.1248–3, whichever is applicable, which were accumulated in taxable years of such foreign corporation beginning after December 31, 1962, during the period or periods such stock was held (or was considered as held by reason of the application of section 1223) by such person while such corporation was a controlled foreign corporation. See section 1248(a). For computation of earnings and profits attributable to such stock if there are any "lower tier" corporations, see paragraph (a) (3) and (4) of § 1.1248–2 or paragraph (a) of § 1.1248–3, whichever is applicable. In general, the amount of gain to be included in a person's gross income as a dividend under section 1248 (a) shall be determined separately for each share of stock sold or exchanged. However, such determination may be made in respect of a block of stock if earnings and profits attributable to the block are computed under § 1.1248–2 or 1.1248–3. See paragraph (b) of § 1.1248–2 and paragraph (a)(5) of § 1.1248–3. For the limitation on the tax attributable to an amount included in an individual's gross income as a dividend under section 1248(a), see section 1248 (b) and § 1.1248–4. For the treatment, under certain circumstances, of the sale or exchange of stock in a domestic corporation as the sale or exchange of stock held by the domestic corporation in a foreign corporation, see section 1248(e) and § 1.1248–6. For the nonapplication of section 1248 in certain circumstances, see section 1248(f) and paragraph (e) of this section. For the requirement that the person establish the amount of earnings and profits attributable to the stock sold or exchanged and, for purposes of section 1248(b), the amount of certain taxes, see section 1248(g) and § 1.1248–7.

(2) In respect of a United States person who sells or exchanges stock in a foreign corporation, the conditions referred to in subparagraph (1) of this paragraph are satisfied only if (i) such person owned, within the meaning of section 958(a), or was considered as owning by applying the rules of ownership of section 958(b), 10 percent or more of the total combined voting power of all classes of stock entitled to vote of such foreign corporation at any time during the 5-year period ending on the date of the sale or exchange, and (ii) at such time such foreign corporation was a controlled foreign corporation (as defined in section 957).

(3) For purposes of subparagraph (2) of this paragraph, (i) a foreign corporation shall not be considered to be a controlled foreign corporation at any time before the first day of its first taxable year beginning after December 31, 1962, and (ii) the percentage of the total combined voting power of stock of a foreign corporation owned (or considered as owned) by a United States person shall be determined in accordance with the principles of section 951(b) and the regulations thereunder.

(4) The application of this paragraph may be illustrated by the following examples:

*Example (1).* Corporation F is a foreign corporation which has outstanding 100 shares of one class of stock. F was a controlled foreign corporation for the period beginning on January 1, 1963, and ending on June 30, 1965, but was not a controlled foreign corporation at any time thereafter. On December 31, 1965, Brown, a United States person who has owned 15 shares of F stock since 1962, sells 7 of his 15 shares and recognizes gain with respect to each share sold. Since Brown owned stock representing at least 10 percent of the total combined voting power of F at a time during the 5-year period ending on December 31, 1965, while F was a controlled foreign corporation, the conditions of subparagraph (2) of this paragraph are satisfied. Therefore, section 1248(a) applies to the gain recognized by Brown to the extent of the earnings and profits attributable under § 1.1248–3 to such shares.

*Example (2).* Assume the same facts as in example (1). Assume further that on February 1, 1970, Brown sells the remainder of his shares in F Corporation and recognizes gain with respect to each share sold. Even though Brown did not own stock representing at least 10 percent of the total combined voting power of F on February 1, 1970, nevertheless, in respect of each of the 8 shares of F stock which he sold on such date, the conditions of subparagraph (2) of this paragraph are satisfied since Brown owned stock representing at least 10 percent of such voting power at a time during the 5-year period ending on February 1, 1970, while F was a controlled foreign corporation. Therefore, section 1248(a) applies to the gain recognized by Brown to the extent of the earnings and profits attributable under § 1.1248–3 to such shares. If, however, Brown had sold the reminder of his shares in F on July 1, 1970, since the last date on which Brown owned stock representing at least 10 percent of the total combined voting power of F while F was a controlled foreign corporation was June 30, 1965, a date which is not within the 5-year period ending July 1, 1970, the conditions of subparagraph (2) of this paragraph would not be satisfied and section 1248(a) would not apply.

*Example (3).* Corporation G, a foreign corporation created in 1950, has outstanding 100 shares of one class of stock and uses the calendar year as its taxable year. Corporation X, a United States person, owns 60 shares of G stock and has owned such stock since G was created. Corporation Y, a United States person, owned 15 shares of the G stock from 1950 until December 1, 1962, on which date it sold 10 of such shares. On December 31, 1963, Y sells its remaining 5 shares of the G stock and recognizes gain on the sale. Since G is not considered to be a controlled foreign corporation at any time before January 1, 1963, and since Y did not own stock representing at least 10 percent of the total combined voting power of G at any time on or after such date, the conditions of subparagraph (2) of this paragraph are not satisfied and section 1248(a) does not apply.

(b) *Sale or exchange.* For purposes of this section and §§ 1.1248–2 through 1.1248–7, the term "sale or exchange" includes the receipt of a distribution which is treated as in exchange for stock under section 302(a) (relating to distributions in redemption of stock), section 331(a)(1) (relating to distributions in complete liquidation of a corporation), or section 331(a)(2) (relating to distributions in partial liquidation of a corporation).

(c) *Gain recognized.* Section 1248(a) applies to a sale or exchange of stock in a foreign corporation only if gain is recognized in whole or in part upon such sale or exchange. Thus, for example, if a United States person exchanges stock in a foreign corporation, and if under section 332, 351, 354, 355, or 361 no gain is recognized as a result of a determination by the Commissioner under section 367 that the exchange is not in pursuance of a plan having as one of its principal purposes the avoidance of Federal income taxes, then no amount is includible in the gross income of such person as a dividend under section 1248(a).

(d) *Credit for foreign taxes.* (1) If a domestic corporation includes an amount in its gross income as a dividend under section 1248(a) upon a sale or exchange of stock in a foreign corporation (referred to as a "first tier" corporation), and if on the date of the sale or exchange the domestic corporation owns directly at least 10 percent of the voting stock of the first tier corporation—

(i) The foreign tax credit provisions of sections 901 through 905 shall apply in the same manner and subject to the same conditions and limitations as if the first tier corporation on such date distributed to the domestic corporation as a dividend that portion of the amount included in gross income under section 1248(a) which does not exceed the earnings and profits of the first tier corporation attributable to the stock under § 1.1248–2 or § 1.1248–3, as the case may be, and

(ii) If on such date such first tier corporation owns directly 50 percent or more of the voting stock of a "lower tier" corporation described in paragraph (a)(3) of § 1.1248–2 or paragraph (a)(3) of § 1.1248–3, as the case may be (referred to as a "second tier" corporation), then the foreign tax credit provisions of sections 901 through 905 shall apply in the same manner and subject to the same conditions and limitations as if on such date (*a*) the domestic corporation owned directly that percentage of the stock in the second tier corporation which such domestic corporation is considered to own by reason of the application of section 958(a)(2), and (*b*) the second tier corporation had distributed to the domestic corporation as a dividend that portion of the amount included in gross income under section 1248(a) which does not exceed the earnings and profits of the second tier corporation attributable to such stock under § 1.1248–2 or 1.1248–3, as the case may be.

(2) A credit shall not be allowed under subparagraph (1) of this paragraph in respect of taxes which are not actually paid or accrued. For the inclusion as a dividend in the gross income of a domestic corporation of an amount equal to the taxes deemed paid by such corporation under section 902(a)(1), see section 78.

(3) If subparagraph (1)(ii) of this paragraph applies, and if the amount included in gross income under section 1248(a) upon the sale or exchange of the stock in a first tier corporation described in subparagraph (1)(ii) of this paragraph is less than the sum of the earnings and profits of the first tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, plus the earnings and profits of the second tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, then the amount considered distributed to the domestic corporation as a dividend shall be determined by multiplying the amount included in gross income under section 1248(a) by—

(i) For purposes of applying subparagraph (1)(i) of this paragraph, the percentage that (*a*) the earnings and profits of the first tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, bears to (*b*) the sum of the earnings and profits of the first tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, plus the earnings and profits of the second tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, and

(ii) For purposes of applying subparagraph (1)(ii) of this paragraph, the percentage that (*a*) the earnings and profits of the second tier corporation attributable to such stock under § 1.1248–2 or § 1.1248–3, as the case may be, bears to (*b*) the sum referred to in subdivision (i)(*b*) of this subparagraph.

(4) The provisions of this paragraph may be illustrated by the following examples:

*Example (1).* On June 30, 1964, domestic corporation D owns 10 percent of the voting stock of controlled foreign corporation X. On such date, D sells a share of X stock and includes $200 of the gain on the sale in its gross income as a dividend under section 1248(a). X does not own any stock of a lower tier corporation referred to in paragraph (a)(3) of § 1.1248–3. D uses the calendar year as its taxable year and instead of deducting foreign taxes under section 164, D chooses the benefits of the foreign tax credit provisions for 1964. If D had included $200 in its gross income as a dividend with respect to a distribution from X on June 30, 1964, the amount of the foreign income taxes paid by X which D would be deemed to have paid under section 902(a) in respect of such distribution would be $60. Thus, in respect of the $200 included in D's gross income as a dividend under section 1248(a), and subject to the applicable limitations and conditions of sections 901 through 905, D is entitled under this paragraph to a foreign tax credit of $60 for 1964.

*Example (2).* On June 30, 1965, domestic corporation D owns all of the voting stock of foreign corporation Y, and Y (the first tier corporation) owns all of the voting stock of foreign corporation Z (a second tier corporation). On such date, D sells a block of Y stock and includes $400 of the gain on the sale in its gross income as a dividend under section 1248(a). The earnings and profits attributable under § 1.1248–3 to the block are $600 from Y and $1,800 from Z. D uses the calendar year as its taxable year and instead of deducting foreign taxes under section 164, D chooses the benefits of the foreign tax credit provisions for 1965. For purposes of applying the foreign tax credit provisions, Y is considered under subparagraph (3) of this paragraph to have distributed to D a dividend of $100 ($400×600/2400) and Z is considered to have so distributed to D a dividend of $300 ($400×1800/2400). If D had included $100 in its gross income as a dividend with respect to a distribution from Y on June 30, 1965, the amount of foreign income taxes paid by Y which D would be deemed to have paid under section 902(a) in respect of such distribution is $80. If D had owned the stock in Z directly, and if D had included $300 in its gross income as a dividend with respect to a distribution from Z, the amount of foreign income taxes paid by Z which D would be deemed to have paid under section 902(a) in respect of such distribution is $120. Thus, in respect of the $400 included in D's gross income as a dividend under section 1248(a), and subject to the applicable limitations and conditions of sections 901 through 905, D is entitled under this paragraph to a foreign tax credit of $200 ($80 plus $120) for 1965.

(e) *Exceptions.* Under section 1248 (f), this section and §§ 1.1248–2 through 1.1248–7 shall not apply to—

(1) Distributions to which section 303 (relating to distributions in redemption of stock to pay death taxes) applies;

(2) Gain realized on exchanges to which section 356 (relating to receipt of additional consideration in certain reorganizations) applies; or

(3) Any amount to the extent that such amount is, under any other provision of the Code, treated as (i) a dividend, (ii) gain from the sale of an asset which is not a capital asset, or (iii) gain from the sale of an asset held for not more than 6 months.

(f) *Installment method.* (1) Gain from a sale or exchange to which section 1248 applies may be reported under the installment method if such method is otherwise available under section 453 of the Code. In such case, the income (other than interest) on each installment payment shall be deemed to consist of gain which is included in gross income under section 1243 as a dividend until all such gain has been reported, and the remaining portion (if any) of such income shall be deemed to consist of gain to which section 1248 does not apply. For treatment of amounts as interest on certain deferred payments, see section 483.

(2) The application of this paragraph may be illustrated by the following example:

*Example.* Jones contracts to sell stock in a controlled foreign corporation for $5,000 to be paid in 10 equal payments of $500 each, plus a sufficient amount of interest so that section 483 does not apply. He properly elects under section 453 to report under the installment method gain of $1,000 which is includible in gross income under section 1248 as a dividend and gain of $500 which is a long-term capital gain. Accordingly, $150 of each of the first 6 installment payments and $100 of the seventh installment payment are included in gross income under section 1248 as a dividend, and $50 of the seventh installment payment and $150 of each of the last 3 installment payments are long-term capital gain.

### § 1.1248–2 Earnings and profits attributable to a block of stock in simple cases.

(a) *General*—(1) *Manner of computation.* For purposes of paragraph (a)(1) of § 1.1248–1, if a United States person sells or exchanges a block of stock (as defined in paragraph (b) of this section) in a foreign corporation, and if the conditions of paragraph (c) of this section are satisfied in respect of the block, then the earnings and profits attributable to the block which were accumulated in taxable years of the corporation beginning after December 31, 1962, during the period such block was held (or was considered to be held by reason of the application of section 1223) by such person while such corporation was a controlled foreign corporation, shall be computed in accordance with the steps set forth in subparagraphs (2), (3), and (4) of this paragraph.

(2) *Step 1.* (i) For each taxable year of the corporation beginning after December 31, 1962, the earnings and profits accumulated for each such taxable year by the corporation shall be computed in the manner prescribed in paragraph (d) of this section, and (ii) for the period the person held (or is considered to have held by reason of the application of section 1223) the block, the amount of earnings and profits attributable to the block shall be computed in the manner prescribed in paragraph (e) of this section.

(3) *Step 2.* If the conditions of paragraph (c)(5)(ii) of this section must be satisfied in respect of stock in a "lower tier" foreign corporation which such person owns within the meaning of section 958(a)(2), then (i) the earnings and profits accumulated for each such taxable year by such lower tier corporation shall be computed in the manner prescribed in paragraph (d) of this section, and (ii) for the period the person held (or is considered to have held by reason of the application of section 1223) the block, the amount of earnings and profits of the lower tier corporation attributable to the block shall be computed in the manner prescribed in paragraph (e) of this section applied as if such person owned directly the percentage of such stock in such lower tier corporation which such person owns within the meaning of section 958(a)(2).

(4) *Step 3.* The amount of earnings and profits attributable to the block shall be the sum of the amounts computed under steps 1 and 2.

(b) *Block of stock.* For purposes of this section, the term "block of stock" means a group of shares sold or exchanged in one transaction, but only if—

(1) The amount realized, basis, and holding period are identical for each such share, and

(2) In case, during the period the person held (or is considered to have held by reason of the application of section 1223) such shares, any amount was included under section 951 in the gross income of the person (or another person) in respect of the shares, the excess under paragraph (e)(3)(ii) of this section (computed as if each share were a block) is identical for each such share.

(c) *Conditions to application.* This section shall apply only if the following conditions are satisfied:

(1)(i) On each day of the period during which the block of stock was held (or is considered as held by reason of the application of section 1223) by the person during taxable years of the corporation beginning after December 31, 1962, the corporation is a controlled foreign corporation, and (ii) on no such day is the corporation a foreign personal holding company (as defined in section 552) or a foreign investment company (as defined in section 1246(b)).

(2) The corporation had only one class of stock, and the same number of shares of such stock were outstanding, on each day of each taxable year of the corporation beginning after December 31, 1962, any day of which falls within the period referred to in subparagraph (1) of this paragraph.

(3) For each taxable year referred to in subparagraph (2) of this paragraph, the corporation is not a less developed country corporation (as defined in section 902(d)).

(4) For each taxable year referred to in subparagraph (2) of this paragraph, the corporation does not make any distributions out of its earnings and profits other than distributions which, under section 316 (as modified by section 959), are considered to be out of earnings and profits accumulated in taxable years beginning after December 31, 1962, during the period such person held (or is considered to have held by reason of the application of section 1223) the block while such corporation was a controlled foreign corporation.

(5)(i) If (*a*) on the date of the sale or exchange such person, by reason of his ownership of such block, owns within the meaning of section 958(a)(2) stock in another foreign corporation (referred to as a "lower tier" corporation), and (*b*) the conditions of paragraph (a)(2) of § 1.1248–1 would be satisfied by such person in respect of such stock in the lower tier corporation if such person were deemed to have sold or exchanged such stock in the lower tier corporation on the date he actually sold or exchanged such block in the first tier corporation, then the conditions of subdivision (ii) of this subparagraph must be satisfied.

(ii) In respect of stock in such lower tier corporation, (*a*) the conditions set forth in subparagraphs (1) through (4) of this paragraph (applied as if such person owned directly such stock in such lower tier corporation) must be met and (*b*) such person must own within the meaning of section 958(a)(2) the same percentage of the shares of such stock on each day which falls within the period referred to in subparagraph (1) of this paragraph.

(d) *Earnings and profits accumulated for a taxable year*—(1) *General.* For purposes of this section, the earnings and profits accumulated for a taxable year of a foreign corporation shall be the earnings and profits for such year computed in accordance with the rules prescribed in § 1.964–1 (relating to determination of earnings and profits for a taxable year of a controlled foreign corporation) and reduced by any distributions therefrom. If the stock in the corporation is sold or exchanged before any action is taken by or on behalf of the corporation under paragraph (c) of § 1.964–1, the computation of earnings and profits under § 1.964–1 for purposes of this section shall be made as if no elections had been made and no accounting method had been adopted.

(2) *Special rules.* (i) The earnings and profits of the corporation accumulated for a taxable year (computed without any reduction for distributions) shall not include the excess of any item includible in gross income of the foreign corporation under section 882(b) as gross income derived from sources within the United States over any deductions allocable to such item under section 882(c). See section 1248(d)(4). Any item which is required to be excluded from gross income or which is taxed at a reduced rate under an applicable treaty obligation of the United States shall not be excluded under this subdivision from earnings and profits accumulated for a taxable year (computed without any reduction for distributions).

(ii) If a foreign corporation adopts a plan of complete liquidation in a taxable year of the corporation beginning after December 31, 1962, and if because of the application of section 337(a) gain or loss would not be recognized by the corporation from the sale or exchange of property if the corporation were a domestic corporation, then the earnings and profits of the corporation accumulated for the taxable year (computed without any reduction for distributions) shall be determined without regard to the amount of such gain or loss. See section 1248(d)(2). For the nonapplication of section 337(a) to a liquidation by a collapsible corporation (as defined in section 341) and to certain other liquidations, see section 337(c).

(e) *Earnings and profits attributable to block*—(1) *General.* Except as provided in subparagraph (3) of this paragraph, the earnings and profits attributable to a block of stock of a controlled foreign corporation for the period a United States person held (or is considered to have held by reason of the application of section 1223) the block are an amount equal to—

(i) The sum of the earnings and profits accumulated for each taxable year of the corporation beginning after December 31, 1962 (computed under paragraph (d) of this section) during such period, multiplied by

(ii) The percentage that (*a*) the number of shares in the block, bears to (*b*) the total number of shares of the corporation outstanding during such period.

(2) *Special rule.* For purposes of computing the sum referred to in subparagraph (1)(i) of this paragraph, in case the block was held (or is considered as held by reason of the application of section 1223) during a taxable year beginning after December 31, 1962, but not on each day of such taxable year, there shall be included in such sum only that portion which bears the same ratio to (*i*) the total earnings and profits for such taxable year (computed under paragraph (d) of this section), as (*ii*) the number of days during such taxable year the block was held (or is considered as so held), bears to (*iii*) the total number of days in such taxable year.

(3) *Amounts included in gross income under section 951.* (i) If, during the period the person held (or is considered to have held by reason of the application of section 1223) the block, any amount was included under section 951 in the gross income of such person (or of another person whose holding of the stock sold or exchanged is, by reason of the application of section 1223, attributed to such person) in respect of the block, then the earnings and profits attributable to the block for such period shall be an amount equal to (*a*) the earnings and profits attributable to the block which would have been computed under subparagraph (1) of this paragraph if this subparagraph did not apply, reduced by (*b*) the excess computed under subdivision (ii) of this subparagraph. See section 1248(d)(1).

(ii) The excess computed under this subdivision is the excess (if any) of (*a*) amounts included under section 951 in the gross income of such person (or such other person) in respect of the block during such period, over (*b*) the portion of such amounts which, in any taxable year of such person (or such other person), resulted in an exclusion from the gross income of such person (or such other person) under section 959(a)(1) (relating to exclusion from gross income of distributions of previously taxed earnings and profits).

(iii) This subparagraph shall apply notwithstanding an election under section 962 by such person to be subject to tax at corporate rates.

(4) *Examples.* The application of this paragraph may be illustrated by the following examples:

*Example (1).* On May 26, 1965, Green, a United States person, purchases at its fair market value a block of 25 of the 100 outstanding shares of the only class of stock of controlled foreign corporation F. He sells the block on January 1, 1968. In respect of the block, Green did not include any amount in his gross income under section 951. F uses the calendar year as its taxable year and does not own stock in any lower tier corporation referred to in paragraph (c)(5)(i) of this section. All of the conditions of paragraph (c) of this section are satisfied in respect of the block. The earnings and profits accumulated by F (computed under paragraph (d) of this section) are $10,000 for 1965, $13,000 for 1966, and $11,000 for 1967. The earnings and profits of F attributable to the block are $7,500, determined as follows:

| | |
|---|---|
| Sum of earnings and profits accumulated by F during period block was held: | |
| For 1965 (219/365 × $10,000) | $6,000 |
| For 1966 | 13,000 |
| For 1967 | 11,000 |
| Sum | 30,000 |
| Multiplied by: | |
| Number of shares in block (25), divided by total number of shares outstanding (100) | 25% |
| Earnings and profits attributable to block | $7,500 |

*Example (2).* Assume the same facts as in example (1) except that in respect of the block Green includes in his gross income under section 951 the total amount of $2,800 for 1965 and 1966, and because of such inclusion the amount of $2,300 which was distributed to Green by F on January 15, 1967, is excluded from his gross income under section 959(a)(1). Accordingly, the earnings and profits of F attributable to the block are $7,000, determined as follows:

| | |
|---|---|
| Earnings and profits attributable to the block, as computed in example (1) | $7,500 |
| Minus: | |
| Excess of amount included in Green's gross income under section 951 ($2,800), over portion thereof which resulted in an exclusion under section 959(a)(1) ($2,300) | 500 |
| Earnings and profits attributable to block | 7,000 |

*Example (3).* Assume the same facts as in example (1) except that on each day beginning on January 1, 1966 (the date controlled foreign corporation G was organized) through January 1, 1968, F owns 80 of the 100 outstanding shares of the only class of G stock. Since, by reason of his ownership of 25 shares of F stock, Green owns within the meaning of section 958(a)(2) the equivalent of 20 shares of G stock (25/100 of 80 shares), G is a lower tier corporation referred to in paragraph (c)(5)(i)(*a*) of this section. If Green had sold the 20 shares of G stock on January 1, 1968, the date he actually sold the block of F stock, the conditions of paragraph (a)(2) of § 1.1248–1 would be satisfied in respect of the G stock, and, accordingly, the conditions of paragraph (c)(5)(ii) of this section must be satisfied. Assume further that such conditions are satisfied, that G uses the calendar year as its taxable year, and that the earnings and profits accumulated by G (computed under paragraph (d) of this section) are $19,000 for 1966 and $21,000 for 1967. The earnings and profits of F and of G attributable to the block are $15,500, determined as follows:

| | |
|---|---|
| Sum of earnings and profits accumulated by G for period Green owned G stock within the meaning of section 958(a)(2) ($19,000 plus $21,000) | $40,000 |
| Multiplied by: | |
| Number of G shares deemed owned within the meaning of section 958(a)(2) by Green (20), divided by total number of G shares outstanding (100) | 20% |
| Earnings and profits of G attributable to block | $8,000 |
| Earnings and profits of F attributable to block, as determined in example (1) | $7,500 |
| Total earnings and profits attributable to block | $15,500 |

**§ 1.1248–3 Earnings and profits attributable to stock in complex cases.**

(a) *General*—(1) *Manner of computation.* For purposes of paragraph (a)(1) of § 1.1248–1, if a United States person sells or exchanges stock in a foreign corporation, and if the provisions of § 1.1248–2 do not apply, then the earnings and profits attributable to the stock which were accumulated in taxable years of the corporation beginning after December 31, 1962, during the period or periods such stock was held (or was considered to be held by reason of the application of section 1223) by such person while such corporation was a controlled foreign corporation, shall be computed in accordance with the steps set forth in subparagraphs (2), (3), and (4) of this paragraph.

(2) *Step 1.* For each taxable year of the corporation beginning after December 31, 1962, (i) the earnings and profits accumulated for such taxable year by the corporation shall be computed in the manner prescribed in paragraph (b) of this section, (ii) the person's "tentative ratable share" of such earnings and profits shall be computed in the manner prescribed in paragraph (c) or (d) (whichever is applicable) of this section, and (iii) the person's "ratable share" of such earnings and profits shall be computed by adjusting the tentative ratable share in the manner prescribed in paragraph (e) of this section.

(3) *Step 2.* If the provisions of paragraph (f) of this section (relating to earnings and profits of "lower tier" foreign corporations) apply, the amount of the person's ratable share of the earnings and profits accumulated by each "lower tier" corporation attributable to any such taxable year (i) shall be computed in the manner prescribed by paragraph (f) of this section, and (ii) shall be added to such person's ratable share for such taxable year determined in step 1.

(4) *Step 3.* The amount of earnings and profits attributable to the share shall be the sum of the ratable shares computed for each such taxable year in the manner prescribed in steps 1 and 2.

(5) *Share or block.* In general, the computation under this paragraph shall be made separately for each share of stock sold or exchanged, except that if a group of shares constitute a block of stock the computation may be made in respect of the block. For purposes of this section, the term "block of stock" means a group of shares sold or exchanged in one transaction, but only if (i) the amount realized, basis, and holding period are identical for each such share, and (ii) the adjustments (if any) under paragraphs (e) and (f)(5) of this section of the tentative ratable shares would be identical for each such share if such adjustments were computed separately for each such share.

(6) *Deficit in earnings and profits.* For purposes of this section and §§ 1.1248–4 through 1.1248–7, in respect of a taxable year, the term "earnings and profits accumulated" for a taxable year (but only if computed under paragraph (b) of this section) includes a deficit in earnings and profits accumulated for such taxable year. Similarly, a tentative ratable share, or a ratable share, may be a deficit.

(7) *Examples.* The application of the provisions of this paragraph may be illustrated by the following examples:

*Example (1).* On December 31, 1967, Brown sells 10 shares of stock in foreign corporation X, which uses the calendar year as its taxable year. The 10 shares constitute a block of stock under subparagraph (5) of this paragraph. Under step 1, Brown's ratable shares of the earnings and profits of X attributable to the block are as follows:

| *Taxable year of X* | *Ratable shares* |
|---|---|
| 1963 | $100 |
| 1964 | 150 |
| 1965 | −50[1] |
| 1966 | 50 |
| 1967 | 100 |
| Sum | 350 |

[1] Deficit.

The amount of the earnings and profits attributable to such block under step 3 is $350.

*Example (2).* Assume the same facts as in example (1), except that in respect of X there are "lower tier" corporations Y and Z to which the provisions of paragraph (f) of this section apply. Brown's ratable shares of the earnings and profits of X, Y, and Z attributable to the block under steps 1 and 2 for each taxable year of X are as follows:

| Taxable year of X | Ratable shares | | | |
|---|---|---|---|---|
| | X | Y | Z | Total |
| 1963 | $100 | $40 | $20 | $160 |
| 1964 | 150 | 40 | −50 | 140 |
| 1965 | −50 | 30 | 50 | 30 |
| 1966 | 50 | 50 | 30 | 130 |
| 1967 | 100 | −40 | 40 | 100 |
| Sum | 350 | 120 | 80 | 550 |

The amount of the earnings and profits attributable to such block under step 3 is $550.

(b) *Earnings and profits accumulated for a taxable year*—(1) *General.* For purposes of this section, the earnings and profits accumulated for a taxable year of a foreign corporation shall be the earnings and profits for such year, computed in accordance with the rules prescribed in § 1.964–1 (relating to determination of earnings and profits for a taxable year of a controlled foreign corporation), except that (i) the special rules of subparagraph (2) of this paragraph shall apply, and (ii) adjustments shall be made under subparagraph (3) of this paragraph for distributions made by the corporation during such taxable year. If the stock in the corporation is sold or exchanged before any action is taken by or on behalf of the corporation under paragraph (c) of § 1.964–1, the computation of earnings and profits under § 1.964–1 for purposes of this section shall be made as if no elections had been made and no accounting method had been adopted. The amount of earnings and profits accumulated for a taxable year of a foreign corporation, as computed under this paragraph, is not necessarily the same amount as the earnings and profits of the taxable year computed under section 316(a)(2) or paragraph (d) of § 1.1248–2. Thus, for example, if a distribution with respect to stock is in excess of the amount of earnings and profits of the taxable year computed under section 316(a)(2), such excess is treated under section 316(a)(1) or para-

graph (d) of § 1.1248–2 as made out of any earnings and profits accumulated in prior taxable years, whereas the amount of such excess may create, or increase, a deficit in the earnings and profits accumulated for the taxable year as computed under this paragraph. See subparagraph (3) of this paragraph.

(2) *Special rules.* (i) The earnings and profits of the corporation accumulated for a taxable year shall not include the excess of any item includible in gross income of the foreign corporation under section 882(b) as gross income derived from sources within the United States over any deductions allocable to such item under section 882(c). See section 1248(d)(4). Any item which is required to be excluded from gross income or which is taxed at a reduced rate under an applicable treaty obligation of the United States shall not be excluded under this subdivision from earnings and profits accumulated for a taxable year.

(ii) If a foreign corporation adopts a plan of complete liquidation in a taxable year of the corporation beginning after December 31, 1962, and if because of the application of section 337(a) gain or loss would not be recognized by the corporation from the sale or exchange of property if the corporation were a domestic corporation, then the earnings and profits of the corporation accumulated for the taxable year shall be determined without regard to the amount of such gain or loss. See section 1248(d)(2). For the nonapplication of section 337(a) to a liquidation by a collapsible corporation (as defined in section 341) and to certain other liquidations, see section 337(c).

(3) *Adjustment for distributions.* (i) The earnings and profits of a foreign corporation accumulated for a taxable year (computed without regard to this subparagraph) shall be reduced (if necessary below zero so as to create a deficit), or a deficit in such earnings and profits shall be increased, by the amount of the distributions (other than in redemption of stock under section 302(a) or 303) made by the corporation in respect of its stock during such taxable year (*a*) out of such earnings and profits, or (*b*) out of earnings and profits accumulated for prior taxable years beginning after December 31, 1962 (computed under this paragraph). Except for purposes of applying this subparagraph, the application of the preceding sentence shall not affect the amount of earnings and profits accumulated for any such prior taxable year.

(ii) The application of this subparagraph may be illustrated by the following examples:

*Example (1).* X Corporation, which uses the calendar year as its taxable year, was organized on January 1, 1965, and was a controlled foreign corporation on each day of 1965. The amount of X's earnings and profits accumulated for 1965 (computed under this paragraph without regard to the adjustment for distributions under this subparagraph) is $400,000, of which $100,000 is distributed by X as dividends during 1965. The amount of X's earnings and profits accumulated for 1965 (computed under this paragraph) is $300,000 (that is, $400,000 minus $100,000). The result would be the same even if X was not a controlled foreign corporation on each day of 1965.

*Example (2).* Assume the same facts as in example (1). Assume further that the amount of X's earnings and profits accumulated for 1966 (computed under this paragraph without regard to the adjustment for distributions under this subparagraph) is $150,000, and that X distributes the amount of $260,000 as dividends during 1966. Since $150,000 of the distribution is from earnings and profits accumulated for 1966 (computed without regard to the adjustment for distributions under this subparagraph), and since $110,000 is from earnings and profits accumulated for 1965, the earnings and profits of X accumulated for 1966 are a deficit of $110,000 (that is, $150,000 minus $260,000). However, the earnings and profits accumulated for 1965 are still $300,000 for purposes of computing in the manner prescribed in paragraph (c) of this section a person's tentative ratable share.

(c) *Tentative ratable share if earnings and profits accumulated for a taxable year not less than zero*—(1) *General rule.* For purposes of paragraph (a)(2)(ii) of this section, in respect of a share (or block) of stock in a foreign corporation, if the amount of the earnings and profits accumulated for a taxable year of the corporation (computed under paragraph (b) of this section), beginning after December 31, 1962, is not less than zero, then the person's tentative ratable share for such taxable year shall be equal to—

(i) (*a*) Such amount (if the computation is made in respect of a block, multiplied by the number of shares in the block), divided by (*b*) the number of shares in the corporation outstanding, or deemed under subparagraph (2) of this paragraph to be outstanding, on each day of such taxable year, multiplied by

(ii) The percentage that (*a*) the number of days in such taxable year of the corporation during the period the person held (or was considered to have held by reason of the application of section 1223) the share (or block) while the corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year.

(2) *Shares deemed outstanding for a taxable year.* For purposes of this section and §§ 1.1248–4 through 1.1248–7, if the number of shares of stock in a foreign corporation outstanding on each day of a taxable year of the corporation is not constant, then the number of such shares deemed outstanding on each such day shall be the sum of the fractional amounts in respect of each share outstanding on any day of the taxable year. The fractional amount in respect of a share shall be determined by dividing (*i*) the number of days in the taxable year during which such share was outstanding (excluding the day the share became outstanding, but including the day the share ceased to be outstanding), by (*ii*) the total number of days in such taxable year.

(3) *Examples.* The application of subparagraphs (1) and (2) of this paragraph may be illustrated by the following examples:

*Example (1).* On each day of 1964, S owns a block consisting of 30 of the 100 shares of the only class of stock outstanding in F Corporation, and on each such day F is a controlled foreign corporation. F uses the calendar year as its taxable year and F's earnings and profits accumulated for 1964 (computed under paragraph (b) of this section) are $10,000. S's tentative ratable share with respect to the block is $3,000, computed as follows:

| | |
|---|---|
| Earnings and profits accumulated for taxable year | $10,000 |
| Multiplied by: | |
| Number of shares in block (30), divided by number of shares outstanding (100) | 30% |
| Multiplied by: | |
| Number of days in 1964 S held block while F was a controlled foreign corporation (365), divided by number of days in 1964 (365) | 100% |
| Tentative ratable share for block | $3,000 |

*Example (2).* On December 31, 1964, X Corporation, a controlled foreign corporation which uses the calendar year as its taxable year, had 100 shares of one class of stock outstanding, 15 of which were owned by T. T's 15 shares were redeemed by X on March 14, 1965. On December 31, 1965, in addition to the remaining 85 shares, 10 new shares of stock (which were issued on May 26, 1965) were outstanding. Thus, during 1965, 15 shares were outstanding for 73 days, 10 for 219 days, and 85 for 365 days. The earnings and profits (computed under paragraph (b) of this section) accumulated for X's taxable year ending on December 31, 1965, are $18,800. T's tentative ratable share with respect to one share of stock is $40, computed as follows:

| | |
|---|---|
| Earnings and profits accumulated for taxable year | $18,800 |
| Divided by: | |
| Number of shares deemed outstanding each day of 1965: | |
| 15 for 73 days (15×73/365) | 3 |
| 10 for 219 days (10×219/365) | 6 |
| 85 for 365 days (85×365/365) | 85 |
| Total number of shares deemed outstanding each day of 1965 | 94 |
| Earnings and profits accumulated per share | $200 |
| Multiplied by: | |
| Number of days in 1965 T held his share while X was a controlled foreign corporation (73), divided by number of days in 1965 (365) | 20% |
| T's tentative ratable share per share of stock | $40 |

*Example (3).* Assume the same facts as in example (2) except that X was not a controlled foreign corporation after January 31, 1965. T's tentative ratable share with respect to one share of stock for 1965 is $17, computed as follows:

| | |
|---|---|
| Earnings and profits accumulated per share, determined in example (2) | $200 |
| Multiplied by: | |
| Number of days in 1965 T held X stock while X was a controlled foreign corporation (31), divided by number of days in 1965 (365) | 8.5% |
| Tentative ratable share | $17 |

(4) *More than one class of stock.* If a foreign corporation for a taxable year has more than one class of stock outstanding, then before applying subparagraphs (1) and (2) of this paragraph the earnings and profits accumulated for the taxable year of the corporation (computed under paragraph (b) of this section) shall be allocated to each class of stock in accordance with the principles of paragraph (d)(2)(i) (*d*) and (*e*) of § 1.963–2, applied as if the corporation were a controlled foreign corporation on each day of such taxable year.

(d) *Tentative ratable share if deficit in earnings and profits accumulated for taxable year*—(1) *General rule.* For purposes of paragraph (a)(2)(ii) of this section, in respect of a share (or block) of stock in a foreign corporation, if there is a deficit in the earnings and profits accumulated for a taxable year of the corporation (computed under paragraph (b) of this section) beginning after December 31, 1962, the person's tentative ratable share for such taxable year shall be an amount equal to the sum of the partial tentative ratable shares computed under subparagraphs (2) and (3) of this paragraph.

(2) *Operating deficit.* The partial tentative ratable share under this subparagraph is computed in 2 steps. First, compute (under paragraph (b) of this section without regard to the adjustment for distributions under subparagraph (3) thereof) the deficit (if any) in earnings and profits accumulated for such taxable year. Second, compute the partial tentative ratable share in the same manner as the tentative ratable share for such taxable year would be computed under paragraph (c) of this section if such deficit were the amount referred to in paragraph (c)(1)(i)(*a*) of this section.

(3) *Deficit from distributions.* The partial tentative ratable share under this subparagraph is computed in 2 steps. First, compute and treat as a deficit only that portion of the adjustment for distributions under paragraph (b)(3) of this section for such taxable year which is attributable under subparagraph (4) of this paragraph to distributions out of earnings and profits accumulated during prior taxable years of the corporation beginning after December 31, 1962, during the period or periods the corporation was a controlled foreign corporation and the share (or block) of stock was owned by a United States shareholder (as defined in section 951(b) and the regulations thereunder). Second, compute the partial tentative ratable share for such taxable year in the same manner as the tentative ratable share for such taxable year would be computed under paragraph (c) of this section if (i) such deficit were the amount referred to in paragraph (c)(1)(i)(*a*) of this section, and (ii) the corporation were a controlled foreign corporation on each day of such taxable year.

(4) *Order of distributions.* For purposes of applying subparagraph (3) of this paragraph only, the adjustment for distributions under paragraph (b)(3) of this section for a taxable year of a foreign corporation shall be treated as attributable first to distributions of earnings and profits for the taxable year (computed under paragraph (b) of this section without regard to such adjustment) to the extent thereof, and then to distributions out of the most recent of earnings and profits accumulated during prior taxable years beginning after December 31, 1962 (computed under paragraph (b) of this section). If the foreign corporation was a controlled foreign corporation during a prior taxable year for a period or periods which was only part of such prior taxable year, then for purposes of the preceding sentence (i) such taxable year shall be divided into periods the corporation was or was not a controlled foreign corporation, (ii) distributions of the earnings and profits accumulated during such prior taxable year shall be considered made from the most recent period first, and (iii) the earnings and profits accumulated during such prior taxable year shall be allocated to a period during such year in the same proportion as the number of days in the period bears to the number of days in such year. Except for purposes of applying subparagraph (3) of this paragraph, the application of this subparagraph shall not affect the amount of earnings and profits accumulated for any such prior taxable year (computed under paragraph (b) of this section).

(5) *Examples.* The application of this paragraph may be illustrated by the following examples:

*Example (1).* On each day of 1965 X Corporation, which uses the calendar year as its taxable year, was a controlled foreign corporation having 100 shares of one class of stock outstanding, a block of 25 of which were owned by T, who acquired them in 1962 and sold them in 1967. The deficit in X's earnings and profits accumulated for 1965 (computed under paragraph (b) of this section without regard to the adjustment for distributions under subparagraph (3) thereof) is $100,000, and thus in respect of the block T's partial tentative ratable share computed under subparagraph (2) of this paragraph is a deficit of $25,000 (that is, $100,000×25/100). During 1965 X does not make any distributions in respect of its stock, and thus in respect of the block T's partial tentative ratable share computed under subparagraph (3) of this paragraph is zero. Accordingly, T's tentative ratable share in respect of the block of X stock for 1965 is a deficit of $25,000. If, however, X was a controlled foreign corporation for only 292 days during 1965, T's tentative ratable share in respect of the block for 1965 would be a deficit of $20,000 (that is, $25,000×292/365).

*Example (2).* (i) Assume the same facts as in example (1) except that at no time during 1965 is X a controlled foreign corporation and that during 1965 X distributes $80,000 with respect to its stock. Assume further that X was a controlled foreign corporation on each day of 1964, but only for the first 146 days of 1963, and that X's earnings and profits accumulated for prior taxable years computed under paragraph (b) of this section are $70,000 for 1964 and $20,000 for 1963.

(ii) Since X was not a controlled foreign corporation on any day of 1965, in respect of the block T's partial tentative ratable share computed under subparagraph (2) of this paragraph is zero.

(iii) The partial tentative ratable share under subparagraph (3) of this paragraph is computed in the following manner: For 1965 the adjustment for distributions under paragraph (b)(3) of this section is $80,000. Under subparagraph (4) of this paragraph $70,000 of such adjustment is attributable to the distribution of all of the earnings and profits accumulated during 1964, on every day of which X was a controlled foreign corporation, and $10,000 of the adjustment is attributable to the distribution of $10,000 of the earnings and profits accumulated by X in 1963 attributable to the first 146 days in 1963 during which X was a controlled foreign corporation is $8,000 (that is, $20,000×146/365), and the portion attributable to the period in 1963 during which X was not a controlled foreign corporation is $12,000 (that is, $20,000×219/365). Under subparagraph (4) (ii) of this paragraph, the distribution in 1965 of $10,000 of earnings and profits accumulated during 1963 is attributable to the more recent period in 1963, that is, the period X was not a controlled foreign corporation. Accordingly, the portion of the adjustment for distributions under paragraph (b)(3) of this section attributable to earnings and profits accumulated during periods X was a controlled foreign corporation is $70,000, and in respect of the block T's partial tentative ratable share under subparagraph (3) of this paragraph is a deficit of $17,500 (that is, $70,000×25/100).

(iv) T's tentative ratable share in respect of the block of X stock for 1965 is a deficit of $17,500 (that is, the sum of the partial tentative ratable share for the block computed under subparagraph (2) of this paragraph, zero, plus the partial tentative ratable share for the block computed under subparagraph (3) of this paragraph, a deficit of $17,500).

(v) Assume that X had 100 shares of one class of stock outstanding on each day of 1964 and 1963. Notwithstanding the distributions in 1965 of earnings and profits accumulated during 1964 and 1963 (computed under paragraph (b) of this section), nevertheless, in respect of the block T's tentative ratable share for 1964 is $17,500 (that is, earnings and profits accumulated during 1964 so computed of $70,000, multiplied by 25 shares/100 shares) and in respect of the block T's tentative ratable share for 1963 is $2,000 (that is, earnings and profits accumulated during 1963 so computed of $20,000, multiplied by 25 shares/100 shares, and multiplied by the percentage that the number of days in 1963 on which X was a controlled foreign corporation bears to the total number of days in 1963, 146/365).

*Example (3).* Assume the same facts as in example (2) except that X was a controlled foreign corporation on each day of 1965. The tentative ratable share with respect to the block of stock for 1965 is a deficit of $42,500, that is, the sum of the partial tentative ratable share under subparagraph (2) of this paragraph (as determined in example (1)), a deficit of $25,000, plus the partial tentative ratable share under subparagraph (3) of this paragraph (as determined in example (2)), a deficit of $17,500.

(6) *More than one class of stock.* If a foreign corporation for a taxable year has more than one class of stock outstanding, then before applying subparagraph (1) of this paragraph the earnings and profits accumulated for the taxable year of the corporation (computed under paragraph (b) of this section) shall be allocated to each class of stock in accordance with the principles of paragraph (d)(2)(i) (*d*) and (*e*) of § 1.963–2, applied as if the corporation were a controlled foreign corporation on each day of such taxable year.

(e) *Ratable share of earnings and profits accumulated for a taxable year*—(1) *In general.* For purposes of paragraph (a)(2)(iii) of this section, in respect of a share (or block) of stock in a foreign corporation, the person's ratable share of the earnings and profits accumulated for a taxable year beginning after December 31, 1962, shall be an amount equal to the tentative ratable share computed under paragraph (c) or

(d) (as the case may be) of this section, adjusted in the manner prescribed in subparagraphs (2) through (6) of this paragraph.

(2) *Amounts included in gross income under section 951.* (i) In respect of a share (or block) of stock in a foreign corporation, a person's tentative ratable share for a taxable year of the corporation (computed under paragraph (c) of this section) shall be reduced (but not below zero) by the excess of (*a*) the amount, if any, included (in respect of such corporation for such taxable year) under section 951 in the gross income of such person or (during the period such share, or block, was considered to be held by such person by reason of the application of section 1223) in the gross income of any other person who held such share (or block), over (*b*) the portion of such amount which, in any taxable year of such person or such other person, resulted in an exclusion from the gross income of such person or such other person of an amount under section 959(a)(1) (relating to exclusion from gross income of distributions of previously taxed earnings and profits). See section 1248(d)(1). This subdivision shall apply notwithstanding an election under section 962 by such person to be subject to tax at corporate rates.

(ii) The application of this subparagraph may be illustrated by the following example:

*Example.* On December 31, 1975, Brown sells one share of stock in X Corporation, a controlled foreign corporation which has never been a less developed country corporation (as defined in section 902(d)). Both Brown and X use the calendar year as the taxable year. In respect of his share, Brown's tentative ratable share for 1971 (computed under paragraph (c) of this section) is $35. In respect of his share, Brown included $4 in his gross income for 1971 under section 951, and the amount of $3, which was distributed to him by X on January 15, 1972, is excluded from Brown's gross income under section 959(a)(1). In respect of the stock, Brown's ratable share for 1971 is $34, determined as follows:

| | |
|---|---|
| Tentative ratable share | $35 |
| Minus: | |
| Excess of amount of tentative ratable share included in Brown's gross income under section 951 ($4), over portion thereof which resulted in exclusion under section 959(a)(1) ($3) | 1 |
| Ratable share | 34 |

(3) *Amounts included in gross income under section 551.* In respect of a share (or block) of stock in a foreign corporation, a person's tentative ratable share for a taxable year of the corporation (computed under paragraph (c) of this section) shall be reduced (but not below zero) by the amount, if any, included (in respect of such corporation for such taxable year) under section 551 in the gross income of such person or (during the period such share, or block, was considered to be held by such person by reason of the application of section 1223) in the gross income of any other person who held such share (or block).

(4) *Less developed country corporations.* (i) If the foreign corporation was a less developed country corporation as defined in section 902(d) for a taxable year of the corporation, and if the person who sold or exchanged a share (or block) of stock in such corporation satisfies the requirements of paragraph (a) of § 1.1248–5 in respect of such stock, then his ratable share for such taxable year shall be zero. See section 1248(d)(3).

(ii) The application of this subparagraph may be illustrated by the following example:

*Example.* Assume the same facts as in the example in subparagraph (2)(ii) of this paragraph except that X was a less developed country corporation for 1971. Assume further that Brown satisfies the requirements of paragraph (a) of § 1.1248–5. Brown's ratable share in respect of the stock for 1971 is zero.

(5) *Qualified shareholder of foreign investment company.* In respect of a share (or block) of stock in a foreign corporation which was a foreign investment company described in section 1246(b)(1), if the election under section 1247(a) to distribute income currently was in effect for a taxable year of the company, and if the person who sold or exchanged the stock (or another person who actually owned the stock during such taxable year and whose holding of the stock is attributed by reason of the application of section 1223 to the person who sold or exchanged the stock) was a qualified shareholder (as defined in section 1247(c)) for his taxable year in which or with which such taxable year of the company ends, then the ratable share in respect of the share (or block) for such taxable year of the company shall be zero. See section 1248(d)(5). In case gain is recognized under section 1246 in respect of a share (or block), see section 1248(f)(3)(B).

(6) *Adjustment for certain distributions.* If (i) the person who sold or exchanged the share or block (or another person who actually owned the share or block and whose holding of the share or block is attributed by reason of the application of section 1223 to such person) received a distribution during a taxable year of the corporation, and (ii) such distribution was not included in the gross income of such person (or such other person) by reason of the application of section 959(a)(1) to amounts which were included under section 951(a)(1) in the gross income of a United States shareholder whose holding of the share or block is not attributed by reason of the application of section 1223 to such person (or such other person), then the amount of such distribution shall be added to such person's tentative ratable share for such taxable year. Thus, for example, such tentative ratable share may be increased, or a deficit reduced, by the amount of such distribution.

(f) *Earnings and profits of subsidiaries of foreign corporations*—(1) *Application of paragraph.* (i) In respect of a person who sells or exchanges stock in a foreign corporation (referred to as a "first tier" corporation), the provisions of this paragraph shall apply if the following 3 conditions exist:

(*a*) The conditions of paragraph (a)(2) of § 1.1248–1 are satisfied by the person in respect of such stock;

(*b*) By reason of his ownership of such stock, on the date of such sale or exchange such person owned, within the meaning of section 958(a)(2), stock in another foreign corporation (referred to as a "lower tier" corporation); and

(*c*) The conditions of paragraph (a)(2) of § 1.1248–1 would be satisfied by such person in respect of such stock in the lower tier corporation if such person were deemed to have sold or exchanged such stock in the lower tier corporation on the date he actually sold or exchanged such stock in the first tier corporation.

(ii) If the provisions of this paragraph apply, (*a*) the person's tentative ratable share (or shares) of the earnings and profits accumulated by the lower tier corporation attributable to a taxable year of the first tier corporation shall be computed under subparagraph (2) or (4) of this paragraph, whichever is applicable, and (*b*) such person's ratable share (or shares) for the lower tier corporation attributable to a taxable year of the first tier corporation shall be computed under subparagraph (5) of this paragraph. For the manner of taking into account the ratable share for a lower tier corporation, see paragraph (a)(3) of this section.

(iii) The application of this subparagraph may be illustrated by the following example:

*Example.* On each day of 1964 and 1965 corporations X and Y are controlled foreign corporations, and each has outstanding 100 shares of one class of stock. On January 15, 1965, T, a United States person, owns one share of stock in X and X directly owns 20 shares of stock in Y. Thus, T owns, within the meaning of section 958(a)(2), stock in Y. On that date, T sells his share in X and satisfies the conditions of paragraph (a)(2) of § 1.1248–1 in respect of his stock in X. Assuming that the conditions of paragraph (a)(2) of § 1.1248–1 would be satisfied by T in respect of the stock he indirectly owns in Y if, on January 15, 1965, he were deemed to have sold such stock in Y, the provisions of this paragraph apply.

(2) *Tentative ratable share (of lower tier corporation attributable to a taxable year of first tier corporation) not less than zero.* If the provisions of this paragraph apply to a sale or exchange by a United States person of a share (or block) of stock in a first tier corporation, and if the amount of earnings and profits accumulated (computed under paragraph (b) of this section) for a taxable year (beginning after December 31, 1962) of the lower tier corporation is not less than zero, then in respect of the share (or block) such person's tentative ratable share of the earnings and profits accumulated for such taxable year of the lower tier corporation attributable to any taxable year (beginning after December 31, 1962) of such first tier corporation shall be an amount equal to—

(i) (*a*) Such amount of earnings and profits accumulated for such taxable year of the lower tier corporation (if the computation is made in respect of a block in the first tier corporation, multiplied by the number of shares in the block), divided by (*b*) the number of shares in the first tier corporation outstanding, or deemed under paragraph (c)(2) of this section to be outstanding, on each day of such taxable year of the first tier corporation, multiplied by

(ii) The percentage that (*a*) the number of days during the period or periods in such taxable year of the first tier corporation on which such person held (or was considered to have held by reason of the application of section 1223) the share (or block) in the first tier corporation while the first tier corporation owned (within the meaning of section 958(a)) stock of such lower tier corporation at times while such lower tier corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year of the first tier corporation, multiplied by

(iii) The percentage that (*a*) the average number of shares in the lower tier corporation which were owned within the meaning of section 958(a) by the first tier corporation during such period or periods (referred to in subdivision (ii)(*a*) of this subparagraph), bears to (*b*) the total number of such shares outstanding, or deemed under the principles of paragraph (c)(2) of this section to be outstanding, during such period or periods, multiplied by

(iv) The percentage that (*a*) the number of days in such taxable year of the lower tier corporation which fall within the taxable year of the first tier corporation, bears to (*b*) the total number of days in such taxable year of the lower tier corporation.

(3) *Examples.* The application of subparagraph (2) of this paragraph may be illustrated by the following examples:

*Example (1).* In a year subsequent to 1969, Brown, a United States person, sells 5 of his shares of stock in X Corporation in a transaction as to which the provisions of this paragraph apply. Brown had purchased the 5 shares prior to 1969. On each day of 1969 X Corporation actually had 100 shares of one class of stock outstanding. On each such day X Corporation directly owned all of the shares of stock in Y Corporation, and Y Corporation directly owned all of the shares of stock in Z Corporation. Z Corporation on each such day was a controlled foreign corporation. Both X and Z use the calendar year as the taxable year. Z's earnings and profits accumulated for 1969 (computed under paragraph (b) of this section) are $2,000. Brown's tentative ratable share of the earnings and profits accumulated by Z attributable to the 1969 calendar year of X is $20 per share, computed as follows:

| | |
|---|---|
| (1) Z's earnings and profits for 1969 ($2,000), divided by the number of shares in X deemed outstanding each day of 1969 (100) | $20 |
| Multiplied by: | |
| (ii) Since on each day of 1969 Brown (by reason of owning directly his shares in X) owned, within the meaning of section 958(a)(2), stock in Z while Z was a controlled foreign corporation, the percentage determined under subparagraph (2)(ii) of this paragraph equals | 100% |
| Multiplied by: | |
| (iii) Since on each day of 1969 X owned 100 percent of the stock of Y while Y owned 100 percent of the stock in Z, the percentage determined under subparagraph (2)(iii) of this paragraph equals | 100% |
| Multiplied by: | |
| (iv) Since X and Z each use the same taxable year, the percentage determined under subparagraph (2)(iv) of this paragraph equals | 100% |
| Total | $20 |

*Example (2).* Assume the same facts as in example (1), except that Brown sold his stock in X on October 19, 1969. Brown's tentative ratable share of the earnings and profits accumulated by Z attributable to the 1969 calendar year of X is $16 per share, computed as follows:

| | |
|---|---|
| (1) The amount determined in subdivision (i) of example (1) | $20 |
| Multiplied by: | |
| (ii) The number of days in the period during 1969 Brown (by reason of owning directly his stock in X) owned, within the meaning of section 958(a)(2), his stock in Z while Z was a controlled foreign corporation (292), divided by the number of days in 1969 (365), equals | 80% |
| Multiplied by: | |
| (iii) The percentage determined in subdivision (iii) of example (1) | 100% |
| Multiplied by: | |
| (iv) The percentage determined in subdivision (iv) of example (1) | 100% |
| Total | $16 |

*Example (3).* Assume the same facts as in examples (1) and (2), except that on each day during 1969 Y owned (within the meaning of section 958(a)(2)) 81 of the 100 shares of Z's outstanding stock. Brown's tentative ratable share of the earnings and profits accumulated by Z attributable to the 1969 calendar year of X is $12.96 per share, computed as follows:

| | |
|---|---|
| (1) The amount determined in subdivision (i) of example (1) | $20 |
| Multiplied by: | |
| (ii) The percentage determined in subdivision (ii) of example (2) | 80% |
| Multiplied by: | |
| (iii) The average number of shares in Z which were owned (within the meaning of section 958(a)) by X during the applicable period (81), divided by the total number of shares in Z during such period (100) | 81% |
| Multiplied by: | |
| (iv) The percentage determined in subdivision (iv) of example (1) | 100% |
| Total | $12.96 |

The result would be the same if X owned (within the meaning of section 958(a)(2)) 81 percent of the stock in Y while Y so owned 100 percent of the stock in X, or if X so owned 90 percent of the stock in Y while Y so owned 90 percent of the stock in Z.

*Example (4).* Assume the same facts as in example (3), except that Z Corporation uses a fiscal year ending June 30 as its taxable year. Assume further that Z's earnings and profits accumulated for its fiscal year ending June 30, 1969, and for its fiscal year ending June 30, 1970, are $3,000 and $2,000, respectively. Brown's tentative ratable share of the earnings and profits accumulated by Z attributable to the 1969 calendar year of X is $16.17 per share, computed as follows:

| | *In respect of Z's taxable year ending* June 30, 1969 | June 30, 1970 |
|---|---|---|
| (1) Z's earnings and profits, divided by the number of shares in X deemed outstanding on each day of 1969: | | |
| $3,000/100 | $30 | |
| $2,000/100 | | $20 |
| Multiplied by: | | |
| (ii) The percentage determined in subdivision (ii) of example (2) | 80% | 80% |
| Multiplied by: | | |
| (iii) The percentage determined in subdivision (iii) of example (3) | 81% | 81% |
| Multiplied by: | | |
| (iv) Number of days in Z's taxable year which fall within 1969, divided by total number of days in Z's taxable year: | | |
| 181/365 | 49.6% | |
| 184/365 | | 50.4% |
| Totals | $9.64 | $6.53 |
| (v) Sum of tentative ratable shares of Z attributable to X's 1969 calendar year: | | |
| For Z's taxable year ending | | |
| June 30, 1969 | $9.64 | |
| June 30, 1970 | 6.53 | |
| Sum | $16.17 | |

(4) *Deficit in tentative ratable share of lower tier corporation attributable to a taxable year of first tier corporation.* (i) If there is a deficit in the earnings and profits accumulated for a taxable year of a lower tier corporation beginning after December 31, 1962 (computed under paragraph (b) of this section), the person's tentative ratable share for such taxable year of such lower tier corporation attributable to a taxable year of a first tier corporation shall not be computed under subparagraph (2) of this paragraph but shall be an amount equal to the sum of the partial tentative ratable shares computed under subdivisions (ii) and (iii) of this subparagraph.

(ii) The partial tentative ratable share under this subdivision is computed in 2 steps. First, compute (under paragraph (b) of this section without regard to the adjustments for distributions under subparagraph (3) thereof) the deficit (if any) in earnings and profits accumulated for such taxable year of such lower tier corporation. Second, compute the partial tentative ratable share in the same manner as such tentative ratable share would be computed under subparagraph (2) of this paragraph if such deficit were the amount referred to in subparagraph (2)(i)(*a*) of this paragraph.

(iii) The partial tentative ratable share under this subdivision is computed in 2 steps. First, compute and treat as a deficit the portion of the adjustment for distributions under paragraph (b)(3) of this section for such taxable year which is attributable under paragraph

(d)(4) of this section to distributions of earnings and profits accumulated during prior taxable years of the lower tier corporation beginning after December 31, 1962, during the period or periods such lower tier corporation was a controlled foreign corporation and the percentage of the stock of such lower tier corporation (which the person owns within the meaning of section 958(a)(2)) was owned within the meaning of section 958(a) by a United States shareholder (as defined in section 951(b) and the regulations thereunder). Second, compute the partial tentative ratable share in the same manner as such tentative ratable share would be computed under subparagraph (2) of this paragraph if (*a*) such deficit were the amount referred to in subparagraph (2)(i)(*a*) of this paragraph, and (*b*) such lower tier corporation were a controlled foreign corporation on each day of such taxable year.

(5) *Ratable share of lower tier corporation attributable to a first tier corporation.* (i) If the provisions of this paragraph apply in respect of a share of stock in a first tier corporation, a person's ratable share of the earnings and profits accumulated by the lower tier corporation attributable to a taxable year of the first tier corporation shall be an amount equal to the tentative ratable share computed under subparagraph (2) or (4) of this paragraph, adjusted in the manner prescribed in this subparagraph.

(ii) If the first tier corporation and the lower tier corporation use the same taxable year, then in respect of a share (or block) of stock in the first tier corporation the person's tentative ratable share of the accumulated earnings and profits of the lower tier corporation attributable to the taxable year of the first tier corporation (computed under subparagraph (2) of this paragraph) shall be reduced (but not below zero) by the excess of (*a*) the amount, if any, included (in respect of such lower tier corporation for its taxable year) under section 951 in the gross income of such person or during the period such stock was considered to be held by such person by reason of the application of section 1223) in the gross income of any other person who held such stock, over (*b*) the portion of such amount which, in any taxable year of such person or such other person, resulted in an exclusion from the gross income of such person or such other person of an amount under section 959(a)(1). For an illustration of the principles in the preceding sentence, see the example in paragraph (e)(2)(ii) of this section.

(iii) If the first tier corporation and the lower tier corporation do not use the same taxable year, and if there would be an excess computed under subdivision (ii) of this subparagraph in respect of a taxable year of the lower tier corporation (were the taxable years of such corporations the same), then such person's tentative ratable share of the accumulated earnings and profits for a taxable year of the lower tier corporation attributable to such taxable year of the first tier corporation shall be reduced (but not below zero) by an amount which bears the same ratio to (*a*) such excess, as (*b*) the number of days in the taxable year of the lower tier corporation which fall within the taxable year of the first tier corporation, bears to (*c*) the total number of days in the taxable year of the first tier corporation.

(iv) If the first tier corporation and the lower tier corporation use the same taxable year, then in respect of a share (or block) of stock in the first tier corporation the person's tentative ratable share of the accumulated earnings and profits of the lower tier corporation attributable to the taxable year of the first tier corporation (computed under subparagraph (2) of this paragraph) shall be reduced (but not below zero) by the amount, if any, included (in respect of such corporation for such taxable year) under section 551, by reason of the application of section 555(b), in the gross income of such person or (during the period such share (or block) was considered to be held by such person by reason of the application of section 1223) in the gross income of any other person who held such share (or block).

(v) If the first tier corporation and the lower tier corporation do not use the same taxable year, and if there would be a reduction in the person's tentative ratable share of the accumulated earnings and profits of the lower tier corporation attributable to the taxable year of the first tier corporation by an amount computed under subdivision (iv) of this subparagraph in respect of a taxable year of the lower tier corporation (were the taxable years of such corporations the same), then such person's tentative ratable share of the accumulated earnings and profits for a taxable year of the lower tier corporation attributable to such taxable year of the first tier corporation shall be reduced by an amount which bears the same ratio to (*a*) such amount, as (*b*) the number of days in the taxable year of the lower tier corporation which fall within the taxable year of the first tier corporation, bears to (*c*) the total number of days in the taxable year of the first tier corporation.

(vi) If the lower tier corporation was a less developed country corporation as defined in section 902(d) for a taxable year of the corporation, see paragraph (g) of this section.

(g) *Lower tier corporation a less developed country corporation*—(1) *General.* If the lower tier corporation was a less developed country corporation as defined in section 902(d) for a taxable year of such corporation, and if the person who sold or exchanged a share (or block) of stock in the first tier corporation satisfies on the date of such sale or exchange—

(i) The requirements of paragraph (a)(1) of § 1.1248–5 with respect to such stock, and

(ii) The requirements of paragraph (d)(1) of § 1.1248–5 with respect to any stock of the lower tier corporation which such person, by reason of his direct ownership of such stock in the first tier corporation, owned within the meaning of section 958(a)(2),

then such person's ratable share (or a deficit in such ratable share) for such taxable year of the lower tier corporation attributable to a taxable year of the first tier corporation (determined without regard to this paragraph) shall be reduced by an amount computed by multiplying such ratable share (so determined without regard to this paragraph) by the percentage computed under either subparagraph (2) or (4) of this paragraph, whichever is applicable.

(2) *Percentage for second tier corporation.* For purposes of subparagraph (1) of this paragraph, if stock of a lower tier corporation (hereinafter referred to as a "second tier" corporation) is owned directly by the first tier corporation on the date of the sale or exchange referred to in such subparagraph (1), the percentage under this subparagraph shall be computed by dividing (i) the number of shares of stock of the second tier corporation which the first tier corporation has owned directly for an uninterrupted 10-year period ending on such date, by (ii) the total number of shares of the stock of such second tier corporation owned directly by such first tier corporation on such date.

(3) *Examples.* The provisions of subparagraph (2) of this paragraph may be illustrated by the following examples:

*Example (1).* On January 1, 1966, Smith, a United States person, recognizes gain upon the sale of one share of the only class of stock of F Corporation, which he has owned continuously since 1955. He includes a portion of the gain in his gross income as a dividend under section 1248(a). On January 1, 1966, F owns directly 60 shares of the 100 outstanding shares of the only class of stock of G Corporation, which F acquired in 1955 and owned continuously until such sale. F uses a taxable year ending June 30, and G uses the calendar year as the taxable year. For 1964, G was a less developed country corporation, and on each day of 1964 G was a controlled foreign corporation. Smith's ratable share for G's taxable year ending December 31, 1964, attributable to F's taxable year ending June 30, 1965 (determined without regard to this paragraph) is $6.00. Since the percentage computed under subparagraph (2) of this paragraph is 100 percent (60 shares divided by 60 shares), Smith's ratable share for G's taxable year ending December 31, 1964, attributable to F's taxable year ending June 30, 1965 (after the application of subparagraph (2) of this paragraph) is zero (that is, $6.00 reduced by 100 percent of $6.00).

*Example (2).* Assume the same facts as in example (1) except that of the 60 shares of G Corporation which F Corporation owned on January 1, 1966, 20 shares were acquired in 1961. The percentage computed under subparagraph (2) of this paragraph is 66⅔ percent (40 shares divided by 60 shares). Accordingly, Smith's ratable share for G's taxable year ending December 31, 1964, attributable to F's taxable year ending June 30, 1965 (after the application of subparagraph (2) or this paragraph) is $2.00 (that is, $6.00 reduced by 66⅔ percent of $6.00).

(4) *Percentage for lower tier corporations other than second tier corporation.* For purposes of subparagraph (1) of this paragraph, if stock of a lower tier corporation (other than a second tier corporation) is owned within the meaning of section 958(a)(2) by the first tier corporation on the date of the sale or exchange referred to in such subparagraph (1), the percentage under this subparagraph shall be computed in the following manner:

(i) First, determine the percentage for the second tier corporation in accordance with subparagraph (2) of this paragraph.

(ii) Second, determine a partial percentage for each other lower tier corporation in the same manner as the percentage for the second tier corporation is determined. Thus, for example, the partial percentage for a third tier corporation is determined by dividing (*a*) the number of shares of stock of the third tier corporation which the second tier corporation has owned directly for an uninterrupted 10-year period ending on the date of the sale or exchange referred to in subparagraph (1) of this paragraph, by (*b*) the total number of shares of stock of such third tier corporation owned directly by such second tier corporation on such date.

(iii) Third, the percentage for a third tier corporation is the percentage for the second tier corporation multiplied by the partial percentage for the third tier corporation. The percentage for a fourth tier corporation is the percentage for the third tier corporation (as determined in the preceding sentence) multiplied by the partial percentage for the fourth tier corporation. In a similar manner, the percentage for any other lower tier corporation may be determined.

(5) *Example.* The application of subparagraph (4) of this paragraph may be illustrated by the following example:

*Example.* On January 1, 1967, Brown, a United States person recognizes gain upon the sale of one share of the only class of stock of W Corporation, which he has owned continuously since 1955. He includes a portion of the gain in his gross income as a dividend under section 1248(a). W is the first tier corporation of a chain of foreign corporations W, X, Y, and Z. W and Z each use the calendar year as the taxable year. For 1964, Z was a less developed country corporation and on each day of 1964 Z was a controlled foreign corporation. Additional facts are set forth in the table below:

| Corporation | Shares directly owned by preceding tier— | | Column (2) divided by column (3) (percent) |
|---|---|---|---|
| | For uninterrupted 10-year period ending Jan. 1, 1967 | On Jan. 1, 1967 | |
| (1) | (2) | (3) | (4) |
| X | 40 | 60 | 66⅔ |
| Y | 30 | 40 | 75 |
| Z | 20 | 30 | 66⅔ |

For 1964, the percentage referred to in subparagraph (4) of this paragraph for Z is 33⅓ percent (66⅔% × 75% × 66⅔%).

(6) *Special rule.* For purposes of applying the provisions of this paragraph, a lower tier corporation may be treated as a second tier corporation with respect to any of its stock which is owned directly by a first tier corporation whereas such lower tier corporation may be treated as a lower tier corporation other than a second tier corporation with respect to other stock in such lower tier corporation which is owned (within the meaning of section 958(a)(2)) by such first tier corporation. Thus, for example, if corporations X, Y, and Z are foreign corporations, X is a first tier corporation owning directly 100 percent of the stock of Y and 40 percent of the stock of Z, and in addition Y owns directly 60 percent of the stock of Z, then the 40 percent of the Z stock (which X owns directly) is considered to be stock in a second tier corporation and the 60 percent of the Z stock (which Y owns directly and which X is considered to own within the meaning of section 958(a)(2)) is considered to be stock in a third tier corporation.

### § 1.1248–4 Limitation on tax applicable to individuals.

(a) *General rule*—(1) *Limitation on tax.* Under section 1248(b), if during a taxable year an individual sells or exchanges stock in a foreign corporation, then in respect of the stock the increase in the individual's income tax liability for such taxable year which is attributable (under paragraph (b) of this section) to the amount included in his gross income as a dividend under section 1248(a) shall not be greater than an amount equal to the sum of—

(i) The excess, computed under paragraph (c) of this section in respect of the stock, of the United States taxes which would have been paid by the corporation over the taxes (including United States taxes) actually paid by the corporation, plus

(ii) An amount equal to the increase in the individual's income tax liability which would be attributable to the inclusion in his gross income for such taxable year, as long-term capital gain, of an amount equal to the excess of (*a*) the amount included in the individual's gross income as a dividend under section 1248(a) in respect of such stock, over (*b*) the excess referred to in subdivision (i) of this subparagraph.

(2) *Share or block.* In general, the limitation on tax attributable (under paragraph (b) of this section) to the amount included in an individual's gross income as a dividend under section 1248(a) shall be determined separately for each share of stock sold or exchanged. However, such determination may be made in respect of a block of stock if earnings and profits attributable to the block are computed under § 1.1248–2 or 1.1248–3. See paragraph (b) of § 1.1248–2 and paragraph (a)(5) of § 1.1248–3.

(3) *Application of limitation.* The provisions of subparagraph (1) of this paragraph shall not apply unless the individual establishes—

(i) In the manner prescribed in § 1.1248–7, the amount of the earnings and profits of the corporation attributable under paragraph (a)(1) of § 1.1248–2 or under paragraph (a)(1) of § 1.1248–3, whichever is applicable, to the stock, and

(ii) The amount equal to the sum described in subparagraph (1) of this paragraph, computed in accordance with the provisions of this section.

(4) *Example.* The provisions of this paragraph may be illustrated by the following example:

*Example.* On December 31, 1966, Smith, a United States person, sells a share of stock of X Corporation which he has owned continuously since December 31, 1965, and includes $100 of the gain on the sale in his gross income as a dividend under section 1248(a). Both X and Smith use the calendar year as the taxable year. The increase in Smith's income tax liability for 1966 which is attributable (under paragraph (b) of this section) to the inclusion of the $100 in his gross income as a dividend is $70. X was a controlled foreign corporation on each day of 1966. The excess, computed under paragraph (c) of this section in respect of the share, of the United States taxes which X would have paid over the taxes (including United States taxes) actually paid by X is $49. Under section 1248(b), the limitation on the tax attributable to the $100 included by Smith in his gross income as a dividend under section 1248(a) is $61.75, computed as follows:

| | |
|---|---|
| (i) Excess, computed under paragraph (c) of this section, of United States taxes which X Corporation would have paid in 1966 over the taxes actually paid by X in 1966 | $49.00 |
| (ii) The amount determined under subparagraph (1)(ii) of this paragraph: | |
| The amount Smith included in his gross income as a dividend under section 1248(a) | $100.00 |
| Less the excess referred to in subdivision (i) of this example | 49.00 |
| Difference | 51.00 |
| Increase in Smith's tax liability attributable to including $51 in his gross income as long-term capital gain (25 percent of $51) | 12.75 |
| (iii) Limitation on tax | 61.75 |

(b) *Tax attributable to amount treated as dividend*—(1) *General.* For purposes of paragraph (a)(1) of this section, in respect of a share (or block) of stock in a foreign corporation sold or exchanged by an individual during a taxable year, the tax attributable to the amount included in his gross income as a dividend under section 1248(a) shall be the amount which bears the same ratio to (*i*) the excess of (*a*) his income tax liability for the taxable year determined without regard to section 1248(b) over (*b*) such tax liability determined as if the portion of the total gain recognized during the taxable year which is treated as a dividend under section 1248(a) had not been recognized, as (*ii*) the amount included as a dividend under section 1248(a) in respect of the share (or block), bears to (*iii*) the total amount included as a dividend under section 1248(a) in the individual's gross income for such taxable year.

(2) *Examples.* The application of this paragraph may be illustrated by the following examples:

*Example (1).* (i) During 1963, Brown, an unmarried United States person, sells a block of stock in a controlled foreign corporation. On the sale, he recognizes $22,000 gain, of which $18,000 is treated as a dividend under section 1248(a) and $4,000 as long-term capital gain. Brown computes his income tax liability for his taxable year ending December 31, 1963, under section 1201 (relating to alternative tax) in accordance with the additional facts assumed in the following table:

| | Computation of income tax liability without regard to section 1248(b) | Computation of income tax liability as if the gain treated as a dividend under section 1248(a) had not been recognized |
|---|---|---|
| Income from salary | $300,000 | $300,000 |
| Long-term capital gain resulting from sale of stock, less deduction for capital gains under section 1202 ($4,000 less $2,000) | 2,000 | 2,000 |
| Amount treated as a dividend under section 1248(a) | 18,000 | 0 |
| Adjusted gross income | 320,000 | 302,000 |
| Charitable contribution of $100,000 to church (limited under section 170(b) to 30 percent of adjusted gross income) | (96,000) | (90,600) |
| Other itemized deductions and personal exemption | (7,700) | (7,700) |
| Taxable income | 216,300 | 203,700 |
| Less 50 percent of $4,000 | 2,000 | 2,000 |
| Amount subject to partial tax under section 1201(b)(1) | 214,300 | 201,700 |
| Partial tax | 169,833 | 158,367 |
| 25 percent of $4,000 | 1,000 | 1,000 |
| Tax liability | 170,833 | 159,367 |

(ii) The tax attributable to the $18,000 treated as a dividend under section 1248(a) is $11,466 ($170,833 minus $159,367).

*Example (2).* Assume the same facts as in example (1) except that the $18,000 treated as a dividend under section 1248(a) is attributable to the sale of a block of stock in X Corporation and a block of stock in Y Corporation. Assume further that $10,000 of the gain on the block of X stock was treated as a dividend and that $8,000 of the gain on the block of Y stock was treated as a dividend. Thus, the tax attributable to the amount treated as a dividend in respect of the block of X stock is $6,370 ($10,000/$18,000 of $11,466) and the amount in respect of the block of Y stock is $5,096 ($8,000/$18,000 of $11,466). The result would be the same if both blocks of stock were blocks of stock in the same corporation.

(c) *Excess (of United States taxes which would have been paid over taxes actually paid) attributable to a share (or block)*—(1) *General.* For purposes of paragraph (a)(1)(i) of this section—

(i) The term "taxes" means income, war profits, or excess profits taxes, and

(ii) The excess (and the portion of such excess attributable to an individual's share or block of stock in a foreign corporation) of the United States taxes which would have been paid by the corporation over the taxes (including United States taxes) actually paid by the corporation, for the period or periods the stock was held (or was considered to be held by reason of the application of section 1223) by the individual in taxable years of the corporation beginning after December 31, 1962, while the corporation was a controlled foreign corporation, shall be computed in accordance with the steps set forth in subparagraphs (2), (3), and (4) of this paragraph.

(2) *Step 1.* For each taxable year of the corporation beginning after December 31, 1962, in respect of the individual's share (or block) of such stock (i) the taxable income of the corporation shall be computed in the manner prescribed in paragraph (d) of this section, and (ii) the excess (and the portion of such excess attributable to the stock) of the United States taxes which would have been paid by the corporation on such taxable income over the taxes (including United States taxes) actually paid by the corporation shall be computed in the manner prescribed in paragraph (e) of this section.

(3) *Step 2.* If during such taxable year the corporation is a first tier corporation to which paragraph (f) of this section applies, (i) the excess (and the portion of such excess attributable to the individual's share, or block, of stock in the first tier corporation) of the United States taxes which would have been paid by any lower tier corporation over the taxes (including United States taxes) actually paid by such lower tier corporation shall be computed under paragraph (f) of this section, and (ii) such portion shall be added to the portion of the excess attributable to the individual's share (or block) of such stock as determined in step 1 for such taxable year.

(4) *Step 3.* The excess, in respect of the individual's share (or block), of the United States taxes which would have been paid by the corporation over the taxes actually paid by the corporation shall be the sum of the portions computed for each such taxable year in the manner prescribed in steps 1 and 2.

(d) *Taxable income.* For purposes of paragraph (c)(2)(i) of this section, taxable income shall be computed in respect of an individual's share (or block) in accordance with the following rules:

(1) *Application of principles of § 1.952–2.* Except as otherwise provided in this paragraph, the principles of paragraphs (a)(1), (b)(1), and (c) of § 1.952–2 (other than subparagraphs (2)(iii)(*b*), (2)(v), (5)(i), and (6) of such paragraph (c)) shall apply.

(2) *Effect of elections.* In respect of a taxable year of a foreign corporation, no effect shall be given to an election or an adoption of accounting method unless for such taxable year effect is given to such election or adoption of accounting method under paragraph (d)(1) of § 1.1248–2 or paragraph (b)(1) of § 1.1248–3, whichever is applicable.

(3) The deductions for certain dividends received provided in sections 243, 244, and 245 shall not be allowed.

(4) *Deduction for taxes.* In computing the amount of the deduction allowed under section 164, there shall be excluded income, war profits, or excess profits taxes paid or accrued which are imposed by the authority of any foreign country or possession of the United States.

(5) *Capital loss carryover.* In determining the amount of a net capital loss to be carried forward under section 1212 to the taxable year—

(i) No net capital loss shall be carried forward from a taxable year beginning before January 1, 1963.

(ii) The portion of a net capital loss or a net capital gain for a taxable year beginning after December 31, 1962, which shall be taken into account shall be the amount of such loss or gain (as the case may be), multiplied by the percentage which (*a*) the number of days in such taxable year during which the individual held (or was considered to have held by reason of the application of section 1223) the share (or block) of stock sold or exchanged while the corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year.

(iii) The application of this subparagraph may be illustrated by the following examples:

*Example (1).* Corporation X is a foreign corporation which was created on January 1, 1963, and which uses the calendar year as its taxable year. X was a controlled foreign corporation on each day of the period March 15, 1963, through December 31, 1965, but was not a controlled foreign corporation on any day during the period January 1, 1963, through March 14, 1963. On December 31, 1965, Smith, a United States person, sells a share of X stock which he has owned continuously since January 1, 1963. A portion of the gain recognized on the sale is includible in Smith's gross income as a dividend under section 1248(a). X had a net capital loss (determined without regard to subchapter N, chapter 1 of the Code) of $200 for 1963. Since, however, X was a controlled foreign corporation for only 292 days in 1963, for purposes of determining the net capital loss carryover to 1964 the portion of the net capital loss of $200 for 1963 which Smith takes into account under subdivision (ii) of this subparagraph is $160 (292/365 of $200), and, accordingly, the amount of the net capital loss carryover to 1964 is $160.

*Example (2).* Assume the same facts as in example (1), except that X was not a controlled foreign corporation on any day of the period May 26, 1964, through June 30, 1965. Assume further that X had a net capital gain (determined without regard to subchapter N, chapter 1, of the Code) of $160 for 1964. In computing X's taxable income for 1964 under this paragraph, Smith applies the net capital loss carryover of $160 from 1963 to reduce the net capital gain of $160 for 1964 to zero. Since, however, X was a controlled foreign corporation for only 146 days in 1964, for purposes of computing the portion of the 1963 capital loss of $160 which is a net capital loss carryover to 1965, the portion of the 1964 capital gain which Smith takes into account under subdivision (ii) of this subparagraph is $63.83 (146/366 of $160). Thus, the net capital loss carryover to 1965 is $96.17 ($160 minus $63.83).

(6) *Net operating loss deduction.* (i) The individual shall reduce the taxable income (computed under subparagraphs (1) through (5) of this paragraph) of the corporation for the taxable year by the amount of the net operating loss deduction of the corporation computed under section 172, as modified in the manner prescribed in this subparagraph.

(ii) The rules of subparagraphs (1) through (5) of this paragraph shall apply for purposes of determining the excess referred to in section 172(c) and the taxable income referred to in section 172(b)(2).

(iii) A net operating loss shall not be carried forward from, or carried back to, a taxable year beginning before January 1, 1963.

(iv) The portion of a net operating loss incurred, or of taxable income earned, in a taxable year beginning after December 31, 1962, which shall be taken into account under section 172(b)(2) shall be the amount of such loss or income (as the case may be), multiplied by

the percentage which (*a*) the number of days in such taxable year during which the individual held (or was considered to have held by reason of the application of section 1223) the share (or block) of stock sold or exchanged while the corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year.

(v) For illustrations of the principles of this subparagraph, see the examples relating to net capital loss carryovers in subparagraph (5)(iii) of this paragraph.

(7) *Adjustment for amount previously included in gross income of United States shareholders.* In respect of the individual's share (or block) of stock sold or exchanged, the taxable income of the corporation for the taxable year (determined without regard to this subparagraph and subparagraph (8) of this paragraph) shall be reduced (but not below zero) by an amount equal to the sum of the amounts included under section 951 in the gross income of United States shareholders (as defined in section 951(b)) of the corporation for the taxable year.

(8) *Adjustment for distributions.* In respect of the individual's share (or block) of stock sold or exchanged, the taxable income of the corporation for the taxable year (determined without regard to this subparagraph) shall be reduced (but not below zero) by the amount of the distributions (other than in redemption of stock under section 302(a) or 303) made by the corporation out of earnings and profits of such taxable year (within the meaning of section 316(a)(2)). For purposes of the preceding sentence, distributions shall be taken into account only to the extent not excluded from the gross income of the United States shareholders of the corporation under section 959.

(e) *Excess attributable to a share (or block) of stock*—(1) *Excess of United States taxes which would have been paid over taxes actually paid.* For purposes of paragraph (c)(2)(ii) of this section, in respect of a taxable year of a foreign corporation, the portion of the excess under this subparagraph which is attributable to an individual's share (or block) of such stock shall be an amount equal to—

(i) The excess (if any) of (*a*) the United States taxes which would have been paid by the corporation on its taxable income (computed under paragraph (d) of this section) for the taxable year had it been taxed as a domestic corporation under chapter 1 of the Code (but without regard to subchapters F, G, H, L, M, N, S, and T thereof) for such taxable year, over (*b*) the income, war profits, or excess profits taxes actually paid by the corporation during such taxable year (including such taxes paid to the United States),

(ii) Multiplied by the percentage that (*a*) the number of days in such taxable year of the corporation during the period or periods the share (or block) was held (or was considered as held by reason of the application of section 1223) by the individual while the corporation was a controlled foreign corporation, bears to (*b*) the total number of days in such taxable year,

(iii) If the computation is made in respect of a block, multiplied by the number of shares in the block, and

(iv) Divided by the number of shares in the corporation outstanding, or deemed under paragraph (c)(2) of § 1.1248–3 to be outstanding, on each day of such taxable year.

(2) *Example.* The provisions of this paragraph may be illustrated by the following example:

*Example.* (i) Jones, a United States person, owns on each day of 1963 10 shares of the 100 shares of the only class of outstanding stock of X corporation. He sells one of such shares on December 31, 1963. X Corporation is a controlled foreign corporation on each day of 1963 and Jones and X each use the calendar year as the taxable year. For 1963, the excess of the United States taxes which would have been paid by X had it been taxable as a domestic corporation over the taxes (including United States taxes) actually paid by X is $23,500, computed as follows:

| | |
|---|---|
| Amount subject to partial tax under section 1201(a)(1), as computed by Jones: | |
| Taxable income | $300,000 |
| Less excess of net long-term capital gain over net short-term capital loss | 100,000 |
| Amount subject to partial tax | 200,000 |
| Excess determined under subparagraph (1)(i) of this paragaph: | |
| 30 percent × $25,000 | $7,500 |
| 52 percent × $175,000 | 91,000 |
| Partial tax | 98,500 |
| 25 percent × $100,000 | 25,000 |
| United States taxes X would have paid (alternative tax computed under section 1201(a)) | 123,500 |
| Less income taxes X actually paid to: | |
| United States | $10,000 |
| Foreign countries | 90,000 |
| Total | 100,000 |
| Excess | 23,500 |
| Multiplied by: | |
| Percentage determined under subparagraph (1)(ii) of this paragraph: Since on each day of 1963, Jones held the share of X stock while X was a controlled foreign corporation, the percentage equals | 100% |
| Total | 23,500 |

(ii) The portion of the excess determined in subdivision (i) of this example which is attributable to the share held by Jones is $235, that is, the amount of such excess ($23,500), divided by the number of shares of X deemed to be outstanding on each day of 1963 (100).

(3) *More than one class of stock.* If a foreign corporation for a taxable year has more than one class of stock outstanding, then before applying subparagraph (1) of this paragraph the excess (if any) which would be determined under subparagraph (1)(i) of this paragraph shall be allocated to each class of stock in accordance with the principles of paragraph (d)(2)(i) (*d*) and (*e*) of § 1.963–2, applied as if the corporation were a controlled foreign corporation on each day of such taxable year.

(f) *Subsidiaries of foreign corporations*—(1) *Excess for lower tier corporation attributable to taxable year of first tier corporation.* For purposes of paragraph (c)(3) of this section, if the provisions of paragraph (a)(3) of § 1.1248–2 or paragraph (f) of § 1.1248–3 apply in the case of the sale or exchange by an individual of a share (or block) of stock in a first tier corporation, then in respect of a taxable year of a lower tier corporation (beginning after December 31, 1962) which includes at least one day which falls within a taxable year of the first tier corporation (beginning after December 31, 1962), the portion of the excess under this subparagraph attributable to the share shall be an amount equal to—

(i) The excess (if any) of (*a*) the United States taxes which would have been paid by the lower tier corporation on its taxable income (computed under paragraph (g) of this section) for such taxable year of the lower tier corporation had it been taxed as a domestic corporation under chapter 1 of the Code (but without regard to subchapters F, G, H, L, M, N, and T thereof) for such taxable year of the lower tier corporation, over (*b*) the income, war profits, or excess profits taxes actually paid by the lower tier corporation during such taxable year (including such taxes paid to the United States),

(ii) Multiplied by each of the percentages described under paragraph (f)(2)(ii), (iii), and (iv) of § 1.1248–3 in respect of such taxable year of the first tier corporation,

(iii) If the computation is made in respect of a block of stock, multiplied by the number of shares in the block, and

(iv) Divided by the number of shares in the first tier corporation outstanding, or deemed under paragraph (c)(2) of § 1.1248–3 to be outstanding, on each day of such taxable year of the first tier corporation.

(2) *More than one class of stock.* If a foreign corporation for a taxable year has more than one class of stock outstanding, then before applying subparagraph (1) of this paragraph the principles of paragraph (e)(3) of this section shall apply.

(g) *Taxable income of lower tier corporations*—(1) *General.* For purposes of paragraph (f)(1)(i) of this section, in respect of the individual's share (or block) the taxable income of a lower tier corporation shall be computed in the manner provided in paragraph (d) of this section, except as provided in this paragraph.

(2) *Capital loss carryover.* For purposes of subparagraph (1) of this paragraph, the provisions of paragraph (d)(5)(ii) of this section shall not apply. In determining the amount of a net capital loss to be carried forward under section 1212 to the taxable year of a lower tier corporation, the portion of a net capital loss or a net capital gain for a taxable year of the lower tier corporation beginning after December 31, 1962, which shall be taken into account shall be

the amount of such loss or gain (as the case may be), multiplied by the percentage which (i) the number of days in such taxable year during the period or periods the individual held (or was considered to have held by reason of the application of section 1223) the share (or block) of stock in the first tier corporation sold or exchanged while the first tier corporation owned (within the meaning of section 958 (a)) stock in the lower tier corporation while the lower tier corporation was a controlled foreign corporation, bears to (ii) the total number of days in such taxable year.

(3) *Net operating loss deduction.* For purposes of subparagraph (1) of this paragraph, the provisions of paragraph (d)(6)(iv) of this section shall not apply. In determining the amount of the net operating loss deduction for a taxable year of a lower tier corporation, the portion of a net operating loss incurred, or of taxable income earned, in a taxable year of the lower tier corporation beginning after December 31, 1962, which shall be taken into account under section 172 (b)(2) shall be the amount of such loss or income (as the case may be) multiplied by the percentage described in subparagraph (2) of this paragraph for such taxable year.

**§ 1.1248–5 Stock ownership requirements for less developed country corporations.**

(a) *General rule*—(1) *Requirements.* For purposes of paragraph (e)(4) of § 1.1248–3, a United States person shall be considered as satisfying the requirements of this paragraph with respect to a share (or block) of stock of a foreign corporation if on the date he sells or exchanges such share (or block)—

(i) The 10-year stock ownership requirement of paragraph (b) of this section is met with respect to such share (or block), and

(ii) In the case of a United States person which is a domestic corporation, the requirement of paragraph (c) of this section, if applicable, is met.

(2) *Ownership of stock.* For purposes of this section—

(i) The rules for determining ownership of stock prescribed by section 958 (a) and (b) shall apply.

(ii) Stock owned by a United States person who is an individual, estate, or trust which was acquired by reason of the death of the predecessor in interest of such United States person shall be considered as owned by such United States person during the period such stock was owned by such predecessor in interest, and during the period such stock was owned by any other predecessor in interest if between such United States person and such other predecessor in interest there was no transfer other than by reason of the death of an individual.

(b) *10-year stock ownership requirement*—(1) *General.* A United States person meets the 10-year stock ownership requirement with respect to a share (or block) of stock in a foreign corporation which he sells or exchanges only if the share (or block) was owned (under the rules of paragraph (a)(2) of this section) by such person for a continuous period of at least 10 years ending on the date of the sale or exchange. See the first sentence of section 1248(d)(3). Thus, for example, if Jones, a United States person, sells a share of stock in a foreign corporation on January 1, 1965, the 10-year stock ownership requirement is met with respect to the share only if the share was owned (under the rules of paragraph (a)(2) of this section) by Jones continuously from January 1, 1955, to January 1, 1965. If a foreign corporation has not been in existence for at least 10 years on the date of the sale or exchange of the share, the 10-year stock ownership requirement cannot be met.

(2) *Special rule.* For purposes of this paragraph, a United States person shall be considered to have owned stock during the period he was considered to have held the stock by reason of the application of section 1223.

(c) *Disqualification of domestic corporation as a result of changes in ownership of its stock*—(1) *General.* (i) For purposes of paragraph (a)(1)(ii) of this section, the requirement of this paragraph must be met only if, on at least one day during the 10-year period ending on the date of the sale or exchange by a domestic corporation of a share of stock in a foreign corporation, one or more noncorporate United States shareholders (as defined in subdivision (iii) of this subparagraph) own more than 50 percent of the total combined voting power of all classes of stock entitled to vote of the domestic corporation.

(ii) The requirement of this paragraph is that if one or more persons are noncorporate United States shareholders on the first such day (referred to in subdivision (i) of this subparagraph), such person or persons continue after such first day, at all times during the remainder of such 10-year period, to own in the aggregate more than 50 percent of the total combined voting power of all classes of stock entitled to vote of the domestic corporation. For purposes of determining whether a domestic corporation meets the requirement of this paragraph, the stock owned by a United States person who is a noncorporate United States shareholder of a domestic corporation on such first day shall not be counted at any time after he ceases during such 10-year period to be a noncorporate United States shareholder of such corporation.

(iii) For purposes of this paragraph, the term "noncorporate United States shareholder" means, with respect to a domestic corporation, a United States person who is an individual, estate, or trust and who owns 10 percent or more of the total combined voting power of all classes of stock of such domestic corporation.

(iv) For purposes of this paragraph, the percentage of the total combined voting power of stock of a foreign corporation owned by a United States person shall be determined in accordance with the principles of section 951(b) and the regulations thereunder.

(2) *Examples.* The application of this paragraph may be illustrated by the following examples:

*Example (1).* During the entire period beginning December 31, 1954, and ending December 31, 1964, domestic corporation N owns all the stock of controlled foreign corporation X, a less developed country corporation. On December 31, 1964, N recognizes gain upon the sale of all its X stock. A, B, and C, who are unrelated individuals, were the only United States persons owning, or considered as owning, 10 percent or more of the total combined voting power of all classes of stock entitled to vote of N at any time during the 10-year period December 31, 1954, through December 31, 1964. The percentages of the total combined voting power in N, which A, B, and C owned during such 10-year period, are as follows:

| Owner | Dec. 31, 1954–Apr. 1, 1957 | Apr. 2, 1957–Oct. 1, 1959 | Oct. 2, 1959–Dec. 31, 1964 |
|---|---|---|---|
| | *Percent* | *Percent* | *Percent* |
| A | 20 | 20 | 20 |
| B | 9 | 30 | 30 |
| C | 30 | 15 | 9 |

Domestic corporation N does not meet the requirement of this paragraph with respect to the stock of controlled foreign corporation X for the following reasons:

(i) April 2, 1957, is the first day (during the 10-year period ending on December 31, 1964, the date N sells the X stock) on which noncorporate United States shareholders of N own more than 50 percent of the total combined voting power in N, and thus the requirement of this paragraph must be met. See subparagraph (1)(i) of this paragraph. Although A, B, and C did own, in the aggregate, more than 50 percent of such voting power before April 2, 1957, the voting power owned by B is not counted because B was not a noncorporate United States shareholder of N before such date.

(ii) Although C is a noncorporate United States shareholder on April 2, 1957, C ceases to own 10 percent or more of the total combined voting power in N on October 2, 1959. Thus, after October 1, 1959, the N stock which C owns is not counted for purposes of determining whether the more-than-50-percent stock ownership test is met. See subparagraph (1)(ii) of this paragraph. Accordingly, after October 1, 1959, the requirement of this paragraph is not met.

*Example (2).* Assume the same facts as in example (1), except that B's wife owns directly 5 percent of the total combined voting power in N from December 31, 1954, to December 31, 1964. On the basis of the assumed facts, N meets the requirement of this paragraph with respect to the stock of controlled foreign corporation X for the following reasons:

(i) December 31, 1954, is the first day (of the 10-year period ending on the date N sells the X stock) on which noncorporate United States shareholders of N own more than 50 percent of the total combined voting power in N. B is a noncorporate United States shareholder on such date because he owns, and is considered as owning, 14 percent of the total combined voting power in N (9 percent directly, and, under section 958(h), 5 percent constructively). Thus, on December 31, 1954, noncorporate United States shareholders A, B, and C own, in the aggregate, more than 50 percent of the total combined voting power in N.

(ii) A, B, and C, the noncorporate United States shareholders of N on December 31, 1954, own, and are considered as owning, more than 50 percent of the total voting power of N from December 31, 1954, to October 1, 1959. Since beginning on October 2, 1959, A owns 20 percent and B owns, and is considered as owning, 35 percent of the total combined voting power in N, A and B own, and are considered as owning, more than 50 percent of the total combined voting power in N from October 2, 1959, to December 31, 1964. Therefore, the requirement of this paragraph is met.

(d) *Application of section to lower tier corporation*—(1) *General.* For purposes of paragraph (g)(1)(ii) of § 1.1248–3, a United States person satisfies the requirements of this subparagraph in respect of stock of a lower tier corporation which such person, by reason of his direct ownership of the share (or block) of the first tier corporation sold or exchanged, owned within the meaning of section 958(a)(2) on the date he sold or exchanged such share (or block), if on such date—

(i) The 10-year stock ownership requirement of paragraph (b) of this section is met by such person with respect to any stock in the lower tier corporation which such person so owned, and

(ii) In the case of a United States person which is a domestic corporation, the requirement of paragraph (c) of this section, if applicable, is met.

(2) *Special rule.* For purposes of this paragraph, in applying paragraphs (b) and (c) of this section, the sale or exchange of a share (or block) of stock in a first tier corporation by a United States person shall be deemed to be the sale or exchange of any stock in a lower tier corporation which the person, by reason of his direct ownership of such share (or block) of the first tier corporation, owned within the meaning of section 958(a)(2) on the date he actually sold or exchanged such share (or block) in the first tier corporation.

**§ 1.1248–6 Sale or exchange of stock in certain domestic corporations.**

(a) *General rule.* If a United States person recognizes gain upon the sale or exchange of a share (or block) of stock of a domestic corporation which was formed or availed of principally for the holding, directly or indirectly, of stock of one or more foreign corporations, and if the conditions of paragraph (a)(2) of § 1.1248–1 would be met by such person in respect of the share (or block) if the domestic corporation were a foreign corporation, then section 1248 shall apply in respect of such gain in accordance with the rules provided in paragraph (b) of this section.

(b) *Application.* (1) The gain referred to in paragraph (a) of this section shall be included in the gross income of the United States person as a dividend under section 1248(a) to the extent of the earnings and profits attributable under § 1.1248–2 or § 1.1248–3, whichever is applicable, to the share (or block), computed, however, in accordance with the following rules:

(i) The domestic corporation shall be treated as if it were a first tier foreign corporation;

(ii) If, after the application of subdivision (i) of this subparagraph, the provisions of paragraph (a)(3) of § 1.1248–2 or paragraph (f) of § 1.1248–3 (as the case may be) would apply in respect of a foreign corporation the stock of which is owned (within the meaning of section 958(a)) by the domestic corporation treated as the first tier corporation, such foreign corporation shall be considered a lower tier corporation;

(iii) Except to the extent provided in subdivision (iv) of this subparagraph, the earnings and profits of the domestic corporation treated as the first tier corporation accumulated for a taxable year, as computed under paragraph (d) of § 1.1248–2 or paragraph (b) of § 1.1248–3 (as the case may be), shall be considered to be zero; and

(iv) If, during a taxable year, a domestic corporation treated as the first tier corporation realizes gain upon the sale or exchange of stock in a foreign corporation, and solely by reason of the application of section 337 (relating to certain liquidations) the gain was not recognized, then the earnings and profits of such domestic corporation accumulated for the taxable year as computed under paragraph (d) of § 1.1248–2 or paragraph (b) of § 1.1248–3 (as the case may be), shall be considered to be an amount equal to the portion of such gain realized during the taxable year which, if section 337 had not applied, would have been treated as a dividend under section 1248(a).

(2) If the person selling or exchanging the stock in the domestic corporation is an individual, the limitation on tax attributable to the amount included in his gross income as a dividend under subparagraph (1) of this paragraph shall be determined, in accordance with the principles of paragraph (f) of § 1.1248–4, by treating the domestic corporation as a first tier corporation.

(3)(i) If the earnings and profits of the foreign corporation or corporations (or of the domestic corporation treated as a first tier corporation) to be taken into account under subparagraph (1) of this paragraph are not established in the manner provided in paragraph (a)(1) of § 1.1248–7, all of the gain from the sale or exchange of the share (or block) of the domestic corporation shall be treated as a dividend.

(ii) To the extent that the person does not establish, in the manner provided in paragraph (c) of § 1.1248–7, the foreign taxes paid by such foreign corporation or corporations to be taken into account for purposes of computing the limitation on tax attributable to a share, such foreign taxes shall not be taken into account for purposes of such computation.

(c) *Corporation formed or availed of principally for holding stock of foreign corporations.* Whether or not a domestic corporation is formed or availed of principally for the holding, directly or indirectly, of stock of one or more foreign corporations shall be determined on the basis of all the facts and circumstances of each particular case.

**§ 1.1248–7 Taxpayer to establish earnings and profits and foreign taxes.**

(a) *In general.* (1) If a taxpayer sells or exchanges stock in a foreign corporation which was a controlled foreign corporation and the Commissioner determines that the taxpayer has not established the amount of the earnings and profits of the corporation attributable to the stock under § 1.1248–2 or § 1.1248–3, whichever is applicable, all the gain from such sale or exchange shall be treated as a dividend under section 1248(a). See section 1248(g). A taxpayer shall be considered to have established such amount if—

(i) He attaches to his income tax return, filed on or before the last day prescribed by law (including extensions thereof) for his taxable year in which he sold or exchanged the stock, the schedule prescribed by paragraph (b) of this section or, if such last day is before April 1, 1965, he files such schedule before such date with the district director with whom such return was filed, and

(ii) He establishes in the manner prescribed by paragraph (d) of this section the correctness of each amount shown on such schedule.

(2) Notwithstanding an omission of information from, or an error with respect to an amount shown on, the schedule referred to in subparagraph (1)(i) of this paragraph, a taxpayer shall be considered to have complied with such subparagraph (1)(i) if—

(i) He establishes that such omission or error was inadvertent, or due to reasonable cause and not due to willful neglect, and that he has substantially complied with the requirements of this section, and

(ii) The taxpayer corrects such omission or error at the time when he complies with paragraph (d) of this section.

(3) For the requirement to establish the amount of foreign taxes to be taken into account for purposes of section 1248(b), see paragraph (c) of this section.

(b) *Schedule attached to return.* (1) The taxpayer shall attach to his income tax return for his taxable year in which he sold or exchanged the stock, a schedule showing his name, address, and identifying number. Except to the extent provided in paragraph (e) of this section, the schedule shall also show the amount of the earnings and profits attributable under paragraph (a) of § 1.1248–2 or paragraph (a) of § 1.1248–3 (as the case may be) to the stock, and, in order to support the computation of such amount, any additional information required by subparagraphs (2), (3), (4), and (5) of this paragraph.

(2) The schedule shall also show for the first tier corporation, and for each lower tier corporation as to which information is required under subparagraph (4) of this paragraph, (i) the name of the corporation, (ii) the country under whose laws the corporation is created or organized, and (iii) the last day of the taxable year which the corporation regularly uses in computing its income.

(3) If the amount of earnings and profits attributable to a block of stock sold or exchanged are computed under § 1.1248–2, the schedule shall also show—

(i) For each taxable year of the corporation, beginning after December 31, 1962, during the period the taxpayer held (or was considered to have held by reason of the application of section 1223) the block, (*a*) the earnings and profits accumulated for each such taxable year computed under paragraph (d) of § 1.1248–2, and (*b*) the sum thereof computed under paragraph (e)(1)(i) and (2) of § 1.1248–2,

(ii) The number of shares in the block and the total number of shares of the corporation outstanding during such period,

(iii) If during the period the person held (or is considered to have held by reason of the application of section 1223) the block any amount was included under section 951 in the gross income of such person (or another person), in respect of the block, the computation of the excess referred to in paragraph (e)(3)(ii) of § 1.1248–2, and

(iv) If the amount of earnings and profits of a lower tier corporation attributable to the block are computed under paragraph (a)(3) of § 1.1248–2, (*a*) the number of shares in the lower tier corporation which the taxpayer owns within the meaning of section 958(a)(2), (*b*) the total number of shares of such lower tier corporation outstanding during such period, and (c) in respect of such lower tier corporation, the information prescribed in subdivisions (i) and (iii) of this subparagraph.

(4) If the amount of earnings and profits attributable to a share (or block) sold or exchanged are computed under § 1.1248–3, the schedule shall also show for each taxable year of the corporation beginning after December 31, 1962, any day of which falls in a period or periods the taxpayer held (or was considered to have held by reason of the application of section 1223) the stock while the corporation was a controlled foreign corporation—

(i) The number of days in such period or periods, but only if such number is less than the total number of days in such taxable year,

(ii) The earnings and profits accumulated for the taxable year computed under paragraph (b) of § 1.1248–3,

(iii) The number of shares in the corporation outstanding, or deemed under paragraph (c)(2) of § 1.1248–3 to be outstanding, on each day of the taxable year,

(iv) The taxpayer's tentative ratable share computed under paragraph (c) or (d) (as the case may be) of § 1.1248–3,

(v) The amount of, and a short description of each adjustment to, the tentative ratable share under paragraph (e) of § 1.1248–3, and

(vi) The amount of the ratable share referred to in paragraph (e)(1) of § 1.1248–3.

(5) In respect of a taxable year referred to in subparagraph (4) of this paragraph of a first tier corporation, if the taxpayer is required to compute under paragraph (f)(5) of § 1.1248–3 his ratable share of the earnings and profits for a taxable year of the lower tier corporation attributable to such taxable year of such first tier corporation, then for such taxable year of the lower tier corporation the schedule shall show—

(i) The earnings and profits accumulated for the taxable year of the lower tier corporation, computed under paragraph (b) of § 1.1248–3,

(ii) Each percentage described in paragraph (f)(2)(ii), (iii), and (iv) of § 1.1248–3,

(iii) The amount of the taxpayer's tentative ratable share computed under paragraph (f)(2) or (4) (as the case may be) of § 1.1248–3,

(iv) The amount of, and a short description of each adjustment to, the tentative ratable share under paragraph (f)(5)(i) of § 1.1248–3, and

(v) The amount of the ratable share referred to in paragraph (f)(5)(i) of § 1.1248–3.

(c) *Foreign taxes.* (1) If the taxpayer fails to establish any portion of the amount of any foreign taxes which he is required to establish by subparagraph (2) of this paragraph, then such portion shall not be taken into account under section 1248(b)(1)(B).

(2) The taxpayer shall establish in respect of the stock he sells or exchanges the amount of the foreign taxes described in section 1248(b)(1)(B) paid by the first tier corporation for each taxable year of such corporation for which the information is required under paragraph (b)(3) or (4) of this section, and the amount of such taxes paid by each lower tier corporation for each taxable year (as to which information is required under paragraph (b)(3)(iv) or (5) of this section) of each such lower tier corporation. A taxpayer shall be considered to have established the amount of such foreign taxes if—

(i) He attaches to the schedule described in paragraph (b) of this section a supplementary schedule which, except to the extent provided in paragraph (e) of this section, sets forth the amount of such foreign taxes for each taxable year (of the first tier corporation and of each such lower tier corporation) as to which such amount must be established under this subparagraph, and

(ii) He establishes in the manner prescribed by paragraph (d)(2) of this section the correctness of each amount shown on such supplementary schedule.

(d) *Establishing amounts on schedules.* (1) A taxpayer shall be considered to have established, in respect of the stock he sold or exchanged, the correctness of an amount shown on a schedule described in paragraph (b) of this section only if he produces or provides within 180 days after demand by the district director (or within such longer period to which such director consents)—

(i) The books of original entry, or similar systematic accounting records maintained by any person or persons on a current basis as supplements to such books, which establish to the satisfaction of the district director the correctness of each such amount, and

(ii) In respect of any such books or records which are not in the English language, either an accurate English translation of any such records as are demanded, or the services of a qualified interpreter satisfactory to such director.

(2) A shareholder shall be considered to have established in respect of such stock the correctness of an amount shown on a supplementary schedule described in paragraph (c) of this section only if he produces or provides within 180 days after demand by the district director (or within such longer period to which such director consents)—

(i) Evidence described in paragraph (a)(2) of § 1.905–2 of such amount, or

(ii) Secondary evidence of such amount, in the same manner and to the same extent as would be permissible under paragraph (b) of § 1.905–2 in the case of a taxpayer who claimed the benefits of the foreign tax credit in respect of such amount.

(e) *Insufficient information at time return is filed.* If stock in a foreign corporation, which was a controlled foreign corporation, is sold or exchanged by a taxpayer during a taxable year of the corporation (or of a lower tier corporation) which ends after the last day of the taxpayer's taxable year in which the sale or exchange occurs, and if—

(1) For the taxpayer's taxable year, the last day referred to in paragraph (a)(1) of this section for filing his income tax return with a schedule prescribed in paragraph (b) of this section, and, if applicable, with a supplemental schedule prescribed in paragraph (c) of this section, or

(2) The last day referred to in paragraph (a)(1) of this section (that is, April 1, 1965) for filing any such schedule or schedules with the district director with whom such return was filed, is not later than 90 days after the close of such taxable year of any such corporation, then such return with such schedule or schedules may be filed, or any such schedule or schedules may be filed, on the basis of estimates of amounts or percentages (for any such taxable year of any such corporation) required to be shown on any such schedule or schedules. If any such estimate differs from the actual amount or percentage, the taxpayer shall, within 90 days after the close of any such taxable year of any such corporation, file (or attach to a claim for refund or amended return filed) at the office of the district director with whom he filed the return a new schedule or schedules showing the actual amounts or percentages.

(Sec. 7805 of the Internal Revenue Code of 1954; 68A Stat. 917; 26 U.S.C. 7805)

[T.D. 6780]

## PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

SUBCHAPTER C—EMPLOYMENT TAXES

## PART 31—EMPLOYMENT TAXES; APPLICABLE ON AND AFTER JANUARY 1, 1955

### Allowance and Denial of Deduction for Certain State, Local, and Foreign Taxes

On October 27, 1964, notice of proposed rule making with respect to the amendment of the Income Tax Regulations (26 CFR Part 1) under sections 164 and 275 of the Internal Revenue Code of 1954, relating to the allowance and denial of deduction for certain State, local, and foreign taxes, and the Employment Tax Regulations (26 CFR Part 31) under section 3502, relating to nondeductibility of taxes in computing taxable income, to conform the regulations to changes made by section 207 of the Revenue Act of 1964 (78 Stat. 40) was published in the FEDERAL REGISTER (29 F.R. 14637). After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the amendment of the regulations as proposed is hereby adopted.

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

Approved: December 16, 1964.

STANLEY S. SURREY,
*Assistant Secretary of the Treasury.*

In order to conform the Income Tax Regulations (26 CFR Part 1) and the Employment Tax Regulations (26 CFR Part 31) to the amendments made to the Internal Revenue Code of 1954 by section 207 of the Revenue Act of 1964 (78 Stat. 40), such regulations are amended as follows:

PARAGRAPH 1. Section 1.164 is amended by revising subsections (a), (b), (c), (f), and (g) of section 164, and by revising the historical note. These amended and revised provisions read as follows:

**§ 1.164 Statutory provisions; taxes.**

SEC. 164. *Taxes*—(a) *General rule.* Except as otherwise provided in this section, the following taxes shall be allowed as a deduction for the taxable year within which paid or accrued:

(1) State and local, and foreign, real property taxes.

(2) State and local personal property taxes.

(3) State and local, and foreign, income, war profits, and excess profits taxes.

(4) State and local general sales taxes.

(5) State and local taxes on the sale of gasoline, diesel fuel, and other motor fuels.

In addition, there shall be allowed as a deduction State and local, and foreign, taxes not described in the preceding sentence which are paid or accrued within the taxable year in carrying on a trade or business or an activity described in section 212 (relating to expenses for production of income).

(b) *Definitions and special rules.* For purposes of this section—

(1) *Personal property taxes.* The term "personal property tax" means an ad valorem tax which is imposed on an annual basis in respect of personal property.

(2) *General sales taxes*—(A) *In general.* The term "general sales tax" means a tax imposed at one rate in respect of the sale at retail of a broad range of classes of items.

(B) *Special rules for food, etc.* In the case of items of food, clothing, medical supplies, and motor vehicles—

(i) The fact that the tax does not apply in respect of some or all of such items shall not be taken into account in determining whether the tax applies in respect of a broad range of classes of items, and

(ii) The fact that the rate of tax applicable in respect of some or all of such items is lower than the general rate of tax shall not be taken into account in determining whether the tax is imposed at one rate.

(C) *Items taxed at different rates.* Except in the case of a lower rate of tax applicable in respect of an item described in subparagraph (B), no deduction shall be allowed under this section for any general sales tax imposed in respect of an item at a rate other than the general rate of tax.

(D) *Compensating use taxes.* A compensating use tax in respect of an item shall be treated as a general sales tax. For purposes of the preceding sentence, the term "compensating use tax" means, in respect of any item, a tax which—

(i) Is imposed on the use, storage, or consumption of such item, and

(ii) Is complementary to a general sales tax, but only if a deduction is allowable under subsection (a)(4) in respect of items sold at retail in the taxing jurisdiction which are similar to such item.

(3) *State or local taxes.* A State or local tax includes only a tax imposed by a State, a possession of the United States, or a political subdivision of any of the foregoing, or by the District of Columbia.

(4) *Foreign taxes.* A foreign tax includes only a tax imposed by the authority of a foreign country.

(5) *Separately stated general sales taxes and gasoline taxes.* If the amount of any general sales tax or of any tax on the sale of gasoline, diesel fuel, or other motor fuel is separately stated, then, to the extent that the amount so stated is paid by the consumer (otherwise than in connection with the consumer's trade or business) to his seller, such amount shall be treated as a tax imposed on, and paid by, such consumer.

(c) *Deduction denied in case of certain taxes.* No deduction shall be allowed for the following taxes:

(1) Taxes assessed against local benefits of a kind tending to increase the value of the property assessed; but this paragraph shall not prevent the deduction of so much of such taxes as is properly allocable to maintenance or interest charges.

(2) Taxes on real property, to the extent that subsection (d) requires such taxes to be treated as imposed on another taxpayer.

* * * * *

(f) *Payments for municipal services in atomic energy communities.* For purposes of this section, amounts paid or accrued, to compensate the Atomic Energy Commission for municipal-type services, by any owner of real property within any community (within the meaning of section 21b of the Atomic Energy Community Act of 1955) shall be treated as State real property taxes paid or accrued. For purposes of this subsection, the term "owner" includes a person who holds the real property under a leasehold of 40 or more years and a person who has entered into a contract to purchase under section 81 of the Atomic Energy Community Act of 1955. Subsection (d) of this section shall not apply to a sale by the United States of property with respect to which this subsection applies.

(g) *Cross references.* (1) For provisions disallowing any deduction for the payment of the tax imposed by subchapter B of chapter 3 (relating to tax-free covenant bonds), see section 1451.

(2) For provisions disallowing any deduction for certain taxes, see section 275.

[Sec. 164 as amended by sec. 6, Technical Amendments Act 1958 (72 Stat. 1608); sec. 207, Rev. Act 1964 (78 Stat. 40)]

PAR. 2. Section 1.164–1 is amended to read as follows:

**§ 1.164–1 Deduction for taxes.**

(a) *In general.* Only the following taxes shall be allowed as a deduction under this section for the taxable year within which paid or accrued, according to the method of accounting used in computing taxable income:

(1) State and local, and foreign, real property taxes.

(2) State and local personal property taxes.

(3) State and local, and foreign, income, war profits, and excess profits taxes.

(4) State and local general sales taxes.

(5) State and local taxes on the sale of gasoline, diesel fuel, and other motor fuels. In addition, there shall be allowed as a deduction State and local, and foreign, taxes not described in subparagraphs (1) through (5) of this paragraph which are paid or accrued within the taxable year in carrying on a trade or business or an activity described in section 212 (relating to expenses for production of income). For example, dealers or investors in securities and dealers or investors in real estate may deduct State stock transfer and real estate transfer taxes, respectively, under section 164, to the extent they are expenses incurred in carrying on a trade or business or an activity for the production of income. In general, taxes are deductible only by the person upon whom they are imposed. However, see § 1.164–5 in the case of certain taxes paid by the consumer.

(b) *Taxable years beginning before January 1, 1964.* For taxable years beginning before January 1, 1964, except as otherwise provided in §§1.164–2 through 1.164–8, inclusive, taxes imposed by the United States, any State, territory, possession of the United States, or a political subdivision of any of the foregoing, or by any foreign country, are deductible from gross income for the taxable year in which paid or accrued, according to the method of accounting used in computing taxable income. For this purpose, postage is not a tax and automobile license or registration fees are ordinarily taxes.

(c) *Cross references.* For the definition of the term "real property taxes", see paragraph (b) of § 1.164–3. For the definition of the term "foreign taxes", see paragraph (d) of § 1.164–4. For the definition of the term "general sales taxes", see paragraph (f) of § 1.164–3. For the treatment of gasoline, diesel fuel, and other motor fuel taxes, see § 1.164–5. For apportionment of taxes on real property between seller and purchaser, see section 164(d) and § 1.164–6. For the general rule for taxable year of deduction, see section 461. For provisions disallowing any deduction for the tax paid at the source on interest from tax-free covenant bonds, see section 1451(f).

PAR. 3. Section 1.164–2 is amended to read as follows:

**§ 1.164–2 Deduction denied in case of certain taxes.**

This section and § 1.275 describe certain taxes for which no deduction is allowed. In the case of taxable years beginning before January 1, 1964, the denial is provided for by section 164(b) (prior to being amended by section 207 of the Revenue Act of 1964 (78 Stat. 40)). In the case of taxable years beginning after December 31, 1963, the denial is governed by sections 164 and 275. No deduction is allowed for the following taxes:

(a) *Federal income taxes.* Federal income taxes, including the taxes imposed by section 3101, relating to the tax on employees under the Federal Insurance Contributions Act (chapter 21 of the Code); sections 3201 and 3211, relating to the taxes on railroad employees and

railroad employee representatives; section 3402, relating to the tax withheld at source on wages; and by corresponding provisions of prior internal revenue laws.

(b) *Federal war profits and excess profits taxes.* Federal war profits and excess profits taxes including those imposed by Title II of the Revenue Act of 1917 (39 Stat. 1000), Title III of the Revenue Act of 1918 (40 Stat. 1088), Title III of the Revenue Act of 1921 (42 Stat. 271), section 216 of the National Industrial Recovery Act (48 Stat. 208), section 702 of the Revenue Act of 1934 (48 Stat. 770), subchapter D, chapter 1 of the Internal Revenue Code of 1939, and subchapter E, chapter 2 of the Internal Revenue Code of 1939.

(c) *Estate and gift taxes.* Estate, inheritance, legacy, succession, and gift taxes.

(d) *Foreign income, war profits, and excess profits taxes.* Income, war profits, and excess profits taxes imposed by the authority of any foreign country or possession of the United States, if the taxpayer chooses to take to any extent the benefits of section 901, relating to the credit for taxes of foreign countries and possessions of the United States.

(e) *Real property taxes.* Taxes on real property, to the extent that section 164(d) and § 1.164–6 require such taxes to be treated as imposed on another taxpayer.

(f) *Federal duties and excise taxes.* Federal import or tariff duties, business, license, privilege, excise, and stamp taxes (not described in paragraphs (a), (b), or (c) of this section, or § 1.164–4) paid or accrued within the taxable year. The fact that any such tax is not deductible as a tax under section 164 does not prevent (1) its deduction under section 162 or section 212, provided it represents an ordinary and necessary expense paid or incurred during the taxable year by a corporation or an individual in the conduct of any trade or business or, in the case of an individual for the production or collection of income, for the management, conservation, or maintenance of property held for the production of income, or in connection with the determination, collection, or refund of any tax, or (2) its being taken into account during the taxable year by a corporation or an individual as a part of the cost of acquiring or producing property in the trade or business or, in the case of an individual, as a part of the cost of property held for the production of income with respect to which it relates.

(g) *Taxes for local benefits.* Except as provided in § 1.164–4, taxes assessed against local benefits of a kind tending to increase the value of the property assessed.

PAR. 4. Section 1.164–3 is amended to read as follows:

**§ 1.164–3 Definitions and special rules.**

For purposes of section 164 and § 1.164–1 to § 1.164–8, inclusive—

(a) *State or local taxes.* A State or local tax includes only a tax imposed by a State, a possession of the United States, or a political subdivision of any of the foregoing, or by the District of Columbia.

(b) *Real property taxes.* The term "real property taxes" means taxes imposed on interests in real property and levied for the general public welfare, but it does not include taxes assessed against local benefits. See § 1.164–4.

(c) *Personal property taxes.* The term "personal property tax" means an ad valorem tax which is imposed on an annual basis in respect of personal property. To qualify as a personal property tax, a tax must meet the following three tests:

(1) The tax must be ad valorem—that is, substantially in proportion to the value of the personal property. A tax which is based on criteria other than value does not qualify as ad valorem. For example, a motor vehicle tax based on weight, model year, and horsepower, or any of these characteristics is not an ad valorem tax. However, a tax which is partly based on value and partly based on other criteria may qualify in part. For example, in the case of a motor vehicle tax of 1 percent of value plus 40 cents per hundredweight, the part of the tax equal to 1 percent of value qualifies as an ad valorem tax and the balance does not qualify.

(2) The tax must be imposed on an annual basis, even if collected more frequently or less frequently.

(3) The tax must be imposed in respect of personal property. A tax may be considered to be imposed in respect of personal property even if in form it is imposed on the exercise of a privilege. Thus, for taxable years beginning after December 31, 1963, State and local taxes on the registration or licensing of highway motor vehicles are not deductible as personal property taxes unless and to the extent that the tests prescribed in this subparagraph are met. For example, an annual ad valorem tax qualifies as a personal property tax although it is denominated a registration fee imposed for the privilege of registering motor vehicles or of using them on the highways.

(d) *Foreign taxes.* The term "foreign tax" includes only a tax imposed by the authority of a foreign country. A tax imposed by a political subdivision of a foreign country is considered to be imposed by the authority of that foreign country.

(e) *Sales tax.* (1) The term "sales tax" means a tax imposed upon persons engaged in selling tangible personal property, or upon the consumers of such property, including persons selling gasoline or other motor vehicle fuels at wholesale or retail, which is a stated sum per unit of property sold or which is measured by the gross sales price or the gross receipts from the sale. The term also includes a tax imposed upon persons engaged in furnishing services which is measured by the gross receipts for furnishing such services.

(2) In general, the term "consumer" means the ultimate user or purchaser; it does not include a purchaser such as a retailer, who acquires the property for resale.

(f) *General sales tax.* A "general sales tax" is a sales tax which is imposed at one rate in respect of the sale at retail of a broad range of classes of items. No foreign sales tax is deductible under section 164(a) and paragraph (a)(4) of § 1.164–1. To qualify as a general sales tax, a tax must meet the following two tests:

(1) The tax must be a tax in respect of sales at retail. This may include a tax imposed on persons engaged in selling property at retail or furnishing services at retail, for example, if the tax is measured by gross sales price or by gross receipts from sales or services. Rentals qualify as sales at retail if so treated under applicable State sales tax laws.

(2) The tax must be general—that is, it must be imposed at one rate in respect of the retail sales of a broad range of classes of items. A sales tax is considered to be general although imposed on sales of various classes of items at more than one rate provided that one rate applies to the retail sales of a broad range of classes of items. The term "items" includes both commodities and services.

(g) *Special rules relating to general sales taxes.* (1) A sales tax which is general is usually imposed at one rate in respect of the retail sales of all tangible personal property (with exceptions and additions). However, a sales tax which is selective—that is, a tax which applies at one rate with respect to retail sales of specified classes of items also qualifies as general if the specified classes represent a broad range of classes of items. A selective sales tax which does not apply at one rate to the retail sales of a broad range of classes of items is not general. For example, a tax which applies only to sales of alcoholic beverages, tobacco, admissions, luxury items, and a few other items is not general. Similarly, a tax imposed solely on services is not general. However, a selective sales tax may be deemed to be part of the general sales tax and hence may be deductible, even if imposed by a separate Title, etc., of the State or local law, if imposed at the same rate as the general rate of tax (as defined in subparagraph (4) of this paragraph) which qualifies a tax in the taxing jurisdiction as a general sales tax. For example, if a State has a 5 percent general sales tax and a separate selective sales tax of 5 percent on transient accommodations, the tax on transient accommodations is deductible.

(2) A tax is imposed at one rate only if it is imposed at that rate on generally the same base for all items subject to tax. For example, a sales tax imposed at a 3 percent rate on 100 percent of the sales price of some classes of items and at a 3 percent rate on 50 percent of the sales price of other classes of items would not be imposed at one rate with respect to all such classes. However, a tax is considered to be imposed at one rate although it allows dollar exemptions, if the exemptions are designed to exclude all sales under a certain dollar amount. For example, a tax may be imposed at one rate although it applies to all sales of tangible personal property but applies only to sales amounting to more than 10 cents.

(3) The fact that a sales tax exempts food, clothing, medical supplies, and motor vehicles, or any of them, shall not be taken into account in determining whether the tax applies to a broad range of classes of items. The fact that a sales tax applies to food, clothing, medical supplies, and motor vehicles, or any of them, at a rate which is lower than the general rate of tax (as defined in subparagraph (4) of this paragraph) is not taken into account in determining whether the tax is imposed at one rate on the retail sales of a broad range of classes of items. For purposes of this section, the term "food" means food for human consumption off the premises where sold, and the term "medical supplies" includes drugs, medicines, and medical devices.

(4) Except in the case of a lower rate of tax applicable in respect of food, clothing, medical supplies, and motor vehicles, or any of them, no deduction is allowed for a general sales tax in respect of any item if the tax is imposed on such item at a rate other than the general rate of tax. The general rate of tax is the one rate which qualifies a tax in a taxing jurisdiction as a general sales tax because the tax is imposed at such one rate on a broad range of classes of items. There can be only one general rate of tax in any one taxing jurisdiction. However, a general sales tax imposed at a lower rate or rates on food, clothing, motor vehicles, and medical supplies, or any of them, may nonetheless be deductible with respect to such items. For example, a sales tax which is imposed at 1 percent with respect to food, imposed at 3 percent with respect to a broad range of classes of tangible personal property, and imposed at 4 percent with respect to transient accommodations would qualify as a general sales tax. Taxes paid at the 1 percent and the 3 percent rates are deductible, but tax paid at the 4 percent rate is not deductible. The fact that a sales tax provides for the adjustment of the general rate of tax to reflect the sales tax rate in another taxing jurisdiction shall not be taken into account in determining whether the tax is imposed at one rate on the retail sales of a broad range of classes of items. Moreover, a general sales tax imposed at a lower rate with respect to an item in order to reflect the tax rate in another jurisdiction is also deductible at such lower rate. For example, State E imposes a general sales tax whose general rate is 3 percent. The State E sales tax law provides that in areas bordering on States with general sales taxes, selective sales taxes, or special excise taxes, the rate applied in the adjoining State will be used if such rate is under 3 percent. State F imposes a 2 percent sales tax. The 2 percent sales tax paid by residents of State E in areas bordering on State F is deductible.

(h) *Compensating use taxes.* A compensating use tax in respect of any item is treated as a general sales tax. The term "compensating use tax" means, in respect of any item, a tax which is imposed on the use, storage, or consumption of such item and which is complementary to a general sales tax which is deductible with respect to sales of similar items.

(i) *Special rules relating to compensating use taxes.* (1) In general, a use tax on an item is complementary to a general sales tax on similar items if the use tax is imposed on an item which was not subject to such general sales tax but which would have been subject to such general sales tax if the sale of the item had taken place within the jurisdiction imposing the use tax. For example, a tax imposed by State A on the use of a motor vehicle purchased in State B is complementary to the general sales tax of State A on similar items, if the latter tax applies to motor vehicles sold in State A.

(2) Since a compensating use tax is treated as a general sales tax, it is subject to the rule of subparagraph (C) of section 164(b)(2) and paragraph (g)(4) of this section that no deduction is allowed for a general sales tax imposed in respect of an item at a rate other than the general rate of tax (except in the case of lower rates on the sale of food, clothing, medical supplies, and motor vehicles). The fact that a compensating use tax in respect of any item provides for an adjustment in the rate of the compensating use tax or the amount of such tax to be paid on account of a sales tax on such item imposed by another taxing jurisdiction is not taken into account in determining whether the compensating use tax is imposed in respect of the item at a rate other than the general rate of tax. For example, a compensating use tax imposed by State C on the use of an item purchased in State D is considered to be imposed at the general rate of tax even though the tax imposed by State C allows a credit for any sales tax paid on such item in State D, or the rate of such compensating use tax is adjusted to reflect the rate of sales tax imposed by State D.

PAR. 5. Section 1.164–4 is amended to read as follows:

**§ 1.164–4 Taxes for local benefits.**

(a) So-called taxes for local benefits referred to in paragraph (g) of § 1.164–2 more properly assessments, paid for local benefits such as street, sidewalks, and other like improvements, imposed because of and measured by some benefit inuring directly to the property against which the assessment is levied are not deductible as taxes. A tax is considered assessed against local benefits when the property subject to the tax is limited to property benefited. Special assessments are not deductible, even though an incidental benefit may inure to the public welfare. The real property taxes deductible are those levied for the general public welfare by the proper taxing authorities at a like rate against all property in the territory over which such authorities have jurisdiction. Assessments under the statutes of California relating to irrigation, and of Iowa relating to drainage, and under certain statutes of Tennessee relating to levees, are limited to property benefited, and if the assessments are so limited, the amounts paid thereunder are not deductible as taxes. For treatment of assessments for local benefits as adjustments to the basis of property, see section 1016(a)(1) and the regulations thereunder.

(b)(1) Insofar as assessments against local benefits are made for the purpose of maintenance or repair or for the purpose of meeting interest charges with respect to such benefits, they are deductible. In such cases, the burden is on the taxpayer to show the allocation of the amounts assessed to the different purposes. If the allocation cannot be made, none of the amount so paid is deductible.

(2) Taxes levied by a special taxing district which was in existence on December 31, 1963, for the purpose of retiring indebtedness existing on such date, are deductible, to the extent levied for such purpose, if (i) the district covers the whole of at least one county, (ii) if at least 1,000 persons are subject to the taxes levied by the district, and (iii) if the district levies its assessments annually at a uniform rate on the same assessed value of real property, including improvements, as is used for purposes of the real property tax generally.

PAR. 6. Section 1.164–5 is amended to read as follows:

**§ 1.164–5 Certain retail sales taxes and gasoline taxes.**

For taxable years beginning before January 1, 1964, any amount representing a State or local sales tax paid by a consumer of services or tangible personal property is deductible by such consumer as a tax, provided it is separately stated and not paid in connection with his trade or business. For taxable years beginning after December 31, 1963, only the amount of any separately stated State and local general sales tax (as defined in paragraph (g) of § 1.164–3) and tax on the sale of gasoline, diesel fuel or other motor fuel paid by the consumer (other than in connection with his trade or business) is deductible by the consumer as tax. The fact that, under the law imposing it, the incidence of such State or local tax does not fall on the consumer is immaterial. The requirement that the amount of tax must be separately stated will be deemed complied with where it clearly appears that at the time of sale to the consumer, the tax was added to the sales price and collected or charged as a separate item. It is not necessary, for the purpose of this section, that the consumer be furnished with a sales slip, bill, invoice, or other statement on which the tax is separately stated. For example, where the law imposing the State or local tax for which the taxpayer seeks a deduction contains a prohibition against the seller absorbing the tax, or a provision requiring a posted notice stating that the tax will be added to the quoted price, or a requirement that the tax be separately shown in advertisements or separately stated on all bills and invoices, it is presumed that the amount of the State or local tax was separately stated at the time paid by the consumer; except that such presumption shall have no application to a tax on the sale of gasoline, diesel fuel or other motor fuel imposed upon a wholesaler unless such provisions of law apply with respect to both the sale at wholesale and the sale at retail.

PAR. 7. Paragraphs (a) and (c) of § 1.164–8 are amended to read as follows:

**§ 1.164–8 Payments for municipal services in atomic energy communities.**

(a) *General.* For taxable years beginning after December 31, 1957,

amounts paid or accrued by any owner of real property within any community (as defined in section 21b of the Atomic Energy Community Act of 1955 (42 U.S.C. 2304)) to compensate the Atomic Energy Commission for municipal-type services (or any agent or contractor authorized by the Atomic Energy Commission to charge for such services) shall be treated as State real property taxes paid or accrued for purposes of section 164. Such amounts shall be deductible as taxes to the extent provided in section 164, §§ 1.164–1 through 1.164–7, and this section. See paragraph (b) of this section for definition of the term "Atomic Energy Commission"; paragraph (c) of this section for the definition of the term "municipal-type services"; and paragraph (d) of this section for the definition of the term "owner".

• • • • •

(c) *Municipal-type services.* For purposes of paragraph (a) of this section, the term "municipal-type services" includes services usually rendered by a municipality and usually paid for by taxes. Examples of municipal-type services are police protection, fire protection, public recreational facilities, public libraries, public schools, public health, public welfare, and the maintenance of roads and streets. The term shall include sewage and refuse disposal which are maintained out of revenues derived from a general charge for municipal-type services; however, the term shall not include sewage and refuse disposal if a separate charge for such services is made. Charges assessed against local benefits of a kind tending to increase the value of the property assessed are not charges for municipal-type services. See section 164(c)(1) and § 1.164–4.

PAR. 8. There are inserted immediately after § 1.274–8 the following new sections:

**§ 1.275 Statutory provisions; certain taxes.**

Sec. 275. *Certain taxes*—(a) *General rule.* No deduction shall be allowed for the following taxes:

(1) Federal income taxes, including—

(A) The tax imposed by section 3101 (relating to the tax on employees under the Federal Insurance Contributions Act);

(B) The taxes imposed by sections 3201 and 3211 (relating to the taxes on railroad employees and railroad employee representatives); and

(C) The tax withheld at source on wages under section 3402, and corresponding provisions of prior revenue laws.

(2) Federal war profits and excess profits taxes.

(3) Estate, inheritance, legacy, succession, and gift taxes.

(4) Income, war profits, and excess profits taxes imposed by the authority of any foreign country or possession of the United States, if the taxpayer chooses to take to any extent the benefits of section 901 (relating to the foreign tax credit).

(5) Taxes on real property to the extent that section 164(d) requires such taxes to be treated as imposed on another taxpayer.

(b) *Cross reference.* For disallowance of certain other taxes, see section 164(c).

[Sec. 275 as added by sec. 207(b)(3)(A), Rev. Act 1964 (78 Stat. 42)]

**§ 1.275–1 Deduction denied in case of certain taxes.**

For description of the taxes for which a deduction is denied under section 275, see paragraphs (a), (b), (c), (d), and (e) of § 1.164–2.

PAR. 9. Section 1.535 is amended by revising section 535(b)(1) and the historical note to read as follows:

**§ 1.535 Statutory provisions; accumulated taxable income.**

Sec. 535. *Accumulated taxable income.* • • •

(b) *Adjustments to taxable income.* • • •

(1) *Taxes.* There shall be allowed as a deduction Federal income and excess profits taxes (other than the excess profits tax imposed by subchapter E of chapter 2 of the Internal Revenue Code of 1939 for taxable years beginning after December 31, 1940) and income, war profits, and excess profits taxes of foreign countries and possessions of the United States (to the extent not allowable as a deduction under section 275(a)(4)), accrued during the taxable year or deemed to be paid by a domestic corporation under section 902(a)(1) or 960(a)(1)(C) for the taxable year, but not including the accumulated earnings tax imposed by section 531, the personal holding company tax imposed by section 541, or the taxes imposed by corresponding sections of a prior income tax law.

• • • • •

[Sec. 535 as amended by sec. 31, Technical Amendments Act 1958 (72 Stat. 1631); sec. 205 Small Business Tax Revision Act 1958 (72 Stat. 1680); sec. 9(d)(2), Rev. Act 1962 (76 Stat. 1001); sec. 207, Rev. Act 1964 (78 Stat. 40)]

PAR. 10. Section 1.901 is amended by revising section 901(d)(1) and the historical note to read as follows:

**§ 1.901 Statutory provisions; taxes of foreign countries and of possessions of United States.**

Sec. 901. *Taxes of foreign countries and of possessions of United States.* • • •

(d) *Cross reference.* (1) For deductions of income, war profits, and excess profits taxes paid to a foreign country or a possession of the United States see sections 164 and 275.

• • • • •

[Sec. 901 as amended by sec. 3 (a) and (b), Act of Sept. 14, 1960 (Pub. Law 86–780, 74 Stat. 1013); secs. 9(d)(3) and 12(b)(1), Rev. Act 1962 (76 Stat. 1001, 1031); sec. 207, Rev. Act 1964 (78 Stat. 42)]

PAR. 11. Section 1.901–1 is amended by revising paragraphs (c) and (h) to read as follows:

**§ 1.901–1 Allowance of credit for taxes.**

• • • • •

(c) *Deduction denied if credit claimed.* If a taxpayer chooses with respect to any taxable year to claim a credit for taxes to any extent, such choice will be considered to apply to income, war profits, and excess profits taxes paid or accrued in such taxable year to all foreign countries and possessions of the United States, and no portion of any such taxes shall be allowed as a deduction from gross income in such taxable year or any succeeding taxable year. See section 275(a)(4).

• • • • •

(h) *Taxpayers denied credit in a particular taxable year.* • • •

(2) A taxpayer who elects to deduct taxes paid or accrued to any foreign country or possession of the United States (see sections 164 and 275);

• • • • •

PAR. 12. Section 1.903 is amended by revising section 903 and adding a historical note. These amended and revised provisions read as follows:

**§ 1.903 Statutory provisions; credit for taxes in lieu of income, etc., taxes.**

Sec. 903. *Credit for taxes in lieu of income etc., taxes.* For purposes of this subpart and of sections 164(a) and 275(a), the term "income, war profits, and excess profits taxes" shall include a tax paid in lieu of a tax on income, war profits, or excess profits otherwise generally imposed by any foreign country or by any possession of the United States.

[Sec. 903 as amended by sec. 207(b)(8), Rev. Act 1964 (78 Stat. 42)]

PAR. 13. Section 1.903–1 is amended by revising paragraph (a) to read as follows:

**§ 1.903–1 Definition of taxes in lieu of income, war profits, or excess profits taxes.**

(a) *In general.* For the purposes of subpart A (section 901 and following), part III, subchapter N, chapter 1 of the Code, and sections 164(a) and 275(a), the term "income, war profits, and excess profits taxes" includes a tax imposed by statute or decree by a foreign country or by a possession of the United States if—

(1) Such country or possession has in force a general income tax law,

(2) The taxpayer claiming the credit would, in the absence of a specific provision applicable to such taxpayer, be subject to such general income tax, and

(3) Such general income tax is not imposed upon the taxpayer thus subject to such substituted tax.

• • • • •

PAR. 14. Section 31.3502–1 is amended to read as follows:

**§ 31.3502–1 Nondeductibility of taxes in computing taxable income.**

For provisions relating to the nondeductibility, in computing taxable income under subtitle A, of the taxes imposed by sections 3101, 3201, and 3211, and of the tax deducted and withheld under chapter 24, see §§ 1.164–2 and 1.275–1 of this chapter (Income Tax Regulations). For provisions relating to the credit allowable to the recipient of the income in respect of the tax deducted and withheld under chapter 24, see § 1.31–1 of this chapter (Income Tax Regulations).

# Title 7—AGRICULTURE

**Chapter VII—Agricultural Stabilization and Conservation Service (Agricultural Adjustment), Department of Agriculture**

**SUBCHAPTER A—AGRICULTURAL CONSERVATION PROGRAMS**

[ACP–1964, Supp. 3]

## PART 701—NATIONAL AGRICULTURAL CONSERVATION

### Subpart 1964

MISCELLANEOUS AMENDMENTS

1. Section 701.14 is revised, effective beginning with the 1964 program, to read as follows:

**§ 701.14 Opportunity for requesting cost-sharing.**

Each farmer or rancher, regardless of his race, creed, color, or national origin, shall be given an opportunity to request that the Federal Government share in the cost of those practices on which he considers he needs such assistance in order to permit their performance on his farm or ranch. The county committee, taking into consideration the farmer's or rancher's request and any conservation plan developed by the farmer or rancher with the assistance of any State or Federal agency, and without regard to the race, creed, color, or national origin of the farmer or rancher, shall direct the available funds for cost-sharing to those farms and ranches and to those practices where cost-sharing is considered most essential to the accomplishment of the basic conservation objective of the Department—the use of each acre of agricultural land within its capabilities and the treatment of each acre in accordance with its needs for protection and improvement.

2. Section 701.25 is revised, effective beginning with the 1964 program, by adding paragraph (d) as follows:

**§ 701.25 Conservation materials and services.**

• • • • •

(d) *Eligibility to furnish conservation materials and services.* To be eligible to furnish conservation materials or services on the basis of purchase orders issued by the county committee, a vendor must agree that he will fill purchase orders without regard to the race, creed, color, or national origin of the farmer or rancher to whom the purchase order is issued.

(Sec. 4, 49 Stat. 164, Secs. 7 to 17, 49 Stat. 1148, as amended, P.L. 88–55; 16 U.S.C. 590g–590q)

Signed at Washington, D.C., on December 16, 1964.

**Chapter VIII—Agricultural Stabilization and Conservation Service (Sugar), Department of Agriculture**

**SUBCHAPTER B—SUGAR REQUIREMENTS AND QUOTAS**

## PART 811—CONTINENTAL SUGAR REQUIREMENTS AND AREA QUOTA

### Requirements and Quotas for 1965

*Basis and purpose and bases and considerations.* The purpose of Sugar Regulations 811 is to determine pursuant to Section 201 of the Sugar Act of 1948, as amended (hereinafter called the "Act"), the amount of sugar needed to meet the requirements of consumers in the continental United States for the calendar year 1965, and to establish sugar quotas for the supplying areas in terms of short tons of sugar, raw value, equal to the amount determined by the Secretary of Agriculture to be needed in 1965. Further, this regulation establishes quantities of certain quotas that may be filled by direct-consumption sugar and establishes a liquid sugar quota.

In accordance with the rule making requirements of the Administrative Procedure Act (60 Stat. 237) there was published in the FEDERAL REGISTER (29 F.R. 14669) a notice of proposed rule making for the issuance of a regulation determining sugar requirements for the continental United States and establishing quotas for the calendar year 1965. Written data, views, or arguments for consideration in connection with the proposed regulation were to be submitted by interested persons prior to November 12, 1964. All data, views, and comments received relative to the proposed regulation were thoroughly considered. This determination differs from the proposed determination in several respects. Pursuant to section 202(a)(2)(B) of the Sugar Act the quota for Hawaii has been increased by 5,479 tons because Hawaii's 1964 production resulted in sugar being available for marketing in excess of its 1954 quota. This change has resulted in small downward adjustments in 1965 quota prorations for foreign countries other than the Republic of the Philippines. Also in view of price circumstances, provision has been made to limit the importation of raw sugar from foreign countries during the first and second quarters of the year.

Section 201 of the Act directs the Secretary to determine for each calendar year the amount of sugar needed to meet the requirements of consumers in the continental United States and to revise such determination during the calendar year whenever he deems it necessary. The section sets forth criteria to guide the Secretary in his determination and states that such determination shall be made so as to protect the welfare of consumers and of those engaged in the domestic sugar industry by providing such supply of sugar as will be consumed at prices which will not be excessive to consumers and which will fairly and equitably maintain and protect the welfare of the domestic sugar industry.

During the 12-month period ended October 31, 1964, distribution of sugar for consumption in the continental United States totaled 9,670,000 short tons, raw value. Based on this distribution, the quantity of sugar needed in the calendar year 1965 would be expected to be about 9,800,000 short tons, raw value, if allowance is made for increased consumption due to the normal increase in population and for refining losses.

Refiners' inventories of quota sugar at the end of 1964 are expected to be well below the level of a year earlier but above the average of recent years.

The domestic price of raw sugar which was higher than usual during most of 1963 and the first four months of 1964 returned to a more normal level in May of 1964. Much of the time since July, such prices have been nearly .5 cent per pound below the level of the price reference point in Section 201 of the Act. Though, prices increased in late November and early December, they are still below the price reference level.

High sugar prices during the 1963–64 period had an adverse impact on the consumption of beet and cane sugar. The reduced use of such sugar in some products and the greater use of nonsucrose sweeteners lowered the per capita consumption of sugar. It is unlikely that the trend toward a slightly lower per capita use of sugar will be reversed in 1965.

To encourage the maintenance of sugar prices in line with the objectives of the Act at a level which will protect the domestic sugar industry, quotas established by this regulation total 9.2 million tons or slightly more than 600,000 tons below anticipated consumption.

In view of the wide differential between the price of domestic raw sugar and the world price of raw sugar it is possible that unduly large importations of foreign sugar during the early part of 1965 could prevent meeting the price objectives of the Act. Accordingly, provision has been made for quantitative limitations on the importation of raw sugar from foreign countries by quarters for the first half of the year.

Section 202 of the Act provides that whenever a determination is made, pursuant to Section 201, of the amount of sugar needed to meet the requirements of consumers, the Secretary shall establish quotas. The methods for establishing quotas for the domestic areas and the Republic of the Philippines are set forth in paragraphs (a) and (b) of Section 202, but paragraph (c) which provides the method for prorating the quota for foreign countries other than the Republic of the Philippines will have expired at the end of 1964. However, Section 403(a) of the Act authorizes the Secretary to make such orders or regulations, which shall have the force and effect of law, as may be necessary to

carry out the power vested in him by the Act. In order to carry out the objectives of the Act as intended by the Congress and the requirement of Section 202 of the Act, it is necessary to use the authority provided by Section 403 of the Act to establish quota prorations for foreign countries, other than for the Republic of the Philippines.

This quota is prorated to those countries which have supplied sugar to the United States and with which the United States maintains diplomatic relations. The quota prorations for such foreign countries are herein made on the basis of actual deliveries of quota sugar into the continental United States during the calendar years 1963 and 1964. In determining the quotas for 1965, the 1963 deliveries are given a weighting of one-third and 1964 deliveries are given a weighting of two-thirds. The quantity of sugar prorated on this basis will be equal to the difference between total sugar requirements and the sum of the quotas for the domestic areas and the Republic of the Philippines.

The years 1963 and 1964 constitute a recent period and, in addition, a time when sugar was scarce throughout the world. Performance of countries in importing sugar into the United States in these years is clearly indicative of their relative ability to service the United States market on a continuing basis. At the time commitments were made to export sugar to the United States for 1964 delivery, the unfavorable price differential of the United States market was much greater than it had been at the time 1963 supplies were committed. Accordingly, 1964 performance is given double weighting.

The quotas prorated herein are based on final data for 1963 and on preliminary data for 1964 and accordingly represent only 90 percent of the total for foreign countries other than the Republic of the Philippines. After final outturn weights become available covering actual imports of sugar into the continental United States during 1964, prorations of the quota will be redetermined.

No import fee is provided for, solely in view of legal limitations. The Administration intends to recommend to the Congress reinstitution of a system of import fees for later years in connection with long-term legislation. The Administration has no intention of recommending that such fees apply to any of the sugar to be imported during the year 1965.

Effective date. The Act provides that the Secretary of Agriculture shall, during December 1964, determine sugar requirements and establish sugar quotas for the continental United States for the calendar year 1965. The regulations determining 1965 sugar requirements and quotas apply not only to sugar imported or marketed beginning January 1, 1965, but also to any sugar imported prior thereto for refining, storage and subsequent release within 1965 quotas as may be provided for by regulation. Accordingly, it is hereby found to be impracticable and not in the public interest to comply with the 30-day effective date requirements of the Administrative Procedure Act. The aspects of § 811.33 relating to the submission and approval or acceptance of applications shall be effective when published in the FEDERAL REGISTER and all other provisions of this regulation shall become effective January 1, 1965.

Sec.
811.30 Sugar requirements, 1965.
811.31 Quotas for domestic areas.
811.32 [Reserved]
811.33 Quotas for foreign countries.
811.34 [Reserved]
811.35 Applicability of quotas.
811.36 Restrictions on importations and marketings within quotas.

AUTHORITY: The provisions of this Part 811 issued under sec. 403, 61 Stat. 932, 7 U.S.C. 1153. Interprets or applies secs. 201, 202, 207, 208, 209, 210; 61 Stat. 923, as amended, 924, as amended, 925, as amended, 927, as amended, and 928, as amended, sec. 213 as added by Pub. Law 87-535 approved July 13, 1962; 7 U.S.C. 1111, 1112, 1117, 1118, and 1119.

### § 811.30 Sugar requirements, 1965.

The amount of sugar needed to meet the requirements of consumers in the continental United States for the calendar year 1965 is hereby determined to be 9,200,000 short tons, raw value.

### § 811.31 Quotas for domestic areas.

(a) For the calendar year 1965 domestic area quotas limiting the quantities of sugar which may be brought into or marketed for consumption in the continental United States are established, pursuant to section 202(a) of the Act, in Column (1) and the amounts of such quotas for offshore areas that may be filled by direct-consumption sugar are established, pursuant to section 207 of the Act, in Column (2) as follows:

| Area | Quotas | Direct-consumption limits |
|---|---|---|
| | Short tons, raw value | |
| | (1) | (2) |
| Domestic beet sugar | 2,650,000 | No limit. |
| Mainland cane sugar | 895,000 | No limit. |
| Hawaii | 1,115,479 | 31,464. |
| Puerto Rico | 1,140,000 | 138,000. |
| Virgin Islands | 15,232 | 0. |

(b) Of the quantity established in paragraph (a) of this section for Puerto Rico which may be filled by direct-consumption sugar, 126,033 short tons, raw value, may be filled only by sugar principally of crystalline structure.

### § 811.32 [Reserved]

### § 811.33 Quotas for foreign countries.

(a) The quotas or prorations for foreign countries limiting the quantities of sugar which may be imported into the continental United States during the calendar year 1965 for consumption therein and the amounts of such quotas and prorations that may be filled by direct-consumption sugar are hereby established as set forth in the following paragraphs (b), (c), (d), and (e) of this section.

(b) For the calendar year 1965 the quota for the Republic of the Philippines is 1,050,000 short tons, raw value. The quantity of such quota that may be filled by direct-consumption sugar is 59,920 short tons, raw value; and the quantity that may be filled by raw sugar is subject to the limitation as set forth in paragraph (c)(2) of this section.

(c)(1) For the calendar year 1965, the quantity available for proration to individual foreign countries other than the Republic of the Philippines is 2,334,289 short tons, raw value. Of that quantity, 90 percent is hereby prorated subject to limitations as set forth in subparagraph (2) of this paragraph to individual countries as follows:

| Country: | Short tons, raw value |
|---|---|
| Argentina | 59,244 |
| Australia | 171,913 |
| Belgium | 1,744 |
| Brazil | 204,057 |
| British Honduras | 3,845 |
| British West Indies | 112,690 |
| China | 63,026 |
| Colombia | 27,038 |
| Costa Rica | 32,143 |
| Dominican Republic | 357,566 |
| Ecuador | 45,652 |
| El Salvador | 15,820 |
| Fiji Islands | 41,954 |
| France | 5,315 |
| French West Indies | 39,706 |
| Guatemala | 36,828 |
| Haiti | 20,168 |
| India | 89,224 |
| Ireland | 7,983 |
| Madagascar | 6,723 |
| Mauritius | 13,866 |
| Mexico | 358,617 |
| Nicaragua | 37,395 |
| Panama | 13,298 |
| Peru | 222,691 |
| Reunion | 2,038 |
| South Africa | 98,047 |
| Southern Rhodesia | 8,403 |
| Turkey | 1,408 |
| Venezuela | 2,458 |
| Total | 2,100,860 |

(2) Of the total quotas and prorations for foreign countries established in paragraphs (b) and (c) of this section, only 1,700,000 short tons, raw value of raw sugar may be authorized for importation from all foreign countries in accordance with Part 817 of this chapter during the first six months of 1965, and of such 1,700,000 short tons, raw value, only 500,000 short tons, raw value may be authorized for importation during the first quarter of the year and 1,200,000 short tons, raw value, may be authorized during the second quarter of the year. The importation of sugar within the above specified quarterly limitations will be authorized on the basis of applications submitted in accordance with Sugar Regulations 817: *Provided, however,* That applications accompanied by evidence satisfactory to the Secretary that a charter or other similar firm commitment of a vessel to ship the sugar was irrevocably made prior to 4:00 p.m. (e.s.t.) November 30, 1964, shall have first priority: *And provided further,* That in determining priorities provided for in Sugar Regulation 817, applications, covering sugar for importation during the first quarter of 1965, received on or before five days after the effective date of this regulation shall be considered as having been received at the same time, and applications covering sugar for importation during the second quarter of 1965, received on or before January 15, 1965 shall be considered as having been received at the same time.

(d) For the calendar year 1965, the quantity of each proration established in paragraph (c) of this section that may be filled by direct-consumption sugar pursuant to section 207(e) of the Act is as follows:

| Country: | Short tons, raw value |
|---|---|
| Ireland | 7,983 |
| Panama | 3,817 |
| Belgium | 182 |

(e) For the calendar year 1965 the quota for liquid sugar for foreign countries as a group is 2,000,000 gallons of sirup of cane juice of the type of Barbados molasses, limited to liquid sugar containing soluble nonsugar solids (excluding any foreign substance that may have been added or developed in the product) of more than 5 percent of the total soluble solids, which is not to be used as a component of any direct-consumption sugar but is to be used as molasses without substantial modification of its characteristics after importation.

### § 811.34 [Reserved]

### § 811.35 Applicability of quotas.

(a) All sugar and liquid sugar marketed or imported into the continental United States is subject to the provisions of Part 816 of this chapter or Part 817 of this chapter which prescribe the time, manner and conditions under which quotas, prorations, or quantities made available to countries as a group are filled by the marketing and importation of sugar or liquid sugar.

(b) The quantitative limitations established by §§ 811.31 and 811.33, inclusive, do not apply to sugar or liquid sugar marketed or imported pursuant to sections 211 and 212 of the Act in accordance with the provisions of Part 816 of this chapter or Part 817 of this chapter.

### § 811.36 Restrictions on importations and marketings within quotas.

Subject to the provisions of Part 816 and Part 817 of this chapter all persons are prohibited from bringing or importing into or marketing in the continental United States any sugar or liquid sugar in excess of or after the applicable quota or quantity set forth in §§ 811.31 to 811.33, inclusive, has been filled, or any sugar or liquid sugar as direct-consumption sugar after the direct-consumption portion of the applicable quota has been filled.

Issued at Washington, D.C., this 18th day of December 1964.

CHARLES S. MURPHY,
*Acting Secretary.*

[F.R. Doc. 64-13189; Filed, Dec. 18, 1964; 4:43 p.m.]

## Agricultural Stabilization and Conservation Service

## PART 817—REQUIREMENTS RELATING TO BRINGING OR IMPORTING SUGAR OR LIQUID SUGAR INTO CONTINENTAL UNITED STATES

### Miscellaneous Amendments

*Basis and purpose and bases and considerations.* This amendment is issued pursuant to the authority vested in the Secretary of Agriculture by the Sugar Act of 1948, as amended (61 Stat. 922, as amended).—The purpose of this amendment is to implement the importation of sugar within the time limitations specified in Part 811 of this chapter, and to provide for set-aside applications and agreements limited to such specific periods. Because of the time and quantitative limitations established in Part 811 of this chapter, new methods of establishing eligibility for approval of set-aside applications are necessary.

*Effective date.* To afford all interested persons the opportunity of making commitments to supply this market with sugar and to make arrangements for the orderly shipping of such sugar to serve the needs of this market during the first six months of 1965, it is important that these amendments be made effective at the earliest possible time. Therefore, it is hereby determined and found that compliance with the notice, procedure and effective date requirements of the Administrative Procedure Act is unnecessary, impractical and contrary to the public interest and the amendments herein shall become effective when published in the FEDERAL REGISTER.

Pursuant to the provisions of section 403 of the Act (61 Stat. 932), paragraph (e) of § 817.4 is amended by adding a new subparagraph (4) and paragraph (b) of § 817.6 is amended to read as follows:

### § 817.4 Application by importer.

* * * * * * *

(e) * * *

(4)(i) With respect to importations during the calendar year 1965 application for set-aside of quota or quota proration for the importation of a specified quantity of raw sugar may be made to the Sugar Quota Group and approved, as provided in this subparagraph (4). Such application for set-aside shall be in the form of a Set-Aside Application and Agreement Form SU-8-A as hereafter set forth. The submission of a Set-Aside Application does not relieve the applicant of the necessity of submitting an application for authorization for release of sugar as required under paragraph (a) of this section. Any application for set-aside of quota or quota proration submitted pursuant to this subparagraph (4) covering a quantity of sugar to be imported within a quota or quota proration established in Part 811 of this chapter for a specified foreign country or a quantity of sugar to be imported within a quota deficit quantity established for allocation in Part 811 of this chapter may be approved by the Secretary, except as limited by any time periods specified in Part 811 of this chapter, not more than 75 days prior to the first day of the quarterly period which includes the month of importation stated in the Set-Aside Application and Agreement. During the period from the date of approval of a Set-Aside Application and Agreement through the 15th day after the last day of the month of importation stated therein, both dates inclusive, and subject to the terms and conditions of such Application and Agreement, the quota or quota proration designated in the application shall be set aside to the extent of the quantity of sugar approved for set-aside under such Application and Agreement.

(ii) Set-Aside Applications and Agreements submitted pursuant to this subparagraph (4) shall be submitted in triplicate on Form SU 8-A to provide the following information and certification:

SET-ASIDE APPLICATION AND AGREEMENT

I, _____ of
(Name of applicant)

_____
(Street address) (City) (State)

hereby certify that as owner, or as agent or broker for the owner, I have under my sole control _____ short tons (commercial weight) of sugar in _____, and
(Name of country)

and I hereby make application under the provisions of § 817.4(e)(4) of Sugar Regulation 817 for the set-aside of _____ short tons (commercial weight) of the quota or quota proration for such country established in § 811.____ of Sugar Regulation 811.

I agree that in consideration of the approval of this application I will import such quantity into the continental United States during the month of _____ in accordance with the provisions of this agreement and applicable provisions of Sugar Regulation 817 and 811, regardless of whether sugar quotas are suspended on or before such date of importation.

It is hereby agreed by and between the United States of America and the undersigned that the failure to import the quantity of sugar approved for set-aside of quota or quota proration pursuant to this application will substantially damage the program established under the Sugar Act of 1948, as amended, for providing supplies of sugar to be consumed at prices that will not be excessive to consumers in the United States; that the amount of such damages is very difficult to accurately estimate; that the undersigned will pay liquidated damages to the United States of 0.50 cent per pound for each pound of sugar approved for set-aside of quota or quota proration under this application which is not imported into the continental United States on or before the 15th day after the end of the month of importation stated in this application, except that no liquidated damages shall be paid (1) for a quantity of sugar not imported which is within an allowance for normal shipping losses and normal loading variations equal to the smaller of eleven per centum of the quantity imported (commercial weight) or five thousand tons, and (2) for sugar not imported with respect to which the applicant, within a period of time prescribed by the Administrator, Agricultural Stabilization and Conservation Service, United States Department of Agriculture, furnishes evidence satisfactory to the Administrator that importation within the period ending 15 days after the end of the month of importation stated in this application was prevented by disasters at sea, acts of God, strikes so extensive and of such duration or the occurrence of an insuperable and extraordinary interference which could not have been foreseen or prevented by the applicant's exercise of prudence, diligence, and care as to prevent such importation.

I further certify that I have arranged for and will deposit an irrevocable letter of credit within three business days after the approval date of this application and agreement expiring no earlier than 60 days after end of the month of importation stated in this agreement, issued by

_____
(Name and address of bank)

in an amount not less than an amount determined by multiplying the total number of tons stated in this application by 2,000

and multiplying the product thereof by 0.5 cent. It is further agreed that such letter of credit shall authorize the Agricultural Stabilization and Conservation Service, United States Department of Agriculture, to draw upon the letter of credit on the basis of a written statement signed by the Administrator, Agricultural Stabilization and Conservation Service, or his authorized representative, which sets forth that a specified amount is due as liquidated damages under the terms and conditions of this Application and Agreement. It is further agreed that if such letter of credit as described above is not received by the Agricultural Stabilization and Conservation Service or a wire notice from a United States bank of the issuance of such letter of credit has not been received by the Agricultural Stabilization and Conservation Service within three business days after the approval date of this Application and Agreement as furnished to the applicant by a telegraphic notice from the Sugar Quota Group, any approval of this Application and Agreement will be cancelled and this Application and Agreement shall be null and void.

In the event the full quantity applied for cannot be approved, I will accept a smaller quantity of not less than ------ short tons, commercial weight.

Signed ----------

Date ----------

Approved as Set-Aside No. ------, for ------ short tons (commercial weight), on ----------, by ----------.

(Date)

**§ 817.6 Specific authorization for release.**

* * * * *

(b) *Order of eligibility of applications for authorizations for release of sugar and for the set-aside of quantities for future release.* The order of eligibility for authorization or approval of applications provided for in this paragraph (b) is subject to such modifications as are specified in Part 811 of this chapter. An application on "Sugar Quota Clearance Record", Form SU-3, for authorization to a Collector for the release of sugar which is not being imported under an application for set-aside approved under § 817.4(e) shall become eligible for authorization at 12:01 a.m., on the fifth calendar day prior to the date stated on the application as the date of departure of the shipment of sugar from the area of origin, or at the time of receipt of the application, whichever time occurs later. An application for set-aside submitted pursuant to § 817.4(e) shall become eligible for approval at 12:01 a.m. on the first day that such application for set-aside may be approved as provided in § 817.4(e), or at the time of receipt of the application, whichever time occurs later. The Secretary shall authorize the release by the Collector of sugar not being imported under an application for set-aside and approve applications for set-aside in the same order as such applications for release or set-aside become eligible for authorization or approval. If an application for the release of sugar and an application for set-aside applicable to the same quota become eligible for authorization and approval at the same time, the application for release of sugar shall have priority. If two or more applications for the release of sugar applicable to the same quota become eligible for authorization at the same time, such applications shall be authorized in the order of the date of departure stated thereon, earliest first. If two or more such applications state the same dates of departure and the unfilled balance of the quota or quota proration is less than the total quantity of sugar covered by such applications, the quantity authorized for release under each such application shall be determined by multiplying the quantity covered by each application by the percentage which the unfilled balance of the quota or quota proration is of the total quantity covered by such applications. If two or more applications for set-aside become eligible at the same time and the unfilled balance of the quota or quota proration is less than the total quantity of sugar covered by such applications the quantity to be approved under each such application shall be determined by multiplying the quantity covered by each application by the percentage which the unfilled balance of the quota or quota proration is of the total quantity covered by such applications. The order of eligibility among applications for release and applications for Set-Aside provided for in this paragraph (b) with respect to a quota or quota proration shall also apply with respect to the quantitative limitations for specified periods imposed on the total importations from all foreign countries as a group under Part 811 of this chapter: *Provided, however,* That if two or more applications to import sugar within a quantitative limitation for a specified period, are of equal priority and become eligible at the same time; and the unfilled balance of such quantitative limitation is less than the total quantity of sugar covered by such applications, such applications shall be approved giving first priority to the application covering sugar from the country having the smallest percentage relationships between the quantity authorized for entry from such country for the year 1965 thru the applicable time limitation period and the average of the quantities imported from such country during the same periods of 1963 and 1964: *And provided further,* That in case of ties in such percentage relationships, the application for the smallest quantity shall have priority and in the case of a further tie the application covering sugar from the country having the smallest quota shall be given priority.

(Sec. 403, 61 Stat. 932, 7 U.S.C. 1153. Interprets or applies secs. 101, 202, 211, 212; 61 Stat. 922, as amended, 924, as amended, 928, as amended, 929, as amended, sec. 213 as added by Pub. Law 87-535, Pub. Law 87-539; 7 U.S.C. 1101, 1112, 1121, 1122)

Issued at Washington, D.C., this 18th day of December 1964.

CHARLES S. MURPHY,
*Acting Secretary.*

[F.R. Doc. 64-13190; Filed, Dec. 18, 1964; 4:43 p.m.]

## Chapter X—Agricultural Marketing Service (Marketing Agreements and Orders; Milk), Department of Agriculture

[Milk Order 61]

## PART 1061—MILK IN ST. JOSEPH, MO., MARKETING AREA

### Order Suspending Certain Provision

Pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and of the order regulating the handling of milk in the St. Joseph, Mo., marketing area (7 CFR Part 1061), it is hereby found and determined that:

(a) The following provision of the order no longer tends to effectuate the declared policy of the Act for the months of January and February 1965.

(1) All of § 1061.12(a)(2) following the introductory text except the words "January, February" and "35 percent".

This will result in § 1061.12(a)(2) reading as follows:

**§ 1061.12 Pool plant.**

* * * * *

(a) * * *

(2) As Class I milk not less than the applicable percentage of such plant's receipts of approved milk from dairy farmers and cooperative associations in their capacity as handlers pursuant to § 1061.8 (c): January, February, 35 percent.

* * * * *

(b) Notice of proposed rule making, public procedure thereon, and 30 days notice of the effective date hereof are impractical, unnecessary, and contrary to the public interest in that:

(1) This suspension order does not require of persons affected substantial or extensive preparation prior to the effective date.

(2) This suspension order is necessary to reflect current marketing conditions and to maintain orderly marketing conditions in the marketing area.

(3) This suspension order will reduce from 45 to 35 the percentage of milk receipts which must be utilized in Class I by a distributing plant to maintain pool plant status. The temporary reduction in the pooling requirement is needed to permit the pooling of producer milk received at a plant which has been associated with the market as a pool plant since the inception of the order. This plant which has both route and bulk Class I sales will lose a substantial block of Class I sales due to a contract change effective January 1, 1965. Its bulk sales have also been reduced by the consolidation, undertaken by some of its bulk purchasers, of plant processing operations in other markets.

(4) This suspension action was requested by producers at a public hearing held December 3, 1964, at Overland Park, Kansas. At the hearing witnesses testified that emergency action in the form of a suspension order is necessary to maintain producer status for certain dairy farmers pending the time when an amended order can be issued. The proponent cooperative and another cooperative which supported the proposal at the hearing represent all producers on the market. No testimony in opposition to the proposal was offered at the hearing.

Therefore, good cause exists for making this order effective January 1, 1965.

*It is therefore ordered,* That the aforesaid provision of the order is hereby suspended for the period January and February 1965.

(Secs. 1-19, 48 Stat. 31, as amended; 7 U.S.C. 601-674)

Effective date: January 1, 1965.

Signed at Washington, D.C., on December 17, 1964.

GEORGE L. MEHREN,
*Assistant Secretary.*

[F.R. Doc. 64-13118; Filed, Dec. 21, 1964; 8:49 a.m.]

## Chapter XIV—Commodity Credit Corporation, Department of Agriculture

SUBCHAPTER B—LOANS, PURCHASES AND OTHER OPERATIONS

[Amdt. 7]

## PART 1468—MOHAIR

### Subpart—Payment Program for Mohair

MISCELLANEOUS AMENDMENTS

The regulations issued by Commodity Credit Corporation containing the requirements with respect to the Payment Program for Mohair, as amended (27 F.R. 7417; 28 F.R. 579, 1033, 6532, 10289, 12160, 12735; 29 F.R. 3754), are further amended as follows:

1. At the end of § 1468.202, the following new paragraph (e) is inserted:

**§ 1468.202 Support level and payments.**

* * * * *

(e) *1965 marketing year.* For the 1965 marketing year (i.e., the period from January 1 through December 31, 1965), the price support level was announced on July 2, 1964, as 72 cents per pound of mohair, grease basis.

**§ 1468.208 [Amended]**

2. In § 1468.208(a), subparagraph (5) is amended by the addition of the following at the end thereof: "Association dues are to be considered marketing deductions if they include compensation for marketing services."

3. In § 1468.208(a), subparagraph (7) is amended to read as follows:

**§ 1468.208 Contents of sales documents.**

* * * * *

(7) Other deductions, such as those for bags, storage, interest, association dues which do not include compensation for marketing services, and other charges not directly related to the marketing of the mohair.

* * * * *

(Sec. 4, 62 Stat. 1070, as amended; 15 U.S.C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 702-709, 68 Stat. 910-912, secs. 401-403, 72 Stat. 994-995, sec. 151, 75 Stat. 306; 15 U.S.C. 714c, 7 U.S.C. 1781-1787, 1446)

Effective date. Date of publication.

Signed at Washington, D.C., on December 16, 1964.

H. D. GODFREY,
*Executive Vice President, Commodity Credit Corporation.*

[F.R. Doc. 64-13088; Filed, Dec. 21, 1964; 8:45 am.]

[Amdt. 8]

## PART 1472—WOOL

### Subpart—Payment Program for Shorn Wool and Unshorn Lambs (Pulled Wool)

MISCELLANEOUS AMENDMENTS

The regulations issued by Commodity Credit Corporation containing the requirements with respect to the payment program for shorn wool and unshorn lambs (pulled wool), as amended (27 F.R. 933, 9714; 28 F.R. 579, 1034, 6532, 10290, 12160, 12735; 29 F.R. 3754), are further amended as follows:

1. At the end of § 1472.1102, the following new paragraph (e) is inserted:

**§ 1472.1102 Incentive level and payments.**

* * * * *

(e) *1965 marketing year.* For the 1965 marketing year (i.e., the period from January 1 through December 31, 1965), the price support level was announced on July 2, 1964, as 62 cents per pound of shorn wool, grease basis.

**§ 1472.1108 [Amended]**

2. In § 1472.1108(a), subparagraph (5) is amended by the addition of the following at the end thereof: "Association dues are to be considered marketing deductions if they include compensation for marketing services."

3. In § 1472.1108(a), subparagraph (7) is amended to read as follows:

**§ 1472.1108 Contents of sales document.**

* * * * *

(7) Other deductions, such as those for bags, storage, interest, association dues which do not include compensation for marketing services, and other charges not directly related to the marketing of the wool.

* * * * *

4. At the end of § 1472.1148, the following new paragraph (d) is added:

**§ 1472.1148 Deductions for promotion.**

* * * * *

(d) For the 1964 marketing year, a deduction will be made from each shorn wool payment at the rate of 1 cent a pound of wool, grease basis, and from each unshorn lamb payment at the rate of 5 cents per hundredweight of live animals, as announced in the Department's press release issued June 16, 1964. Those funds will be used to finance the advertising and sales promotion program approved by the Department of Agriculture pursuant to section 708 of the National Wool Act of 1954, as amended.

(Sec. 4, 62 Stat. 1070, as amended; 15 U.S.C. 714b. Interpret or apply sec. 5, 62 Stat. 1072, secs. 702-709, 68 Stat. 910-912, secs. 401-403, 72 Stat. 994-995, sec. 151, 75 Stat. 306; 15 U.S.C. 714c, 7 U.S.C. 1781-1787, 1446)

Effective date. Date of publication.

Signed at Washington, D.C., on December 16, 1964.

H. D. GODFREY,
*Executive Vice President, Commodity Credit Corporation.*

# Title 12—BANKS AND BANKING

## Chapter V—Federal Home Loan Bank Board

### SUBCHAPTER B—FEDERAL HOME LOAN BANK SYSTEM

[No. 18,649]

### PART 525—ADVANCES

### Short Term Advances

DECEMBER 11, 1964.

Resolved that, notice and public procedure having been duly afforded (29 F.R. 13433), and all relevant material presented or available having been considered by it, the Federal Home Loan Bank Board, upon the basis of such consideration and of determination by it of the advisability of amendment of § 525.32 of the regulations for the Federal Home Loan Bank System (12 CFR 525.32) to enable savings bank members and permanent stock deposit institutions to obtain advances from the Federal Home Loan Banks upon the same terms and conditions as mutual institutions, and for the purpose of effecting such amendment, hereby amends said § 525.32 to read as follows, effective December 22, 1964:

**§ 525.32 Short term advances.**

In addition to unsecured or secured advances with a maturity of not to exceed one year which may be made under the provisions of section 11(g)(4) of the Act, advances on an unsecured basis or on any kind of security that may be readily available may be made to members under the provisions of section 11(g)(3) of the Act. Such advances must have been unanimously approved by the executive committee of the Bank or by a majority of the directors or by 2 officers of the Bank and shall either be paid at maturity or refunded with eligible collateral. The resulting aggregate of advances made under this section, together with the unpaid principal of any other advances having an unexpired maturity of more than 30 days, except advances made in accordance with or secured as provided in §§ 525.10, 525.25 or 525.26, shall not exceed 5 per centum of the member's withdrawable accounts.

(Sec. 17, 47 Stat. 736, as amended; 12 U.S.C. 1437. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1947 Supp.)

Resolved further that, inasmuch as the foregoing amendment relieves restriction, the Board hereby finds that postponement of the effective date under the provisions of § 508.14 of the general regulations of the Federal Home Loan Bank Board and section 4(c) of the Administrative Procedure Act is not required and the Board hereby provides that the above said amendment shall become effective as hereinbefore set forth.

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLARD, Jr.,
*Assistant Secretary.*

[F.R. Doc. 64-13119; Filed, Dec. 21, 1964; 8:49 a.m.]

### SUBCHAPTER C—FEDERAL SAVINGS AND LOAN SYSTEM

[No. 18,648]

### PART 545—OPERATIONS

### Branch Offices

DECEMBER 11, 1964.

Resolved that, notice and public procedure having been duly afforded (29 F.R. 12848) and all relevant material presented or available having been considered by it, the Federal Home Loan Bank Board, upon the basis of such consideration and of determination by it of the advisability of amendment of Part 545 of the rules and regulations for the Federal Savings and Loan System (12 CFR Part 545) to codify the procedure to be employed in the processing of branch office applications, and for the purpose of effecting such amendment, hereby amends said Part 545 as hereinafter set forth, effective December 22, 1964.

Section 545.14 of the rules and regulations for the Federal Savings and Loan System is hereby amended to read as follows:

**§ 545.14 Branch office.**

(a) *General provisions.* (1) Any business of a Federal association, as authorized by the association's board of directors, may be transacted at a branch office, except that loans, other than loans to borrowers on the security of their savings accounts in such association, shall not be approved by the personnel of any such office.

(2) A Federal association shall not establish a branch office without prior written approval by the Board. Determination by a Federal association to make an application for permission to establish a branch office shall be evidenced by a resolution duly adopted by the association's board of directors. The making, filing, and processing of, and action on an application for permission to establish a branch office shall be in accordance with this section.

(3) All requests by a Federal association for advice or instructions with respect to any matter arising under this section shall be addressed to the Board's Supervisory Agent. As used in this section, the term "Supervisory Agent" means the President of the Federal home loan bank of the district in which the applicant association is located or any other officer or employee of such bank appointed by the Board as agent as provided by § 501.11 of this chapter of the general regulations of the Federal Home Loan Bank Board. All recommendations by Supervisory Agents and by officers and employees of the Board in connection with branch office applications shall be deemed to be privileged and confidential and subject to the provisions of §§ 505.10, 505.11 and 505.12 of this chapter of the general regulations of the Federal Home Loan Bank Board.

(4) An application by a Federal association for permission to establish a branch office shall be approved or disapproved by the Board within a period not exceeding 9 months after publication of the notice required by paragraph (g) of this section, unless the Board, with respect to a particular application, extends such period.

(b) *Eligibility.* No application for permission to establish a branch office by a Federal association shall be considered or processed, except to determine the association's eligibility under the provisions of this paragraph (b), if, at the date on which such application is filed with the Board,

(1) The association has not been in operation for a period of at least 3 years;

(2) More than 12 months have expired from the date of publication of the notice of application for the association's most recently approved branch, if not yet opened;

(3) The association does not submit in support of its application evidence giving reasonable assurance that the proposed branch office, if approved, will be opened within 21 months after the date on which the application is filed;

(4) The association has on file any other application for permission to establish a branch office with respect to which action by the Board is pending; or

(5) A period of at least 9 months has not elapsed since disapproval by the Board of an application by the association for permission to establish a branch office to serve any substantial part of the same area as determined by the Supervisory Agent.

(c) *Application form; supporting information.* An application for permission to establish a branch office shall be in form prescribed by the Board. A Federal association may obtain from the Supervisory Agent the prescribed application form and "Outline of Information to be Submitted in Support of an Application for Permission to Establish (Maintain) a Branch Office." Information shall be furnished in support of the application in accordance with such Outline designed to show: (1) There is a necessity for the proposed branch office in the community to be served by it; (2) there is a reasonable probability of usefulness and success of the proposed branch office; and (3) the proposed branch office can be established without undue injury to properly conducted existing local thrift and home-financing institutions. The application shall include an estimate of the annual income and expenses of the proposed branch office and of the annual volume of business to be transacted by it, and a statement of the functions to be performed at such office and of the personnel and office facilities to be provided for the operation of the office. A branch office application shall be deemed to be complete when the foregoing requirements of this paragraph (c) have been met.

(d) *Filing of application; annual budget.* An application for permission to establish a branch office shall be filed with the Board by delivering two copies thereof, together with two copies of all supporting information, to the Supervisory Agent. In addition to and concurrently with the filing of such application and supporting information, the applicant shall deliver to the Supervisory Agent, for confidential use by the Board, two copies of a proposed annual budget of the association.

(e) *Amendment of application; filing of additional information.* After a complete application for permission to establish a branch office has been filed with the Board, and prior to the date of advice by the Supervisory Agent to the applicant to publish notice of the filing of the application pursuant to paragraph (g) of this section, the applicant may file additional information in support of the application and may amend the application; after the date of such advice, the applicant may not amend the application or, unless and until a hearing on the branch office application is ordered, file any additional supporting information unless requested by or on behalf of the Board.

(f) *Disapproval or deferral for supervisory reasons.* No application for permission to establish a branch office shall be approved if, in the opinion of the Board, the policies, condition, or operation of the applicant association afford a basis for supervisory objection to the application.

(g) *Processing of application by Supervisory Agent; public notice; inspection.* (1) Upon determination by the Supervisory Agent that an application for permission to establish a branch office is complete, that the association is eligible and if it has been preliminarily determined that there is no basis for supervisory objection to approval of the application, the Supervisory Agent shall advise the applicant, in writing, to publish, within 15 days from the date of such advice, in a newspaper printed in the English language and having general circulation in the community to be served by the proposed branch office, a notice of the filing of the application in the following form:

NOTICE OF FILING OF BRANCH OFFICE APPLICATION

Notice is hereby given that, pursuant to the provisions of § 545.14 of the rules and regulations for the Federal Savings and Loan System, the ---------- Federal Savings and Loan Association ----------, ----------, has filed an application with the Federal Home Loan Bank Board for permission to establish a branch office at, or in the immediate vicinity of, ----------, ----------, ----------.

The application has been delivered to the office of the Supervisory Agent of the said Board, located at the Federal Home Loan Bank of ----------, ----------, ----------. Any person may file communications in favor of or in protest of said application at the aforesaid office of the Supervisory Agent within 20 days after the date of this publication. Under the said rules and regulations for the Federal Savings and Loan System, a hearing in Washington, D.C., may be held if, pursuant to this notice, any interested person expresses a written protest, which shall be filed in duplicate, supported by specific written objections, to said application and requests a hearing at which he expresses intention to appear, provided such protest and request are received at the aforesaid office of the Supervisory Agent within 20 days after the date of this publication. Any such written protest which is not coupled with a request for hearing will also be considered if received at the aforesaid office of the Supervisory Agent within 20 days of the date of this publication. The complete application, together with all communications in favor or in protest thereof, are available for inspection by interested persons at the aforesaid office of the Supervisory Agent.

---------- FEDERAL SAVINGS AND LOAN ASSOCIATION ----------

(2) Within 20 days after the date of publication of said notice, any person may file, at the office of the Supervisory Agent designated in the notice, communications in favor or in protest of the branch office application.

(3) Promptly after publication of the notice, the applicant shall transmit two copies thereof to the Supervisory Agent accompanied by two copies of a publisher's affidavit of publication.

(4) The complete application, together with all communications in favor or in protest thereof, shall be available at the office of the Supervisory Agent during regular working hours for inspection by interested persons following the date of publication of the notice as hereinabove provided. Prior to the issuance to the applicant association of advice to publish a notice, the application and the fact that it has been filed shall be held as confidential.

(h) *Hearings*—(1) *General provisions.* A hearing shall be held upon an application for permission to establish a branch office in any case in which a hearing is ordered unless it is dispensed with as provided in the order for a hearing. A copy of an order for a hearing shall be mailed to the applicant association and to all persons who have filed written statements protesting approval of the branch office application. In any case in which the Board has disapproved an application without a hearing, a hearing may be held, at the discretion of the Board, if such hearing is requested by the applicant association within 30 days after receipt by it of advice that the Board has disapproved the application. Notwithstanding any other provision of this section, the Board may at any time, in its discretion and on its own motion, order a hearing on an application for permission to establish a branch office. Any interested person may appear, in person or by attorney, at any hearing held on an application for permission to establish a branch office and submit any evidence pertinent to the questions at issue.

(2) *Procedure.* After a hearing has been ordered, the order for such hearing, the application and supporting information, and any protest and information in support of any protest, shall be available at the office of the Secretary to the Board for inspection during regular working hours. The hearing shall be held before a hearing officer who shall be a member of the staff of the General Counsel of the Federal Home Loan Bank Board and who shall be designated by the General Counsel or a Deputy or Associate General Counsel. The hearing officer shall have complete charge of the hearing; may receive, admit, allow, exclude, and deny petitions, briefs, and evidence, including the hearing of testimony according to the rules of evidence governing civil proceedings in matters not involving trial by jury in the courts of the United States, provided, however, that such rules may be relaxed by the hearing officer in order to expedite the proceedings or promote the just determination of the ultimate issue; may make rulings and note exceptions, but shall not have power to grant any motion to dismiss the proceedings or other motion that involves final determination of the ultimate issue; may hear arguments; may adjourn the said hearing from time to time, if, in his judgment, it is desirable to the orderly conduct of the said hearing or to promote the just determination of the ultimate issue; shall order the preparation of a record, including a transcript of the testimony and evidence presented; and may do all such things and have all such powers as are necessary or proper for the orderly conduct of the hearing or to promote the just determination of the ultimate issue, but shall not have power to finally determine the ultimate issue. The hearing officer shall determine whether the filing of briefs after a hearing will be permitted, and if such filing is permitted, the hearing officer shall restrict the time for filing to a postmark date not later than 30 days after the conclusion of the hearing, unless for good cause a longer period is allowed. The hearing officer shall not permit the filing of reply briefs.

(i) *Branch office incidental to conversion or merger.* A Federal association into which an existing institution is converted shall not thereafter maintain any office of the predecessor institution as a branch office of such Federal association, and a Federal association shall not maintain any office of another institution which is absorbed by merger, without prior written approval by the Board of an application by the association for permission to maintain such office. Such application shall be in form prescribed by the Board and shall be filed at the same time as a preliminary application for conversion is submitted to the Board pursuant to § 543.9 of this chapter or at the same time as an application for approval by the Board of a merger is submitted pursuant to § 546.2 of this chapter, and shall be processed in accordance with the provisions of this section with respect to applications for permission to establish a branch office, with the following exceptions:

(1) The provisions of this section with respect to hearing and public notice shall be applicable only in cases in which it is so determined by or on behalf of the Board, and the Supervisory Agent shall not advise an applicant association to publish notice pursuant to paragraph (g) of this section unless so instructed by or on behalf of the Board; and

(2) The eligibility requirements of paragraph (b) of this section shall not be applicable to such application.

(Sec. 5, 48 Stat. 132, as amended; 12 U.S.C. 1464. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1947 Supp.)

Resolved further that the Board hereby finds that publication of the aforesaid amendment for the period specified in § 508.14 of the general regulations of the Federal Home Loan Bank Board and section 4(c) of the Administrative Procedure Act would, in the opinion of the Board, result in confusion and unnecessary expense in the filing and processing of branch office applications prior to the effective date hereof

and the Board hereby provides that the aforesaid amendment shall become effective as hereinbefore set forth.

By the Federal Home Loan Bank Board.

[SEAL] GRENVILLE L. MILLARD, Jr.,
*Assistant Secretary.*

[No. 18,650]

## PART 545—OPERATIONS

### Unsecured Loans

DECEMBER 11, 1964.

Resolved that, notice and public procedure having been duly afforded (29 F.R. 13214) and all relevant material presented or available have been considered by it, the Federal Home Loan Bank Board, upon the basis of such consideration and of determination by it of the advisability of amendment of § 545.8 of the rules and regulations for the Federal Savings and Loan System (12 CFR 545.8) in order to implement and to effect conformity with the provisions of section 5(c) of the Home Owners' Loan Act of 1933, as amended by Public Law 88-560, approved September 2, 1964, relating to unsecured loans, and for the purpose of effecting such amendment hereby amends subparagraphs (1), (4) and (5) of § 545.8(b) of the rules and regulations for the Federal Savings and Loan System to read as follows, effective January 22, 1965.

**§ 545.8 Unsecured loans.**

* * * * * *

(b) * * *

(1) The net proceeds of any such loan do not exceed $5,000;

* * * * * *

(4) The resulting aggregate amount of all such loans does not exceed an amount equal to 20 percent of such association's assets;

(5) Each such loan is repayable in regular monthly installments within a period of 8 years:

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

[Airspace Docket No. 64-WA-68]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Designation of Federal Airway

On November 11, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 15219) stating that the Federal Aviation Agency had under consideration a designation of a Federal airway from Millinocket, Maine, to a new VOR to be commissioned near Quebec, Canada.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., January 7, 1965, as hereinafter set forth.

Section 71.123 (29 F.R. 1009) is amended as follows: In V-314 "From Millinocket, Maine, via Princeton, Maine" is deleted and "From Quebec, Canada, via Millinocket, Maine; Princeton, Maine;" is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Washington, D.C., on December 11, 1964.

DANIEL E. BARROW,
*Chief, Airspace Regulations and Procedures Division.*

[Airspace Docket No. 64-CE-59]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Transition Area

On October 7, 1964, a notice of proposed rule making was published in the FEDERAL REGISTER (29 F.R. 13829) stating that the Federal Aviation Agency proposed to alter the transition area at Joplin, Mo.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. All comments received were favorable.

In consideration of the foregoing, Part 71 [New] of the Federal Aviation Regulations is amended, effective 0001 e.s.t., March 4, 1965, as hereinafter set forth.

In § 71.181 (29 F.R. 1160), the Joplin, Missouri, transition area is amended to read:

JOPLIN, MISSOURI

That airspace extending upward from 700 feet above the surface within 2 miles each side of the Joplin ILS localizer NW course, extending from the arc of a 5-mile radius circle centered at the Joplin, Missouri, Municipal Airport (latitude 37°09'00" N., longitude 94°29'50" W.), to 8 miles NW of the OM, and the airspace extending upward from 1200 feet above the surface within 8 miles NE and 6 miles SW of the Joplin ILS localizer NW and SE courses, extending from 12 miles NW to 31 miles SE of the OM, and within 5 miles each side of the Neosho VOR 345° radial extending north from the Neosho VOR to the Joplin ILS OM.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Kansas City, Mo., on December 11, 1964.

HENRY L. NEWMAN,
*Acting Director, Central Region.*

[F.R. Doc. 64-13078; Filed, Dec. 21, 1964; 8:45 a.m.]

[Airspace Docket No. 64-CE-87]

## PART 73—SPECIAL USE AIRSPACE [NEW]

### Alteration of Restricted Area

The purpose of this amendment to Part 73 [New] of the Federal Aviation Regulations is to change the using agency for the Brookville, Kans. restricted area R-3601.

The United States Air Force has requested a change in the using agency of R-3601 since there has been a transfer of operational control from Strategic Air Command to Tactical Air Command. R-3601 is presently used to train all SAC and TAC gunners. Therefore, the activity for which this restricted area was designated will not be affected by the change in using agency requested.

Since this amendment is procedural in nature and of very minor consequence to the public, notice and public procedure hereon are unnecessary and the amendment may be made effective immediately.

In consideration of the foregoing, Part 73 [New] of the Federal Aviation Regulations is amended, effective immediately, as hereinafter set forth.

In § 73.36 (29 F.R. 1252), the Brookville, Kans. restricted area R-3601 is amended by deleting "Using agency. Commander, Schilling AFB, Kans." and substituting therefor "Using agency. Commander, McConnell AFB, Kans."

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348)

Issued in Washington, D.C., on December 15, 1964.

CLIFFORD P. BURTON,
*Acting Director, Air Traffic Service.*

# Title 29—LABOR

## Subtitle A—Office of the Secretary of Labor

## PART 40—FARM LABOR CONTRACTOR REGISTRATION

Pursuant to section 14 of the Farm Labor Contractor Registration Act of 1963 (Pub. Law 88-582; Approved September 7, 1964), 29 CFR Part 40 is hereby established to read as set forth below.

Because these regulations establish the requirements for obtaining certificates of registration which must be applied for and issued prior to January 1, 1965, notice of proposed rule making, public participation in their adoption, and delay in effective date are found to be impracticable. Therefore, in accordance with section 4 of the Administrative Procedure Act (5 U.S.C. 1003), good cause is found to, and I do hereby, make these regulations effective upon publication in the FEDERAL REGISTER. Interested persons may at any time, however, submit petitions for amendment of these regulations in accordance with 29 CFR 40.29. Interpretative material will also be published shortly.

The new 29 CFR Part 40 reads as follows:

Sec.

40.1 Purpose and scope.
40.2 Definitions.
40.3 Certificate of Registration Required.
40.4 Application for Certificate of Registration.
40.5 Corporations, partnerships, associations and other organizations.

40.7 Office of filing, action.
40.8 Regional Administrator; duties, action.
40.9 The Administrator; duties, action.
40.10 Terms of Certificates of Registration, other conditions and obligations.
40.11 Cancellation of insurance, review of financial responsibility, change of ownership.
40.12 Report of violation, investigation.
40.13 Action following investigation, Regional Administrator.
40.14 Action following investigation, Administrator.
40.15 Voluntary compliance.
40.16 Notice of proposed denial of an application for or renewal of a Certificate of Registration or a Farm Labor Contractor Identification Card or suspension or revocation thereof.
40.17 Notice and hearing.
40.18 Answer.
40.19 Service by mail.
40.20 The hearing—presiding officer.
40.21 The hearing—appearances.
40.22 The hearing—evidence.
40.23 The hearing—witnesses.
40.24 The hearing—examiner's decision.
40.25 The hearing—exceptions to examiner's decision.
40.26 Issuance of order.
40.27 Initial certificate.
40.28 Compliance with other Federal and State statutes.
40.29 Amendment to the regulations in this part.

AUTHORITY: The provisions of this Part 40 issued under sec. 14, 78 Stat. 924.

**§ 40.1 Purpose and scope.**

The Farm Labor Contractor Registration Act of 1963 requires certain persons to obtain Certificates of Registration prior to performing any activities which constitute engagement in farm labor contracting within the meaning of the Act. This part sets forth the Regulations of the Secretary of Labor, United States Department of Labor, which are promulgated pursuant to section 14 of the Act to provide the procedure for applying for Certificates of Registration and allied documents, the issuance, renewal, suspension, or revocation thereof and rules of practice for administrative hearings relating thereto.

**§ 40.2 Definitions.**

For the purposes of this part:

(a) The term "person" includes any individual, partnership, association, joint stock company, trust, or corporation.

(b) The term "farm labor contractor" means any person, who, for a fee, either for himself or on behalf of another person, recruits, solicits, hires, furnishes, or transports ten or more migrant workers (excluding members of his immediate family) at any one time in any calendar year for interstate agricultural employment. The term "farm labor contractor" does not include (1) any nonprofit charitable organization, public or nonprofit private educational institution, or similar organization; (2) any farmer, processor, canner, ginner, packing shed operator, or nurseryman who engages in any such activity for the purpose of supplying migrant workers solely for his own operation; (3) any full-time or regular employe of any entity referred to in subparagraph (1) or (2) of this paragraph; or (4) any person who engages in any such activity for the purpose of obtaining migrant workers of any foreign nation for employment in the United States, if the employment of such workers is subject to (i) an agreement between the United States and such foreign nation, or (ii) an arrangement with the government of any foreign nation under which written contracts for the employment of such workers are provided for and the enforcement thereof is provided for in the United States by an instrumentality of such foreign nation.

(c) The term "fee" includes any money or other valuable consideration paid or promised to be paid to a person for services as a farm labor contractor.

(d) The term "interstate agricultural employment" means employment in any service or activity included within the provisions of section 3(f) of the Fair Labor Standards Act of 1938, as amended (29 USC 203(f)), or section 3121(g) of the Internal Revenue Code of 1954 (26 USC 3121(g)), when such service or activity is performed by an individual worker who has been transported from one State to another or from any place outside of a State to any place within a State.

(e) The term "migrant worker" means an individual whose primary employment is in agriculture, as defined in section 3(f) of the Fair Labor Standards Act of 1938, as amended (29 USC 203(f)), or who performs agricultural labor, as defined in section 3121(g) of the Internal Revenue Code of 1954 (26 USC 3121(g)), on a seasonal or other temporary basis.

(f) The term "immediate family" includes only (1) a spouse; (2) children, step-children, and foster children; and (3) parents, step-parents, and foster parents.

(g) The "Regional Administrator" is the administrative officer in charge of a regional office of the Bureau of Employment Security, United States Department of Labor.

(h) The term "Secretary" means the Secretary of Labor, United States Department of Labor.

(i) The "Administrator" means the Manpower Administrator of the United States Department of Labor or his authorized representative.

(j) The "Examiner" is an examiner appointed pursuant to § 11 of the Administrative Procedure Act and is the officer who presides at hearings conducted pursuant to §§ 40.17–40.26.

(k) The term "State" means any of the States of the United States, the District of Columbia, the Virgin Islands, the Commonwealth of Puerto Rico, and Guam.

(l) "Convicted" means that a final judgment of guilt has been rendered by a court of competent jurisdiction from which no opportunity for appeal remains.

(m) A "full-time or regular employee" is a person who performs farm labor contracting activities solely on behalf of one employer and is not an independent contractor.

(n) A "Certificate of Registration" is the certificate issued by the Secretary which permits a person to engage in activities as a farm labor contractor.

(o) A "Farm Labor Contractor Identification Card" is a card issued pursuant to this part permitting a full-time or regular employee of a person holding a valid Certificate of Registration to engage in activities as a farm labor contractor.

**§ 40.3 Certificate of Registration required.**

On and after January 1, 1965, the effective date of the Farm Labor Contractor Registration Act of 1963, any person who desires to engage in activities as a farm labor contractor must first obtain a Certificate of Registration. A full-time or regular employee of a person holding a valid Certificate of Registration may engage in activities as a farm labor contractor solely on behalf of his employer without obtaining a Certificate of Registration providing he first obtains and has in his possession while engaging in such activities a Farm Labor Contractor Identification Card.

**§ 40.4 Application for Certificate of Registration.**

(a) Any person desiring to obtain or renew a Certificate of Registration shall execute and file ES-410 Application for Certificate of Registration which is available at the local offices of the Employment Services of the various States. The application must be executed and filed in triplicate at any office of the Employment Services of the various States, except that in States requiring licensing or registration of farm labor contractors under State law such application shall be available and shall be filed at the Employment Service office of such State or the same office where the State registration or license is filed, whichever may be designated by the Governor of such State.

(b) The application shall set forth the information required thereon, shall be subscribed and sworn to by the applicant, set forth information concerning the applicant's conduct and his method of operation as a farm labor contractor, and have attached:

(1) The fingerprints of the applicant on a completed form FD-258.

(2) One of the following:

(i) Photostat or other copies of an insurance policy or policies for the period of the Certificate of Registration for which application is made, from an insurance carrier licensed or otherwise authorized to do business in the State in which the insurance is obtained, which insures the applicant against liability for damages to persons or property arising out of the applicant's ownership or operation of or his causing to be operated any vehicle for the transportation of migrant workers in connection with his business, activities, or operations as a farm labor contractor. The policy or policies shall provide insur-

ance in an amount not less than that required by any law or regulation of any State in which the applicant operates a vehicle in connection with his business, activities, or operations as a farm labor contractor; but in no event shall the amount of such insurance be less than $5,000 for bodily injuries to or death of one person; $20,000 for bodily injuries to or death of all persons injured or killed in any one accident; $5,000 for the loss or damage in any one accident to property of others; or

(ii) A letter of intention addressed to an insurance carrier licensed or otherwise authorized to do business in one of the several States, and countersigned or endorsed by such insurance carrier indicating that insurance coverage as provided in subdivision (i) of this subparagraph will be in effect prior to the use, or operation, of any vehicle by or at the instance of the applicant in the course of his business, activities, or operations as a farm labor contractor; or

(iii) Proof of financial responsibility evidenced by a liability bond executed by the applicant, identified in the instrument as the "principal," together with a third party, identified in the instrument as the "surety," to assure payment of any liability, up to $50,000, for damages to persons or property arising out of the applicant's ownership of, operation of, or his causing to be operated any vehicle for the transportation of migrant workers in connection with his business, activities, or operations as a farm labor contractor. Every bond furnished in connection with activities as a farm labor contractor shall be supported by a corporate surety which appears on the list contained in Treasury Department Circular 570, with an underwriting limit of not less than $50,000 or which has been approved by the Secretary under the Welfare and Pension Plans Disclosure Act, as amended. Treasury Department Circular 570 may be obtained from the United States Treasury Department, Bureau of Accounts, Division of Deposits and Investments, Surety Bonds Branch, Washington, D.C., 20226.

(3) Evidence satisfactory to the Regional Administrator that the applicant has complied and does comply with rules and regulations promulgated by the Interstate Commerce Commission that are applicable to his activities and operations in interstate commerce.

(c) If a Certificate of Registration is lost or destroyed, a duplicate Certificate of Registration may be obtained by submission to the office at which application was originally made of an affidavit explaining the loss or destruction together with a letter requesting that a duplicate be issued.

### § 40.5 Corporations, partnerships, associations and other organizations.

Any corporation, partnership, association or other organization which is a farm labor contractor must obtain a farm labor contractor Certificate of Registration. Any officer, director, partner or member engaging in activities as a farm labor contractor on behalf of the corporation, partnership, association or other organization is for the purposes of this part, a full-time or regular employee of a farm labor contractor.

### § 40.6 Farm Labor Contractor Identification Cards, applications.

(a) Full-time or regular employees of a holder of a valid Certificate of Registration who desire to obtain a Farm Labor Contractor Identification Card shall execute ES–412, Application for Farm Labor Contractor Identification Card, which is available at the local offices of the Employment Services of the various States or any office designated by the Governor of a State pursuant to § 40.4. The application must be executed and filed in quadruplicate at any such office. Each application shall set forth as required thereon information concerning the applicant's conduct and a description of his activities as a farm labor contractor. The application shall be sworn to and subscribed by the applicant and contain a certification by the holder of the valid Certificate of Registration that the applicant is his full-time or regular employee. The application shall have attached the fingerprints of the applicant on a completed form FD–258, which is available at any local office of the Employment Services of the various States or any office designated by the Governor of a State pursuant to § 40.4.

(b) Applications for Farm Labor Contractor Identification Cards shall be acknowledged by the Regional Administrator. Such acknowledgement shall authorize the applicant to engage in the activities of a farm labor contractor as a full-time or regular employee of the holder of the valid Certificate of Registration until a determination is made upon the application.

(c) If a Farm Labor Contractor Identification Card is lost or destroyed a duplicate Farm Labor Contractor Identification Card may be obtained by submission to the office at which application was originally made of an affidavit explaining the loss or destruction together with a letter requesting that a duplicate be issued.

### § 40.7 Office of filing, action.

Each application for a Certificate of Registration or a Farm Labor Contractor Identification Card filed at any of the offices designated in §§ 40.4 and 40.6 shall be transmitted promptly to the appropriate Regional Administrator.

### § 40.8 Regional Administrator; duties, action.

The Regional Administrator shall:

(a) Review each application transmitted to him by the offices of filing and determine whether such application is complete and properly executed.

(b) When appropriate, notify the applicant in writing of any incompleteness or error in execution and return the application to him for correction and completion.

(c) Determine after appropriate investigation whether the applicant has complied with the requirements of the Act and this Part and do one of the following:

(1) Issue a Certificate of Registration or Farm Labor Contractor Identification Card.

(2) Recommend that the Administrator refuse to issue a Certificate of Registration or Farm Labor Contractor Identification Card.

(d) Transmit to the Administrator all recommendations that issuance or renewal of a Certificate of Registration or Farm Labor Contractor Identification Card be refused together with the reasons for his recommendation.

### § 40.9 The Administrator; duties, action.

The Administrator shall:

(a) Review all recommendations by Regional Administrators that issuance or renewal of Certificates of Registration or Farm Labor Contractor Identification Cards be refused.

(b) When appropriate, return to the Regional Administrator for such further investigation, consideration, and determination as he deems necessary any application with reference to which the Regional Administrator has recommended that he refuse to issue or renew a Certificate of Registration or Farm Labor Contractor Identification Card.

(c) When appropriate, concur in the recommendation to refuse issuance or renewal of a Certificate of Registration or Farm Labor Contractor Identification Card.

(d) When appropriate, notify the applicant in writing of his proposed action and the grounds and reasons therefor in accordance with § 40.16.

### § 40.10 Terms of Certificates of Registration, other conditions and obligations.

(a) Certificates of Registration shall be issued for a calendar year and shall expire at midnight on each December 31. Receipt of any application for renewal in accordance with § 40.4 on or before November 30 of the year preceding the year for which certification is sought shall be acknowledged by the Regional Administrator. Such acknowledgment shall extend the applicant's Certificate of Registration until a determination is made upon the application for renewal.

(b) Farm Labor Contractor Identification Cards shall be valid, unless suspended or revoked pursuant to the Act, or this part, so long as the Farm Labor Contractor who employs the full-time or regular employee holds a valid Certificate of Registration.

(c) Certificates of Registration and Farm Labor Contractor Identification Cards may be revoked or suspended, or issuance or renewal thereof refused, if the applicant or registrant:

(1) Fails to carry his Certificate of Registration or identification card with him at all tmes while engaging in activities as a farm labor contractor or fails to exhibit the same when requested to do so, to any person with whom he undertakes to deal in his capacity as a farm labor contractor.

(2) Knowingly has made any misrepresentation or false statements in his application for a Certificate of Registration or identification card, or any renewal thereof.

(3) Knowingly has given false or misleading information to migrant workers concerning the terms, conditions, or existence of agricultural employment.

(4) Has failed, without justification, to perform agreements entered into or arrangements made with farm operators.

(5) Has failed, without justification, to comply with the terms of any working arrangements he has made with migrant workers.

(6) Has recruited, employed, or utilized the services of a person with knowledge that such person is violating the provisions of the immigration and nationality laws of the United States.

(7) Has been convicted of any crime under State or Federal law relating to gambling or to the sale, distribution, or possession of alcoholic liquors in connection with or incident to his activities as a farm labor contractor; or has been convicted of any crime under State or Federal law involving robbery, bribery, extortion, embezzlement, grand larceny, burglary, arson, violation of narcotics laws, murder, rape, assault with intent to kill, assault which inflicts grievous bodily injury, or crimes involving prostitution.

(8) Has failed to comply with rules and regulations promulgated by the Interstate Commerce Commission that are applicable to his activities and operations in interstate commerce.

(9) Knowingly employs or continues to employ any person, to whom subsection (b) of section 4 of the Act applies, who has taken any action, except for that listed in subparagraph 15 of this section, which could be used by the Administrator to refuse to issue a Certificate of Registration.

(10) Has failed to comply with any of the provisions of the Act or any regulations issued thereunder.

(11) Has failed to ascertain and disclose to each worker at the time the worker is recruited the following information to the best of his knowledge and belief: (i) The area of employment, (ii) the crops and operations on which he may be employed, (iii) the transportation, housing, and insurance to be provided him, (iv) the wage rates to be paid him, and (v) the charges to be made by the contractor for his services.

(12) Has failed or refused, upon arrival at a given place of employment, to post in a conspicuous place a written statement of the terms and conditions of that employment.

(13) Has failed or refused to post in a conspicuous place the terms and conditions of occupancy, in the event he manages, supervises, or otherwise controls the housing facilities.

(14) Has failed or refused to comply with or perform any of the following, in the event he pays migrant workers engaged in interstate agricultural employment, either on his own behalf or on behalf of another person:

(i) To keep payroll records which shall show for each worker total earnings in each payroll period, all withholdings from wages, net earnings, the hours worked each day and the total hours worked during each payroll period.

(ii) For any worker employed on a time basis, to record on the payroll records the time period constituting the basis for payment of each worker and if the unit is other than an hour the number of hours of work comprising such unit.

(iii) For workers employed on a piece rate basis, to record on the payroll records the number of units of work performed and the rate per unit.

(iv) To provide to each migrant worker engaged in interstate agricultural employment with whom he deals in a capacity as a farm labor contractor, a statement of all sums paid to him (including sums received on behalf of such migrant worker) on account of the labor of such migrant worker.

(v) To provide each migrant worker, engaged in interstate agricultural employment with whom he deals in a capacity as a farm labor contractor, an itemized statement showing all sums withheld by him from the amount he received on account of the labor of such worker, and the purpose for which withheld.

(15) Has failed to obtain or has had cancelled any insurance policy required by the Act and this Part and cannot demonstrate financial responsibility acceptable to the Secretary or his representative.

(16) Has failed to furnish, or refused to allow a designated representative of the Secretary to obtain appropriate information necessary to make a determination of eligibility for a Certificate of Registration or a Farm Labor Contractor Identification Card as provided by section 5(b) of the Farm Labor Contractor Registration Act of 1963.

### § 40.11 Cancellation of insurance, review of financial responsibility, change of ownership.

Any insurance policy or bond required by the Act or this Part shall provide that it cannot be cancelled or lapse or otherwise terminate without prior written notice to the Regional Administrator with whom proof of such policy or bond is filed at least twenty (20) days before such cancellation. Any change in the membership or officers of a holder of a Certificate of Registration from that most recently reported shall within twenty (20) days of the change be reported in writing to the Regional Administrator who issued the Certificate of Registration.

### § 40.12 Report of violation, investigation.

(a) Any person may report a violation of the Act or this part to any local office of the Employment Services of the various States or any office designated by the Governor of a State pursuant to § 40.4 or any Regional Administrator or any of his representatives. The office receiving such a report shall refer it to the Regional Administrator of the Region in which the reported violation is alleged to have occurred. The Regional Administrator shall make or cause to be made an appropriate investigation of any alleged violation.

(b) The Regional Administrator shall also make or cause to be made an appropriate investigation when he has reasonable grounds to believe that a farm labor contractor has violated any provisions of the Act or this part.

### § 40.13 Action following investigation Regional Administrator.

The Regional Administrator who makes or causes to be made an investigation in accordance with § 40.12 shall as appropriate:

(a) If the investigation relates to a Certificate of Registration or a Farm Labor Contractor Identification Card issued by him and he finds no or insufficient grounds to recommend suspension or revocation thereof, close the investigation without further action.

(b) If he finds grounds for suspension or revocation of the Certificate of Registration or the Farm Labor Contractor Identification Card to which the investigation relates, recommend suspension or revocation thereof by reporting the investigation and his recommendation to the Administrator with the reasons and basis for his recommendation.

(c) Report all other investigations to the Administrator.

### § 40.14 Action following investigation, Administrator.

The Administrator in cases in which revocation or suspension of a Certificate of Registration or Farm Labor Contractor Identification Card is recommended shall, utilizing the same procedures set forth in § 40.9 relating to issuance or renewal, make an appropriate determination. When he determines that the recommendation of the Regional Administrator should be followed, he shall give notice thereof as provided in § 40.16.

### § 40.15 Voluntary compliance.

Except in cases of willfulness, prior to making any recommendation to revoke or suspend a Certificate of Registration or Farm Labor Contractor Identification Card in cases in which compliance can be achieved, the Regional Administrator shall call to the attention of the holder of or applicant for a Certificate of Registration or Farm Labor Contractor Identification Card, the facts and conduct upon which he intends to base his recommendation. He shall afford such holder or applicant a reasonable opportunity to demonstrate or achieve voluntary compliance.

### § 40.16 Notice of proposed denial of an application for or renewal of a Certificate of Registration or a Farm Labor Contractor Identification Card or suspension or revocation thereof.

Upon a determination by the Administrator that a Certificate of Registration or a Farm Labor Contractor Identification Card should be suspended or revoked or that issuance or renewal thereof should be refused, the Administrator shall notify the applicant therefor or holder thereof of his proposed action. In cases involving a determination relating to a Farm Labor Contractor Identification Card notice shall also be given to the holder of the Certificate of Registration under which the card is applied for. The notice shall be in writing, set forth the proposed action

and the reasons therefor, and inform the applicant or holder of his right to a hearing. The notice shall:

(a) Set forth the proposed determination of the Administrator and the reasons therefor;

(b) Apprise the applicant or holder of his right to a hearing on the proposed action and that such a hearing will be held upon his request, provided that his request is made in writing not later than twenty (20) days after the service of the notice, and mailed to the Manpower Administrator, United States Department of Labor, Washington, D.C., 20210; and

(c) Inform the applicant or holder that in the absence of a request for a hearing the proposed determination shall become the order of the Secretary.

**§ 40.17 Notice and hearing.**

Upon receipt of a request, pursuant to § 40.16, the Administrator shall refer the matter to the Chief Hearing Examiner, United States Department of Labor, Washington, D.C., 20210. Such request shall provide the basis for initiation of a hearing on the issues raised in the notice given pursuant to § 40.16. Within a reasonable time following the aforesaid reference, the Examiner to whom the matter is referred shall issue and serve upon the person requesting a hearing and the Administrator, a Notice of Hearing prescribing the day and time, the place, and the purpose of the hearing to determine whether a Certificate of Registration or Farm Labor Contractor Identification Card or renewal thereof should be issued, suspended or revoked. The hearing contemplated by the notice shall not be held prior to 14 days after the date of notice.

**§ 40.18 Answer.**

Any person served with a Notice of Hearing pursuant to § 40.17 may, at any time prior to the commencement of the hearing for which notice has been given, file with the Chief Hearing Examiner an answer denying, explaining, or otherwise responding to the proposed determination. No such answer or any response is required, but if filed, must be signed by the person answering or responding or his representative.

**§ 40.19 Service by mail.**

Any application, notice or other document required by this Part to be filed or served on any person may be filed or served personally or by mail. If done by mail, filing or service is complete upon mailing. Service of any such notice or other document by mail upon applicants for or holders of Certificates of Registration or Farm Labor Contractor Identification Cards shall be made at the address designated either on such applicant's or holder's most recent ES–410, Application for Certificate of Registration, or ES–412, Application for Farm Labor Contractor Identification Card, or by any subsequent written communication to the Regional Administrator who issued the Certificate of Registration or the Identification Card as the place to which service of all notices and documents may be made.

**§ 40.20 The hearing—presiding officer.**

(a) The Hearing contemplated by the Act and this Part shall be conducted by an Examiner.

(b) In any proceeding assigned to him, the Examiner shall have all powers necessary to conduct a fair and impartial hearing as enumerated in section 7(b) of the Administrative Procedure Act (5 U.S.C. 1006(b)).

**§ 40.21 The hearing—appearances.**

(a) Each party shall have the right to appear in person, through an authorized agent, or by or with counsel. The Solicitor of the United States Department of Labor or his designee shall represent the Administrator in each proceeding before the Examiner.

(b) For good cause shown, the Examiner may permit any interested person or party to intervene at a hearing. A petition to intervene shall be in writing and shall state briefly and with particularity the petitioner's relationship to the matters involved in the proceedings and the nature of the presentation he would make.

(c) If any party to the proceeding, after being properly served with notice of the hearing, should fail to appear at the hearing, the matter may be set for further hearing upon notice or the Examiner may make his decision without further hearing. Failure to appear at a hearing, however, shall not be deemed to be a waiver of the respondent's right to be served with a copy of the Examiner's decision and to file exceptions with respect thereto.

**§ 40.22 The hearing—evidence.**

(a) The testimony of witnesses shall be upon oath or affirmation administered by the Examiner and shall be subject to such cross-examination as may be required for a full and true disclosure of the facts. The Examiner shall exclude evidence which is immaterial, irrelevant, or unduly repetitious.

(b) If a party objects to the admission or rejection of any evidence or to the limitation of the scope of any examination or cross-examination or the failure to limit such scope, he shall state briefly the grounds for such objection. Rulings on all objections shall appear in the record. Only objections made before the Examiner may be relied upon subsequently in the proceeding. A formal exception to an adverse ruling is not required.

(c) Official notice may be taken of any material fact, not appearing in evidence in the record, which is among the traditional matters of judicial notice and also concerning which the Department by reason of its functions is presumed to be expert: *Provided*, That the parties shall be given adequate notice, at the hearing or by reference in the Examiner's decision of the matters so noticed, and shall be given adequate opportunity to show the contrary.

(d) At the end of the hearing, the Examiner shall afford any party a reasonable opportunity, upon request, to file with him proposed findings of fact, conclusions of law, and a proposed order, together with a supporting brief including the reasons for any proposals. Such proposals shall be accompanied by a certification that service of the proposals has been made upon all other parties.

(e) The hearing shall be open to the public, unless otherwise ordered by the Examiner.

**§ 40.23 The hearing—witnesses.**

The Examiner, either at the request of the parties or upon his own motion, may request persons to appear to testify as witnesses, where such action is deemed necessary to serve the purposes of the hearing.

**§ 40.24 The hearing—examiner's decision.**

(a) Following the hearing the Examiner shall prepare a decision as promptly as practicable after the expiration of the time set for filing proposals provided for in § 40.22, if any. He shall include in the decision findings of fact and conclusions which set forth the reasons and basis for his decision with respect to all material issues of fact, law and discretion. If the respondent does not appear at the hearing, the Examiner shall, subject to the authority granted in § 40.21(c), prepare his decision on the record before him. He shall prepare an order affirming or rejecting the proposed action of the Administrator or providing such other relief or sanction as may be appropriate.

(b) The Examiner shall transmit the entire record which includes the original of his decision to the Administrator and serve copies of the decision on each of the other parties.

**§ 40.25 The hearing—exceptions to Examiner's decision.**

Within 20 days of service of the Examiner's decision any party to the proceedings may file with the Chief Hearing Examiner a written statement setting forth exceptions to the decision or proceedings. Each exception shall set forth specifically the matters of law, fact or policy to which exceptions are taken, shall identify the portions of the record relied upon, and shall state the grounds for the exceptions. Exceptions may be accompanied by a separate brief or memoranda of law.

**§ 40.26 Issuance of order.**

If within the time provided no exceptions have been filed, the Examiner's order shall become the order of the Secretary. If exceptions are filed, the Administrator shall transmit the entire record to the Secretary. The Secretary shall as soon as practicable rule on each such exception and upon the basis of the entire record make the Examiner's order final or such other order as he may find appropriate. The Secretary's order will be served upon all parties forthwith.

**§ 40.27 Initial certificate.**

Applications for Certificates of Registration for the calendar year 1965 made on or before March 1, 1965, which are complete and properly executed shall immediately be acknowledged. Until a determination is made upon such application, the applicant shall not be deemed to be in violation of the Act or this part if, while having such acknowledgement in his immediate personal possession, he engages in activities as a farm labor contractor during the calendar year 1965.

**§ 40.28 Compliance with other Federal and State statutes.**

This part and the provisions contained herein are intended to supplement State action, and compliance herewith shall not excuse anyone from compliance with applicable State and Federal laws or regulations, including but not limited to such Federal laws as the Child Labor provisions of the Fair Labor Standards Act of 1938, as amended, the regulations governing the transportation of migrant workers under sections 203(a) and 204(a) of the Interstate Commerce Act, the provisions of Title 2 of the Social Security Act relating to Federal Old-Age, Survivors, and Disability Insurance Benefits, and the provisions of U.S.C. Title 18, section 1231, prohibiting the interstate transportation of strikebreakers.

**§ 40.29 Amendment to the regulations in this part.**

The Secretary may at any time upon his own motion or upon written petition of any person setting forth reasonable grounds therefor amend or revoke any of the terms of the regulations contained in this part. Such petitions should be filed by mail with the Secretary of Labor, United States Department of Labor, Washington, D.C., 20210.

Signed at Washington, D.C., this 15th day of December 1964.

W. WILLARD WIRTZ,
*Secretary.*

# Title 31—MONEY AND FINANCE: TREASURY

## Subtitle A—Office of the Secretary of the Treasury

[CGFR 64–78]

## PART 3—CLAIMS REGULATIONS

### Miscellaneous Amendments

Public Law 86–223 amended section 2734 of Title 10 of the United States Code to enlarge the period of time from one year to two years within which a claim must be presented after it accrues. Sections 3.88 and 3.99 are amended to conform to the provisions of Public Law 86–223. Section 3.101 is amended as set forth herein.

### Subpart F—Claims Arising Outside the United States

(1) Section 3.88 is amended to read as follows:

**§ 3.88 When claims must be presented.**

A claim may not be considered under this subpart unless presented within two years after it accrues, or filed within those years with a foreign government under Article VIII of the Agreement Regarding the Status of Forces of Parties to the North Atlantic Treaty, Article XVIII of the Japanese Administrative Agreement, or other similar treaty or agreement. If examination of a claim discloses that it was not seasonably presented, the claimant may be advised to that effect without further action being required. A claim otherwise within this subpart but not presented within two years will not be settled under other claims regulations.

(2) Section 3.99(a) is amended to read as follows:

**§ 3.99 Procedure.**

(a) A foreign claims commission, upon receipt of a claim and supporting documents, will consider the claim and determine how it should be processed for settlement. If the claim was not presented within two years, the claimant will be advised by the commission that the claim is barred. If necessary, the commission will conduct a further investigation. It may confer with the claimant to resolve or determine the facts and, if deemed in the best interest of the Government and permitted by the situation, conduct a hearing and take testimony. Claims under other laws, treaties, agreements or regulations will be returned promptly to the appointing authority. Payment of claims approved under this subpart will be made by sending the originals of the completed claim form, commission settlement action and release, if obtainable in advance, as follows:

* * * * * *

(3) Section 3.101 is amended to read as follows:

**§ 3.101 Cross-servicing of claims.**

(a) Any claim cognizable under 10 U.S.C. 2734 generated by any United States Armed Force, will, upon request, be processed or settled in accordance with these regulations by a commission appointed by the Commandant, U.S. Coast Guard, or his designee.

(b) A claim cognizable under 10 U.S.C. 2734 arising in a foreign country where another service has been assigned responsibility for its settlement, normally will be investigated and sent to that service for settlement.

By virtue of the authority vested in the Commandant, U.S. Coast Guard, by section 633 of Title 14, U.S. Code; section 2736, 76 Stat. 767, 10 U.S.C. 2736; Treasury Department Order 167–54, dated August 21, 1963 (28 F.R. 9481), the following regulations are prescribed:

### Subpart G—Claims Incident to the Use of Government Vehicles or Other Property of the United States Not Cognizable Under Other Law

Sec.
3.110 Statutory authority.
3.111 Definitions.
3.112 Scope.
3.113 Claims payable.
3.114 Claims not payable.
3.115 When claim must be presented.
3.116 Procedures.
3.117 Settlement agreement.

AUTHORITY: The provisions of this subpart is issued under sec. 633, 63 Stat. 545, 14 U.S.C. 633; sec. 2736, 76 Stat. 767; 10 U.S.C. 2736, Treasury Department Order 167–54, dated August 21, 1963 (28 F.R. 9481).

**§ 3.110 Statutory authority.**

The statutory authority for §§ 3.110–3.117 is contained in the Act of October 9, 1962 (76 Stat. 767), commonly known as the "Non-Scope of Employment Claims Act of 1962".

**§ 3.111 Definitions.**

The definitions of terms set forth in § 3.1 of this part are applicable to §§ 3.110 to 3.117 except as follows:

(a) *Civilian official or employee.* Includes civilian officials or employees of the Coast Guard, paid from appropriated funds at the time the incident resulting in the claim occurred.

(b) *Government installation.* A United States Government facility having fixed or relatively fixed boundaries owned or controlled by the Government.

(c) *Vehicle.* Includes every description of carriage or other artificial contrivance used, or capable of being used, as a means of transportation on land (1 U.S.C. 4).

**§ 3.112 Scope.**

Sections 3.110–3.117 prescribe the substantive bases and special procedural requirements for the settlement of claims against the United States not cognizable under any other provision of law, determined to be meritorious in amounts not more than $1,000, for damage to, or loss of property, or personal injury or death caused by a member of the Coast Guard or a civilian official or employee of the Coast Guard, incident to the use of a vehicle of the United States at any place, or any other property of the United States on a Government installation.

**§ 3.113 Claims payable.**

(a) *General.* A claim for personal injury, death, or damage to or loss of property, real or personal, is payable under §§ 3.110–3.117 when:

(1) Caused by a member of the Coast Guard, or a civilian official or employee of the Coast Guard and is

(i) Incident to the use of a vehicle of the United States at any place, or,

(ii) Incident to the use of any other property of the United States on a Government installation.

(2) The claim is not cognizable under any other provision of law and regulations.

(3) The claim has been determined to be meritorious in an amount not in excess of $1,000, and the approving authority has obtained a settlement agreement in full satisfaction of the claim prior to approval of the claim for payment.

(b) *Personal injury or death.* A claim for personal injury or death is allowable only for the cost of reasonable medical, hospital, and burial expenses actually incurred, not otherwise furnished or paid by the United states.

**§ 3.114 Claims not payable.**

A claim is not allowable under §§ 3.110–3.117 which:

(a) Is cognizable under any other provision of law administered by the Coast Guard.

(b) **Results wholly or partly from the negligent or wrongful act of the claimant, his agent, or his employee.** The doctrine of comparative negligence is not applicable.

(c) **Is for medical, hospital, and burial expenses furnished or paid by the United States.**

(d) **Is for any element of damage pertaining to personal injuries or death other than provided in** § 3.113(b). All other items of damage, for example, compensation for loss of earnings and services, diminution of earning capacity, anticipated medical expenses, physical disfigurement, and pain and suffering, are not payable.

(e) **Is legally recoverable by the claimant under an indemnifying law or indemnity contract.** If the claim is legally recoverable in part, that part recoverable by the claimant is not payable.

**§ 3.115 When claim must be presented.**

A claim may be settled under §§ 3.110–3.117 only if it is presented in writing within 2 years after it accrues.

**§ 3.116 Procedures.**

So far as not inconsistent with §§ 3.110–3.117 the procedures for the investigation and processing of claims contained in Subpart A of this part will be followed.

**§ 3.117 Settlement agreement.**

No claim is payable under §§ 3.110–3.117 unless a settlement agreement has been obtained from the claimant accepting the amount determined to be meritorious in full satisfaction of any claim against the United States arising out of the incident.

Dated: December 15, 1964.

[SEAL] W. D. SHIELDS,
*Vice Admiral, U.S. Coast Guard,*
*Acting Commandant.*

[F.R. Doc. 64-13095; Filed, Dec. 21, 1964; 8:46 a.m.]

# Title 33—NAVIGATION AND NAVIGABLE WATERS

## Chapter I—Coast Guard, Department of the Treasury

SUBCHAPTER A—GENERAL

[CGFR 64-80]

## PART 2—GENERAL DUTIES AND JURISDICTION

### Navigable Waters of United States in Certain States

The purpose for this document is to publish the determinations made by the Commandant, United States Coast Guard, with respect to certain navigable waters of the United States in Arizona, Connecticut, Iowa, Massachusetts, Nebraska, New Hampshire, South Carolina, Utah, and Vermont, as well as determinations that certain waters which are in New York and South Carolina are considered to be nonnavigable waters of the United States.

In the administration and enforcement of various navigation and vessel inspection laws, rules and regulations, it was necessary to determine whether or not certain bodies of water were in fact navigable waters of the United States and subject to laws administered by the Coast Guard. The information in this document is intended also to further the development, use and enjoyment of all the navigable waters within the United States, and to clarify responsibility with respect to laws, rules and regulations intended to promote safety of life and property on those waters as further described in 33 CFR 2.10–5 and 2.15–1.

Because the rules in this document are interpretations, it is hereby found that the Coast Guard is exempt from compliance with the Administrative Procedure Act (respecting notice of proposed rulemaking, public rulemaking procedures thereon and effective date requirements).

By virtue of the authority vested in me as Commandant, United States Coast Guard, by section 632 in Title 14, U.S. Code, and Treasury Department Orders 120 dated July 31, 1950 (15 F.R. 6521), and 167–17 dated June 29, 1955 (20 F.R. 4976), to promulgate regulations in accordance with section 1002 in Title 5, U.S. Code, and section 633 in Title 14, U.S. Code, cited with the regulations below, the following regulations are prescribed and shall be in effect on and after the date of publication in the FEDERAL REGISTER.

### Subpart 2.23—Navigable Waters of the United States—Arizona

1. Subpart 2.23 is amended by adding after § 2.23–1 a new § 2.23–5 reading as follows:

**§ 2.23–5 Lake Powell.**

Lake Powell, an impoundment of the waters of the Colorado River.

2. Part 2 is amended by inserting after § 2.25–5 a new Subpart 2.27, consisting of § 2.27–1, reading as follows:

### Subpart 2.27—Navigable Waters of the United States—Connecticut

**§ 2.27–1 Connecticut River.**

Connecticut River.

### Subpart 2.37—Navigable Waters of the United States—Iowa

3. Subpart 2.37 is amended by adding after § 2.37–1 a new § 2.37–5 reading as follows:

**§ 2.37–5 Desoto Bend.**

Desoto Bend, also known as Desoto Lake.

4. Part 2 is amended by inserting after § 2.42–1 a new Subpart 2.43, consisting of § 2.43–1, reading as follows:

### Subpart 2.43—Navigable Waters of the United States—Massachusetts

**§ 2.43–1 Connecticut River.**

Connecticut River.

### Subpart 2.49—Navigable Waters of the United States—Nebraska

5. Subpart 2.49 is amended by adding after § 2.49–1 a new § 2.49–5 reading as follows:

**§ 2.49–5 Desoto Bend.**

Desoto Bend, also known as Desoto Lake.

### Subpart 2.51—Navigable Waters of the United States—New Hampshire

6. Subpart 2.51 is amended by adding after § 2.51–1 a new § 2.51–5 reading as follows:

**§ 2.51–5 Connecticut River.**

Connecticut River.

### Subpart 2.54—Navigable Waters of the United States—New York

**§ 2.54–5 [Canceled]**

7. Section 2.54–5 *Keuka Lake* is canceled. (See 2.99–170(b) stating that it is a nonnavigable water of the United States.)

### Subpart 2.63—Navigable Waters of the United States—South Carolina

7a. Section 2.63–5 is amended to read as follows:

**§ 2.63–5 Cooper River.**

The Cooper River and its West Branch.

8. Subpart 2.63 is amended by adding after § 2.63–40 new §§ 2.63–45, 2.63–50, and 2.63–55, reading as follows:

**§ 2.63–45 Lake Moultrie.**

Lake Moultrie.

**§ 2.63–50 Diversionary Canal.**

Diversionary Canal, which unites Lake Marion and Lake Moultrie.

**§ 2.63–55 Tail Race Canal.**

Tail Race Canal, which unites West Branch of Cooper River with Lake Moultrie.

9. Part 2 is amended by inserting after § 2.66–15 a new Subpart 2.67, consisting of § 2.67–1, and a new Subpart 2.68, consisting of § 2.68–1, reading as follows:

### Subpart 2.67—Navigable Waters of the United States—Utah

**§ 2.67–1 Lake Powell.**

Lake Powell, an impoundment of the waters of the Colorado River.

### Subpart 2.68—Navigable Waters of the United States—Vermont

**§ 2.68–1 Connecticut River.**

Connecticut River.

### Subpart 2.99—Nonnavigable Waters of the United States

10. Section 2.99–170 is amended by adding a new paragraph (b) reading as follows:

**§ 2.99–170 New York.**

* * * * *

(b) Keuka Lake.

11. Section 2.99–215 is amended by canceling paragraph (a) and redesignating paragraph (b) as paragraph (a) so this section reads as follows:

**§ 2.99–215 South Carolina.**

(a) Saluda River.

(Sec. 3, 60 Stat. 238, sec. 633, 63 Stat. 545, 5 U.S.C. 1002, 14 U.S.C. 633)

Dated: December 16, 1964.

[SEAL] E. J. ROLAND,
*Admiral, U.S. Coast Guard,*
*Commandant.*

[F.R. Doc. 64-13096; Filed, Dec. 21, 1964; 8:46 a.m.]

# Title 46—SHIPPING

## Chapter I—Coast Guard, Department of the Treasury

SUBCHAPTER N—DANGEROUS CARGOES

[CGFR 64-83]

## PART 146—TRANSPORTATION OR STORAGE OF EXPLOSIVES OR OTHER DANGEROUS ARTICLES OR SUBSTANCES AND COMBUSTIBLE LIQUIDS ON BOARD VESSELS

## PART 147—REGULATIONS GOVERNING USE OF DANGEROUS ARTICLES OF SHIPS' STORES AND SUPPLIES

### Miscellaneous Amendments

The provisions of R.S. 4472, as amended (46 U.S.C. 170), require that the land and water regulations governing the transportation of dangerous articles or substances shall be as nearly parallel as practical. The provisions in 46 CFR 146.02–18 and 146.02–19 make the Dangerous Cargo Regulations applicable to all shipments of dangerous cargoes by vessels. The Interstate Commerce Commission in Change Order Nos. 63, 64 and 65 has made changes in the ICC regulations with respect to definitions, descriptive names, classifications, specifications of containers, packing, marking, labeling, and certification for certain dangerous cargoes, which are now in effect for land transportation. Various amendments to the Dangerous Cargo Regulations in 46 CFR Part 146 have been included in this document in order that these regulations governing water transportation of certain dangerous cargoes will be as nearly parallel as practicable with the regulations of the Interstate Commerce Commission which govern the land transportation of the same commodities.

The amendments to 46 CFR Part 146 and Part 147 are considered to be interpretations of law, or revised requirements to agree with existing ICC regulations, or editorial in nature, and it is hereby found that compliance with the Administrative Procedure Act (respecting notice of proposed rule making, public rule making procedure thereon, and effective date requirements thereof) is unnecessary with respect to such changes.

By virtue of the authority vested in me as Commandant, United States Coast Guard, by Treasury Department Orders 120 dated July 31, 1950 (15 F.R. 6521), 167–14 dated November 26, 1954 (19 F.R. 8026), and CGFR 56–28 dated July 24, 1956 (21 F.R. 5659), to promulgate regulations in accordance with the statutes cited with the regulations below, the following amendments are prescribed and shall become effective on and after January 1, 1965:

### Subpart 146.04—List of Explosives or Other Dangerous Articles Containing the Shipping Name or Description of Articles Subject to the Regulations in This Subchapter

1. Section 146.04–5 is amended by adding or changing certain items as follows:

**§ 146.04–5 List of explosives and other dangerous articles and combustible liquids.**

| Article | Classed as— | Label required [1] |
|---|---|---|
| * * * | * * * | * * * |
| *Items changed* | | |
| * * * | * * * | * * * |
| Acetyl benzoyl peroxide, solid (see "*Organic peroxides*") | Not permitted | |
| Acetyl benzoyl peroxide, solution (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Acetyl peroxide, solid (see "*Organic peroxides*") | Not permitted | |
| Acetyl peroxide, solution (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| *Aqua ammonia solution containing anhydrous ammonia | Noninf. G | Green gas. |
| * * * | * * * | * * * |
| Benzoyl peroxide, wet (*with not less than 30 percent water*) (see "*Organic peroxides*"). | Oxy. M | Yellow. |
| Benzoyl peroxide, dry (*granular form*) (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Caprylyl peroxide (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Chlorobenzoyl peroxide (para), dry (see "*Organic peroxides*") | Oxy. M | Yellow. |
| Chlorobenzoyl peroxide (para), wet (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Cumene hydroperoxide (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Cyclohexanone peroxide not over 50 percent concentration (see "*Organic peroxides*"). | Oxy. M | Yellow. |
| Cyclohexanone peroxide over 50 percent concentration but not exceeding 85 percent concentration, dry (see "*Organic peroxides*"). | Oxy. M | Yellow. |
| Cyclohexanone peroxide over 50 percent concentration but not exceeding 85 percent concentration, wet (see "*Organic peroxides*"). | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Dicumyl peroxide, 50 percent solution (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Dimethylhexane dihydroperoxide, dry (see "*Organic peroxides*") | Inf. S | Yellow. |
| Dimethylhexane dihydroperoxide, wet (*wet with at least 30 percent of water by weight*) (see "*Organic peroxides*"). | Inf. S | Yellow. |
| * * * | * * * | * * * |
| Hydraulic accumulators (*pressurized with noninflammable, nonliquefied compressed gas*). | Noninfl. G | Green Gas. |
| Lauroyl peroxide, dry (see "*Organic peroxides*") | Oxy. M | Yellow. |
| Lauroyl peroxide, wet (*when wet with not less than 30 percent by weight of water*) (see "*Organic peroxides*"). | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Magnesium scrap (*borings, clippings, shavings, sheets, turnings or scalpings*). | Inf. S | Yellow. |
| * * * | * * * | * * * |
| *Nitrogen fertilizer solution | Noninfl. G | Green Gas. |
| * * * | * * * | * * * |
| Paramenthane hydroperoxide (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Peroxides, organic, liquid, N.O.S. (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Succinic acid peroxide, dry (see "*Organic peroxides*") | Oxy. M | Yellow. |
| Succinic acid peroxide, wet (*with not less than 30 percent water*) (see "*Organic peroxides*"). | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Tertiary butylisopropyl benzene hydroperoxide (see "*Organic peroxides*"). | Oxy. M | Yellow. |
| *Urea peroxide (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| *Items added* | | |
| * * * | * * * | * * * |
| Diisopropylbenzene hydroperoxide (see "*Organic peroxides*") | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| Methyl bromide mixture, liquid (*containing no class A poison*) | Pois. B | Poison. |
| * * * | * * * | * * * |
| Sodium aluminum hydride | Inf. S | Yellow. |
| * * * | * * * | * * * |
| Sodium nitrite mixtures (*sodium nitrate, sodium nitrite, and potassium nitrate*). | Oxy. M | Yellow. |
| * * * | * * * | * * * |
| *Van or truck body with refrigerating or heating equipment on board vessels* (see §146.07–5(d) and §146.08–55). | * * * | * * * |

[1] Unless otherwise exempt by the provisions of the detailed regulations.

## Subpart 146.20—Detailed Regulations Governing Explosives

**§ 146.20–200 [Amended]**

2. Section 146.20–200 *Table B—Classification: Class B; less dangerous explosives* is amended as follows:

A. Amend "Propellant explosives (liquid), Class B" as follows:

(1) In column 4, add the following:

Propellant explosives (liquid) packed or prepared for shipment in any other manner must be approved by the Commandant, U.S. Coast Guard.

## Subpart 146.21—Detailed Regulations Governing Inflammable Liquids

**§ 146.21–100 [Amended]**

3. Section 146.21–100 *Table D—Classification: Inflammable liquids* is amended as follows:

A. Amend the following items as indicated:

1. Methyl dichlorosilane.
2. Trichlorosilane.

(1) In column 4, after "Cylinders as prescribed, etc.", insert the following:

Authorized for stowage "On deck in open" only: Portable tanks (ICC–51) not over 20,000 lb. gr. wt.

## Subpart 146.22—Detailed Regulations Governing Inflammable Solids and Oxidizing Materials

**§ 146.22–25 [Amended]**

4. Section 146.22–25 *Exemptions for inflammable solids and oxidizing materials* is amended by adding the following item to paragraph (d) as follows:

Sodium aluminum hydride.

**§ 146.22–100 [Amended]**

5. Section 146.22–100 *Table E—Classification: Inflammable Solids and Oxidizing Materials* is amended as follows:

A. Delete the following entries and all text pertaining thereto:

1. Acetyl benzoyl peroxide, solution, etc.
2. Acetyl benzoyl peroxide, solid.
3. Acetyl peroxide solution, etc.
4. Acetyl peroxide, solid.
5. Benzoyl peroxide, dry.
6. Benzoyl peroxide, wet, etc.
7. Caprylyl peroxide solution.
8. Chlorobenzoyl peroxide (para), dry.
9. Chlorobenzoyl peroxide (para), wet, etc.
10. Cumene hydroperoxide, etc.
11. Cyclohexanone peroxide, not over 50 percent concentration.
12. Cyclohexanone peroxide over 50 percent concentration but not exceeding 85 percent concentration, dry.
13. Cyclohexanone peroxide over 50 percent concentration but not exceeding 85 percent concentration, wet.
14. Dicumyl peroxide, etc.
15. Paramenthane hydroperoxide, etc.
16. Tertiary butylisopropyl benzene hydroperoxide, etc.
17. Dimethylhexane dihydroperoxide, dry.
18. Dimethylhexane dihydroperoxide, wet, etc.
19. Lauroyl peroxide, wet, etc.
20. Lauroyl peroxide, dry.
21. Peroxides, organic, liquid, N.O.S., etc.
22. Succinic acid peroxide, dry.
23. Succinic acid peroxide, wet, etc.
24. Urea peroxide.

B. Amend "Phosphorus, amorphous, red" as follows:

(1) In columns 4, 5, 6 and 7, delete "Mailing tubes (ICC–29), etc." and insert in lieu thereof:

Mailing tubes (ICC–29) WIC of glass in hermetically sealed metal can, not over 100 gms. net wt.

C. Amend "Magnesium scrap (borings, etc." as follows:

(1) In column 1, delete the present text and insert in lieu thereof:

Magnesium scrap (*borings, clippings, shavings*, sheets, turnings or scalpings).

(2) In column 4, delete "Magnesium scrap consisting of clippings, or sheets:" and insert in lieu thereof:

Magnesium scrap consisting of clippings, scalpings, or sheets:

(3) In column 4, delete "Note: Magnesium scrap, etc." and insert in lieu thereof:

NOTE: Magnesium scrap consisting of clippings, scalpings, or sheets in tightly and securely closed metal drums, wooden barrels, or wooden boxes is exempt from specification packaging, marking other than name of contents, and label requirements.

D. After "Reclaimed rubber or regenerated rubber, etc." insert the following:

(1) In column 1, insert:

Sodium aluminum hydride.

(2) In column 2, insert:

*White crystalline material.*
*On contact with water ignites and may explode.*
Do not stow with explosives, inflammable liquids or acids.
Keep cool and dry.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums:
(ICC–6A) not over 55 gal. cap.
(ICC–5, 6B, 6C) not over 110 gal. cap.
(ICC–37A, 37B) STC, not over 6 gal. cap. Not more than 4 drums in one strong outside wooden box.
(ICC–17C) STC, not over 55 gal. cap.
Wooden boxes (ICC–15A, 15B) with hermetically sealed metal inside containers, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIMC, not over 250 lb. gr. wt.

(5) In columns 5, 6 and 7, insert:

Not permitted.

E. After "strontium nitrate" insert the following:

(1) In column 1, insert:

*Organic peroxides*

F. After "*Organic peroxides*" insert the following:

(1) In column 1, insert:

Acetyl benzoyl peroxide, solution (*solution must not contain more than 40% by weight of the peroxide in a nonvolatile solvent*).

(2) In column 2, insert:

*Solution of an organic peroxide in a nonvolatile solvent.*
*Clear, colorless liquid with a sharp odor.*
*Burns very rapidly with accelerating in intensity when ignited.*
Do not stow with combustible materials, explosives or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes:
(ICC–12B) WIC, not over 1 gal. cap.
(ICC–12P) WIC ICC–2U, not over 5 gal. cap.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 1 gal. cap.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes:
(ICC–12B) WIC, not over 1 gal. cap.
(ICC–12P) WIC ICC–2U, not over 5 gal. cap.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes:
(ICC–12B) WIC, not over 1 gal. cap.
(ICC–12P) WIC ICC–2U, not over 5 gal. cap.

G. After "Acetyl benzoyl peroxide, solution, etc." insert the following:

(1) In column 1, insert:

Acetyl benzoyl peroxide, solid.

(2) In columns 4, 5, 6 and 7, insert:

Not permitted.

H. After "Acetyl benzoyl peroxide, solid" insert the following:

(1) In column 1, insert:

Acetyl peroxide solution (*solution must not contain more than 25 percent by weight of the peroxide in a nonvolatile solvent*).

(2) In column 2, insert:

*Solution of 25 percent acetyl peroxide in dimethyl phthalate. Clear colorless liquid with a strong pungent odor.*
*Burns rapidly when ignited.*
*Sensitive to heat.*
Do not stow with combustible materials, explosives, or acids.
Keep cool.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes:
(ICC–12B) WIC, not over 1 gal. cap.
(ICC–12P) WIC ICC–2U, not over 5 gal. cap.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 1 gal. cap.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes:
(ICC–12B) WIC, not over 1 gal. cap.
(ICC–12P) WIC ICC–2U, not over 5 gal. cap.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes:
(ICC–12B) WIC, not over 1 gal. cap.
(ICC–12P) WIC ICC–2U, not over 5 gal. cap.

I. After "Acetyl peroxide, solution etc.", insert the following:

(1) In column 1, insert:

Acetyl peroxide, solid.

(2) In columns 4, 5, 6 and 7, insert:

Not permitted.

J. After "Acetyl peroxide, solid", insert the following:

(1) In column 1, insert:

Benzoyl peroxide, dry.

(2) In column 2, insert:

*Granular form is highly inflammable.*
*Strong supporter of combustion.*
*Insoluble in water.*
Keep cool and dry.
Do not stow with combustible materials, explosives or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

K. After "Benzoyl peroxide, dry", insert the following:

(1) In column 1, insert:

Benzoyl peroxide, wet (*when wet with not less than 30% by weight of water*).

Shipping containers must have marked thereon the gross, tare, and net weight of the package.

(2) In column 2, insert:

*A light, finely divided white crystalline powder in water solution.*
*In dry condition burns rapidly.*
When in powdered or crystalline form must be wet with at least 30% by weight of water.
Check gross weight of container to ascertain if leakage has occurred. Reject leaking containers or ones that show signs of having leaked.
Do not stow with explosives, combustible material, and acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums (ICC–5, 5B, 6A, 6B, 6C) WIL, not over 350 lb. gr. wt.
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Steel barrels or drums (ICC–5, 5B, 6A, 6B, 6C) WIL, not over 350 lb. gr. wt.
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Steel barrels or drums (ICC–5, 5B, 6A, 6B, 6C) WIL, not over 350 lb. gr. wt.
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(7) In Column 7, insert:

Ferry stowage (BB).
Outside containers:
Steel barrels or drums (ICC–5, 5B, 6A, 6B, 6C) WIL, not over 350 lb. gr. wt.
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

L. After "Benzoyl peroxide, wet, etc.", insert the following:

(1) In column 1, insert:

Caprylyl peroxide solution.

(2) In column 2, insert:

*Straw-colored liquid with a sharp odor.*
*Burns rapidly and vigorously with increasing intensity.*
*Immiscible with water.*
Do not stow with explosives, combustible materials, or acids.
Keep cool.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 1 gal. cap.
Authorized only for material which will not react dangerously with, or cause decomposition of polyethylene:
Fiberboard boxes (ICC–12P) WIC ICC–2U or polyethylene bottles, not over 5 gal. cap. ea.
Steel barrels or drums:
(ICC–5B, 6J, 37A) STC, WIC ICC–2S polyethylene, not over 15 gal. cap.
(ICC–37P) NRC, not over 5 gal. cap.
Following barrels and drums authorized for materials which will not react dangerously with the drum's metal, or be decomposed by contact with it:
Steel barrels or drums (ICC–17C, 17E) STC, not over 15 gal. cap.
Aluminum drums (ICC–42B) not over 15 gal. cap.

(5) In columns 5, 6 and 7, insert:

Not permitted.

M. After "Caprylyl peroxide solution", insert the following:

(1) In column 1, insert:

Chlorobenzoyl peroxide (para), dry.

(2) In column 2, insert:

*White, odorless powder.*
*Can be ignited by external flame and when so ignited burns rapidly.*
*Insoluble in water.*
Do not stow with explosives, combustible materials, or acids.
Keep cool and dry.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(6) In column 6, insert:

Stowage:
Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(7) In column 7, insert:

Stowage:
Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

N. After "Chlorobenzoyl peroxide (para), dry", insert the following:

(1) In column 1, insert:

Chlorobenzoyl peroxide (para), wet (*when wet with not less than 30% by weight of water*).

Shipping containers must have marked thereon the gross, tare and net weight of the package.

(2) In column 2, insert:

*White odorless powder in water solution. In dry condition burns rapidly.*

When in powdered or crystalline form must be wet with at least 30 percent by weight of water.

Check gross weight of container to ascertain if leakage has occurred. Reject leaking containers or ones that show signs of having leaked.

Do not stow with explosives, combustible materials, or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

O. After "Chlorobenzoyl peroxide (para), wet, etc.", insert the following:

(1) In column 1, insert:

Cumene hydroperoxide (*strength not exceeding 90% in a nonvolatile solvent*).

(2) In column 2, insert:

*A colorless to pale-yellow liquid consisting of a solution of the solid peroxide in a liquid such as phthalate. Solution is combustible.*

*When ignited the burning rate becomes more rapid as the combustion proceeds.*

Do not stow with explosives, combustible materials or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums (ICC–17E) STC, with interiors so treated that they will be resistant to the contents. Not over 55 gal. cap.

Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt. Also authorized for cumene hydroperoxide strength not exceeding 96% in a nonvolatile solvent.

Authorized for stowage "On deck" and "First deck below":

Tank cars complying with ICC regulations (trainships only).

(5) In columns 5 and 6, insert:

Not permitted.

(6) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Tank cars complying with ICC regulations.

P. After "Cumene hydroperoxide, etc.", insert the following:

(1) In column 1, insert:

Cyclohexanone peroxide, not over 50% concentration.

(2) In column 2, insert:

*Thick grayish white paste.*

*Organic peroxide compounded with a nonvolatile solvent such as dibutyl phthalate.*

Keep cool.

Do not stow with explosives, acids or combustible materials.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums:
(ICC–6A) not over 55 gal. cap. and not exceeding 880 lb. gr. wt.
(ICC–6B, 6C) not over 110 gal. cap. and not exceeding 1760 lb. gr. wt.
(ICC–17C, 17E, 17H, 37A, 37B) STC, not over 55 gal. cap.
Wooden barrels or kegs:
(ICC–10A, 10B, 10C) not over 50 gal. cap. and not exceeding 600 lb. gr. wt.
(ICC–11A, 11B) WIC, not over 600 lb. gr. wt.
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12A, 12B) WIC, not over 65 lb. gr. wt.
Fiber drum (ICC–21C) not over 250 lb. net wt.
Plywood drums:
(ICC–22A) not over 225 lb. gr. wt.
(ICC–22B) WIMC, not over 225 lb. gr. wt.

(5) In column 5, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums:
(ICC–6A) not over 55 gal. cap. and not exceeding 880 lb. gr. wt.
Wooden barrels or kegs:
(ICC–11A, 11B) WIC, not over 600 lb. gr. wt.
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12A, 12B) WIC, not over 65 lb. gr. wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Steel barrels or drums:
(ICC–6A) not over 55 gal. cap. and not exceeding 880 lb. gr. wt.
(ICC–6B, 6C) not over 110 gal. Cap. and not exceeding 1760 lb. gr. wt.
(ICC–17C, 17E, 17H, 37A, 37B) STC, not ovef 55 gal. cap.
Wooden barrels or kegs:
(ICC–10A, 10B, 10C) not over 50 gal. cap. and not exceeding 600 lb. gr. wt.
(ICC–11A, 11B) WIC, not over 600 lb. gr. wt.
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12A, 12B) WIC, not over 65 lb. gr. wt.
Fiber drum (ICC–21C) not over 250 lb. net wt.
Plywood drums:
(ICC–22A) not over 225 lb. gr. wt.
(ICC–22B) WIMC, not over 225 lb. gr. wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Steel barrels or drums:
(ICC–6A) not over 55 gal. cap. and not exceeding 880 lb. gr. wt.
(ICC–6B, 6C) not over 110 gal. cap. and not exceeding 1760 lb. gr. wt.
(ICC–17C, 17E, 17H, 37A, 37B) STC, not over 55 gal. cap.
Wooden barrels or kegs:
(ICC–10A, 10B, 10C) not over 50 gal. cap. and not exceeding 600 lb. gr. wt.
(ICC–11A, 11B) WIC, not over 600 lb. gr. wt.
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19C) WIC, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12A, 12B) WIC, not over 65 lb. gr. wt.
Fiber drum (ICC–21C) not over 250 lb. net wt.
Plywood drums:
(ICC–22A) not over 225 lb. gr. wt.
(ICC–22B) WIMC, not over 225 lb. gr. wt.

Q. After "Cyclohexanone peroxide, not over 50% concentration" insert the following:

(1) In column 1, insert:

Cyclohexanone peroxide over 50% concentration but not exceeding 85% concentration, dry.

(2) In column 2, insert:

*White granules.*

*Flammable, burns rapidly when ignited.*

Keep cool.

Do not stow with combustible materials, explosives or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC not over 1 lb. cap. each, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC not over 1 lb. cap. each, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC not over 1 lb. cap. each, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A 15B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.

R. After "Cyclohexanone peroxide over 50% concentration but not exceeding 85% concentration, dry", insert the following:

(1) In column 1, insert:

Cyclohexanone peroxide over 50% concentration but not exceeding 85% concentration, wet.

(2) In column 2, insert:

*Organic peroxide compounded with a nonvolatile solvent such as dibutyl phthalate.*

Keep cool.

Do not stow with combustible materials, explosives or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC not over 1 lb. cap. ea., not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiber drum (ICC–21C) WIC of plastic, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck protected."
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC not over 1 lb. cap. ea., not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiber drum (ICC–21C) WIC of plastic, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC not over 1 lb. cap. ea., not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiber drum (ICC–21C) WIC of plastic, not over 50 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC not over 1 lb. cap. ea., not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiber drum (ICC–21C) WIC of plastic, not over 50 lb. net wt.

S. After "Cyclohexanone peroxide * * *, wet," insert the following:

(1) In column 1, insert:

Dicumyl peroxide (*strength not exceeding 50% in a nonvolatile solvent*).

(2) In column 2, insert:

*Solution of the peroxide in a nonvolatile solvent.*

Keep cool.

Do not stow with combustible materials, explosives or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums (ICC–17E) STC, with interiors so treated that they will be resistant to the contents. Not over 55 gal. cap.
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC not over 250 lb. gr. wt.

(5) In columns 5, 6 and 7, insert:

Not permitted.

T. After "Dicumyl peroxide, etc.", insert the following:

(1) In column 1, insert:

Diisopropylbenzene hydroperoxide (*strength not exceeding 60% in a nonvolatile solvent*).

(2) In column 2, insert:

*Colorless to pale yellow liquid.*

*Burns vigorously and persistently, especially in large quantities.*

Do not stow with explosives, combustible materials or acids.

Keep cool.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums (ICC–17E) STC, with interiors so treated that they will be resistant to the contents. Not over 55 gal. cap.
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC not over 250 lb. gr. wt.
Authorized for stowage "On deck" and "First deck below":
Tank cars complying with ICC regulations (trainships only).

(5) In columns 5 and 6, insert:

Not permitted.

(6) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Tank cars complying with ICC regulations.

U. After "diisopropylbenzene hydroperoxide, etc.", insert the following:

(1) In column 1, insert:

Dimethylhexane dihydroperoxide, dry.

(2) In column 2, insert:

*Finely divided white powder.*

*Inflammable and burns steadily when ignited.*

*Will decompose at elevated temperatures.*

Keep cool and dry.

Do not stow with combustible materials, explosives or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.
Fiber drums (ICC–21C) WIC of plastic, not over 100 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.
Fiber drums (ICC–21C) WIC of plastic, not over 100 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.
Fiber drums (ICC–21C) WIC of plastic, not over 100 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B), WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.
Fiber drums (ICC–21C) WIC of plastic, not over 100 lb. net wt.

V. After "Dimethylhexane dihydroperoxide, dry", insert the following:

(1) In column 1, insert:

Dimethylhexane dihydroperoxide, wet (*wet with at least 30% of water by weight*).

Shipping containers must have marked thereon the gross, tare, and net weight of the package.

(2) In column 2, insert:

*Finely divided white powder in water.*

*Inflammable when dry.*

Check gross weight of container to ascertain if leakage has occurred. Reject leaking containers or ones that show signs of having leaked.

Do not stow with explosives, combustible materials or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiber drums (ICC–21C) WIC of plastic, not over 100 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiber drums (ICC–21C) WIC of plastic, not over 100 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiber drums (ICC–21C) WIC of plastic, not over 100 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 1 lb. cap. ea., not over 50 lb. net wt.
Fiber drums (ICC–21C) WIC of plastic, not over 100 lb. net wt.

W. After "Dimethylhexane dihydroperoxide, wet, etc.", insert the following:

(1) In column 1, insert:

Lauroyl peroxide, dry.

(2) In column 2, insert:

*White coarse powder; faint pungent odor. Strong supporter of combustion.*
*Insoluble in water.*
Do not stow with explosives, combustible materials, or acids.
Keep cool and dry.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 100 lb. net wt.
Fiber drum (ICC–21C) not over 100 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 100 lb. net wt.
Fiber drum (ICC–21C) not over 100 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 100 lb. net wt.
Fiber drum (ICC–21C) not over 100 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 100 lb. net wt.
Fiber drum (ICC–21C) not over 100 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

X. After "Lauroyl peroxide, dry", insert the following:

(1) In column 1, insert:

Lauroyl peroxide, wet (*when wet with not less than 30% by weight of water*).

Shipping containers shall have marked thereon the gross, tare, and net weight of package.

(2) In column 2, insert:

*White coarse powder in water solution.*
When in powdered or crystalline form, must be wet with at least 30% by weight of water.
Check gross weight of container to ascertain if leakage has occurred. Reject leaking containers or ones that show signs of having leaked.
Do not stow with explosives, combustible materials or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck under cover."
"On deck protected."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

Y. After "Lauroyl peroxide, wet, etc.", insert the following:

(1) In column 1, insert:

Paramethane hydroperoxide (*strength not exceeding 60% in a nonvolatile solvent*).

(2) In column 2, insert:

*Organic peroxide in a nonvolatile solvent.*
Keep cool.
Do not stow with explosives, combustible materials or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums (ICC–17E) STC, with interiors so treated that they will be resistant to the contents. Not over 55 gal. cap.
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC not over 250 lb. gr. wt.
Authorized for stowage "On deck" and "First deck below":
Tank cars complying with ICC regulations (trainships only).

(5) In columns 5 and 6, insert:

Not permitted.

(6) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Tank cars complying with ICC regulations.

Z. After "Paramenthane hydroperoxide, etc.", insert the following:

(1) In column 1, insert:

Peroxides, organic, liquid, N.O.S.
Peroxides, organic, solution, liquid, N.O.S.

(2) In column 2, insert:

*Combustible liquids, usually colorless, with sharp penetrating odor. Readily ignitable and burn with acceleration.*
*Immiscible with water.*
Do not stow with combustible materials, explosives or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC not over 1 gal. cap., total 6 gal. cap.
Authorized only for material which will not react dangerously with, or cause decomposition of polyethylene:
Plywood drums (ICC–22C) WIC (ICC–2T) not over 13 gal. cap.
Cylindrical steel overpack: (ICC–6D, 37M (NRC), WIC ICC–2S, not over 15 gal. cap.
Steel drums (ICC–37P) NRC, not over 5 gal. cap.
Fiberboard boxes (ICC–12P) WIC ICC–2U or polyethylene bottles, not over 5 gal. cap. ea.
Following barrels or drums authorized for materials which will not react dangerously with the drum's metal, or be decomposed by contact with it:
Steel barrels or drums (ICC–17C, 17E) STC, not over 15 gal. cap.
Aluminum drums (ICC–42B) not over 15 gal. cap.

(5) In columns 5, 6 and 7, insert:

Not permitted.

AA. After "Peroxides, organic, liquid, N.O.S., etc." insert the following:

(1) In column 1, insert:

Succinic acid peroxide, dry.

(2) In column 2, insert:

*White powder.*
*Combustible, burns rapidly when ignited.*
*Insoluble in water.*
Do not stow with combustible materials, explosives, or acids.
Keep cool.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B) WIC, not over 50 lb. net wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

BB. After "Succinic acid peroxide, dry", insert the following:

(1) In column 1, insert:

Succinic acid peroxide, wet (*when wet with not less than 30 percent by weight of water*).

Shipping containers must have marked thereon the gross, tare, and net weight of the package.

(2) In column 2, insert:

*White powder in water solution.*
*Combustible, burns rapidly when ignited.*
Do not stow with combustible materials, explosives or acids.
Keep cool.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(5) In column 5, insert:

Stowage:
"On deck under cover."
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(6) In column 6, insert:

Ferry stowage (AA).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt. Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

(7) In column 7, insert:

Ferry stowage (BB).
Outside containers:
Wooden boxes (ICC–15A, 15B, 15C) WIMC, not over 200 lb. gr. wt.
Fiberboard boxes (ICC–12B) WIC, not over 50 lb. net wt.

CC. After "Succinic acid, wet etc.", insert the following:

(1) In column 1, insert:

Tertiary butylisopropyl benzene hydroperoxide (*strength not exceeding 60% in a nonvolatile solvent*).

(2) In column 2, insert:

*White crystalline solid in a nonvolatile solvent.*
Keep cool.
Do not stow with combustible materials, explosives or acids.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
"Tween decks readily accessible."
Outside containers:
Steel barrels or drums (ICC–17E) STC with interiors so treated that they will be resistant to the contents. Not over 55 gal. cap.
Wooden boxes (ICC–15A, 15B, 15C, 16A, 19A) WIC, not over 250 lb. gr. wt.

(5) In columns 5, 6, and 7, insert:

Not permitted.

DD. After "Tertiary butylisopropyl benzene hydroperoxide, etc.", insert the following:

(1) In column 1, insert:

Urea peroxide.

(2) In column 2, insert:

*A white crystalline organic solid.*
*Unstable at elevated temperatures.*
*Decomposes very slightly at normal temperatures.*
*May be compounded with waxes, etc., and made up into pellet form.*
Do not stow with combustible materials, explosives, or acids.
Keep cool and dry.

(3) In column 3, insert:

Yellow.

(4) In column 4, insert:

Stowage:
"On deck protected."
"On deck under cover."
Outside containers:
Fiberboard boxes (ICC–12B) WIC of plastic or rubber, not over 65 lb. gr. wt.
Fiber drums (ICC–21C) coated on inside with a suitable wax not over 250 lb. net wt.
Plywood drums (ICC–22A) WIC ICC–2J, coated on inside with a suitable wax, not over 220 lb. gr. wt.

(5) In columns 5, 6, and 7, insert:

Not permitted.

EE. Amend "Sodium nitrite", as follows:

(1) In column 1, insert:

Sodium nitrite mixtures.

(2) In column 2, insert:

*Mixtures of sodium nitrate, sodium nitrite and potassium nitrate.*

FF. Amend the following items as indicated:

1. Barium peroxide, etc.
2. Calcium metallic.
3. Calcium peroxide.
4. Compounds, tree or weed killing, solids.
5. Drugs, chemicals, medicines, or cosmetics, etc.
6. Inflammable solids, N.O.S., etc.
7. Lacquer base, or lacquer chips, dry, etc.
8. Lithium peroxide.
9. Magnesium metallic, etc.
10. Magnesium peroxide, solid.
11. Motion-picture film, old and worn out (*nitrocellulose base*).
12. Oxidizing materials, N.O.S.
13. *Perchlorates*, etc.
14. *Permanganates*, etc.
15. Potassium bromate.
16. Potassium nitrite.
17. Potassium peroxide.
18. Pyroxylin plastics, rods, etc.
19. Pyroxylin plastic, scrap.
20. Rubber scrap, etc.
21. Sodium bromate.
22. Sodium hydrosulfite.
23. Sodium methylate, dry.
24. Strontium peroxide.
25. Zinc peroxide.

(1) In columns 4, 5, 6 and 7, wherever applicable, delete "Fiber drum (ICC–21C), etc." and insert in lieu thereof:

Fiber drums (ICC–21C) not over 250 lb. gr. wt.

GG. Amend the following items as indicated:

1. *Chlorates*, etc.
2. Lithium amide, powdered.

(1) In columns 4, 6 and 7, wherever applicable, delete "Fiber drum (ICC–21C), etc." and insert in lieu thereof:

Fiber drum (ICC–21C) WIMC ICC–2F not over 250 lb. gr. wt.

## Subpart 146.23—Detailed Regulations Governing Corrosive Liquids

### § 146.23–100 [Amended]

6. Section 146.23–100 *Table F—Classification: Corrosive liquids* is amended as follows:

A. Amend "Sulfuric acid (oil of vitriol), etc.", as follows:

(1) In columns 4, 6 and 7, under "For sulfuric acid of concentration not to exceed 95% (approximately 1.835 specific gravity (66° Baume)):" delete "Fiber drum (ICC–21C), etc." and insert in lieu thereof:

Fiber drum (ICC–21C) WIC ICC–2T or 2U, not over 15 gal. cap.

## Subpart 146.24—Detailed Regulations Governing Compressed Gases

7. Section 146.24–1 is amended by deleting the present text and inserting in lieu thereof:

### § 146.24–1 Definitions of compressed gases.

(a) A compressed gas is defined by the Interstate Commerce Commission as any material or mixture having in the container an absolute pressure exceeding 40 psi at 70° F.; or regardless of the pressure at 70° F., having an absolute pressure exceeding 104 psi at 130° F.; or any liquid flammable material having a vapor pressure exceeding 40 psi absolute at 100° F. as determined by the Reid method covered by the American Society for Testing Materials Method of Test for Vapor Pressure of Petroleum Products (D–323).

(b) Any compressed gas as defined in paragraph (a) of this section shall be classified as an "inflammable compressed gas" if any one of the following occurs:

(1) Either a mixture of 13 percent or less (by volume) with air forms an inflammable mixture or the inflammable range with air is wider than 12 percent regardless of the lower limit. These limits shall be determined at atmospheric temperature and pressure. The method of sampling and test procedure shall be acceptable to the Interstate Commerce Commission.

(2) Using the Bureau of Explosives' Flame Projection Apparatus,[1] the flame projects more than 18 inches beyond the ignition source with valve opened fully, or, the flame flashes back and burns at the valve with any degree of valve opening.

(3) Using the Bureau of Explosives' Open Drum Apparatus,[2] there is any sig-

[1] See footnote at end of section.

[2] A description of the Bureau of Explosives Flame Projection Apparatus, Open Drum Apparatus, Closed Drum Apparatus, and method of tests may be procured from the Bureau of Explosives, 63 Vesey Street, New York, New York 10000.

nificant propagation of flame away from the ignition source.

(4) Using the Bureau of Explosives' Closed Drum Apparatus,[1] there is any explosion of the vapor-air mixture in the drum.

(c) A "non-liquified compressed gas" is a gas, other than gas in solution, which under the charged pressure is entirely gaseous at a temperature of 70° F.

(d) A "liquefied compressed gas" is a gas which, under the charged pressure, is partially liquid at a temperature of 70° F.

(e) A "compressed gas in solution" is a nonliquefied compressed gas which is dissolved in a solvent.

8. Section 146.24–15 is amended by changing paragraph (c) and (f) to read as follows:

**§ 146.24–15 Containers.**

• • • • •

(c) Cylinders of foreign manufacture received from foreign countries for charging with compressed gas may be accepted for transportation as indicated in the table for the particular character vessels involved provided such cylinders are retested and recharged in accordance with the Interstate Commerce Commission regulations applying to such cylinders and the compressed gas involved. The bill of lading or other shipping paper shall, when possible, identify the containers and shall carry the following certification:

These containers have been retested and refilled in accordance with the ICC requirements for export.

• • • • •

(f) Mixtures containing compressed gases or gases including insecticides and refrigerant gases, which are noninflammable and nonpoisonous may be shipped in inside metal containers ICC–2P equipped with safety devices of a type approved by the Interstate Commerce Commission and packed in strong wooden or fiber boxes of such design as to protect valves from injury or accidental functioning under conditions incident to transportation. Pressure in the container must not exceed 85 psi absolute at 70° F. Each completed metal container filled for shipment must be heated until content reaches a minimum temperature of 130° F., without evidence of leakage, distortion, or other defect. Each outside shipping container must be plainly marked "INSIDE CONTAINERS COMPLY WITH PRESCRIBED SPECIFICATION" and shall bear the proper label.

• • • • •

9. Section 146.24–20 is amended by deleting all the present text and inserting in lieu thereof:

**§ 146.24–20 Exemptions for compressed gases.**

Compressed gases, except poisonous gases as defined in the regulations in this part, and except those listed in paragraph (e) of this section, are exempt from specification packaging, marking other than true shipping name of contents, and labeling requirements as follows:

(a) In containers of not more than 4 fluid ounces water capacity (7.22 cubic inches or less).

(b) In metal containers filled with non-dangerous material to not over 90 percent capacity at 70° F., then charged with noninflammable, nonliquefied gas; each container must be tested to three times the gas pressure at 70° F., and, when refilled and reshipped, must be retested at this pressure before each shipment, provided one of the following conditions is met:

(1) Container is not over 1 quart capacity charged to not over 170 psig at 70° F.

(2) Container is not over 30 gallons capacity charged to not over 75 psig pressure at 70° F.

(c) In inside nonrefillable metal containers charged with a solution of materials and compressed gas or gases which are nonpoisonous, provided all of the following conditions are met:

(1) Capacity must not exceed 32 cubic inches.

(2) Pressure in container must not exceed 75 pounds per square inch absolute at 70° F.; however, if the pressure exceeds 55 pounds per square inch at 70° F., an ICC specification 2P container must be used.

(3) Liquid content of the material and gas must not completely fill the container at 130° F.

(4) If the contents are inflammable as provided in § 146.24–1(b)(2)(3)(4), as determined by Bureau of Explosives method, the flash point must not be less than 20° F.

(5) Each completed container filled for shipment must be heated until content reaches a minimum temperature of 130° F., without evidence of leakage, distortion or other defect.

(d) In inside nonrefillable metal containers charged with a solution of nonpoisonous and noninflammable materials and nonliquefied compressed gas, provided all the following conditions are met:

(1) Capacity does not exceed 31.83 cubic inches (17.6 fluid ounces).

(2) Pressure in container does not exceed 140 pounds per square inch absolute at 130° F.

(3) The metal container must be capable of withstanding without bursting a pressure of two times the pressure of the container at 70° F. or one and one-half times the pressure of the container at 130° F., whichever is greater.

(e) The following articles in any quantity are not exempt from any of the regulations in this subpart:

(1) Argon.

(2) Engine starting fluid.

(3) Oxygen, pressurized liquid.

10. After section 146.24–20 add a new section 146.24–21 as follows:

**§ 146.24–21 Exemptions for foodstuffs, soap, cosmetics, beverages, biologicals, electronic tubes and audible fire alarm systems.**

Compressed gases, except poisonous gases as defined in the regulations in this part, and except those listed in paragraph 146.24–20(e), are exempt from specification packaging, marking other than true shipping name of contents, and labeling requirements as follows:

(a) Carbonated beverages.

(b) Foodstuffs or soaps in metal cans with soluble or emulsified compressed gas, provided the pressure in the container does not exceed 115 pounds per square inch absolute at 70° F., or 150 pounds per square inch absolute at 130° F. The metal container must be capable of withstanding without bursting a pressure of two times the pressure of contents at 70° F., or one and one-half times the pressure of the contents at 130° F., whichever is greater.

(c) (1) Inside nonrefillable metal containers charged with compressed gas and a solution which is nonpoisonous and noninflammable containing

(i) A biological product, or

(ii) A medical preparation which will be determined by heat.

(2) The capacity of each inside container shall not exceed 31.83 cubic inches (17.6 fluid ounces). Pressure in the container not to exceed 55 pounds per square inch absolute at 70° F., and the liquid content of the product and gas must not completely fill the container at 130° F. One completed container out of each lot of 500 or less, filled for shipment, must have been heated, until content reached a minimum temperature of 130° F., without evidence of leakage, distortion or other defect.

(d) Electronic tubes of not more than 30 cubic inch volume charged with gas to a pressure of not more than 35 pounds per square inch gauge.

(e) Inside metal containers of a capacity not to exceed 35 cubic inches, charged with noninflammable, nonpoisonous liquefied compressed gas to be used in conjunction with audible fire alarm systems. Pressure in the container must not exceed 85 pounds per square inch absolute at 70° F. The completely assembled containers must be capable of withstanding without bursting a pressure of 100 pounds per square inch absolute. The liquid portion of the gas must not completely fill the container at 130° F.

11. After the new § 146.24–21, add a new § 146.24–22 as follows:

**§ 146.24–22 Exemptions for fire extinguishers and component parts thereof.**

Fire extinguishers and component parts thereof are exempt from specifications packaging, marking other than true name of contents, and labeling requirements provided all the following conditions are met:

(a) Compressed gas in the container is for the purpose of expelling the fire extinguishing contents:

(b) The gas must be nonliquefied in containers exceeding 30 cubic inches.

(c) Must be shipped as inside containers.

(d) The container under stored pressure shall have an internal volume not exceeding 1,100 cubic inches.

(e) The pressure in the container shall not exceed 200 pounds per square inch absolute at 70° F.

(f) The contents shall be noninflammable, nonpoisonous, and noncorrosive as defined in the regulations in this part.

(g) Except as provided in paragraph (h) of this section, each container must be tested before shipment to at least three times the pressure in the container at 70° F. when charged and not less than 120 pounds per square inch absolute, and before refilling and reshipping must be retested at this pressure before each shipment. The container shall show no leakage or damage when subjected to this pressure.

(h) When ICC specification 2P inside metal containers are used for pressures not exceeding 85 pounds per square inch absolute, at 70° F. or 115 pounds per square inch absolute, at 130° F., the test requirements of paragraph (g) of this section do not apply, but each container must be capable of having the contents heated to 130° F. without evidence of leakage or permanent distortion.

## Subpart 146.25—Detailed Regulations Governing Poisonous Articles

**§ 146.25–55 [Amended]**

12. Section 146.25–55 *Exemptions for poisons, Class B* is amended by changing subparagraph (a)(3) as follows:

(1) Insert in the listing the following:

(Methyl) bromide mixture, liquid (*containing no class A poison*).

12a. Section 146.25–200 *Table H—Classification: Class B; less dangerous poisons* is amended as follows:

A. Amend "Chlorpicrin, liquid, etc.", as follows:

(1) In column 4, change "Authorized only for chlorpicrin mixtures containing not to exceed 15% chlorpicrin; etc.", to read as follows:

Authorized only for chlorpicrin mixtures containing not to exceed 15% chlorpicrin by weight or 15% chlorpicrin by volume, 85% by volume dichloropropene technical, and only authorized for such mixtures not classed as inflammable under the regulations in this part:

(2) In column 4, after "Fiberboard boxes (ICC–12B)", insert:

Authorized for stowage "On deck" and "First deck below:"
Tank cars complying with ICC regulations (trainships only).

B. Amend the following items as indicated:

1. Alcohol allyl, etc.
2. Aldrin mixtures, liquids, etc.
3. Arsenic acid, liquid.
4. Arsenic chloride (arsenous), liquid, etc.
5. Arsenical compounds or mixtures, N.O.S., liquid, etc.
6. Carbolic acid (phenol) liquid, etc.
7. Compounds, tree or wood killing, liquid.
8. Dinitrobenzol, liquid.
9. Dinitrophenol solutions.
10. Drugs, chemicals, medicines or cosmetics, N.O.S. (liquid).
11. Insecticide, liquid.
12. Mercuric iodide solution.
13. Nicotine hydrochloride, etc.
14. Nitrobenzol, liquid, etc.
15. Nitroxylol.
16. Parathion, liquid, etc.
17. Parathion mixtures, liquid, etc.
18. Poisonous liquids, N.O.S., etc.
19. Sodium arsenite (solution), liquid.
20. Tetraethyl pyrophosphate, liquid.
21. Tetraethyl pyrophosphate mixtures, liquid, etc.

(1) In columns 4, 5, 6 and 7, wherever applicable, delete "Fiber drum (ICC–21C), etc." and insert in lieu thereof:

Fiber drum (ICC–21C) WIC, glass, not over 1 gal. cap. ea.; total gr. wt. not over 250 lb.

C. Amend the following items as indicated:

1. Aldrin mixtures, dry, etc.
2. Ammonium arsenate, solid.
3. Arsenic acid, solid, etc.
4. Arsenic bromide, solid, etc.
5. Arsenic sulfied (powder) solid.
6. Arsenical compounds or mixtures, N.O.S. solid.
7. Bordeaux arsenites, solid, etc.
8. Cocculus, solid (fishberry), etc.
9. Cyanides or cyanide mixtures, dry, etc.
10. Dinitrobenzol, solid, etc.
11. Drugs, chemicals, medicines or cosmetics, N.O.S. (solid).
12. Ferric arsenate, solid, etc.
13. Insecticide, dry, etc.
14. Lead arsenate, solid, etc.
15. *Mercury compounds, solid.*
16. Nicotine salicylate.
17. Parathion mixtures, dry.
18. Poisonous solids, N.O.S.
19. Potassium arsenate, etc.
20. Tetraethyl pyrophosphate, mixture, dry.
21. Thallium salts, solid, etc.
22. Zinc arsenate, etc.

(1) In columns 4, 5, 6 and 7, delete "Fiber drums (ICC–21C), etc." and insert in lieu thereof:

Fiber drum (ICC–21C) not over 250 lb. gr. wt.

D. Amend "Methyl bromide, liquid, etc.", as follows:

(1) In column 1, after "Methyl bromide, liquid (*bromomethane*), etc.", insert the following:

Methyl bromide mixtures, liquid (*Containing no Class A poison*).

13. Section 146.25–300 *Table H—Classification: Class C, tear gas or irritating substances* is amended as follows:

A. Amend the following items as indicated:

1. Brombenzyl cyanide, liquid.
2. Chloracetophenone, gas, liquid, or solid, etc.

(1) In column 4, under "Steel drums or barrels", delete "(ICC–5, 5A, 5B, etc.", and insert in lieu thereof:

(ICC–5, 5A, 5B, 5C, 6B, 6C) not over 110 gal. cap.

B. Amend the following items as indicated:

1. Poisonous liquids, N.O.S., etc.
2. Tear gas material, liquid or solid, N.O.S., etc.

(1) In column 4, under "Steel drums or barrels", delete "(ICC–5, 5A, 5B, etc.", and insert in lieu thereof:

(ICC–5, 5A, 5B, 5C, 6B, 6C) not over 110 gal. cap. and not over 1760 lb. gr. wt.

**§ 147.05–100 [Amended]**

14. Section 147.05–100 *Table S—Classification: Ships' stores and supplies of a dangerous nature* is amended as follows:

A. Delete the entry "Starting fluid, etc.", and all text in table relating thereto.

B. After "Drugs and medicines, etc.", insert the following:

(1) In column 1, insert:

Engine starting fluid, inflammable, in metal containers. Not permitted in gelatin capsules.

(2) In column 2, insert:

*Used for starting engines.*
*Flashpoint usually below 0° F.*
Must be packaged in metal containers that will not rupture when exposed to temperatures of 200° F. or below.
Protect from excessive temperature.

(3) In column 3, insert:

No label required.

(4) In columns 4, 5, 6 and 7, insert:

Stowage: In metal locker selected and supervised by the chief engineer, with the knowledge and approval of the master.

(R.S. 4405, as amended, 4462, as amended, 4472, as amended; 46 U.S.C. 375, 416, 170. Interpret or apply sec. 3, 68 Stat. 675; 50 U.S.C. 198, E.O. 10402, 17 F.R. 9917, 3 CFR 1952 Supp. Treasury Department Orders 120, July 31, 1950, 15 F.R. 6521; 167–14, November 26, 1964, 19 F.R. 8026)

## Chapter IV—Federal Maritime Commission

### SUBCHAPTER A—GENERAL PROVISIONS

[General Order 8, Part II; Amdt. 2]

### PART 502—RULES OF PRACTICE AND PROCEDURE

### Fees and Charges for Special Services

On pages 15380 and 15381 of the FEDERAL REGISTER of November 17, 1964, there was published a notice of proposed rule making to issue regulations governing fees and charges for special services. Interested persons were given the opportunity to submit written comments, suggestions, or objections with respect to the proposed regulations.

No objections have been received and no comments have been submitted.

The proposed regulations are hereby adopted without change, to be effective January 1, 1965.

THOMAS LISI,
*Secretary.*

**§ 502.6 Fees and charges for special services.**

(a) *Policy and services available.* Pursuant to policies established by the Congress, the Government's costs for special services furnished to individuals or firms who request such service are to be recovered by the payment of fees (Act of August 31, 1951—5 U.S.C. 140). Upon written request directed to and within the discretion of the Federal Maritime Commission, there are available upon payment of the fees hereinafter prescribed, with respect to documents subject to inspection, services as follows:

(1) Copying records/documents.

(2) Certification of copies of documents.

(3) Records search.

(4) Subscriptions to publications of the Commission.

(5) Transcripts of hearings.

(b) *Payment of fees and charges.* The fees charged for special services may be paid by check, draft, or postal money order, payable to the Federal Maritime Commission, except for charges for transcript of hearings. Fees for transcript of hearings are payable to the firm providing the services.

(c) *Fees for services.* The basic fees set forth below provide for documents to be mailed with ordinary first class postage prepaid. If copy is to be transmitted by registered, certified, air or special delivery mail, postage therefor will be added to the basic fee. Also, if special handling or packaging is required, costs thereof will be added to the basic fee.

(1) The copying of records and documents will be available at the rate of 25 cents per page (one side) by the Xerox process, limited to size 8¼" x 14" or smaller.

(2) The certification and validation (with Federal Maritime Commission seal) of documents filed with or issued by the Commission will be available at $1.00 for each such certification.

(3) To the extent that time can be made available, records and information search will be performed for reimbursement at the following rates:

(i) By clerical personnel at a rate of $4.00 per person per hours.

(ii) By professional personnel at an actual hourly cost basis to be established prior to search.

(iii) Minimum charge $2.00.

(4) Annual subscriptions to Commission publications for which there are regular mailing lists are available at the charges indicated below. Subscriptions will be available effective Jaunary 1, 1965, for a one-year term, and for calendar year terms thereafter. Subscriptions for periods of less than a full calendar year will be prorated on a quarterly basis. No provision is made for refund upon cancellation of subscription by a purchaser.

(i) Orders, notices, rulings and decisions (initial and final) issued by hearing examiners and by the Commission in all formal docketed proceedings before the Federal Maritime Commission are available at an annual subscription rate of $30.00.

(ii) Final decisions (only) issued by the Commission in all formal docketed proceedings before the Commission are available at an annual subscription rate of $10.00.

(iii) General Orders of the Commission, including all proposed and final rules, are available at an annual subscription rate of $2.00 (initial annual subscription will entitle the purchaser to a complete set of current General orders issued to date).

(iv) Exceptions: No charge will be made by the Commission for notices, decisions, orders, etc., required by law to be served on a party to any proceeding or matter before the Commission. No charge will be made for single copies of Commission publications individually requested, in person or by mail. In addition a subscription to Commission mailing lists will be entered without charge when one of the following conditions is present:

(a) The furnishing of the service without charge is an appropriate courtesy to a foreign country or international organization.

(b) The recipient is another government agency, Federal, State or local, concerned with the domestic or foreign commerce by water of the United States or, having a legitimate interest in the proceedings and activities of the Commission.

(c) The recipient is a college or university.

(d) The recipient does not fall into 1, 2, or 3 above, but is determined by the Commission to be appropriate in the interest of its program.

(5) Transcripts of testimony and of oral argument are furnished by a non-Government contractor, and may be purchased directly from the reporting firm.

THOMAS LISI,
*Secretary.*

[F.R. Doc. 64-13102; Filed, Dec. 21, 1964; 8:50 a.m.]

# Title 47—TELECOMMUNICATION

## Chapter I—Federal Communications Commission

[Docket No. 15683; FCC 64-1167]

## PART 73—RADIO BROADCAST SERVICES

### Table of Assignments; Television Broadcast Stations

In the matter of amendment of § 73.606, Table of Assignments, Television Broadcast Stations (Redding, Calif.); Docket No. 15683, RM-606.

*Report and order.* 1. The Commission has before it for consideration its notice of proposed rule making, released October 29, 1964 (FCC 64-996), proposing to reserve for educational use Channel 9, Redding, Calif., where it is now assigned unreserved. Northern California Educational Television Association, Inc. (NCETA) is already occupying the channel, its Station KIXE-TV having commenced regular operation as a noncommercial educational broadcaster on October 5, 1964, under temporary authority. NCETA was the petitioner seeking the reservation and the only party filing in response to the notice.

2. Redding, with a population of 12,773, is the county seat of Shasta County, which has a population of 59,468 (1960 U.S. Census). The area is served by two commercial stations, KVIP-TV, Channel 7, Redding, and KHSL-TV, Channel 12, Chico, Calif. In an earlier petition NCETA pointed out that the northern portion of the state is not presently served by and has no allocation for an educational television station and asserted that because of the population pattern of the north state area, with small and relatively isolated schools, an instructional facility such as an educational television station would be "an even greater servant to education" than a similar facility in a metropolitan area.

3. Petitioner has stated that it will operate on a noncommercial educational basis, with plans for instructional service to the schools, telecourses to provide in-service courses for teachers, and cultural enrichment programs. In its comments, petitioner reports that it is at present furnishing to schoolrooms in nine counties of northern California educational programs originated by Stations KQED-TV, San Francisco, and KVIE-TV, Sacramento, and Chico State College, Chico, Calif.; also that it is now assembling its staff and expects to have its studios and regular program operations in effect in the near future. We also note that the California educational television authority (California State Television Advisory Committee) strongly supported this Channel 9 reservation in a statement filed in Docket No. 14229, the overall UHF proceeding.

4. The Commission is of the view that adoption of the proposal would enhance opportunities for needed educational television service in the northern California area, and that a reservation of Channel 9 for noncommercial educational use at Redding would serve the public interest.

5. In view of the foregoing: *It is ordered*, That, effective January 25, 1965, the Table of Assignments contained in § 3.606 of the Commission's rules and regulations is amended, insofar as the community named is concerned, to read as follows:

| City: | Channel No. |
|---|---|
| Redding, Calif | 7, *9 |

6. The action herein is taken pursuant to authority found in sections 4(i), 303 and 307(b) of the Communications Act of 1934, as amended.

(Secs. 4, 303, 307, 48 Stat. 1066, as amended, 1082, as amended, 1083; 47 U.S.C. 154, 303, 307)

Adopted: December 16, 1964.

Released: December 17, 1964.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
*Secretary.*

[F.R. Doc. 64-13110; Filed, Dec. 21, 1964; 8:48 a.m.]

# Proposed Rule Making

## DEPARTMENT OF THE TREASURY

### Internal Revenue Service

[26 CFR Part 1]

### INCOME TAX

### Treatment of Carrying Charges With Respect to the Installment Method of Accounting

Notice is hereby given, pursuant to the Administrative Procedure Act, approved June 11, 1946, that the regulations set forth in tentative form below are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments or suggestions pertaining thereto which are submitted in writing, in duplicate, to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C., 20224, within the period of 30 days from the date of publication of this notice in the FEDERAL REGISTER. Any person submitting written comments or suggestions who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit his request, in writing, to the Commissioner within the 30-day period. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the FEDERAL REGISTER. The proposed regulations are to be issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

In order to conform the Income Tax Regulations (26 CFR Part 1) under section 453 of the Internal Revenue Code of 1954 to section 3 of the Act of August 31, 1964 (Public Law 88-539, 78 Stat. 746), and to make certain other changes, such regulations are amended as follows:

PARAGRAPH 1. Section 1.453 is amended by adding a new subsection (e) to section 453, by revising subsections (a) and (d)(4) of section 453, by adding a new paragraph (5) to section 453(d) and by revising the historical note. Such added and amended provisions read as follows:

**§ 1.453 Statutory provisions; installment method.**

Sec. 453. *Installment method*—(a) *Dealers in personal property*—(1) *In general.* Under regulations prescribed by the Secretary or his delegate, a person who regularly sells or otherwise disposes of personal property on the installment plan may return as income therefrom in any taxable year that proportion of the installment payments actually received in that year which the gross profit, realized or to be realized when payment is completed, bears to the total contract price.

(2) *Total contract price.* For purposes of paragraph (1), the total contract price of all sales of personal property on the installment plan includes the amount of carrying charges or interest which is determined with respect to such sales and is added on the books of account of the seller to the established cash selling price of such property. This paragraph shall not apply with respect to sales of personal property under a revolving credit type plan or with respect to sales or other dispositions of property the income from which is, under subsection (b), returned on the basis and in the manner prescribed in paragraph (1).

* * * * * * *

(d) *Gain or loss on disposition of installment obligations.* * * *

(4) *Effect of distribution in certain liquidations*—(A) *Liquidations to which section 332 applies.* If—

(i) An installment obligation is distributed by one corporation to another corporation in the course of a liquidation, and

(ii) Under section 332 (relating to complete liquidations of subsidiaries) no gain or loss with respect to the receipt of such obligation is recognized in the case of the recipient corporation,

Then no gain or loss with respect to the distribution of such obligation shall be recognized in the case of the distributing corporation. If the basis of the property of the liquidating corporation in the hands of the distributee is determined under section 334(b)(2) then the preceding sentence shall not apply to the extent that under paragraph (1) gain to the distributing corporation would be considered as gain to which section 341(f) or section 1245(a) or 1250(a) applies.

(B) *Liquidations to which section 337 applies.* If—

(i) An installment obligation is distributed by a corporation in the course of a liquidation, and

(ii) Under section 337 (relating to gain or loss on sales or exchanges in connection with certain liquidations) no gain or loss would have been recognized to the corporation if the corporation had sold or exchanged such installment obligation on the day of such distribution,

Then no gain or loss shall be recognized to such corporation by reason of such distribution. The preceding sentence shall not apply to the extent that under paragraph (1) gain to the distributing corporation would be considered as gain to which section 341(f) or section 1245(a) or 1250(a) applies.

(5) *Life insurance companies.* In the case of a disposition of an installment obligation by any person other than a life insurance company (as defined in section 801(a)) to such an insurance company or to a partnership of which such an insurance company is a partner, no provision of this subtitle providing for the nonrecognition of gain shall apply with respect to any gain resulting under paragraph (1). If a corporation which is a life insurance company for the taxable year was (for the preceding taxable year) a corporation which was not a life insurance company, such corporation shall, for purposes of this paragraph and paragraph (1), be treated as having transferred to a life insurance company, on the last day of the preceding taxable year, all installment obligations which it held on such last day. A partnership of which a life insurance company becomes a partner shall, for purposes of this paragraph and paragraph (1), be treated as having transferred to a life insurance company, on the last day of the preceding taxable year of such partnership, all installment obligations which it holds at the time such insurance company becomes a partner.

(e) *Carrying charges not included in total contract price.* If the carrying charges or interest with respect to sales of personal property, the income from which is returned under subsection (a)(1), is not included in the total contract price, payments received with respect to such sales shall be treated as applying first against such carrying charges or interest. This subsection shall not apply with respect to sales or other dispositions of property the income from which is, under subsection (b), returned on the basis and in the manner prescribed in subsection (a)(1).

[Sec. 453 as amended by sec. 27, Technical Amendments Act 1958 (72 Stat. 1624); sec. 13(f)(5), Rev. Act 1962 (76 Stat. 1035); secs. 222(a) and 231(b)(5), Rev. Act 1964 (78 Stat. 75, 105); sec. 1(b)(2), Act of Aug. 22, 1964 (Pub. Law 88-484, 78 Stat. 597); sec. 3, Act of Aug. 31, 1964 (Pub. Law 88-539, 78 Stat. 746)]

PAR. 2. Section 1.453-2 is amended by revising paragraph (c) and (d)(2)(ii), the material preceding subdivision (i) of paragraph (d)(6), paragraph (d)(6)(v), by revising example (2) in paragraph (d)(4), and by adding example (3) to paragraph (d)(4). Such amended and added provisions read as follows:

**§ 1.453-2 Special rules applicable to dealers in personal property.**

* * * * * * *

(c) *Installment income of dealers in personal property*—(1) *In general.* The income from sales on the installment plan of a dealer, that is, a person regularly engaged in the sale of personal property on the installment plan, may be ascertained by treating as income that proportion of the total payments received in the taxable year from sales on the installment plan (such payments being allocated to the year against the sales of which they apply) which the gross profit realized or to be realized on the total sales on the installment plan made during each year bears to the total contract price of all such sales made during that respective year. However, if the dealer demonstrates to the satisfaction of the district director that income from sales on the installment plan is clearly reflected, the income from such sales may be ascertained by treating as income that proportion of the total payments received in the taxable year from sales on the installment plan (such payments being allocated to the year against the sales of which they apply) which either (i) the gross profit realized or to be realized on the total credit sales made during each year bears to the total contract price of all credit sales during that respective year, or (ii) the gross profit realized or to be realized on all sales made during each year bears to the total contract price of all sales made during that respective year. See, however, paragraph (d)(6)(vi) of this section for rules permitting, under certain circumstances, all sales under a revolving credit

plan to be considered as having been made in the taxable year. A dealer who desires to compute income by the installment method shall maintain accounting records in such a manner as to enable an accurate computation to be made by such method in accordance with the provisions of this section, section 446, and § 1.446–1.

(2) *Gross profit and total contract price.* For purposes of subparagraph (1) of this paragraph, in computing the gross profit realized or to be realized on the total sales on the installment plan, there shall be included in the total selling price and, thus, in the total contract price of all such sales,

(i) The amount of carrying charges or interest which is determined at the time of each sale and is added to the established cash selling price of such property and is treated as part of the selling price on the books of the seller and for customer billing purposes, and

(ii) In the case of sales made in taxable years beginning on or after January 1, 1960, the amount of carrying charges or interest determined with respect to such sales which are added contemporaneously with the sale on the books of account of the seller but are treated as periodic service charges for customer billing purposes.

Any change in the amount of the carrying charges or interest in a year subsequent to the sale will not affect the computation of the gross profit for the year of sale but will be taken into account at the time the carrying charges or interest are adjusted. However, this subparagraph does not apply to sales of personal property under a revolving credit plan described in paragraph (d)(1) of this section, nor to sales described in section 453(b)(1) and paragraph (c) of § 1.453–1. The application of this subparagraph to carrying charges or interest described in subdivision (ii) of this subparagraph may be illustrated by the following example:

*Example.* X Corporation makes sales on the traditional installment plan. The customer's order specifies that the total price consists of a cash price plus a "time price differential" of 1½ percent per month on the outstanding balance in his account and he is billed in this manner. On its books and for purposes of reporting to stockholders, X Corporation consistently makes the following entries each month when it records its sales. A debit entry is made to accounts receivable (for the total price) and balancing credit entries are made to sales (for the established selling price) and to a reserve account for collection expense (for the amount of the time price differential). In computing the gross profit realized or to be realized on the total sales on the installment plan, the total selling price and, thus, the total contract price for purposes of this paragraph would, with respect to sales made in taxable years beginning on or after January 1, 1960, include the time price differential.

(3) *Carrying charges not included in total contract price.* In the case of sales by dealers in personal property made during taxable years beginning after December 31, 1963, the income from which is returned on the installment method, if the carrying charges or interest with respect to such sales is not included in the total contract price, payments received with respect to such sales shall be treated as applying first against such carrying charges or interest. For application of this rule to revolving credit sales, see paragraph (d)(6)(v) of this section.

(d) *Revolving credit plans.* • • •

(2) • • •

(ii) For taxable years ending before January 31, 1964, a taxpayer who has reported for income tax purposes all or a portion of sales under a revolving credit plan as sales on the installment method may apply the percentage obtained for the first taxable year ending on or after such date in determining the percentage of charges under a revolving credit plan for such prior taxable year (or years) which will be treated as sales on the installment plan. However, in computing the percentage to be applied in determining the percentage of charges under a revolving credit plan which will be treated as sales on the installment plan for such prior taxable year (or years), the rule stated in paragraph (c)(3) of this section shall not apply. See subparagraph (6)(v) of this paragraph for rules relating to the application of payments to finance charges for such prior taxable years.

• • • • •

(4) • • •

*Example* (2). This example is applicable with respect to sales made during taxable years beginning before January 1, 1964. Under the terms of the taxpayer's revolving credit plan, payments are required in accordance with the following schedule:

| *Unpaid balance* | *Required monthly payment* |
|---|---|
| 0– $99.99 | $20 |
| $100–$199.99 | 40 |
| $200–$299.99 | 60 |

Customer B's revolving credit ledger account for the period beginning on September 21, 1963 and ending February 20, 1964 shows the following:

| Month ending— | Aggregate sales in month [1] | Returns and allowances | Payments | Finance charges | Balance |
|---|---|---|---|---|---|
| Oct. 20 | $55.00 | 0 | 0 | 0 | $55.00 |
| Nov. 20 | 45.00 | 0 | $20.00 | $0.35 | 80.35 |
| Dec. 20 | 20.00 | 0 | 20.00 | .60 | 80.95 |
| Jan. 20 | 26.00 | $5.00 | 20.00 | .61 | 82.56 |
| Feb. 20 | 0 | 10.00 | 72.56 | 0 | 0 |

[1] Including sales of personal property and nonpersonal property sales.

The three $20 payments and the $5 return or allowance made in the billing-months ending in the taxable year are applied, under the rules in subparagraph (6)(v), to liquidate the earliest outstanding charges, first to the $55 aggregate of sales in the billing-month ending October 20 and next to $10 of the aggregate of sales made in the billing-month ending November 20. Thus, the balance of the account as of the close of the billing-month ending January 20, $82.56, is made up as follows:

| | |
|---|---|
| Remainder of sales in billing-month ending Nov. 20 ($45—$10) | $35.00 |
| Finance charge for billing-month ending Nov. 20 | .35 |
| Sales for billing-month ending Dec. 20 | 20.00 |
| Finance charge for billing-month ending Dec. 20 | .60 |
| Sales for billing-month ending Jan. 20 | 26.00 |
| Finance charge for billing-month ending Jan. 20 | .61 |
| | 82.56 |

The sales of $35 remaining from the aggregate of sales for the billing-month ending November 20 meet the requirements of subparagraph (3)(i) of this paragraph because the aggregate of sales charged during such billing-month ($45) exceeds the required monthly payment ($20), and such sales meet the requirements of subparagraph (3)(ii) of this paragraph because the first payment after the billing-month of sale ($20) is an amount less than the balance of the account as of the close of such month ($80.35). Therefore, $35 of sales will be treated as sales on the installment plan. The $20 aggregate of sales charged during the billing-month ending December 20 does not meet the requirements of subparagraph (3)(i) of this paragraph because it is in an amount which does not exceed the required monthly payment ($20). (The finance charge of $0.60 added in the billing-month does not enter into the determination of the aggregate of sales for the month because the term "sales" (as defined in subparagraph (6)(i) of this paragraph) does not include finance charges). The $26 aggregate of sales for the billing-month ending January 20 does not meet the requirements of subparagraph (3)(ii) of this paragraph because the first payment after such billing-month ($72.56) was equal to the balance of the account as of the close of such billing-month ($72.56). For this purpose, the balance of $82.56 is reduced by the $10 return or allowance which was credited after the billing-month of sale and before February 20. Thus, of the $82.56 balance of B's account as of the close of the last billing-month ending within corporation X's taxable year, $35 will be treated as sales on the installment plan for purposes of determining the percentage provided for in subparagraph (2) of this paragraph.

*Example* (3). This example is applicable with respect to sales made during taxable years beginning after December 31, 1963. Assume the facts in example (2), except that Customer B's revolving credit ledger account is for the period beginning on September 21, 1964 and ending February 20, 1965. Since payments received are first used to liquidate any outstanding finance charges under the rule in subparagraph (6)(v), the $20 payment in December liquidated the $0.35 finance charge accrued at the end of the November billing-month and the $20 payment in January liquidated the $0.60 finance charge accrued at the end of the December billing-month. The balance of the three $20 payments ($59.05) and the $5 return or allowance are applied (under the rules in subparagraph (6)(v)) to liquidate the earliest outstanding sales, first to the $55 aggregate of sales in the billing-month ending October 20 and next to $9.05 of the aggregate of sales made in the billing-month ending November 20. Thus, the balance of the account as of the close of the billing-month ending January 20, $82.56, is made up as follows:

| | |
|---|---|
| Remainder of sales in billing-month ending Nov. 20 ($45—$9.05) | $35.95 |
| Sales for billing-month ending Dec. 20 | 20.00 |
| Sales for billing-month ending Jan. 20 | 26.00 |
| Finance charge for billing-month ending Jan. 20 | .61 |
| | 82.56 |

The sales of $35.95 remaining from the aggregate of sales for the billing-month ending November 20 meet the requirements of subparagraph (3)(i) of this paragraph because the aggregate of sales charged during such billing-month ($45) exceeds the required monthly payment ($20), and such sales meet the requirements of subparagraph (3)(ii) of this paragraph because the first payment after the billing-month of sale ($20) is an amount less than the balance of the account as of the close of such month ($80.35). Therefore, $35.95 of sales will be treated as sales on the installment plan. The $20 aggregate of sales charged during the billing-month ending December 20 does not meet the requirements of subparagraph (3)(i) of this paragraph because it is in an amount which does not exceed the required monthly payment ($20). The $26 aggregate of sales for the billing-month ending January 20 does not meet the requirements of subparagraph (3)(ii) of this paragraph because the first payment after such billing-month ($72.56) was equal to the balance of the account as of the close of such billing-month ($72.56). For this purpose, the balance of $82.56 is reduced by the $10 return or allowance which was credited after the billing-month of sale and before February 20. Thus, of the $82.56 balance of B's account as of the close of the last billing-month ending within corporation X's taxable year $35.95 will be treated as sales on the installment plan for purposes of determining the percentage provided for in subparagraph (2) of this paragraph.

• • • • •

(6) For purposes of this paragraph—

• • • • •

(v) Except as otherwise provided in this subdivision, each payment received from a customer under a revolving credit plan before the close of the last billing-month ending in the taxable year shall be applied to liquidate the earliest outstanding charges under such plan, notwithstanding any rule of law or contract provision to the contrary. For purposes of determining which charges remain in the balance of an account at the end of the last billing-month ending in the taxable year, the taxpayer may apply returns and allowances which are credited before the close of the last billing-month ending in the taxable year either (*a*) to liquidate or reduce the charge for the specific item so returned or for which an allowance is permitted, or (*b*) to liquidate or reduce the earliest outstanding charges. The method so selected for applying returns and allowances shall be followed on a consistent basis from year to year unless the district director consents to a change. Additionally, finance or service charges which are computed on the basis of the balance of the account at the end of the previous billing-month (usually reduced by payments during the current billing-month) are accrued at the end of the current billing-month and are therefore considered, for purposes of determining the earliest outstanding charges, as charged to the account after any sales made during the current billing month. However, for purposes of determining which charges remain in the balance of an account at the end of the last billing-month ending in a taxable year which began after December 31, 1963, payments received during such year shall be applied first against any finance or service charges which were outstanding at the time such payment was received. The preceding sentence shall not apply with respect to a computation made for purposes of applying the rule described in subparagraph (2)(ii) of this paragraph.

# DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

## Food and Drug Administration

## [ 21 CFR Part 36 ]

[Docket No. FDC–73]

## SHELLFISH; FROZEN RAW BREADED AND LIGHTLY BREADED SHRIMP; DEFINITIONS AND STANDARDS OF IDENTITY

### Proposed Findings of Fact and Tentative Order

In the matter of establishing definitions and standards of identity for frozen raw breaded shrimp and frozen raw lightly breaded shrimp:

Notice of proposed rule making was published in the FEDERAL REGISTER of March 31, 1961 (26 F.R. 2722), setting forth proposals of the National Fisheries Institute, Inc., 1614 Twentieth Street NW., Washington 9, D.C., and the National Shrimp Breaders Association, Inc., 624 South Michigan Avenue, Chicago 5, Ill., representing members who are processors of breaded shrimp, for the establishment of definitions and standards of identity for frozen raw breaded shrimp. An order was published in the FEDERAL REGISTER of May 7, 1963 (28 F.R. 4556), promulgating identity standards for frozen raw breaded shrimp (21 CFR 36.30) and for frozen raw lightly breaded shrimp (21 CFR 36.31). Objections to the order were filed, asserting grounds for a public hearing on several issues, and an announcement was published on July 6, 1963 (28 F.R. 6915) staying the order. In response to the notice in the FEDERAL REGISTER of December 21, 1963 (28 F.R. 13940) and following a notice of postponement published in the issue of January 11, 1964 (29 F.R. 297), a hearing was held.

Based upon the evidence received at the hearing and having given consideration to the written arguments and suggested findings, some of which were adopted in whole or in part and some of which were rejected, the Commissioner, pursuant to the authority provided in the Federal Food, Drug, and Cosmetic Act (secs. 401, 701(e), 52 Stat. 1046, 1055 as amended, 70 Stat. 919; 21 U.S.C. 341, 371(e)) delegated to him by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), proposes that the following findings of fact, conclusions, and definitions and standards of identity for frozen raw breaded shrimp and frozen raw lightly breaded shrimp be issued:

*Findings of fact.*[1] Frozen raw breaded shrimp and frozen raw lightly breaded shrimp are prepared by coating appropriate forms of peeled shrimp with safe and suitable batter and breading ingredients and then freezing. Only the "tail" portion of shrimp is used. The tail portions are prepared in the following forms:

a. Split or butterfly, with tail fins remaining and with or without first adjoining shell segment.

b. Split or butterfly, tail fins and all shell segments removed.

c. Round, unsplit shrimp with tail fins remaining and with or without first adjoining shell segment.

d. Round, unsplit shrimp, tail fins and all shell segments removed.

e. Pieces of shrimp, tail fins and all shell segments removed.

f. Composited units consisting of two or more shrimp pieces or whole shrimp or a combination of both with tail fins and all shell segments removed.

Breaded shrimp is a relatively new commercial food, having been first commercially distribute d about 1947 or 1948. Breaded shrimp is prepared from either iced or frozen shrimp or both and from one or more of the so-called white, pink, or brown varieties. Shrimp are obtained from many different parts of the world (R. 151–170, 228, 274; Ex. 2, 27).

2. When frozen raw breaded shrimp first appeared on the market it contained appreciably more shrimp material than breading. Due to many factors, including economics and product acceptability, the percentage of shrimp material in the food decreased. However, a small portion of the production was maintained at a higher percentage of shrimp for those purchasers, primarily volume purchasers, such as institutional users, who wanted such higher shrimp percentage (R. 124, 170, 234).

3. After negotiations with industry, the United States Department of the Interior, through its Fish and Wildlife Service, caused to be published United States Standards for Grades of Frozen Raw Breaded Shrimp with an effective date of March 1, 1958. These standards were recodified and republished on July 1, 1958, by the United States Department of the Interior. Within 2 or 3 years after publication of the grade

[1] The citations following each finding of fact refer to the pages of the transcript of testimony and the exhibits received in evidence at the hearing.

standards, approximately 85 percent of the production of breaded shrimp was being inspected by the United States Department of the Interior for compliance. Among other requirements, the product description of the standards for grades requires a minimum of 50 percent shrimp material as determined by the procedure set out in the grade standards (R. 608; Ex. 26).

4. The Food and Drug Administration order establishing the definitions and standards of identity for frozen raw breaded shrimp and frozen raw lightly breaded shrimp invited persons claiming to be adversely affected by such order to submit relevant objections specifying with particularity that part of the order to which objection was taken. In the event a hearing should be required on an issue or issues raised by objectors, they were to be prepared to support such objections at the hearing.

A person claiming to be adversely affected by the order objected to the requirement that frozen raw breaded shrimp contain not less than 50 percent shrimp material. He proposed instead that the minimum shrimp material for the food be set at 60 percent. He also objected because the order did not require the size of the raw shrimp used to be listed on the label; because standards were not established for size based on the number of shrimp per pound; because the order did not require the numerical percentage of breading actually in the food to be declared on the label; because it did not require label statement of the geographic origin of the shrimp; and because it did not limit the time raw frozen shrimp may be held in storage prior to breading.

Others claiming to be adversely affected objected to the order because it did not provide for optional use of alternative names for the food designated as "breaded shrimp pieces"; because it did not provide for the optional use of the alternative designation "breaded round fantail shrimp" for the food designated as "breaded round shrimp"; because it did not specify that size of those large shrimp that the order permitted to be parenthetically designated as "prawns"; and because the method for determination of the percentage of shrimp material in the food included the use of a rubber-tipped glass stirring rod.

The objections were duly noted and set out as issues for the hearing. At the hearing, no objectors or representatives of the objectors, nor any other person supported the objections listed in this finding of fact. Accordingly, there is no basis in the record for changing the order as it concerns these issues (Ex. 2, 4).

5. Some consumers demand breaded shrimp with an appreciably higher proportion of shrimp material than coating. Such lightly breaded shrimp containing not less than 70 percent shrimp material can be prepared. In Federal Specifications, provision is made for the purchase of it and a purchase specification by one of the large grocery chains provides for lightly breaded shrimp with not less than 70 percent shrimp material. However, there was evidence adduced at the hearing that at the 70 percent shrimp material level the present state of the technique of the industry is such that:

a. Only larger size shrimp would satisfactorily lend themselves to being lightly breaded.

b. The coating often shows a number of cracks and voids so that the food would not meet the requirements for Grade A, as set out in the United States Standards for Grades of Frozen Raw Breaded Shrimp.

c. The need for "hand" breading this food increases the price considerably.

d. Packers produce a 70 percent lightly breaded shrimp only upon a customer's order.

On the other hand, breaded shrimp prepared with not less than 65 percent shrimp material substantially overcomes the problems arising with the 70 percent product. Lightly breaded shrimp at the level of 65 percent shrimp material is recognizably different from ordinary breaded shrimp in which the shrimp material amounts to only slightly more than 50 percent (R. 124, 127, 189–192, 219, 234, 235, 238, 320, 325, 532–535, 574, 597–605, 874–876, 918, 1185–1188, 1241, 1244, 1246, 1249, 1250, 1253–1258; Ex. 2, 6, 20, 29–38).

6. Section 403(f) of the Federal Food, Drug, and Cosmetic Act requires mandatory labeling to be placed on food labels with such prominence and conspicuousness as to render it likely to be read and understood under customary conditions of purchase and use. Section 1.9(a) of Title 21, Code of Federal Regulations, points out that this statutory requirement may be offended if required labeling is not shown "on the part or panel of the label which is presented or displayed under customary conditions of purchase." Frozen raw breaded shrimp is usually packaged and sold in six-sided packages. Two of the rectangular panels opposite to each other each have a much greater surface area than any of the other four panels. The top one of these panels is ordinarily used as the principal display panel. Principal display panels are easily recognized since they usually carry the manufacturer's brand name, the name of the food in large letters, and often a colorful vignette of the food. In boxes of frozen raw breaded shrimp this panel is sometimes referred to as the main or front panel. Designers of labels and manufacturers of the food intend for this panel to be the one displayed at the point of sale in order to catch the purchaser's eye. It is recognized that sometimes more than one panel is intended for display purposes. Section 403(f) of the act and § 1.9(a) of the regulations apply not only to foods for which there have been established standards of identity but also to nonstandardized foods (R. 179, 180, 290–292; Ex. 21, 22, 41–44, 46–49):

7. Many foods have been defined and standards of identity established in accordance with section 401 of the act. Many of the standards require certain optional ingredients to be listed on the label. A few standardized foods have lengthy lists of optional ingredients providing for many, if not all, to be designated for label declaration. Frozen raw breaded shrimp has a coating that may consist of many ingredients. No objections were received to the order establishing the standard as it concerns the coating ingredients and the provision that it shall be mandatory that they all be listed on labels. The length of the listing of optional ingredients used should not preclude its prominent and conspicuous display. There is substantial evidence of record supporting the placement of the optional ingredient listing on the principal display panel or panels comprising the surface of the label usually displayed to the consumer at the time of purchase. Questions raised concerning the significance and meaning to the consumer of some of the chemical names of certain of the optional ingredients were not sufficient to overcome the need for ready availability of such information to the consumer who seeks such information. The fact that many labels presently used on frozen raw breaded shrimp and other nonstandardized foods do not present the ingredient listing on the principal display panel does not overcome the statutory requirement that the listing be prominent and conspicuous. Evidence of record revealed that the changing of labels or the development of new labels is expensive. However, despite the costs, witnesses revealed that labels are constantly being revised and new labels developed. Some witnesses believed that the order as objected to had required that wherever and as often as the name of the food appeared on the label the ingredient listing must also appear. It was made clear that such listing is to be required only upon the principal display panel (or panels). If the ingredient listing is conspicuously displayed on the principal display panel or panels of the packages of frozen raw breaded shrimp, it is not necessary to require that such labeling immediately precede or follow the name of the food, without intervening written, printed, or graphic matter. It was asserted that it would be difficult to locate and to read the ingredient listing, regardless of position placement on the label, under certain adverse conditions of frost, light, etc. It is not reasonable to conclude that if such adverse conditions sometimes develop it is unnecessary to prescribe the position placement of such listing. On the other hand, it would be reasonable and in the interest of consumers to prescribe the location of the ingredient listing so that under normal and expected conditions of sale such listing may be easily located and read (R. 66, 72, 78, 80, 81, 88, 94, 142, 180, 183, 186, 241–243, 537, 538, 542, 543, 548, 578, 579, 591, 594, 595, 709, 1070, 1071, 1073, 1075–1080, 1083, 1086, 1090, 1091, 1093, 1095, 1097, 1126, 1127, 1130, 1136, 1138, 1145, 1146, 1160, 1161, 1171, 1174; Ex. 2, 41–44, 46–49).

8. A form of frozen raw breaded shrimp is prepared from two or more whole shrimp, that is, the tail portion of the shrimp with all shell and tail fins removed, or pieces of such shrimp, or both. These units are compressed in a mold, frozen, and coated with a batter and breading. Frozen units, prior to coating, may be cut into smaller units. One such product, prepared from blocks, in its finished form is in the shape of fish sticks and is labeled "shrimp sticks." Another such product is prepared from shrimp caught in Alaskan waters. For this latter product the tail portions are peeled, tail fins removed, placed in a mold, and frozen. The frozen composited units of this shrimp material prepared in Alaska are termed "logs." The logs, in frozen form, are shipped to Ponchatoula, La., where they are then sliced perpendicularly to their long axes. The slices are then individually coated with a batter and breading, refrozen, packaged, and distributed. Each slice consists of many pieces of shrimp. In the approximately two years this product had been on the commercial market prior to the date of hearing, the form and size of the individual serving unit was prepared to resemble that of a "jumbo" shrimp of about "10–15 count." It was asserted that the size of the individual shrimp used is so small that they are unmarketable as single breaded units but do have a commercial market when composited.

The composited units prepared from shrimp caught in Alaskan waters, when breaded, have been sold under the name "Alaskan Breaded Shrimp." There is also on the market a product designated by the manufacturer as "Alaskan Angel Shrimp." This product is packaged frozen and glazed in block form and consists of the individual tail portion of peeled shrimp, tail fins removed. When thawed, the individual uncoated tail portions separate one from another. The witness for the processor stated that the word "Angel" in the name of the food has no meaning or significance. The witness for the packer of the Alaskan products testified that both were prepared from tiny shrimp. However, a size comparison of the pieces of shrimp in the breaded composited units and the single units of glazed shrimp with the size designations found in the United States Standards for Grades of Frozen Raw Headless Shrimp revealed that the composited units and the single units were prepared from shrimp consisting of a preponderance of medium-size shrimp. Shrimp of such size from other areas are often prepared as individual breaded units. The composited units prepared from shrimp caught in Alaskan waters could be formed into many shapes, including that shape and size known as "sticks." Composited units could be made from small or broken shrimp, or both, from any waters where shrimp are obtained and in the same shape and size as the composited units prepared in Alaska. The geographic origin of the Shrimp" are different forms of the food, consumer the form of the shrimp units. For example, the food sold as "Alaskan Breaded Shrimp" and "Alaskan Angel Shrimp" are different forms of the food the former consisting of composited units and the latter consisting of single units. It is reasonable to believe that the uninitiated consumer would be confused and unable to differentiate the forms of the two foods from the names presently appearing on the labels. This follows from the manner in which the geographic origin is used in both names as presently applied to the labels and to the lack of labeling to show the form of the units. It would not be in the consumer's interest to provide in standards that foods prepared in composite form from shrimp obtained from different geographic areas shall bear the same name, such as "Alaskan breaded shrimp," with no additional meaningful description. Further, it would be confusing to the consumer for the order to provide for foods prepared in different geographic areas but in the same manner and having the same form to bear different names; for example, "Alaskan Breaded Shrimp" vs. "Louisiana Breaded Shrimp."

A witness for the Food and Drug Administration testified that personnel of a large chain store have been advertising and selling the composited form of breaded shrimp from Alaska as "jumbo shrimp," without realizing that the units were not single shrimp. The name of the food apparently did not reveal to the sales personnel that the food consisted of composited units. It is not unreasonable to expect that all the various forms of breaded shrimp units encompassed within the order should be indicative of the form of the units, whether it be single split, single round, single pieces, or composited of several whole shrimp or pieces. It would not be contrary to the consumer's interest to provide in the standards that labels may show the geographic origin of the shrimp (R. 634, 641, 644, 646, 650, 652, 655–658, 661–664, 676–678, 681, 682, 686, 689, 699, 1273, 1276–1279, 1283, 1286, 1288, 1289, 1291, 1292, 1294, 1296, 1299–1304; Ex. 2, 20, 23–25, 48, 49, 54, 55, 57–59).

9. In 1958 the United States Department of the Interior published a standard for grades of frozen raw breaded shrimp wherein the product description requires that the finished food contain not less than 50 percent shrimp material. Such requirement has been continued to the date of the hearing and included in the proposal to establish a standard of identity for the food. The method for determining the percentage of shrimp material in the food is incorporated within the grade standard. This method provides for weighing the finished food; removing the coating by means of an agitating water bath; draining and weighing the debreaded shrimp material; and calculating the percentage of shrimp material. To the result obtained from the calculation of shrimp material provision is made for the addition of 5 percent. (For example, if the calculated result for the finished food is 45 percent shrimp material one then adds 5 percent so that the food is now stated to contain 50 percent shrimp material.) A footnote is appended to the calculation in the published grade standard which states, "A tentative correction factor of 5 percent is employed pending completion of definitive studies" (R. 903, 904, 921; Ex. 1, 26).

10. The petitioners proposing the establishment of a standard for frozen raw breaded shrimp provided for a minimum shrimp material content of not less than 50 percent, to be determined in accordance with the method set out in the United States Standards for Grades, including the 5 percent correction factor. Following publication of the proposed standard of identity, the Commissioner of Food and Drugs, after reviewing comments received and considering other information available to him, published the order establishing the definition and standard of identity. In the Commissioner's order, the correction factor was prescribed as plus 2 percent. The change in this value was objected to by interested parties claiming to be adversely affected and was therefore set up as an issue for the hearing.

Some testimony of record would support the complete deletion of a correction factor, particularly in view of the fact that the product is professed to contain not less than 50 percent of shrimp material. However, the question of deleting the correction factor was not an issue for the hearing, and therefore these findings of fact and conclusions restrict themselves to the question of plus 5 versus plus 2. It is readily recognized that any positive adjustment factor favors the packer. It is reasonable to believe that a packer exercising good commercial controls (good controls of processing are available and are being practiced) would minimize processing variations and therefore can easily produce the finished food well within an adjustment factor of plus 2. For some packers who have been producing a frozen raw breaded shrimp with somewhat less than 50 percent shrimp material a slight increase in weight of shrimp material used will make certain that the consumer will receive a finished food, containing not less than 50 percent shrimp material at the time of purchase. It is well established in the processed food industry that with variable raw materials careful producers do not aim for the lower limits of acceptance because of the dangers inherent in such practice. Since all producers of the food would be subject to the same requirement for minimum shrimp material content, and this percentage will be determined in the same manner, none would be placed at a competitive disadvantage by the changes.

Arguments were advanced that reducing the so-called correction factor from plus 5 to plus 2 would increase the costs to the consumer. Although the cost to the consumer for frozen raw breaded shrimp has increased through the years, the production and consumption of the food have increased at a greater rate. It is not reasonable to believe that the question of possibly slightly higher costs being passed on to the consumer in return for the inclusion of more shrimp material is germane to the issue, particularly in view of the fact that many packers are presently supplying foods containing in excess of the 50 percent shrimp material requirement. Additionally, it was argued that small differences in the amount of shrimp material were not recognizable to the consumer and therefore the change from plus 5 to plus 2 is unnecessary in the interest of consumers. Opposed to this was the argument that where consumers were unable to protect themselves it is in this area that the standard serves its purpose best by of-

fering such protection from those packers inclined to substitute cheap breading for expensive shrimp (R. 225, 260, 456, 613, 614, 779, 782, 879, 896, 897, 919, 964, 973, 974, 983, 993, 997–999, 1030, 1031, 1050, 1199–1201, 1205, 1216, 1217, 1230, 1236, 1237; Ex. 1, 2, 4).

11. A witness testified that studies he had carried out in preparation for the hearing would not support the plus 2 adjustment factor ordered by the Commissioner. This study had not been published nor had it been available prior to the hearing. The witness proposed that the plus 5 be retained. However, referring to his own studies he stated that such studies were not definitive. An examination of his data and his testimony as a whole revealed many inconsistencies and incompatibilities. One striking segment of his data revealed that of a particular set of 20 samples of frozen raw breaded shrimp 19 were admittedly prepared with less than 50 percent shrimp material. All 20 samples were frozen and stored prior to analysis. Upon analysis for shrimp material content, when plus 5 was added to the result obtained, all 20 samples were reported to contain 50 percent or more of shrimp material. It is readily seen that it would not be in the interest of the consumer to provide for an adjustment factor of plus 5 since, with such factor products intentionally packed to contain less than 50 percent shrimp material would on examination, appear to be in compliance with the shrimp requirement in the standard (R. 439, 733, 757–759, 778, 790, 844, 867, 1201–1204, 1260, 1262; Ex. 40).

12. The record reveals that the correction factor of plus 5 in the United States Standards for Grades of Frozen Raw Breaded Shrimp was both tentative and inadequate to reasonably reflect the shrimp material level in the finished food. As suggested by the footnote to the procedure, the correction factor was not the result of definitive studies. The plus 5 had been included at the time of publication at the request of industry. No witness at the hearing was aware of any work published in support of such plus 5. In fact, it was asserted that the plus 5 was based on admittedly inadequate information (R. 297–299, 963, 994–996, 1195; Ex. 26).

13. Prior to the publication of the Commissioner's order, the Food and Drug Administration was apprised of the details of a study and recommendation by seafood scientists of the United States Department of the Interior, Fish and Wildlife Service, Bureau of Commercial Fisheries, concerning the correction factor. Prior to the hearing, the study and recommendation were reported in the Commercial Fisheries Review published by the Bureau of Commercial Fisheries. It was the only published paper, known to the witnesses at the hearing, on the subject. Substantial testimony concerning the investigations reported supports the following:

a. The plus 5 correction factor was only tentative, pending definitive studies.

b. It is desirable to make the correction factor as small as the accuracy of the method will permit to insure uniformity of product.

c. The tentative correction factor of 5 percent is too large.

d. A change in the correction factor from plus 5 to plus 2 more correctly reflects the shrimp content of the finished food.

e. The accuracy of the method for determining the quantity of shrimp material in the finished food warrants the reduction from plus 5 to plus 2.

The study reflects representative commercial handling of the food from preparation to packaging and storage. The published scientific report is definitive of the subject, which was to determine the accuracy of the method for testing samples of frozen raw breaded shrimp in order to reveal the shrimp material content as the consumer receives it. The report embodies a scientific approach to the problem of determining the proper correction factor to be applied in the formula for calculating the amount of shrimp material in breaded shrimp. It is authoritative and reliable. An averaging of results in the report would actually support a slightly negative adjustment factor; that is, on an average basis the percentage of shrimp material in the finished food is slightly higher than that put in at the time of preparation. However, since some samples, when tested, showed a slight decrease in percentage of shrimp material it need not be considered contrary to the promotion of honesty and fair dealing in the interest of consumers to provide a safety factor for the producer by means of an adjustment factor of plus 2. One witness testified that the Bureau of Commercial Fisheries had reviewed the paper and determined that from its accuracy and consideration of the conclusions drawn it warranted publication. Further, prior to publication it had been distributed to representative members of industry for comment and no comments were submitted. Another witness testified that he had personal knowledge of the methods and had personally studied the paper and concluded it supported the conclusions drawn. Further, the data reported had been submitted to statistical analysis and found to warrant the conclusions drawn. The method is reproducible and has a low error. The test is capable of being conducted prior to and at time of consumer purchase and properly reflects the percentage of shrimp material in the food. It is in the interest of consumers to lower the correction factor from plus 5 to plus 2 (R. 780–782, 898–900, 921, 962, 1000–1007, 1049–1051, 1196, 1202, 1212–1223; Ex. 27, 51A–51C).

14. The Commissioner's order required that the method for determining the percentage of shrimp material be the same for all forms of the food provided for, and such method was incorporated in the order. However, substantial evidence of record reveals that the method provided for was not easily applicable to the food in composited form. A witness of the U.S. Department of the Interior testified that the method incorporated in the U.S. Standards for Grades of Frozen Raw Breaded Fish Portions would better reflect the shrimp material content in composited units of raw breaded shrimp. Such method is also provided for in the Federal Specification which covers this item of food (R. 261, 262, 680, 914–916, 1012; Ex. 20, 52).

*Conclusions.* On the basis of the foregoing findings of fact and taking into consideration the weight of substantial evidence of the entire record, the following conclusions are drawn:

1. Certain objections to the order, which were set up as issues for the hearing, are rejected because the objectors failed to support their objections at the hearing. These objections had been submitted in opposition to the order because:

a. The minimum shrimp material content of frozen raw breaded shrimp should be changed to require a minimum of 60 percent shrimp material.

b. The size of raw shrimp used should be required for label declaration.

c. The order should establish standards for size based on the number of shrimp per pound.

d. Mandatory label declaration of the percentage of breading actually in the package of food should be required.

e. Mandatory label declaration of geographic origin of the shrimp used should be provided for.

f. The order should impose a requirement setting forth the maximum time that shrimp may remain in storage prior to being coated with a batter and breading.

g. Provision should be included for optional use of alternative names for the food designated as "breaded shrimp pieces."

h. The standard should provide for the optional use of an alternative designation "breaded round fantail shrimp" for the food designated as "breaded round shrimp."

i. The standard should include a specification for the size of shrimp that may be parenthetically further designated as "prawns."

j. The method for determining the percentage of shrimp material in the finished food should not provide for the use of a rubber-tipped glass stirring rod.

The order as it relates to the above objections stands as promulgated.

2. The food designated as frozen raw lightly breaded shrimp shall contain not less than 65 percent shrimp material.

3. All safe and suitable coating ingredients are provided for optional use without specific listing in the regulation with certain exceptions. The consumer is unable to determine from a reading of the regulation what specific optional ingredients are permitted. Therefore, the label declaration of optional coating ingredients used in the preparation of the food should appear prominently and conspicuously on the principal panel or panels of the label used for display to the consumer at time of purchase.

4. The food prepared from the tail portion of shrimp from which all shell segments and tail fins are removed and wherein two or more whole shrimp, or pieces of shrimp, or both, are formed and pressed into composite units prior to coating are designated as "Breaded shrimp _____," the blank to be filled in with the words or phrase that accurately describe the shape or form, but which is not misleading. For example, if in the shape of fish sticks the food shall be designated as "Breaded shrimp sticks."

5. The percentage of shrimp material in frozen raw breaded shrimp, other than composited units, shall be calculated as follows:

$$\text{Percent shrimp material} = \frac{\text{Weight of debreaded sample}}{\text{Weight of sample}} \times 100 + 2$$

6. The method for determining the percentage of shrimp material in frozen raw breaded shrimp in the form of composited units shall be in accordance with the method prescribed in the United States Standards for Grades of Frozen Raw Breaded Fish Portions (50 CFR 266.-21(f)).

On the basis of the foregoing findings of fact and conclusions drawn therefrom, it is concluded that it will promote honesty and fair dealing in the interest of consumers to establish definitions and standards of identity as follows:

**§ 36.30 Frozen raw breaded shrimp; identity; label statement of optional ingredients.**

(a) Frozen raw breaded shrimp is the food prepared by coating one of the optional forms of shrimp specified in paragraph (c) of this section with safe and suitable batter and breading ingredients as provided in paragraph (d) of this section. The food is frozen.

(b) The food tests not less than 50 percent of shrimp material as determined by the method prescribed in paragraph (g) of this section, except that if the shrimp are composite units the method prescribed in paragraph (h) of this section is used.

(c) The term "shrimp" means the tail portion of properly prepared shrimp of commercial species. Except for composite units, each shrimp unit is individually coated. The optional forms of shrimp are:

(1) Fantail or butterfly: Prepared by splitting the shrimp; the shrimp are peeled, except that tail fins remain attached and the shell segment immediately adjacent to the tail fins may be left attached.

(2) Butterfly, tail off: Prepared by splitting the shrimp; tail fins and all shell segments are removed.

(3) Round: Round shrimp, not split; the shrimp are peeled, except that tail fins remain attached and the shell segment immediately adjacent to the tail fins may be left attached.

(4) Round, tail off: Round shrimp, not split; tail fins and all shell segments are removed.

(5) Pieces: Each unit consists of a piece or a part of a shrimp; tail fins and all shell segments are removed.

(6) Composite units: Each unit consists of two or more whole shrimp or pieces of shrimp, or both, formed and pressed into composite units prior to coating; tail fins and all shell segments are removed; large composite units, prior to coating, may be cut into smaller units.

(d) The batter and breading ingredients referred to in paragraph (a) of this section are the fluid constituents and the solid constituents of the coating around the shrimp. These ingredients consist of suitable substances which are not food additives as defined in section 201(s) of the Federal Food, Drug, and Cosmetic Act; or if they are food additives as so defined, they are used in conformity with regulations established pursuant to section 409 of the act. Batter and breading ingredients that perform a useful function are regarded as suitable, except that artificial flavorings, artificial sweeteners, artificial colors, and chemical preservatives, other than those provided for in this paragraph, are not suitable ingredients of frozen raw breaded shrimp. Chemical preservatives that are suitable are:

(1) Ascorbic acid, which may be used in a quantity sufficient to retard development of dark spots on the shrimp; and

(2) The antioxidant preservatives listed in § 121.101(d)(2) of this chapter that may be used to retard development of rancidity of the fat content of the food, in amounts within the limits prescribed by that section.

(e) The label shall name the food, as prepared from each of the optional forms of shrimp specified in paragraph (c) (1) to (6), inclusive, of this section, and following the numbered sequence of such subparagraph, as follows:

(1) "Breaded fantail shrimp." The word "butterfly" may be used in lieu of "fantail" in the name.

(2) "Breaded butterfly shrimp, tail off."

(3) "Breaded round shrimp."

(4) "Breaded round shrimp, tail off."

(5) "Breaded shrimp pieces."

(6) Composite units:

(i) If the composite units are in a shape similar to that of breaded fish sticks the name is "Breaded shrimp sticks"; if they are in the shape of meat cutlets, the name is "Breaded shrimp cutlets."

(ii) If prepared in a shape other than that of sticks or cutlets, the name is "Breaded shrimp _____," the blank to be filled in with the word or phrase that accurately describes the shape, but which is not misleading.

In the case of the names specified in subparagraphs (1) through (5) of this paragraph, the words in each name may be arranged in any order, provided they are so arranged as to be accurately descriptive of the food. The word "prawns" may be added in parentheses immediately after the word "shrimp" in the name of the food if the shrimp are of large size; for example, "Fantail breaded shrimp (prawns)." If the shrimp are from a single geographic area, the adjectival designation of that area may appear as part of the name; for example, "Breaded Alaskan shrimp sticks."

(f) The names of the optional ingredients used, as provided for in paragraph (d) of this section, shall be listed on the principal display panel or panels of the label with such prominence and conspicuousness as to render them likely to be read and understood by the ordinary individual under customary conditions of purchase. If a spice that also imparts color is used, it shall be designated as "spice and coloring," unless the spice is designated by its specific name. If ascorbic acid is used to retard development of dark spots on the shrimp, it shall be designated as "Ascorbic acid added as a preservative" or "Ascorbic acid added to retard discoloration of shrimp." If any other antioxidant preservative, as provided in paragraph (c) of this section, is used, such preservative shall be designated by its common name followed by the statement "Added as a preservative."

(g) The method for determining percentage of shrimp material for those forms specified in paragraph (c)(1) through (5) of this section is as follows:

(1) *Equipment needed.* (i) Two-gallon container, approximately 9 inches in diameter.

(ii) Two-vaned wooden paddle, each vane measuring approximately 1¾ inches by 3¾ inches.

(iii) Stirring device capable of rotating the wooden paddle at 120 r.p.m.

(iv) Balance accurate to 0.01 ounce (or 0.1 gram).

(v) U.S. Standard sieve No. 20, 12-inch diameter.[1]

(vi) U.S. Standard sieve, ½-inch sieve opening, 12-inch diameter.[1]

(vii) Forceps, blunt points.

(viii) Shallow baking pans.

(ix) Rubber-tipped glass stirring rod.

(2) *Procedure.* (i) Weigh the sample to be debreaded. Fill the container three-fourths full of water at 70° F.–80° F. Suspend the paddle in the container, leaving a clearance of at least 5 inches below the paddle vanes, and adjust speed to 120 r.p.m. Add shrimp and stir for 10 minutes. Stack the sieves, the ½-inch mesh over the No. 20, and pour the contents of the container onto them. Set the sieves under a faucet, preferably with spray attached, and rinse shrimp with no rubbing of flesh, being careful to keep all rinsings over the sieves and not having the stream of water hit the shrimp on the sieve directly. Lay the shrimp out singly on the sieve as rinsed. Inspect each shrimp and use the rubber-tipped rod and the spray to remove the breading material that may remain on any of them, being careful to avoid undue pressure or rubbing, and return each shrimp to the sieve. Remove the top sieve and drain on a slope for 2 minutes, then remove the shrimp to weighing pan. Rinse contents of the No. 20 sieve onto a flat pan and collect any particles other than breading (i.e., flesh and tail fins) and add to shrimp on balance pan and weigh.

(ii) Calculate percent shrimp material:

[1] The sieves shall comply with the specifications for wire cloth and sieve frames in "Standard Specifications for Sieves," published March 1, 1940, in L.C. 584 of the U.S. Department of Commerce, National Bureau of Standards.

$$\text{Percent shrimp material} = \frac{\text{Weight of debreaded sample}}{\text{Weight of sample}} \times 100 + 2$$

(h) The method for determining percentage of shrimp material for composite units, specified in paragraph (c) (6) of this section, is as follows:

(1) *Equipment needed.* (i) Water bath (for example a 3 liter to 4 liter beaker).

(ii) Balance accurate to 0.1 gram.

(iii) Clip tongs of wire, plastic, or glass.

(iv) Stop-watch or regular watch readable to a second.

(v) Paper towels.

(vi) Spatula, 4-inch blade with rounded tip.

(vii) Nut picker.

(viii) Thermometer (immersion type) accurate to ±2° F.

(ix) Copper sulfate crystals ($CuSo_4 \cdot 5H_2O$).

(2) *Procedure.* (i) Weigh all composite units in the sample while they are still hard frozen.

(ii) Place each composite unit individually in a water bath that is maintained at 63° F.–86° F., and allow to remain until the breading becomes soft and can easily be removed from the still frozen shrimp material (between 10 seconds to 80 seconds for composite units held in storage at 0° F.). If the composite units were prepared using batters that are difficult to remove after one dipping, redip them for up to 5 seconds after the initial debreading and remove residual batter materials.

[NOTE: Several preliminary trials may be necessary to determine the exact dip time required for "debreading" the composite units in a sample. For these trials only, a saturated solution of copper sulfate (1 pound of copper sulfate in 2 liters of tap water) is necessary. The correct dip time is the minimum time of immersion in the copper sulfate solution required before the breading can easily be scraped off: *Provided*, That the "debreaded" units are still solidly frozen and only a slight trace of blue color is visible on the surface of the "debreaded" shrimp material.]

(iii) Remove the unit from the bath; blot lightly with double thickness of paper toweling; and scrape off or pick out coating from the shrimp material with the spatula or nut picker.

(iv) Weigh all the "debreaded" shrimp material.

(v) Calculate the percentage of shrimp material in the sample, using the following formula:

$$\text{Percent shrimp material} = \frac{\text{Weight of debreaded shrimp sample}}{\text{Weight of sample}} \times 100$$

**§ 36.31 Frozen raw lightly breaded shrimp; identity; label statement of optional ingredients.**

Frozen raw lightly breaded shrimp complies with the provisions of § 36.30, except that it contains not less than 65 percent of shrimp material, as determined by the method prescribed in § 36.30 (g) or (h), as appropriate, and that in the name prescribed the word "lightly" immediately precedes the words "breaded shrimp."

Any interested person may, within 30 days from the date of publication of this proposed order in the FEDERAL REGISTER, file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written exceptions thereto, preferably in quintuplicate. Exceptions shall point out with particularity the alleged errors in the findings of fact, conclusions, and proposed order, and shall contain specific references to the pages of the transcript of testimony or to the exhibits on which the exceptions are based. Exceptions may be accompanied by memoranda or briefs in support thereof.

Dated: December 4, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

# FEDERAL AVIATION AGENCY

**[ 14 CFR Part 71 [New] ]**

[Airspace Docket No. 64-CE-93]

## CONTROL ZONE AND TRANSITION AREA

### Proposed Designation and Alteration

The Federal Aviation Agency is considering amendments to Part 71 [New] of the Federal Aviation Regulations which would alter the controlled airspace in the Bloomington, Ill., terminal area:

As a result of prior studies attendant to the implementation of the provisions of Amendments 60-21 and 60-29 of Part 60 of the Civil Air Regulations, the Bloomington transition area is presently designated as that airspace extending upward from 700 feet above the surface within a 4-mile radius of Bloomington Municipal Airport (latitude 40°28'50'' N., longitude 88°55'45'' W.), and within 2 miles each side of the Bloomington VOR 043° radial, extending from the 4-mile radius circle to 8 miles NE of the VOR.

The Federal Aviation Agency, having completed a comprehensive review of the terminal airspace structural requirements in the Bloomington terminal area, proposes the following airspace actions:

(1) Designate a control zone at Bloomington to comprise that airspace within a 5-mile radius of Bloomington Municipal Airport (latitude 40°28'50'' N., longitude 88°55'45'' W.); and within 2 miles each side of the Bloomington VOR 043° radial, extending from the 5-mile radius zone to a point 8 miles NE of the VOR. The control zone shall be effective during the times established by a Notice to Airmen and published continuously in the Airman's Information Manual.

(2) Designate the Bloomington transition area as that airspace extending upward from 700' above the surface within a 5-mile radius of Bloomington Municipal Airport (latitude 40°28'50'' N., longitude 88°55'45'' W.), and within 2 miles each side of the Bloomington VOR 043° radial, extending from the 5-mile radius circle to 8 miles NE of the VOR.

The proposed control zone at Bloomington will provide protection for aircraft executing the prescribed VOR approach procedures when descending below 1,000 feet above the surface and for aircraft executing departure and missed approach procedures until reaching an altitude of 700 feet above the surface. This control zone will be effective during the hours of operation of the weather reporting service to be provided by duly certificated personnel of Ozark Airlines. Initially, weather observations and the dissemination of weather information will be from 0600 to 2000 hours, local time, daily. In the event of airline schedule changes, these hours may vary. Normally, thirty days notice will be given prior to any change by a Notice to Airmen and continuously published in the Airman's Information Manual.

During hours when the control zone is not in effect, the proposed transition area will provide protection for aircraft executing the prescribed VOR approach procedures when descending from 1200 feet to 700 feet above the surface and for aircraft executing missed approach and departure procedures during climb from 700 feet to 1200 feet above the surface. The Peoria, Ill., transition area will provide protection for aircraft in prescribed holding patterns, for aircraft transitioning from enroute altitudes and for aircraft executing the procedure turn portion of the VOR approach in the Bloomington terminal area.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110. All communications received within forty-five days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No public hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The public Docket will be available for examination by interested persons in the office of the Regional Counsel, Federal Aviation Agency, 4825 Troost Avenue, Kansas City, Mo., 64110.

This amendment is proposed under the authority of section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued at Kansas City, Mo., on December 11, 1964.

HENRY L. NEWMAN,
*Acting Director, Central Region.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

### ALASKA

### Notice of Proposed Withdrawal and Reservation of Lands

DECEMBER 15, 1964.

The Bureau of Sport Fisheries and Wildlife has filed an application Serial Number Anchorage 061928 for the withdrawal of lands described below, from all forms of appropriation under the public land laws. The applicant desires the land for use as an administrative site for the Kodiak National Wildlife Refuge.

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, 555 Cordova Street, Anchorage, Alaska, 99501.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, and to reach agreement on the concurrent management of the lands and their resources.

He will also prepare a report for consideration by the Secretary of the Interior who will determine whether the lands will be withdrawn as requested by the Bureau of Sport Fisheries and Wildlife. The determination by the Secretary will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant, a public hearing will be held at a convenient time and place, which will be announced.

The lands involved in the application are:

GIBSON COVE AREA, KODIAK ISLAND, ALASKA

A tract of land situated between the Abbert Highway Right-of-Way and St. Paul Harbor, within U.S. Survey No. 2539, at the Eastern end of Gibson Cove and more particularly described as:

Beginning at a point at the intersection of the right-of-way of the Abbert Highway as shown on Bureau of Public Roads Project No. AD-2(3) Sheet "As Built" and the line of Mean High Water of St. Paul Harbor, said point lying S. 50°40' W., approximately 547 feet from Meander Corner No. 1, U.S. Survey 2537B (Tract A) which is also Meander Corner No. 12, U.S. Survey No. 2539; thence on a 3°16' curve right with a tangency of 16°53' and a radius of 1,759.85 feet for a distance of approximately 205 feet to the point of tangency; thence along a tangent S. 74°52'50" W., 1,038.9 feet, to a point of curvature; on a 10°07' curve to the left with a tangency of 26°38' and a radius of 566.20 feet for a distance of 263.18 feet to the point of tangency; south, approximately 105 feet to the line of mean high water; easterly, along the line of mean high water to the point of beginning of this description.

The area described aggregates approximately 10.0 acres.

JAMES W. SCOTT,
*Manager, Anchorage District*
*and Land Office.*

## FEDERAL AVIATION AGENCY

[OE Docket No. 64-EA-10]

### DAYMON RADIO SERVICE

### Determination of No Hazard to Air Navigation

The Federal Aviation Agency has circularized the following proposal for aeronautical comment and has conducted an aeronautical study (EA-OE-5638) to determine its effect upon the safe and efficient utilization of the navigable airspace.

The Daymon Radio Service, Findlay, Ohio, proposes to construct a guyed radio antenna structure near Findlay, Ohio, at latitude 41°01'20" N., longitude 83°-38'40" W. The overall height of the proposed structure would be 950 feet above mean sea level (170 feet above ground).

A similar proposal for a tower 999 feet above mean sea level (219 feet above ground) at the above site was considered in Aeronautical Study No. 1-OE-161. As a result of the study, a Determination of Hazard was issued in OE Docket No. 62-EA-2 on March 21, 1962.

Subsequent to the issuance of the above determination, a runway threshold was established 795 feet from the northeast end of Runway 7/25. In addition, following a recalculation of the relation of existing obstructions to the runway threshold the glide angle to Runway 25 was decreased from 40:1 to 45:1. The Federal Aviation Facilities Record for this airport, dated April 29, 1964, indicates a tree 3,000 feet from the displaced threshold of Runway 25 to be the controlling obstruction for this runway.

The currently proposed structure would be located approximately 5,700 feet northeast of the displaced threshold at the northeast end of Runway 7/25 of the Findlay Airport, Findlay, Ohio. It would be approximately on the extended centerline of this runway. At this location, it would exceed the standards for determining hazards to air navigation as defined in § 77.27(b)(1) of the Federal Aviation Regulations by 34 feet as applied to Runway 25. This is based on measurement from the displaced threshold which is 795 feet from the physical end of the runway.

The aeronautical study disclosed that:

1. There is no straight-in instrument approach established for Runway 25.

2. The proposed tower will have no adverse effect on instrument operations, procedures or minimum flight altitudes, nor would it preclude future establishment of a straight-in ADF or VOR approach with 400-foot minimums.

3. Although the proposed tower is 170 feet above ground, it would be only 138 feet above the airport and located 1.1 miles from the end of the runway.

4. The approach path of Runway 25 is over a congested area and although regulations concerning altitudes of aircraft over congested areas do not apply to aircraft landing or taking off, normal safety precautions dictate that reasonable altitudes be maintained over congested areas. Therefore, at 1.1 miles from the runway, aircraft would be expected to be at altitudes high enough to sufficiently clear the tower.

5. The Determination of Hazard for the original proposal was based largely upon the fact that the tower would exceed a 50:1 glide slope to Runway 25 by 102 feet, whereas the Blanchard Valley Hospital exceeded the 50:1 slope by only 47 feet. The limiting height, 897 feet above mean sea level, was established in the previous determination since it would not exceed the 50:1 slope. A conclusion was made that the hospital would not shield the tower.

6. The tower now under consideration exceeds the 50:1 glide slope by 34 feet and, as a result of the threshold being displaced, the hospital now exceeds the 50:1 slope by a lesser amount. The situation presented by the currently proposed tower would be less restrictive than that which existed at the time the Determination of Hazard was written.

7. The glide angle for Runway 25 is based on the distance of obstructions from the threshold. Construction of the tower would result in a glide angle of 40:1.

8. The objection made by the Aircraft Owners and Pilots Association and supported by the Air Transport Association of America at the Eastern Regional Informal Airspace Meeting No. 58, held on September 15, 1964, was a desire to see the tower located off the extended centerline of the runway. This was the only objection voiced at the meeting.

9. Other objections received were general in nature and stated that the structure would be a hazard to aircraft operations at the Findlay Airport, made reference to the previous Determination of Hazard, and quoted the 897-foot above mean sea level height stated therein.

Based on the aeronautical study, it is the finding of the Agency that the proposed structure at the location and height specified would have no substantial adverse effect upon aeronautical operations, procedures or minimum flight altitudes at the Findlay Airport, Findlay, Ohio. No other aeronautical operations, procedures or minimum flight altitudes would be affected.

Therefore, pursuant to the authority delegated to me by the Administrator (§ 77.37 [New]), it is found that the proposed structure would have no substantial adverse effect upon the safe and efficient utilization of navigable airspace and it is hereby determined that the proposed structure would not be a hazard to air navigation provided that it is obstruction marked and lighted in accordance with Agency standards.

This determination is effective and will become final 30 days after the date of issuance unless an appeal is filed under § 77.39 [New] (27 F.R. 10352). If the appeal is denied, the determination will then become final as of the date of the denial or 30 days after the issuance of the determination, whichever is later. Unless otherwise revised or terminated, a final determination hereunder will expire 18 months after its effective date or upon earlier abandonment of the construction proposal (§ 77.41 [New]).

Issued in Washington, D.C., on December 11, 1964.

GEORGE R. BORSARI,
*Chief,*
*Obstruction Evaluation Branch.*

[F.R. Doc. 64-13081; Filed, Dec. 21, 1964; 8:45 a.m.]

[OE Docket No. 64-SO-26]

### WLOX BROADCASTING CO., INC.

### Amended Determination of No Hazard to Air Navigation

The Federal Aviation Agency has circularized the following proposal for aeronautical comment and has conducted a study (SO-OE-5189) to determine its effect upon the safe and efficient utilization of navigable airspace.

The WLOX Broadcasting Co., Inc., Biloxi, Miss., proposes to increase by 20 feet the overall height of a previously-approved television antenna structure (see FAA's OE Docket No. 63-SO-17). The proposed structure would be located at latitude 30°43'25" N., longitude 89°05'29" W., such location being approximately three miles northeast of McHenry, Miss. The new overall height would be 1319 feet above ground level (AGL); the height above mean sea level (AMSL) would remain the same at 1549 feet.

The aeronautical study disclosed that the proposed structure would have no different effect upon aeronautical operations, procedures or minimum flight altitudes than the previously-approved structure.

Therefore, pursuant to the authority delegated to me by the Administrator (§ 77.37 [New]), it is found that the proposed structure would have no substantial adverse effect upon the safe and efficient utilization of navigable airspace and it is hereby determined that the proposed structure would not be a hazard to air navigation provided that it is obstruction marked and lighted in accordance with Agency standards.

This determination is effective and will become final 30 days after the date of issuance unless an appeal is filed under § 77.39 [New] (27 F.R. 10352). If the appeal is denied, the determination will then become final as of the date of the denial or 30 days after the issuance of the determination, whichever is later. Unless otherwise revised or terminated,

a final determination hereunder will expire 18 months after its effective date or upon earlier abandonment of the construction proposal (§ 77.41 [New]).

Issued in Washington, D.C., on December 11, 1964.

GEORGE R. BORSARI,
*Chief,*
*Obstruction Evaluation Branch.*

# FEDERAL COMMUNICATIONS COMMISSION

[Docket Nos. 15741, 15742]

## ROBERT J. MARTIN AND TALTON BROADCASTING CO.

### Order Designating Applications for Consolidated Hearing on Stated Issues

In re applications of Robert J. Martin, Selma, Ala., Requests: 100.1mc, #261; 2.64kw; 129.2 ft., Docket No. 15741, File No. BPH-4499; Talton Broadcasting Co., Selma, Ala., Requests: 100.1mc, #261; 3kw; 123.25 ft., Docket No. 15742, File No. BPH-4572; for construction permits.

The Commission, by the Chief of the Broadcast Bureau under delegated authority, considered the captioned applications on December 16, 1964;

It appearing, that, except as indicated by the issues specified below, each of the applicants is legally, technically, financially and otherwise qualified to construct and operate as proposed; and

It further appearing, that the above-captioned applications are mutually exclusive in that concurrent operation would result in mutually destructive interference; and

It further appearing, that, in view of the foregoing, the Commission is unable to make the statutory finding that a grant of the subject applications would serve the public interest, convenience, and necessity, and is of the opinion that the applications must be designated for hearing in a consolidated proceeding on the issues set forth below:

*It is ordered,* That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine which of the operations proposed in the above-captioned applications would better serve the public interest, in light of the evidence adduced and the record made with respect to the significant differences between the applicants as to:

(a) The background and experience of each having a bearing on the applicant's ability to own and operate the proposed FM broadcast station.

(b) The proposals of each of the applicants with respect to management and operation of the proposed stations.

(c) The programming services proposed in each of the applications.

2. To determine, in the light of the evidence adduced pursuant to the foregoing issue which of the applications should be granted.

*It is further ordered,* That, to avail themselves of the opportunity to be heard, the applicants herein, pursuant to § 1.221(c) of the Commission rules, in person or by attorney, shall, within 20 days of the mailing of this Order, file with the Commission in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

*It is further ordered,* That the applicants herein shall, pursuant to section 311(a)(3) of the Communications Act of 1934, as amended, and § 1.594 of the Commission's rules, give notice of the hearing, either individually or, if feasible and consistent with the rules, jointly, within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 1.594(g) of the rules.

*It is further ordered,* That, the issues in the above-captioned proceeding may be enlarged by the Examiner, on his own motion or on petition properly filed by a party to the proceeding, and upon sufficient allegations of fact in support thereof, by the addition of the following issue:

To determine whether the funds available to the applicant will give reasonable assurance that the proposals set forth in the application will be effectuated.

Released: December 17, 1964.

## SKYLARK CORP. AND KINGSTON BROADCASTERS, INC.

### Order Continuing Prehearing Conference

In re applications of Skylark Corp., Kingston, N.Y., Docket No. 15436, File No. BPH-4256; Kingston Broadcasters, Inc., Kingston, N.Y., Docket No. 15437, File No. BPH-4357; for construction permits.

The Hearing Examiner having under consideration a verbal request from counsel for all parties for a continuance of the date for further prehearing conference;

It appearing, that proposed rule making is pending which would materially affect the course of this hearing:

*It is ordered,* This 16th day of December 1964, that the further prehearing conference is continued from December 21, 1964, to January 22, 1965 at 2:00 p.m.

Released: December 17, 1964.

# FEDERAL MARITIME COMMISSION

[Docket No. 1217]

## PORT OF SAN DIEGO

### Investigation of Free Time Practices; Order of Investigation

On November 1, 1964, the San Diego Unified Port District, Port of San Diego, Calif., issued its Tariff No. 1-D and amended its Cotton Tariff No. 3, effective December 1, 1964. These tariffs now provide that thirty calendar days free time will be allowed on all commodities, with the exception of certain lumber and forest products.

The Ports of San Francisco, Oakland, Sacramento and Encinal Terminals filed protests objecting to the thirty days free time allowance requesting that the Commission institute an investigation to determine the lawfulness of such practice under the Shipping Act.

The Commission has reviewed the free time allowances and the protests and it appears that such practices may be contrary to section 16, First, or section 17, Shipping Act, 1916.

*Now therefore, it is ordered,* That the Commission on its own motion, enter upon an investigation and hearing pursuant to section 22 of the Shipping Act, 1916, to determine whether the free time practices of the Port of San Diego are contrary to the provisions of section 16, First, or section 17 of said Act;

*It is further ordered,* That the San Diego Unified Port District, Port of San Diego, Calif., is hereby made respondent in this proceeding; and

*It is further ordered,* That the proceeding herein ordered be assigned for hearing before an examiner of the Commission's Office of Hearing Examiners at a date and place to be hereafter determined and announced by the Chief Examiner; and

*It is further ordered,* That notice of this Order and notice of hearing be published in the FEDERAL REGISTER, and copy of such order and notice of hearing be served upon respondents;

*It is further ordered,* That persons other than respondent who desire to become parties to this proceeding and to participate herein shall file with the Secretary, Federal Maritime Commission, Washington, D.C., 20573, a petition to intervene in accordance with Rule 5(n) of the Commission's rules of practice and procedure on or before January 12, 1965, with copy to the respondent; and

*It is further ordered,* That all future notices issued by or on behalf of the Commission in this proceeding, including notice of time and place of hearing or prehearing conference shall be mailed directly to all parties of record.

By the Commission.

THOMAS LISI,
[SEAL] *Secretary.*

## UNITED FORWARDERS SERVICE ET AL.

### Notice of Agreements Filed for Approval

Notice is hereby given that the following freight forwarder cooperative working agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreements at the Washington office of the Federal Maritime Commission, 1321 H Street NW., Room 301. Comments with reference to an agreement including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. A copy of any such statement or request for a hearing should also be forwarded to each of the parties to the agreement (as indicated hereinafter), and the comments should indicate that this has been done.

Unless otherwise indicated, these agreements are non-exclusive, cooperative working arrangements under which the parties may perform freight forwarding services for each other, dividing forwarding and service fees as agreed on each transaction. Ocean freight compensation is to be divided as agreed between the parties.

United Forwarders Service, Miami, Fla., is party to the agreements, the terms of which are identical. The other parties are:

| | |
|---|---|
| A. J. Arango, Inc., Tampa, Fla | FF-1750 |
| J. Cortina, Tampa, Fla | FF-1751 |

The following agreements have similar terms:

| | |
|---|---|
| Wolf & Gerber, Inc., New York, N.Y., and Port Everglades Terminal Co., Fort Lauderdale, Fla | FF-1744 |
| Charles Kurz Co., Philadelphia, Pa., and Henry E. Sullivan, Jr., Jacksonville, Fla | FF-1747 |
| H. L. Ziegler, Inc., Houston, Tex., and J. P. Harle Forwarding Co., Houston, Texas | FF-1748 |
| J. D. Smith Inter-Ocean, Inc., New York, N.Y., and George S. Bush & Co. Inc., Seattle, Wash | FF-1752 |
| W. G. Kesler, New Orleans, La., and Robert L. Keller, Miami, Fla | FF-1755 |
| Thornley & Pitt, Inc., San Francisco, Calif., and Tooze and Associates, Portland, Oreg | FF-1756 |
| Wedemann & Godknecht, Inc., New York, N.Y., and Lusk Shipping Co., Inc., New Orleans, La | FF-1757 |
| Castelazo & Associates, Los Angeles, Calif., and Maher & Co., Inc., New Orleans, La | FF-1759 |
| Loretz & Co., Los Angeles, Calif., and J. D. Smith Inter-Ocean, Inc., New York, N.Y | FF-1760 |
| Amerford International Corp., Jamaica, N.Y., Amerford International Corp., Miami, Fla., and Air-Sea Forwarders, Inc., Los Angeles, Calif | FF-1761 |
| L. T. Burke d.b.a. Pacific Forwarders, San Francisco, Calif., and Judson Sheldon International Corp., New York, N.Y | FF-1762 |

Agreement FF 1745 between Alonso Shipping Company, New Orleans, Louisiana, and Wehrli Shipping Company, New York, New York, is a working arrangement under which forwarding and service fees are $5.00 per shipment. Ocean freight compensation is to be divided equally between the parties.

Agreement FF-1746 between King Shipping Co., New York, N.Y., and J. Ashton Greene, New Orleans, La., under which forwarding and service fees are subject to agreement, ocean freight compensation is to be retained by King Shipping Co.

Agreement FF-1749 between C. S. Greene and Co., Inc., Chicago, Ill., and Paul A. Boulo & Co., Mobile, Ala., is a working arrangement under which forwarding and service fees range from $4.50 to $9.50. Ocean freight compensation is to be divided equally between the parties.

Agreement FF-1753 between Francesco Parisi International Transports (U.S.A.) Inc., New York, N.Y., (a), and Advance Shipping Co., Houston, Tex., party (b), is a working arrangement under which forwarding and service fees are $5.50 per shipment. Ocean freight compensation is to be divided; 75 percent to party (a) and 25 percent to party (b).

Agreement FF-1754 between H. L. Ziegler, Inc., Houston, Tex., and Mar Shipping Corp., New York, N.Y., is a working arrangement under which forwarding and service fees are to be divided as agreed. Ocean freight compensation is to be divided equally between the parties.

Agreement FF-1758 between Sunshine Forwarders, Inc., Jacksonville, Fla., and All Cargo Transport, Inc., Miami, Fla., is an arrangement under which forwarding and service fees are to be as follows:

| | |
|---|---|
| Bermuda and Nassau | $2.50 |
| All other countries: | |
| To pass completed export declarations | 1.25 |
| To pass completed bills of lading | 1.25 |
| To prepare or complete and pass export declarations | 2.50 |
| To prepare or complete and pass bills of lading | 2.50 |
| Preparation of Consul documents | 5.00 |
| Consular documents (at cost) | ----- |
| Telephone calls, teletypes or telegrams (at cost) | ----- |

Ocean freight compensation is to be divided equally on a 50/50 basis between both parties.

Dated: December 17, 1964.

THOMAS LISI,
*Secretary.*

# FEDERAL POWER COMMISSION

[Docket Nos. G-3913, etc.]

## ASHLAND OIL & REFINING CO. ET AL.

### Findings and Order After Statutory Hearing

DECEMBER 15, 1964.

Findings and order after statutory hearing issuing certificates of public convenience and necessity, amending certificates, permitting and approving abandonment of service, terminating certificates, substituting respondent, redesignating proceedings, accepting agreement and undertaking for filing and accepting related rate schedules and supplements for filing.

Each of the Applicants listed herein has filed an application pursuant to section 7 of the Natural Gas Act for a certificate of public convenience and necessity authorizing the sale and delivery of natural gas in interstate commerce, for permission and approval to abandon service, or a petition to amend an existing certificate authorization, all as more fully described in the respective applications and petitions (and any supplements or amendments thereto) which are on file with the Commission.

The Applicants herein have filed related FPC Gas Rate Schedules and propose to initiate or abandon, add or delete natural gas service in interstate commerce as indicated by the tabulation herein. All sales certificated herein are either equal to or below the ceiling prices established by the Commission's Statement of Policy 61-1, as amended, or involve sales for which permanent certificates have been previously issued.

Occidental Petroleum Corp., Applicant in Docket No. G-14307, proposes to continue the sale of natural gas heretofore authorized in said docket and rendered by Jefferson Lake Sulphur Co. pursuant to its FPC Gas Rate Schedule Nos. 1, 2, and 3 which are herein redesignated as Occidental's FPC Gas Rate Schedule Nos. 3, 4, and 5, respectively. The presently effective rate under Jefferson Lake's FPC Gas Rate Schedule No. 1 is in effect subject to refund in Docket No. RI62-355. A lesser increased rate was also collected under said rate schedule for a locked-in period subject to refund in Docket No. G-12303.[1] The presently effective rate under Jefferson Lake's FPC Gas Rate Schedule No. 2 is in effect subject to refund in Docket No. G-17997.[1] The presently effective rate under Jefferson Lake's FPC Gas Rate Schedule No. 3 is in effect subject to refund in Docket No. RI61-330.[1] Jefferson Lake has filed another increased rate under said rate schedule which has been suspended in Docket No. RI64-73 and has not yet been made effective. On September 18, 1964, Occidental filed a motion in the aforementioned rate proceedings to be substituted therein as party respondent in lieu of Jefferson Lake. Concurrently with said motion Occidental filed in Docket Nos. G-12303, G-17997, RI61-330 and RI62-355 an agreement and undertaking to assure the refund of any amounts, together with interest, collected in excess of the amount determined to be just and reasonable in said dockets. Accordingly, Occidental will be substituted as respondent in the rate proceedings, said proceedings will be redesignated, and the agreement and undertaking will be accepted for filing.

After due notice, no petition or notice to intervene or protest to the granting of any of the respective applications or petitions have been filed.

At a hearing held on December 11, 1964, the Commission on its own motion received and made a part of the record in these proceedings all evidence, including the applications, amendments and exhibits thereto, submitted in support of the respective authorizations sought herein, and upon consideration of the record,

The Commission finds:

(1) Each Applicant herein is a "natural-gas company" within the meaning of the Natural Gas Act as heretofore found by the Commission or will be engaged in the sale of natural gas in interstate commerce for resale for ultimate public consumption, subject to the jurisdiction of the Commission, and will, therefore, be a "natural-gas company" within the meaning of said Act upon the commencement of the service under the respective authorizations granted hereinafter.

(2) The sales of natural gas hereinbefore described, as more fully described in the respective applications, amendments and/or supplements herein, will be made in interstate commerce, subject to the jurisdiction of the Commission, and such sales by the respective Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are subject to the requirements of subsections (c) and (e) of section 7 of the Natural Gas Act.

(3) The sales of natural gas by the respective Applicants, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary therefor, are required by the public convenience and necessity and certificates therefor should be issued as hereinafter ordered and conditioned.

(4) The respective Applicants are able and willing properly to do the acts and to perform the services proposed and to conform to the provisions of the Commission thereunder.

(5) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act and the public convenience and necessity require that the certificate authorizations heretofore issued by the Commission in Docket Nos. G-3913, G-6595, G-8087, G-9852, G-11019, G-11479, G-11700, G-11821, G-12707, G-12888, G-14307, G-14895, G-17570, CI60-546, CI61-2, CI61-1557, CI61-1772, CI62-797, CI62-1251, CI62-1553, CI63-848, CI63-1026, CI63-1230, CI64-812, CI64-935 and CI64-1246 should be amended as hereinafter ordered.

(6) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that the temporary certificate heretofore issued in Docket No. G-18741 should be amended by deleting therefrom authorization only as to the Lance Lease.

(7) The sales of natural gas proposed to be abandoned by the respective Applicants, as hereinbefore described, all as more fully described in the tabulation herein, and in the respective applications, are subject to the requirements of subsection (b) of section 7 of the Natural Gas Act, and such abandonments should be permitted and approved as hereinafter ordered.

(8) The certificates of public convenience and necessity heretofore issued to the Applicants herein, relating to the several abandonments hereinafter permitted and approved should be terminated.

(9) It is necessary and appropriate in carrying out the provisions of the Natural Gas Act that Occidental Petroleum Corp. should be substituted in lieu of Jefferson Lake Sulfur Co. as respondent in the proceedings pending in Docket Nos. G-12303, G-17997, RI61-330, RI62-355 and RI64-73, that said proceedings should be redesignated accordingly, and that the agreement and undertaking submitted by Occidental in Docket Nos. G-12303, G-17997, RI61-330 and RI62-355 should be accepted for filing.

(10) The respective related rate schedules and supplements as designated or redesignated in the tabulation herein, should be accepted for filing as hereinafter ordered.

The Commission orders:

(A) Certificates of public convenience and necessity be and the same are hereby issued, upon the terms and conditions of this order, authorizing the sales by the respective Applicants herein of natural gas in interstate commerce for resale, together with the construction and operation of any facilities subject to the jurisdiction of the Commission necessary for such sales, all as hereinbefore described and as more fully described in the respective applications, amendments, supplements and exhibits in this consolidated proceeding.

(B) The certificates granted in paragraph (A) above are not transferable and shall be effective only so long as Applicants continue the acts or operations hereby authorized in accordance with the provisions of the Natural Gas Act and the applicable rules, regulations and orders of the Commission.

(C) The grant of the certificates issued in paragraph (A) above shall not be construed as a waiver of the requirements of section 4 of the Natural Gas Act or of Part 154 or Part 157 of the Commission's regulations thereunder, and is without prejudice to any findings or orders which have been or may hereafter be made by the Commission in any proceeding now pending or hereafter instituted by or against the respective Applicants. Further, our action in this proceeding shall not foreclose nor prejudice any future proceedings or objections relating to the operation of any price or related provisions in the gas purchase contracts herein involved. Nor shall the grant of the certificates aforesaid for service to the particular customers involved imply approval of all of the terms of the respective contracts, particularly as to the cessation of service upon termination of said contracts, as provided by section 7(b) of the Natural Gas Act. Nor shall the grant of the certificates aforesaid be construed to preclude the imposition of any sanctions pursuant to the provisions of the Natural Gas Act for the unauthorized commencement of any sales of natural gas subject to said certificates.

(D) The certificate authorizations heretofore granted to the respective Applicants in Docket Nos. G-3913, G-8087, G-11479, G-11821, G-12888, G-17570, CI61-2, CI61-1557, CI62-797, CI62-1251, CI62-1553, CI63-848, CI63-1026, CI64-812 and CI64-1246 are hereby amended by adding thereto and deleting therefrom authorization to sell natural gas to the same purchasers and in the same areas as covered by the original authorizations, pursuant to the rate schedule supplements as indicated in the tabulation herein.

(E) The certificates heretofore issued in Docket Nos. G-11019 and G-11700 are hereby amended by deleting therefrom authorization granted herein in Docket Nos. CI65-334 and CI65-207.

(F) The temporary certificate heretofore itssued in Docket No. G-18741 is hereby amended by deleting therefrom authorization only as to the Lance Lease.

(G) The certificate heretofore issued in Docket No. CI61-1772 is hereby amended to include the additional dedication and such authorization is conditioned as was its certificate issued March 20, 1964.

(H) The certificate heretofore issued in Docket No. CI64-935 is hereby amended to include the additional dedication and such authorization is conditioned as provided in the Commission's Opinion No. 353, issued March 7, 1962, in Docket Nos. CP61-102, et al.

(I) The certificates heretofore issued in Docket Nos. G-6595, G-9852, G-12707, G-14307, G-14895, CI60-546 and CI63-1230 are hereby amended by changing the certificate holders to the successors in interest as indicated in the tabulation herein.

(J) Permission for and approval of the abandonment of service by the respective Applicants, as hereinbefore described and as more fully described in the respective applications herein, are hereby granted.

(K) The certificates heretofore issued in Docket Nos. G-6594, G-7105, G-10680 and G-17473 are hereby terminated.

(L) In view of the abandonment authorization granted herein, in Docket No. CI65-364 the certificate heretofore issued in Docket No. G-12341 is hereby terminated and such authorization does not relieve Applicant of any refund obligation in the related rate suspension proceeding in Docket No. RI61-534.

(M) The certificate issued herein in Docket No. CI65-344 for the subject sale covers only the depths above the base of the Chase Group.

(N) Occidental Petroleum Corp. be and it is hereby substituted in lieu of Jefferson Lake Sulfur Co. as respondent in the proceedings pending in Docket Nos. G-12303, G-17997, RI61-330, RI62-355, and RI64-73; said proceedings are redesignated accordingly; and the agreement and undertaking submitted by Occidental in Docket Nos. G-12303, G-17997, RI61-330 and RI62-355 is hereby accepted for filing.

(O) Occidental Petroleum Corp. shall comply with the refunding and reporting procedure required by the Natural Gas Act and § 154.102 of the Commission's regulations thereunder, and the agreement and undertaking filed by Occidental in Docket Nos. G-12303, G-17997, RI61-330 and RI62-355 shall remain in full force and effect until discharged by the Commission.

(P) The respective related rate schedules and supplements as indicated in the tabulation herein, are hereby accepted for filing; further, the rate schedules relating to the successions herein, are hereby redesignated and accepted, subject to the applicable Commission Regulations under the Natural Gas Act to be effective on the dates indicated in the tabulation herein.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[1] Well produces 65-75 Mcf per day and the line serving the well is deteriorated, but replacement not economically justified. Buyer has heretofore been granted authorization in Docket No. C164-717 to abandon resale of gas to Texas Gas Transmission Corp.
[2] Effective date: Date of this order.
[3] Effective date: Date of transfer of properties.
[4] Docket No. G-8087 presently consolidated with Docket Nos. G-4281, et al.
[5] Buyer is unable to justify laying a pipeline into area.
[6] Effective date: Date of initial delivery.
[7] Pertains to lease dated Nov. 24, 1952, only insofar as it covers all depths from surface to stratigraphic equivalent of 50 feet below depth of 4,791 feet.
[8] Instrument whereby Marathon conveys the subject properties to Southern Natural Gas Co.; Southern Natural Gas Co. has made related filings in Docket No. CP65-51 to render the service at the same rate authorized Marathon.
[9] Pressure insufficient for gas to enter buyer's line and compression not justified. Applicant in Docket No. C165-380 proposes to sell its 20-percent interest in production to Arkansas Louisiana Gas Co., 1 of 2 present buyers of remaining 80-percent interest, at lower pressure and at lower price.
[10] Executed by Occidental Petroleum and Jefferson Lake Sulphur (N.J.).
[11] Conveys properties from Jefferson Lake Sulphur Co. (N.J.) to Occidental Petroleum Corp.
[12] Conveys properties from Occidental Petroleum Corp. to Jefferson Lake Sulphur Co. (Del.).
[13] Conveys properties from Jefferson Lake Sulphur Co. (Del.) to Occidental Petroleum Corp.
[14] Releases acreage from the subject contract which is presently being covered by Bradco Properties, Inc., in Docket No. C164-1382 (Bradco's FPC GRS No. 4).
[15] Partial abandonment only as to Lance Lease; temporary certificate covering subject sales issued July 8, 1960.
[16] Source of gas depleted.
[17] Amendment filed to reflect a rate of 17.0 cents per Mcf in lieu of 16.6 cents per Mcf.
[18] By letter filed Nov. 16, 1964, applicant agreed to accept additional authorization conditioned as was its certificate issued Mar. 30, 1964.
[19] Deletes the indefinite pricing provisions contained in the basic contract with respect to the additional dedication.
[20] Replaces short-form statement filed on Jan. 17, 1962, pursuant to section 154.92(c) of the Regulations.
[21] Adds acreage and deletes 1.0 cent minimum guarantee and favored nations provisions insofar as they pertain to the additional acreage.
[22] Contract rate is 19.5 cents per Mcf plus B.t.u. plus tax reimbursement, but Southern accepted a permanent certificate in the original application conditioned the same as in opinion No. 353 and requests the same for this additional acreage.
[23] Agreement between Neville G. Penrose, Inc., and Permian Basin Pipeline Co. (now Northern Natural Gas Co.) whereby Penrose agrees to sell gas under the contract dated Feb. 29, 1952, between Amerada Petroleum Corp. and Northern Natural Gas Co.
[24] Transfer of acreage from Neville G. Penrose, Inc., to the Sohio Petroleum Co. (filed Sept. 30, 1964). Acreage involved herein previously nonproductive and not certificated.
[25] Deletes indefinite pricing provisions contained in the Feb. 29, 1952, contract.
[26] Abandonment application filed by Hydrocarbon Chemicals, Inc., as successor to Watson Oil & Gas Co., Inc., and Earl Goodwin, et al. Hydrocarbon has made succession filings, but in view of the abandonments, it is recommended that no action will be taken on the succession filings.
[27] Production of gas no longer economically feasible.
[28] Presently on file as Prince Marine Drilling & Exploration Co. (Operator), et al., FPC GRS No. 1.
[29] Instrument whereby Prince Marine ratified the basic contract of Apr. 16, 1953, executed by H. J. Chavanne, Trustee, et al.
[30] Farmout whereby Associated Oil & Gas Co. acquired the authorization to drill the related previously nonproducing dedication.
[31] By letter filed Nov. 12, 1964, applicant expressed willingness to accept a permanent certificate at 20.0 cents per Mcf, inclusive of applicable tax reimbursement.
[32] Between Byrd Oil Corp (predecessor of Bayview Oil Corp., et al.) and Trunkline Gas Co., presently on file as Texas Gulf Producing Co. (Operator), et al., FPC GRS No. 23 (Bayview is a nonoperating party under this FPC GRS No. 23).
[33] Stipulates date of initial delivery under basic contract as being Nov. 15, 1956.
[34] Conveys properties from Bayview to Socony.
[35] Adopts terms of contract dated Mar. 21, 1960, between Cities Service Oil Co. and buyer. Applicant previously nonoperator under Cities Service FPC GRS No. 139.
[36] Applicant's rate schedule No. 1, as amended, was filed June 5, 1961, and became effective July 6, 1961 (30 days after filing). Acceptance covered only those depths above the Chase Group.

[Docket No. CP65-62]

## COMMUNITY NATURAL GAS CO., INC.

### Notice of Application

DECEMBER 15, 1964.

Take notice that on September 3, 1964, as supplemented on October 16, 1964 and December 2, 1964, Community Natural Gas Co., Inc. (Applicant), Owensville, Ind., filed in Docket No. CP65-62 an application pursuant to section 7(a) of the Natural Gas Act for an order of the Commission directing American Louisiana Pipe Line Co. to establish physical connection of its natural gas transmission facilities with the distribution facilities proposed to be constructed by Applicant, and to sell and deliver natural gas to Applicant, for resale and distribution in the community of Dale, Ind., all as more fully set forth in the application on file with the Commission and open to public inspection.

The estimated initial three year period of annual and peak day requirements are stated to be:

| | First year | Second year | Third year |
|---|---|---|---|
| Annual (Mcf) | 30,635 | 35,005 | 39,482 |
| Peak day (Mcf) | 316 | 369 | 426 |

The estimated cost of Applicant's proposed distribution system is $145,000 which will be financed by the sale of common stock.

This matter is one that should be disposed of as promptly as possible under the applicable rules and regulations and to that end:

Take further notice that preliminary staff analysis has indicated that there are no problems which would warrant a recommendation that the Commission designate this application for formal hearing before an examiner and that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing may be held without further notice before the Commission on this application provided no protest or petition to intervene is filed within the time required herein. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and

procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

JOSEPH H. GUTRIDE,
*Secretary.*

[Project No. 2490]

## CENTRAL VERMONT PUBLIC SERVICE CORP.

### Notice of Application for License

DECEMBER 17, 1964.

Public notice is hereby given that application has been filed under the Federal Power Act (16 U.S.C. 791a-825r) by Central Vermont Public Service Corp. (correspondence to: Porter E. Noble, Clerk and General Counsel, 77 Grove Street, Rutland, Vt.) for a license for constructed Project No. 2490, known as the Taftsville Plant, located on the Ottauquechee River, in Windsor County, Vt., in the vicinity of Taftsville, Vt.

The project consists of: (1) A concrete dam approximately 220 feet long and 16 feet high containing a spillway section and on the west end a concrete structure housing head gates and trash racks; (2) a spillway 194 feet long topped by 18-inch wood flashboards; (3) a reservoir 16.6 acres in size with storage limited to hourly pondage; (4) a rectangular concrete penstock 11 feet high, six feet eight inches wide, and approximately 36 feet long; (5) a powerhouse with a concrete foundation and brick superstructure equipped with one vertical turbine with a capacity of 675 hp connected to a generator having a capacity of 500 kw; (6) a substation with three 44 kv transmission lines; and (7) appurtenant electrical and mechanical facilities.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10). The last day upon which protests or petitions may be filed is February 2, 1965. The application is on file with the Commission for public inspection.

JOSEPH H. GUTRIDE,
*Secretary.*

[Docket No. G-2793, etc.[1]]

## SINCLAIR OIL & GAS CO. AND TEXAS GULF PRODUCING CO.

### Notice of Application

DECEMBER 14, 1964.

Take notice that on November 27, 1963, Sinclair Oil & Gas Co. (Applicant) filed in Docket No. G-2793, et al., an application pursuant to section 7(c) of the Natural Gas Act to amend orders of the Commission issuing certificates of public convenience and necessity to Texas Gulf Producing Co. (Texas Gulf) for the sale for resale of natural gas in interstate commerce by substituting Applicant in lieu of Texas Gulf as certificate holder, all as more fully set forth in the Appendix hereto and in the application which is on file with the Commission and open to public inspection.

The application states that effective January 1, 1964, Applicant will have acquired the gas producing properties and contracts of Texas Gulf and that service will have been continued by Applicant as of that date.

Applicant has submitted notices of succession to the FPC gas rate schedules of Texas Gulf which have been accepted for filing. The rate schedules have been redesignated as those of Applicant as set forth in the Appendix hereto. In cases in which increased rates have been suspended and made effect subject to refund by Texas Gulf, Applicant has filed a motion to be substituted as party respondent in the related rate proceeding together with agreements and undertakings to assure the refund of any amounts collected in excess of the amounts determined to be just and reasonable in said proceedings. Applicant also requests to be made party respondent in lieu of Texas Gulf in proceedings in which increased rates have been suspended and not yet made effective.

Petitions to intervene, notices of intervention, or protests to the granting of the application may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

JOSEPH H. GUTRIDE,
*Secretary.*

[Docket No. E-7197]

## PACIFIC POWER & LIGHT CO.

### Notice of Application

DECEMBER 17, 1964.

Take notice that on December 11, 1964, an application was filed with the Federal Power Commission, pursuant to section 204 of the Federal Power Act by Pacific Power & Light Co. (Applicant) a corporation organized under the laws of the State of Maine and qualified to transact business in the States of Oregon, Wyoming, Washington, California, Montana, and Idaho, with its principal business office in Portland, Oreg., seeking an order authorizing the issuance of 100,000 shares of its Serial Preferred Stock of the par value of $100 per share.

Applicant is primarily engaged in the business of generating, purchasing, transmitting, and distributing electric energy. Applicant's electric operations accounted for approximately 97 percent of its revenues during the 12 months ending October 31, 1964. The territories served by Applicant are located in Oregon, Wyoming, Washington, California, Montana, and Idaho.

The New Preferred Stock is proposed to be issued under and pursuant to the applicable provisions of Applicant's bylaws, as heretofore amended and as to be further amended by an appropriate amendment thereto creating the new series and fixing its distinctive characteristics. The New Preferred Stock will be entitled to cumulative dividends at the rate per annum to be fixed by competitive bidding and the holders thereof will be entitled to one vote for each share held together with certain additional voting privileges during any periods when preferred stock dividends may be in arrears. Applicant proposes to sell the New Preferred Stock at competitive bidding in accordance with the applicable requirements of § 34.1(a) of the Commission's rules and regulations under the Federal Power Act.

Applicant represents that it will supply information by amendment promptly after competitive bidding for these securities shall have taken place, showing both per unit and in total amount, (a) the price at which the New Preferred Stock is to be offered to the public by the underwriters, (b) the discounts at which said securities are to be sold by Applicant to the underwriters, and (c) the resulting net proceeds to Applicant from the sale of said securities.

Applicant proposes to apply the net proceeds from the sale of the New Preferred Stock to the redemption of 100,000 outstanding shares of its 5.64 percent Serial Preferred Stock at 107 percent of the par value thereof plus an amount equivalent to unpaid accumulated dividends to the date of redemption. According to the application, the amount required to redeem these shares, exclusive of dividends accumulated after December 31, 1964, is $10,700,000.

Any person desiring to be heard or to make any protest with reference to said application should on or before January 8, 1965, file with the Federal Power Commission, Washington, D.C., 20426, petitions or protests in accordance with the requirements of the Commission's rules of practice and procedure (18 CFR 1.8 or 1.10). The application is on file and available for public inspection.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-13125; Filed, Dec. 21, 1964; 8:50 a.m.]

[Docket No. G-3653, etc.]

## SUN OIL CO.

### Notice of Applications

DECEMBER 14, 1964.

Take notice that Sun Oil Co. (Applicant) filed in the dockets listed in the Appendix hereto applications pursuant to section 7(c) of the Natural Gas Act for certificates of public convenience and necessity authorizing the sale for resale of natural gas in interstate commerce or to amend orders issuing certificates by authorizing the sale of natural gas from additional acreage, all as more fully set forth in the Appendix hereto and in the applications which are on file with the Commission and open to public inspection.

In several cases Applicant has submitted FPC gas rate schedules or supplements to FPC gas rate schedules. These have been accepted for filing and designated as set forth in the Appendix hereto. The prices set forth in the Appendix are those approved by the Commission in a settlement order issued October 1, 1964, in Docket No. G-8288, et al.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act, and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on all applications in which no protest or petition to intervene is filed within the time required herein. Where a protest or petition for leave to intervene is timely filed, further notice of a hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised it will be unnecessary for Applicant to appear or be represented at the hearing.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

JOSEPH H. GUTRIDE,
*Secretary.*

# GENERAL SERVICES ADMINISTRATION

### Utilization and Disposal Service

[Wildlife Order 74]

## DARBY CREEK DISPOSAL AREA; TINICUM TOWNSHIP, DELAWARE COUNTY, PENNSYLVANIA

### Transfer of Property

Pursuant to section 2 of Public Law 537, Eightieth Congress, approved May 19, 1948 (16 U.S.C. 667c), notice is hereby given that:

1. By letter from the General Services Administration, New York Regional Office, dated November 23, 1964, the property comprising 16.5 acres, known as the Darby Creek Disposal Area, located in Tinicum Township, Delaware County, Pa., and more particularly described in the letter of request dated November 17, 1964, from the Department of the Interior, has been transferred, effective November 27, 1964, to the Department of the Interior.

2. The above-described property was transferred to the Department of the In-

terior for the national migratory bird management program in accordance with the provisions of section 1 of said Public Law 537 (16 U.S.C. 667b).

Dated: December 15, 1964.

# SECURITIES AND EXCHANGE COMMISSION

[File No. 37-60]

## AMERICAN NATURAL GAS CO. ET AL.

### Notice of Proposed Modifications of Organization and Conduct of Business of Subsidiary Service Company and Related Transactions

DECEMBER 14, 1964.

Notice is hereby given that American Natural Gas Service Co. ("Service Company"), a wholly-owned subsidiary company of American Natural Gas Co. ("American Natural"), a registered holding company, Michigan Consolidated Gas Co. ("Michigan Consolidated"), a public-utility subsidiary company of American Natural, American Louisiana Pipe Line Co. ("American Louisiana") and Michigan Wisconsin Pipe Line Co. ("Michigan-Wisconsin"), gas transmission subsidiary companies of American Natural, and American Natural have filed a joint application-declaration, and an amendment thereto, pursuant to the provisions of the Public Utility Holding Company Act of 1935 ("Act") requesting authorization by the Commission of certain proposed modifications in the organization and conduct of business of Service Company and related sales and acquisitions of securities and other assets. Applicants-declarants have designated sections 6, 7, 9, 10, 12(f) and 13(b) of the Act and Rules 40(b), 42(b)(2), 43, 50(a)(3), 88 and 91 promulgated thereunder as being applicable to the proposed transactions.

All interested persons are referred to the said amended application-declaration on file in the office of the Commission for a statement of the proposals which are summarized below.

Service Company performs managerial, professional and technical services at cost for associate companies in the American Natural holding-company system, and its capitalization consists solely of authorized capital stock in the amount of 2,500 shares, par value $100 per share, of which 2,000 shares with aggregate par value of $200,000 are issued and outstanding and are owned entirely by American Natural.

Effective as at January 1, 1965, Service Company proposes to acquire from American Louisiana, Michigan Consolidated, and Michigan-Wisconsin for cash, and such companies propose to sell to Service Company at their respective depreciated costs thereof aggregating $325,000, certain electronic data processing and related equipment. Such equipment, together with other data processing equipment heretofore leased by the aforesaid operating subsidiary companies, will be installed by Service Company in a new System Data Processing Center. In connection therewith, all data processing center personnel (approximately 90) of Michigan Consolidated will be transferred to the payroll of Service Company. Service Company also proposes to execute new service agreements with all associate companies and to perform expanded data processing and related advisory services for such companies at cost. The costs of operation of the Data Processing Center will be allocated among all associate companies on the basis of benefits conferred in accordance with methods described in the aforesaid application-declaration.

Service Company proposes to issue and sell for cash shortly after issuance of the Commission's order herein, and American Natural proposes to acquire, the 500 shares of Service Company's authorized but unissued capital stock at the aggregate par value thereof of $50,000 and long-term unsecured notes at the aggregate principal amount thereof of $450,000. Service Company further proposes to issue and sell for cash at the principal amount thereof, and American Natural proposes to acquire, additional amounts of unsecured notes from time to time during the period ending December 31, 1969, and to prepay and reissue and sell during such period part or all of the notes theretofore issued: *Provided, however,* (a) That the aggregate principal amount of such notes to be outstanding at anytime will not exceed $1,000,000, and (b) that the aggregate of the principal amount of Service Company's outstanding notes, and the par value of its outstanding capital stock, and its retained earnings will be maintained at an amount equivalent to approximately the sum of Service Company's operating expenses for two months, and its prepayments and petty cash working funds, and the depreciated cost of its fixed assets.

The application-declaration states that each note will mature December 31, 1989, and will bear interest at a rate ¼ of one percent above the prime rate in effect at a specified bank in New York on the date of issuance. Such interest rate will be adjusted to the prime rate plus ¼ percent as of the first day of the month following any change in the prime rate. It is represented that the proposed interest rate of ¼ percent above the prime rate recognizes the fact that long-term loans consistently command higher rates of interest than short-term loans. Service Company will reserve the right to prepay part or all of the aforesaid notes at any time without penalty.

Service Company states that, effective as at January 1, 1965, it will include in its monthly charges to associate companies for services rendered such an amount of compensation for the use of its equity capital as will, together with the interest to be paid on its proposed notes, provide an overall return of 6½ percent per annum, after income taxes, on its monthly average capitalization. The applicants-declarants assert that such return will represent a reasonable return on only the amount of capital reasonably required by Service Company to perform services for associate companies and that such return is permitted by the terms of Rule 91(b) under the Act. In this connection, the applicants-declarants have agreed to a reservation of jurisdiction by the Commission in its order herein to determine whether the aforesaid return on Service Company's capitalization, including the interest rate on the proposed notes, is consistent with the provisions of Rule 91, and they have requested that the Commission's determination of this matter be made retroactive to January 1, 1965.

Service Company estimates that its annual service charges to associate companies, which totalled $1,704,000 for the 12 months ended September 30, 1964, will increase by an amount of $1,600,000 in 1965 if the proposed transactions are authorized and that further increases may result in subsequent years as additional applications are adapted to the Data Processing Center. It is also represented that, based upon the proposed initial capitalization of $700,000 and an assumed interest rate of 4.75 percent on the proposed notes, such increase in service charges in 1965 would include interest of $21,375, Federal income taxes of $22,292 and compensation of $24,125 (after income taxes) for use of equity capital. Such compensation would be equivalent to approximately 9.65 percent on the $250,000 par value of Service Company's capital stock proposed to be outstanding.

The applicants-declarants represent that the centralization in the System Data Processing Center of the data processing functions, heretofore provided by the operating subsidiary companies primarily for their own needs with less efficient arrangements, will produce substantial overall savings and other benefits to the operating companies of the System. It is also represented that the proposed modifications will not result in any increase in the consolidated operating expenses of the American Natural System; and that such modifications will not result in, or be the basis for, a request to increase the present rates of any operating subsidiary company, although the proposed increase in service charges will increase the aggregate operating expenses of such subsidiary companies by a corresponding amount.

The Public Service Commission of Wisconsin has jurisdiction over the proposed service agreement to be executed by Service Company with Milwaukee Gas Light Co. A petition for approval of the service agreement has been filed with the Wisconsin Commission and a copy of the order issued pursuant thereto will be filed by amendment. The applicants-declarants represent that no other State commission or Federal commission has jurisdiction in respect of the proposed transactions, however, copies of the aforesaid application-declaration have been furnished to the Federal Power Commission and to the State Commissions of Michigan and Wisconsin.

Notice is further given that any interested person may, not later than January 8, 1965, request in writing that a hearing be held in respect of such matters, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the said amended joint application-declaration which he desires to controvert; or he may request that he be notified should the Commission order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request should be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicants-declarants, and proof of service (by affidavit or, in case of an attorney-at-law, by certificate) should be filed contemporaneously with the request. At any time after said date, the joint application-declaration as amended, or as it may be further amended, may be granted and permitted to become effective in the manner provided by Rule 23 of the general rules and regulations promulgated under the Act, or the Commission may grant exemption from such rule as provided by Rules 20(a) and 100 thereof, or take such other action as it may deem appropriate.

By the Commission.

[SEAL] NELLYE A. THORSEN,
*Assistant Secretary.*

[F.R. Doc. 64-13083; Filed, Dec. 21, 1964; 8:45 a.m.]

## WORLDWIDE FUND LTD.

### Notice of Application for Order Declaring That Company Has Ceased To Be Investment Company

DECEMBER 16, 1964.

Notice is hereby given that Worldwide Fund Ltd. ("Applicant"), 60 Broad Street, New York, N.Y., 10004, a Bermuda corporation and a management open-end, nondiversified investment company registered under the Investment Company Act of 1940 ("Act"), has filed an application pursuant to section 8(f) of the Act for an order declaring that applicant has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a complete statement of the representations contained therein.

Applicant represents that it is not offering its securities to the public; that it does not presently propose a public offering of its securities; and that its 10,440 outstanding shares of common stock are owned beneficially by forty-eight persons.

Section 3(c)(1) of the Act provides that any issuer whose outstanding securities are beneficially owned by not more than 100 persons and which is not making and does not presently propose to make a public offering of its securities is not an investment company within the meaning of the Act.

Notice is further given that any interested person may, not later than December 30, 1964 at 5:30 p.m. submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C., 20549. A copy of such request shall be served personally or by mail (air mail if the person being served is located more than 500 miles from the point of mailing) upon applicant. Proof of such service (by affidavit or in case of an attorney-at-law by certificate) shall be filed contemporaneously with the request. At any time after said date, as provided by Rule 0-5 of the rules and regulation promulgated under the Act, an order disposing of the application herein may be issued by the Commission upon the basis of the information stated in said application, unless an

order for hearing upon said application shall be issued upon request or upon the Commission's own motion.

For the Commission (pursuant to delegated authority).

[SEAL] NELLYE A. THORSEN, *Assistant Secretary.*

# SMALL BUSINESS ADMINISTRATION

[Delegation of Authority 4, Amdt. 1]

## DEPUTY ADMINISTRATOR FOR FINANCIAL ASSISTANCE

### Delegation on Financial Assistance

In order to include the source authority under the Economic Opportunity Act of 1964 by which previously delegated functions may also be performed, the first paragraph of Item I of Delegation of Authority No. 4, 29 F.R. 5489 is hereby amended to read as follows:

I. Pursuant to the authority vested in the Administrator by the Small Business Act, 72 Stat. 384, as amended, and the Small Business Investment Act of 1958, 72 Stat. 689, as amended; Title IV of the Economic Opportunity Act of 1964, 78 Stat. 526 and Delegation of Authority to the Administrator of the Small Business Administration from the Director, Office of Economic Opportunity (29 F.R. 14764), there is hereby delegated to the Deputy Administrator for Financial Assistance the following authority:

• • • • • •

Effective date: December 9, 1964.

EUGENE P. FOLEY, *Administrator.*

[F.R. Doc. 64-13075; Filed, Dec. 21, 1964; 8:45 a.m.]

[Delegation of Authority 30 (Revision 9), Amdt. 4]

## REGIONAL DIRECTORS

### Delegation of Authority To Conduct Program Activities in the Regional Offices

In order to include the source authority under the Economic Opportunity Act of 1964 by which previously delegated functions may also be performed, the first paragraph of Item I of Delegation of Authority No. 30 (Revision 9), as amended, 29 F.R. 11777, 12570, 13354 and 14093 is hereby amended to read as follows:

I. Pursuant to the authority vested in the Administrator by the Small Business Act, 72 Stat. 384, as amended; the Small Business Investment Act of 1958, 72 Stat. 689, as amended; Title IV of the Economic Opportunity Act of 1964, 78 Stat. 526 and Delegation of Authority to the Administrator of the Small Business Administration from the Director, Office of Economic Opportunity (29 F.R. 14764), there is hereby delegated to each regional director within his region, the authority:

• • • • •

Effective date: December 9, 1964.

EUGENE P. FOLEY, *Administrator.*

# INTERSTATE COMMERCE COMMISSION

## FOURTH SECTION APPLICATIONS FOR RELIEF

DECEMBER 17, 1964.

Protests to the granting of an application must be prepared in accordance with Rule 1.40 of the general rules of practice (49 CFR 1.40) and filed within 15 days from the date of publication of this notice in the FEDERAL REGISTER.

LONG-AND-SHORT HAUL

FSA 39471: *T.O.F.C. rates from and to official territory points.* Filed by Southwestern Freight Bureau, agent (No. B-8658) for interested rail carriers. Rates on property moving on class and commodity rates loaded in trailers and transported on railroad flatcars, between Bond and Lone Star (Morris County), Tex., on the one hand, and points in official (not including Illinois) territory, on the other.

Grounds for relief: Short-line distance formula and grouping.

Tariffs: Supplements 50 and 40 to Southwestern Freight Bureau, agent, tariffs I.C.C. 4571 and 4547, respectively.

FSA 39472: *T.O.F.C. rates from and to Ravenna, Ohio.* Filed by Southwestern Freight Bureau, agent (No. B-8659), for interested rail carriers. Rates on property moving on class rates loaded in trailers and transported on railroad flatcars, between Ravenna, Ohio, on the one hand, and points in southwestern territory, on the other.

Grounds for relief: Short-line distance formula and grouping.

Tariff: Supplement 40 to Southwestern Freight Bureau, agent, tariff I.C.C. 4547.

FSA 39473: *Freight loaded in containers—Seatrain Lines, Inc.* Filed by Seatrain Lines, Inc. (No. 32), for itself and interested motor carriers. Rates on property moving on class rates, loaded in containers and transported over joint routes of applicant motor carriers and Seatrain Lines, Inc., between points in Arkansas, Louisiana, and Texas, on the one hand, and points in Connecticut, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, and Rhode Island, on the other.

Grounds for relief: Motor-water-motor competition.

Tariff: Supplement 22 to Seatrain Lines, Inc., tariff I.C.C. 199.

By the Commission.

[SEAL] HAROLD D. MCCOY, *Secretary.*

[Notice 1097]

## MOTOR CARRIER TRANSFER PROCEEDINGS

DECEMBER 17, 1964.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC 67301. By order of December 14, 1964, The Transfer Board approved the transfer to John D. Bohr, Jr., Annville, Pa., of the operating rights issued by this Commission, November 22, 1961, August 28, 1962, July 12, 1962, October 1, 1962, October 4, 1962, July 16, 1963, and December 12, 1963, respectively, under Certificates Nos. MC 118876 Sub 2, MC 118876 Sub 5, MC 118876 Sub 9, MC 118876 Sub 10, MC 118876 Sub 12, MC 118876 Sub 17, and MC 118876 Sub 21, to Graves Transfer Co., a corporation, Georgetown, Del., authorizing the transportation of: Fish oil and fish solubles, in bulk, in tank vehicles, and fish scrap and fish meal, in bulk, from Lewes, Del., to Denton and Hagerstown, Md., Rohestown, Allentown and York, Pa., Romney, W. Va., Cartersville, Ga., Akron and Wooster, Ohio, and Lakewood, N.J.; fish meal, in bulk, from Wildwood, N.J., to

site of Ralston Purina Co., Wilmington, Del.; meat scrap, from Bristol and Philadelphia, Pa., and Baltimore, Md., to plant sites at Wilmington and Delmar, Del.; fish oil, fish solubles, fish scrap, and fish meal, from Lewes, Del., to points in 9 counties in Maryland, and Accomack and Northampton Counties, Va.; dry meat scrap, in bulk, from Philadelphia and Bristol, Pa., to points in New Castle County, Del., and Cecil County, Md.; from Baltimore, Md., to points in New Castle County, Del.; dry meat scrap and other dry feed ingredients in bulk and in bags, from Philadelphia and Bristol, Pa., to points in 8 counties in Maryland, 2 in Virginia, and 2 in Delaware; from Baltimore, Md., to points in Accomack and Northampton Counties, Va.; dry meat scrap and other dry feed ingredients, in bulk, in bags, from Baltimore, Md., to points in Kent and Sussex Counties, Del.; dry soy bean meal and dry soy bean hulls, in bulk, and in bags, from points in Sussex County, Del., and Wicomico County, Md., to points in Maryland and New Jersey, and points in 12 counties in Pennsylvania, and points in 2 counties in Virginia, dry meat scrap and other dry feed ingredients, in bulk, etc., from Tuckerton and Port Monmouth, N.J., to points in Maryland, Virginia, and Delaware; dry meat scrap and other dry feed ingredients, in bulk, etc., from Wildwood, N.J., to Delmar, Del.; from points in New Jersey, with exceptions, Atlantic, and Camden Counties, N.J., to points in Maryland, Virginia, and Delaware; from points in 16 counties in Pennsylvania to points in Maryland, Virginia, and Delaware; and dry meat scrap and other dry feed ingredients used in the manufacture of prepared animal and poultry feed, in bulk and in bags, from points in Harford County, Md., to Delmar, Del. Christian V. Graf, 407 North Front Street, Harrisburg, Pa., attorney for applicants.

No. MC-FC 67343. By order of December 14, 1964, The Transfer Board approved the transfer to the Estate of Geo. S. Snyder, Hatfield, Pa., of the operating rights issued by the Commission, April 20, 1964, under Certificate No. MC 118876 Sub 16, to Graves Transfer Co., Georgetown, Del., authorizing the transportation, over irregular routes, of prepared poultry and animal feeds, in bulk (except liquid feeds in tank vehicles), from Wilmington, Del., to points in Berks, Bucks, Chester, Delaware, Lehigh, Montgomery, Northampton, and Philadelphia Counties, Pa. John E. Landis, 425 West Main Street, Landsdale, Pa., attorney for applicants.

No. MC-FC 67393. By order of December 14, 1964, The Transfer Board approved the transfer to Wayne Warehousing & Cartage, Inc., Fort Wayne, Ind., of all the operating rights issued by the Commission May 5, 1952, under Certificates Nos. MC 9448, MC 9448 Sub 3 and MC 9448 Sub 4, to Clifford H. Borgmann, doing business as A. C. Borgmann and Son, Fort Wayne, Ind., authorizing the transportation, over irregular routes, of household goods, between points in Indiana, on the one hand, and, on the other, points in Illinois, Michigan, Ohio, Pennsylvania, Connecticut, Delaware, Indiana, Iowa, Kansas, Kentucky, Maine, Maryland, Massachusetts, Minnesota, Missouri, Nebraska, New Hampshire, New Jersey, Rhode Island, Vermont, West Virginia, Wisconsin, New York, and the District of Columbia; Christmas trees, between Fort Wayne, Ind., on the one hand, and, on the other, points in Indiana within 60 miles of Fort Wayne; general commodities, excluding household goods, and other specified commodities, between points in Allen County, Ind.; heavy machinery and other equipment, requiring special equipment for handling, between points in Indiana within 60 miles of Fort Wayne, Ind., including Fort Wayne; general commodities, over regular routes, between Fort Wayne, Ind., and Ferguson, Ind.; between Fort Wayne, Ind., and site of Casad Ordnance Depot, near New Haven, Ind. Arthur H. Fruechtenicht, 421 Standard Building, Fort Wayne, Ind., attorney for applicants.

No. MC-FC 67413. By order of December 14, 1964, The Transfer Board approved the transfer to Mitchell M. Vassar, doing business as Mitch Vassar, Route 1, Box 148, Wilkerson Ranch, Bishop, Calif., of Certificate No. MC 116809, issued September 2, 1958, to Charles H. Olds, Jr., 148 Shepard Lane, Bishop, Calif., authorizing the transportation of general commodities, including household goods but excluding commodities in bulk, between Bishop, Calif., and Tonopah, Nev., serving all intermediate points, with specified restrictions.

No. MC-FC 67416. By order of December 14, 1964, The Transfer Board approved the transfer to C. J. Weber Trucking, Inc., 540 Broad Street, Tonawanda, N.Y., of Certificate No. MC 62275, issued August 8, 1958, to Charles J. Weber and Isabel M. Weber, a partnership, doing business as Charles J. Weber, 540 Broad Street, Tonawanda, N.Y., authorizing the transportation of general commodities, excluding household goods and commodities in bulk, over irregular routes, between Tonawanda, Buffalo, and Niagara Falls, N.Y.

No. MC-FC 67424. By order of December 14, 1964, The Transfer Board approved the transfer to L. J. Navy Trucking Co., a corporation, 202 Eighth Avenue W., Huntington, W. Va., of the operating rights in Certificate No. MC 123887, issued September 7, 1962, to L. J. Navy, doing business as L. J. Navy Trucking Company, 202 Eighth Avenue W., Huntington, W. Va., authorizing the transportation, over irregular routes, of: Malt beverages, from, to, and between specified points, and described portions, of Illinois, Indiana, Kentucky, Michigan, Missouri, Ohio, and West Virginia.

No. MC-FC 67432. By order of December 14, 1964, The Transfer Board approved the transfer to Shantz Cartage, Inc., Akron, Ohio, of the operating rights in Permit No. MC 123009, issued May 22, 1961, to Merchandise Cartage Co., a corporation, Akron, Ohio, authorizing the transportation, over irregular routes, of: Perchlorethylene, in tank vehicles, and laundry cleaning supplies, from Akron, Ohio, to points in specified counties in Pennsylvania. James E. Davis, 165 West Center Street, Akron, Ohio, 44302, attorney for applicants.

No. MC-FC 67433. By order of December 14, 1964, The Transfer Board approved the transfer to Medill Transfer, Inc., Peoria, Ill., of the Certificate of Registration No. MC 99996 Sub 1, issued January 9, 1964, evidencing a right to engage in interstate or foreign commerce within the State of Illinois, to John W. Medill, doing business as Medill Transfer, Peoria, Ill. Delbert Loos, 510 Vermont Street, Quincy, Ill., attorney for applicants.

FEDERAL REGISTER

Area Code 202 Phone 963-3261

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration (mail address National Archives Building, Washington, D.C. 20408), pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

# Rules and Regulations

## Title 26—INTERNAL REVENUE

### Chapter I—Internal Revenue Service, Department of the Treasury

SUBCHAPTER A—INCOME TAX

[T.D. 6781]

### PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

### Income of Controlled Foreign Corporation From Insurance of United States Risks

On July 30, 1964, notice of proposed rule making with respect to the amendment of the Income Tax Regulations (26 CFR Part 1) to conform such regulations to section 953 of the Internal Revenue Code of 1954, as added by section 12(a) of the Revenue Act of 1962 (76 Stat. 1006), was published in the FEDERAL REGISTER (29 F.R. 10603). After consideration of all such relevant matter as was presented by interested persons regarding the rules proposed, the amendment to the regulations as proposed is hereby adopted, subject to the changes set forth below in paragraphs 1 through 5. In addition, pargaraph 6 of this Treasury decision contains an amendment which revises paragraph (d)(3) of § 1.954–2. These amendments shall apply for taxable years of foreign corporations beginning after December 31, 1962, and for taxable years of United States shareholders within which or with which such taxable years of such corporations end.

PARAGRAPH 1. Section 1.053–1, as set forth in the notice of proposed rule making, is changed by adding after subparagraph (5) of paragraph (c) a new subparagraph (6).

PAR. 2. Section 1.953–2, as set forth in the notice of proposed rule making, is changed by revising subdivision (i) of paragraph (b)(2), by redesignating subdivisions (ii) through (ix) of paragraph (b)(2) as subdivisions (iii) through (x), by adding after subdivision (i) of paragraph (b)(2) a new subdivision (ii), by revising subdivisions (iii)(a), (iv), (v), (viii), and (x) of paragraph (b)(2), as so redesignated, and by revising paragraph (c).

PAR. 3. Section 1.953–4, as set forth in the notice of proposed rule making, is changed by revising paragraph (a)(1) and (2), by revising paragraph (c), and by revising paragraph (f)(2)(iii).

PAR. 4. Section 1.953–5, as set forth in the notice of proposed rule making, is changed by revising paragraphs (c)(2)(ii)(a) and (c)(3)(ii)(a).

PAR. 5. Section 1.953–6, as set forth in the notice of proposed rule making, is changed by revising the first sentence of paragraph (a).

PAR. 6. Paragraph (d)(3) of § 1.954–2 is amended.

Because paragraph 6 of this Treasury decision substantially conforms to provisions which were published with notice of proposed rule making on December 27, 1962 (27 F.R. 12762), it is hereby found that it is unnecessary to issue such paragraph of this Treasury decision with notice and public procedure thereon under section 4(a) of the Administrative Procedure Act, approved June 11, 1946, or subject to the effective date limitation of section 4(c) of said Act.

[SEAL] BERTRAND M. HARDING,
*Acting Commissioner of Internal Revenue.*

Approved: December 16, 1964.

STANLEY S. SURREY,
*Assistant Secretary of the Treasury.*

In order to conform the Income Tax Regulations (26 CFR Part 1) to section 953 of the Internal Revenue Code of 1954, as added by section 12(a) of the Revenue Act of 1962 (76 Stat. 1006), such regulations are amended to include the following new sections, effective with respect to taxable years of foreign corporations beginning after December 31, 1962, and to taxable years of United States shareholders within which or with which such taxable years of such foreign corporations end:

**§ 1.953 Statutory provisions; income from insurance of United States risks.**

SEC. 953. *Income from insurance of United States risks*—(a) *General rule.* For purposes of section 952(a)(1), the term "income derived from the insurance of United States risks" means that income which—

(1) Is attributable to the reinsurance or the issuing of any insurance or annuity contract—

(A) In connection with property in, or liability arising out of activity in, or in connection with the lives or health of residents of, the United States, or

(B) In connection with risks not included in subparagraph (A) as the result of any arrangement whereby another corporation receives a substantially equal amount of premiums or other consideration in respect to any reinsurance or the issuing of any insurance or annuity contract in connection with property in, or liability arising out of activity in, or in connection with the lives or health of residents of, the United States, and

(2) Would (subject to the modifications provided by paragraphs (1), (2), and (3) of subsection (b)) be taxed under subchapter L of this chapter if such income were the income of a domestic insurance corporation.

This section shall apply only in the case of a controlled foreign corporation which receives, during any taxable year, premiums or other consideration in respect of the reinsurance, and the issuing, of insurance and annuity contracts described in paragraph (1) in excess of 5 percent of the total of premiums and other consideration received during such taxable year in respect of all reinsurance and issuing of insurance and annuity contracts.

(b) *Special rules.* For purposes of subsection (a)—

(1) In the application of part I of subchapter L, life insurance company taxable income is the gain from operations as defined in section 809(b).

(2) A corporation which would, if it were a domestic insurance corporation, be taxable under part II of subchapter L shall apply subsection (a) as if it were taxable under part III of subchapter L.

(3) The following provisions of subchapter L shall not apply:

(A) Section 809(d)(4) (operations loss deduction),

(B) Section 809(d)(5) (certain nonparticipating contracts),

(C) Section 809(d)(6) (group life, accident, and health insurance),

(D) Section 809(d)(10) (small business deduction),

(E) Section 817(b) (gain on property held on December 31, 1958, and certain substituted property acquired after 1958),

(F) Section 832(b)(5) (certain capital losses).

(4) The items referred to in—

(A) Section 809(c)(1) (relating to gross amount of premiums and other considerations),

(B) Section 809(c)(2) (relating to net decrease in reserves),

(C) Section 809(d)(2) (relating to net increase in reserves), and

(D) Section 832(b)(4) (relating to premiums earned on insurance contracts),

shall be taken into account only to the extent they are in respect of any reinsurance or the issuing of any insurance or annuity contract described in subsection (a)(1).

(5) All items of income, expenses, losses, and deductions (other than those taken into account under paragraph (4)) shall be properly allocated or apportioned under regulations prescribed by the Secretary or his delegate.

[Sec. 953 as added by sec. 12(a), Rev. Act 1962 (76 Stat. 1006)]

**§ 1.953–1 Income from insurance of United States risks.**

(a) *In general.* The subpart F income of a controlled foreign corporation for any taxable year includes its income derived from the insurance of United States risks for such taxable year. See section 952(a)(1). A controlled foreign corporation shall have income derived from the insurance of United States risks for such purpose if it has taxable income, as determined under § 1.953–4 or § 1.953–5, which is attributable to the reinsuring or the issuing of any insurance or annuity contract in connection with United States risks, as defined in § 1.953–2 or § 1.953–3, and if it satisfies the 5-percent minimum premium requirement prescribed in paragraph (b) of this section. It is immaterial for purposes of this section whether the person insured or the beneficiary of any insurance, annuity, or reinsurance contract is, as to such corporation, a related person or a United States shareholder. For definition of the term "controlled foreign corporation" for purposes of taking into account income derived from the insurance of United States risks under section 953, see section 957 (a) and (b) and §§ 1.957–1 and 1.957–2.

(b) *5-percent minimum premium requirement.* A controlled foreign corporation shall not have income derived from the insurance of United States risks for purposes of this section unless the premiums received by such corporation during the taxable year which are attributable to the reinsuring and the issuing of insurance and annuity contracts in connection with the United States risks exceed 5 percent of the total premiums which are received by such corporation during such taxable year and which are attributable to the reinsuring and the issuing of insurance and annuity contracts in connection with all risks.

(c) *General definitions.* For purposes of §§ 1.953–1 to 1.953–6, inclusive—

(1) *Reinsurance, etc.* The terms "reinsurance", "insurance", and "annuity contract" have the same meaning which they have for purposes of applying section 809(c)(1) or section 832(b)(4), as the case may be.

(2) *Premiums.* The term "premiums" means the items taken into account for the taxable year under section 809(c)(1), or the amount computed for the taxable year under section 832(b)(4) without the application of subparagraph (B) thereof, as the case may be; except that, for purposes of determining the amount of premiums received in applying paragraph (b) of this section or paragraph (a) of § 1.953–3, advance premiums and deposits shall not be taken into account.

(3) *Insurance company.* The term "insurance company" has the same meaning which it has for purposes of applying section 801(a), determined by applying the principles of paragraph (a) of § 1.801–3.

(4) *Related person.* The term "related person", when used with respect to a controlled foreign corporation, shall have the meaning assigned to it by paragraph (e) of § 1.954–1.

(5) *Policy period.* With respect to any insurance or annuity contract under which a corporation is potentially liable at any time during its taxable year, the term "policy period" means with respect to such year each period of coverage under the contract if such period begins or ends with or within the taxable year, except that, if such period of coverage is more than one year, such term means such of the following periods as are applicable, each one of which is a policy period with respect to the taxable year:

(i) The one-year period which begins with the effective date of the contract and begins or ends with or within the taxable year,

(ii) The one-year period which begins with an anniversary of the contract and begins or ends with or within the taxable year, and

(iii) The period of less than one year if such period begins with an anniversary of the contract, ends with the date on which coverage under the contract terminates, and begins or ends with or within the taxable year.

For such purposes, the effective date of the contract is the date on which coverage under the contract begins, and the anniversary of the contract is the annual return of the effective date. The period of coverage under a contract is the period beginning with the effective date of the contract and ending with the date on which the coverage under the contract expires; except that, if the risk under the contract has been transferred by assumption reinsurance, the period of coverage shall end with the effective date of such transfer or, if the contract is cancelled, with the effective date of cancellation. For this purpose, the term "assumption reinsurance" shall have the meaning provided by paragraph (a)(7)(ii) of § 1.809–5. The application of this subparagraph may be illustrated by the following examples:

*Example (1).* Controlled foreign corporation A issues to domestic corporation M an insurance contract which provides coverage for the 2½ year period beginning on July 1, 1963. Corporation A uses the calendar year as the taxable year. For 1963, the policy period under such contract as to A Corporation is July 1, 1963, to June 30, 1964. For 1964, the policy periods under such contract as to A Corporation are July 1, 1963, to June 30, 1964, and July 1, 1964, to June 30, 1965. For 1965, the policy periods under such contract as to A Corporation are July 1, 1964, to June 30, 1965, and July 1, 1965, to December 31, 1965.

*Example (2).* The facts are the same as in example (1) except that M Corporation cancels the contract on August 31, 1963. For 1963, the policy period under such contract as to A Corporation is July 1, 1963, to August 31, 1963.

*Example (3).* The facts are the same as in example (1) except that on January 15, 1965, A Corporation cedes insurance under the contract to controlled foreign corporation B, which also uses the calendar year as the taxable year. For 1964, the policy periods under such contract as to A Corporation are July 1, 1963, to June 30, 1964, and July 1, 1964, to June 30, 1965. For 1965, the policy periods under such contract as to both A Corporation and B Corporation are July 1, 1964, to June 30, 1965, and July 1, 1965, to December 31, 1965.

*Example (4).* Controlled foreign corporation C, which uses the calendar year as the taxable year, issues to domestic corporation N an insurance contract which covers the marine risks in connection with shipping a machine to Europe. The contract does not specify the dates during which the machine is covered, but provides coverage from the time the machine is delivered alongside a named vessel in Hoboken, New Jersey, until the machine is delivered alongside such vessel in Liverpool, England. Such deliveries in New Jersey and England take place on February 1, and February 28, 1963, respectively. For 1963, the policy period under such contract as to C Corporation is February 1, to February 28, 1963.

(6) *Foreign country.* The term "foreign country" includes, where not otherwise expressly provided, a possession of the United States.

### § 1.953–2 Actual United States risks.

(a) *In general.* For purposes of paragraph (a) of § 1.953–1, the term "United States risks" means risks described in section 953(a)(1)(A)—

(1) In connection with property in the United States (as defined in paragraph (b) of this section),

(2) In connection with liability arising out of activity in the United States (as defined in paragraph (c) of this section), or

(3) In connection with the lives or health of residents of the United States (as defined in paragraph (d) of this section).

For purposes of section 953(a), the term "United States" is used in a geographical sense and includes only the States and the District of Columbia. Therefore, the reinsuring or the issuing of insurance or annuity contracts by a controlled foreign corporation in connection with property located in a foreign country or a possession of the United States, in connection with activity in a foreign country or a possession, or in connection with the lives or health of citizens of the United States who are not residents of the United States will not give rise to income to which paragraph (a) of § 1.953–1 applies, unless the income derived by the controlled foreign corporation from such contracts constitutes income derived in connection with risks which are deemed to be United States risks, as defined in § 1.953–3.

(b) *Property in the United States.* The term "property in the United States" means property, as defined in subparagraph (1) of this paragraph, which is in the United States, within the meaning of subparagraph (2) of this paragraph.

(1) *Property defined.* The term "property" means any interest of an insured in tangible (including real and personal) or intangible property. Such interests include, but are not limited to, those of an owner, landlord, tenant, mortgagor, mortgagee, trustee, beneficiary, or partner. Thus, for example, if insurance is issued against loss from fire and theft with respect to an insured's home and its contents, such risks are risks in connection with property, whether the insured is the owner or lessee and whether the contents include furniture or cash and securities. Furthermore, if insurance is issued against all risks of damage or loss with respect to the automobile of an insured, such risks are risks in connection with property, whether the risks insured against may be caused by the insured, another person, or natural forces.

(2) *United States location*—(i) *In general.* Property will be considered property in the United States when it is exclusively located in the United States. Conversely, property will be considered property not in the United States when it is exclusively located outside the United States. In addition, property which is ordinarily located in, but temporarily located outside, the United States will be considered property in the United States both when it is ordinarily located in, and when it is temporarily located outside, the United States if the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with such property cannot be allocated to, or apportioned between, risks incurred when such property is acutally located in the United States and risks incurred when it is actually located outside the United States. If such premium can be so allocated or apportioned on a reasonable basis, however, such property will be considered property not in the United States when it is actually located outside the United States. However, property will not be considered property in the United States if it is neither property which is exclusively located in the United States nor property which is ordinarily located in, but temporarily located outside, the United States. The rules prescribed in subdivision (ii) of this subparagraph shall apply in determining whether a premium can be allocated or apportioned on a reasonable basis to or between risks incurred when property is actually located in the United States and risks incurred when such property is actually located outside the United States. The rules prescribed in subdivisions (iii) through (x) of this subparagraph shall apply in determining whether property is, or will be considered, exclusively located in or outside the United States and whether property is, or will be considered, ordinarily located in the United States; such rules also limit the rule of premium allocation and apportionment prescribed in this subdivision and subdivision (ii) of this subparagraph. The determinations required by this subparagraph shall be made with respect to the location of property during the policy period applicable to the taxable year of the insuring or reinsuring corporation, or, if more than one policy period exists with respect to such taxable year, such determinations shall be made separately with respect to the location of property during each such policy period.

(ii) *Premium allocation or apportionment.* Whether a premium can be allocated or apportioned on a reasonable basis to or between risks incurred when property is actually located in the United States and risks incurred when such property is actually located outside the United States shall depend on the intention of the parties to the insurance contract, as determined from its provisions and the facts and circumstances preceding its execution. Contract provisions on the basis of which the premium reasonably may be so allocated or apportioned include, but are not limited to, provisions which separately describe each risk covered, the period of coverage of each risk, the special warranties for each risk, the premium for each risk (or the basis for determining such premium), and the conditions of paying the premium for each risk. For purposes of this subdivision, it shall be unnecessary formally to make a separate policy with respect to each risk covered or with respect to each clause attached to the policy, provided that the intention of the parties to the contract is reasonably clear. For example, if in the ordinary course of carrying on an insurance business an insurance policy is issued which covers fire, theft, and water damage risks incurred when property is actually located in the United States and marine risks incurred when such property is actually located outside the United States and which, pursuant to accepted insurance principles, properly describes the premium rates as percentages of the amount of coverage as ".825% plus .3% fire, etc. risks plus .12% water risks = 1.245%", a reasonable basis exists to allocate a $124.50 premium paid for $10,000 of such coverage to $82.50 for foreign risks and $42.00 ($30.00+$12.00) to United States risks.

(iii) *Property in general—(a) Ordinary and temporary location.* Except as otherwise provided in subdivisions (iv) through (x) of this subparagraph, the determination of whether property is ordinarily located in the United States will depend on all the facts and circumstances in each case. Property is ordinarily located in the United States if its location in the United States is regular, usual, or often occurring. However, in all cases property will be considered ordinarily located in the United States if it is actually located in the United States for an aggregate of more than 50 percent of the days in the applicable policy period whereas property will, under no circumstances, be considered ordinarily located in the United States if it is actually located in the United States for an aggregate of not more than 30 percent of the days in the applicable policy period. Property which is ordinarily located in the United States is temporarily located outside the United States when it is actually located outside the United States. For purposes of determining the number and percent of the days in an applicable policy period, the term "day" means, not any 24-consecutive-hour period, but a continuous period of twenty-four hours commencing from midnight and ending with the following midnight; in determining the location of property for such purposes, an amount of time which is at least one-half of such a day, but less than the entire day, shall be considered a day, and an amount of time which is less than one-half of such a day shall not be considered a day.

(*b*) *Illustrations.* The application of this subdivision may be illustrated by the following examples:

*Example (1).* Controlled foreign corporation A issues to domestic corporation M a comprehensive blanket or floater insurance policy which, for one year, covers inventory samples which M Corporation regularly ships from the United States in order to encourage sales. Such shipments are made on the condition that they be returned to the United States within 5 days after they are received. During the one-year policy period, such samples are sent from, and returned to, the United States 50 times, and during such one-year period are actually located in the United States for an aggregate of 120 days. Since the location of the samples in the United States during such one-year period is often recurring, they are property ordinarily located in, but temporarily located outside, the United States. Therefore, they will be considered property in the United States even though for such one-year period their location in the United States is not regular or usual and is not for an aggregate of more than 50 percent of the days in the policy period. However, if, by considering such factors as the terms and premium schedule of the insurance contract as well as the number, value, and duration of the location in and outside the United States, of such samples, the premium which is attributable to the issuing of such contract can be allocated to, or apportioned between, risks occurring when such samples are actually located in the United States and risks occurring when they are actually located outside the United States, such samples will be considered property not in the United States when they are actually located outside the United States.

*Example (2).* A machine, located for several years in a foreign branch of a United States manufacturer, is permanently transferred to the home office of such manufacturer, where it arrives on January 1, 1963, and remains for the remainder of 1963. Under a separate insurance contract issued by a controlled foreign corporation, which uses the calendar year as the taxable year, such machine is insured against damage for the three-year period commencing on May 1, 1962. Because of the change in location of the machine, the premiums are increased as of January 1, 1963. Since the machine is in the United States from January 1, 1963, to April 30, 1963, its location in the United States is regular and usual during the policy period of May 1, 1962, to April 30, 1963. Accordingly, the machine is ordinarily located in the United States for such policy period. However, since the premium which is attributable to the issuing of such contract is allocable to risks occurring when the machine is actually located in, and when it is actually located outside, the United States, such machine will be considered property not in the United States from May 1, 1962, through December 31, 1962.

(iv) *Commercial motor vehicles, ships, aircraft, railroad rolling stock, and containers.* Any motor vehicle, ship, aircraft, railroad rolling stock, or any container transported thereby, which is used exclusively in the commercial transportation of persons or property to or from the United States (including such transportation from one place to another in the United States) and is ordinarily located in the United States will be considered property in the United States both when such property is ordinarily located in, and when such property is temporarily located outside, the United States. Whether such property is used in the transportation of persons or property to or from the United States and is ordinarily located in the United States are issues to be determined from all the facts and circumstances in each case. However, in all cases such transportation property will be considered ordinarily located in the United States if either more than 50 percent of the miles traversed during the applicable policy period in the use of such property are traversed within the United States or such property is located in the United States more than 50 percent of the time during such period. Further, such transportation property will not at any time be considered property in the United States if either not more than 30 percent of the miles traversed during the applicable policy period in the use of such property are traversed within the United States or such property is located in the United States for not more than 30 percent of the time during such period. Nevertheless, if not more than 30 percent of the miles traversed during the applicable policy period in the use of such transportation property are traversed within the United States, such property will be considered ordinarily located in the United States if it is located in the United States more than 50 percent of the time during such period. Moreover, if such transportation property is located in the United States for not more than 30 percent of the time

during the applicable policy period, such property will be considered ordinarily located in the United States if more than 50 percent of the miles traversed during such period in the use of such property are traversed within the United States. If such transportation property is considered property in the United States because more than 50 percent of the miles traversed during the applicable policy period in the use of such property are traversed within the United States, the apportionment of premium provided in subdivision (i) of this subparagraph shall be made on a mileage basis. If, however, such property is considered property in the United States because such property is located in the United States more than 50 percent of the time during the applicable policy period, the apportionment of premium provided in subdivision (i) of this subparagraph shall be made on a time basis.

(v) *Noncommercial motor vehicles, ships, aircraft, and railroad rolling stock.* Except as provided in subdivision (iv) of this subparagraph, any motor vehicle, ship or boat, aircraft, or railroad rolling stock which at any time is actually located in the United States and which either (*a*) is registered with the United States, a State (including any political subdivision thereof), or any agency thereof or (*b*), if not so registered, is owned by a citizen, resident, or corporation of the United States will be considered property which is ordinarily located in the United States. Unless the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with such property considered ordinarily located in the United States is specifically allocated under the contract to risks incurred when such property is actually located in the United States and to risks incurred when it is actually located outside the United States, such property will be considered property in the United States both when it is ordinarily located in, and when it is temporarily located outside, the United States; under no circumstances will such property be considered outside the United States on the basis of any apportionment of such premium.

(vi) *Property exported or imported by railroad or motor vehicle.* Any property which is exported from, or imported to, the United States by railroad or motor vehicle will be considered property ordinarily located in the United States which, when such property is not actually located in the United States, is temporarily located outside the United States. For example, if an insurance contract reinsured or issued in connection with property exported from the United States by motor vehicle covers risks commencing when such property is loaded on the motor vehicle at the United States warehouse and terminating when such property is unloaded at the foreign warehouse, and if the premium payable with respect to risks incurred when the property is in the United States and risks incurred when the property is in the foreign country is not separately stated, such property will be considered property in the United States only until such property is actually located outside the United States, provided that the premium can be properly apportioned (for example) on the basis of time or mileage, between risks incurred when the property is actually located in the United States and risks incurred when it is actually located outside the United States. If in such case the premium is not so apportionable, such property will be considered property in the United States both when such property is ordinarily located in, and when it is temporarily located outside, the United States.

(vii) *Property exported by ship or aircraft.* If an insurance contract which is reinsured or issued in connection with property which is exported from the United States by ship or aircraft covers risks all of which terminate when such property is placed aboard a ship or aircraft at the United States port of exit for shipment from the United States, such property will be considered property in the United States. If such insurance contract covers risks all of which commence when such property is placed aboard a ship or aircraft at the United States port of exit for shipment from the United States, such property will be considered property not in the United States. If such insurance contract covers risks commencing before, and terminating after, such property is placed aboard a ship or aircraft at the United States port of exit for shipment from the United States, such property will be considered property ordinarily located in the United States which, after such property is placed aboard such ship or aircraft at the United States port of exit, is temporarily located outside the United States. The application of this subdivision may be illustrated by the following example:

*Example.* A controlled foreign corporation issues an insurance contract in connection with property exported from the United States by ship. The contract covers risks commencing after such property is removed from the United States warehouse and terminating when such property is unloaded at the foreign port of entry. Assuming that the premium payable with respect to the risks incurred before and the risks incurred after the property is placed aboard the ship at the United States port of exit for shipment from the United States or with respect to the steps in handling such property during such coverage, such as transporting the property to the United States port of exit, unloading the property there, placing the property aboard the ship, holding the property aboard the ship in port, the actual voyage, and unloading the property at the foreign port of entry, is separately stated in, or is determinable from, such contract, the property will be considered property in the United States only until such property is placed aboard the ship at the United States port of exit for shipment from the United States. Assuming, however, that the premiums payable with respect to such steps, or with respect to the risks incurred before and the risks incurred after the property is placed aboard the ship at the United States port of exit, are not allocable or apportionable under the contract, such property will be considered property in the United States both before and after such property is placed aboard the ship at the United States port of exit.

(viii) *Property imported by ship or aircraft.* If an insurance contract which is reinsured or issued in connection with property which is imported to the United States by ship or aircraft covers risks all of which terminate when such property is unloaded at the United States port of entry, such property will be considered property not in the United States. If such insurance contract covers risks all of which commence after such property is unloaded at the United States port of entry, such property will be considered property in the United States. If such insurance contract covers risks commencing before, and terminating after, such property is unloaded at the United States port of entry, such property will be considered property ordinarily located in the United States which, before such property is unloaded at the United States port of entry, is temporarily located outside the United States. For an illustration pertaining to the allocation or apportionment of the premium, see the example in subdivision (vii) of this subparagraph.

(ix) *Shipments originating and terminating in the United States.* Any property which is shipped from one place in the United States to another place in the United States, on or over a foreign country, the high seas, or the coastal waters of the United States will be considered property actually located at all times in the United States. For example, property which is shipped from New York City to Los Angeles via the Panama Canal or from San Francisco to Hawaii or Alaska will be considered property actually located at all times in the United States.

(x) *Shipments originating and terminating in a foreign country.* Any property which is shipped by any means, or a combination of means, of transportation from one foreign country to another foreign country, or from a contiguous foreign country to the same contiguous foreign country, on or over the United States will be considered property exclusively located outside the United States. Notwithstanding the foregoing, any property which is shipped by any means, or a combination of means, of transportation from one contiguous foreign country to another contiguous foreign country on or over the United States will be considered property ordinarily located in the United States which, when such property is not actually located in the United States, is temporarily located outside the United States.

(c) *Liability from United States activity.* The term "liability arising out of activity in the United States" means a loss, as described in subparagraph (1) of this paragraph, or a liability, as described in subparagraph (2) of this paragraph, which could arise from activity performed in the United States, as defined in subparagraph (3) of this paragraph.

(1) *Loss described.* The term "loss" includes all loss of an insured which could arise from the occurrence of the event insured against except that such term does not include any loss in connection with property described in paragraph (b) of this section. For example, such term includes, in the case of a promoter of outdoor sporting events, the loss which could arise from the cancellation of such an event because of inclement weather.

(2) *Liability described.* The term "liability" includes all liability of an insured in tort, contract, property, or otherwise. It includes, for example, the liability of a principal for the acts of his agent, of a husband for the acts of his spouse, and of a parent for the acts of his child. The term not only includes the direct liability which may be incurred, for example, by a tortfeasor to the person harmed, but also the indirect liability which may be incurred, for example, by a manufacturer to the purchaser at retail for a breach of warranty.

(3) *Activity in the United States*—(i) *In general.* A loss or liability will be considered a loss or liability which could arise from activity performed in the United States if the loss or liability would result, if at all, from an activity exclusively carried on in the United States. Conversely, a loss or liability will be considered a loss or liability which could not arise from activity performed in the United States if the loss or liability would result, if at all, from an activity exclusively carried on outside the United States. In addition, a loss or liability will be considered a loss or liability which could arise from activity performed in the United States if the loss or liability would result, if at all, from an activity ordinarily carried on in, but partly carried on outside, the United States. If the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with an activity ordinarily carried on in, but partly carried on outside, the United States can, on a reasonable basis, be allocated to, or apportioned between, the risks incurred with respect to the activity carried on in, and the risks incurred with respect to the activity carried on outside, the United States, such loss or liability will be considered a loss or liability which could not arise from activity performed in the United States to the extent the loss or liability would result, if at all, from that activity carried on outside the United States. However, a loss or liability will not be considered a loss or liability which could arise from an activity performed in the United States if such loss or liability would result, if at all, from an activity which is neither exclusively carried on in the United States nor ordinarily carried on in, but partly carried on outside, the United States. The principles of paragraph (b) (2) (ii) of this section for allocating or apportioning a premium on a reasonable basis to or between risks incurred when property is actually located in the United States and risks incurred when such property is actually located outside the United States shall apply for allocating or apportioning a premium on a reasonable basis to or between the risks incurred with respect to the activity carried on in, and the risks incurred with respect to the activity carried on outside, the United States. The rules prescribed in subdivisions (ii) through (vi) of this subparagraph shall apply in determining whether an activity is, or will be considered, exclusively carried on in or outside the United States and whether an activity is, or will be considered, ordinarily carried on in the United States and in determining what is the activity which is performed by the insured from which a loss or liability results or could result; such rules also limit the rule of premium allocation and apportionment prescribed in this subdivision. The determinations required by this subparagraph shall be made with respect to the location of an activity of the insured performed during the policy period applicable to the taxable year of the insuring or reinsuring corporation, or, if more than one policy period exists with respect to such taxable year, such determinations shall be made separately with respect to the location of the activity during each such policy period.

(ii) *Substantial activity carried on in the United States.* The term "activity" is used in its broadest sense and includes the performance of an act unlawfully undertaken, the wrongful performance of an act lawfully undertaken, and the wrongful failure to perform an act lawfully required to be undertaken. With respect to a loss described in subparagraph (1) of this paragraph, the term "activity" includes the occurrence of the event insured against. The determination of whether an activity ordinarily is carried on in, but is partly carried on outside, the United States will depend on all the facts and circumstances in each case. An activity ordinarily is carried on in the United States if a substantial amount of such activity is carried on in the United States. Factors which will be taken into account in determining whether a substantial amount of activity is carried on in the United States are those which are connected with the activity and include, but are not limited to, the location of the insured's assets, the place where personal services are performed, and the place where sales occur, but only if such assets, services, and sales are connected with the activity. In all cases an activity will be considered substantially carried on in the United States if more than 50 percent of the insured's total assets, personal services, and sales, if any, connected with such activity are located, performed, or occur in the United States. On the other hand, an activity will, under no circumstances, be considered substantially carried on in the United States if not more than 30 percent of the insured's total assets, personal services, and sales, if any, connected with such activity are located, performed, or occur in the United States. For this purpose, the mean of the value of the total assets at the beginning and end of the policy period shall be used, determined by taking assets into account at their actual value (not reduced by liabilities), which, in the absence of affirmative evidence to the contrary, shall be deemed to be (*a*) face value in the case of bills receivable, accounts receivable, notes receivable, and open accounts held by an insured using the cash receipts and disbursements method of accounting and (*b*) adjusted basis in the case of all other assets. Personal services shall be measured by the amount of compensation paid or accrued for such services, and sales shall be measured by the volume of gross sales. An activity is carried on partly outside the United States if it is carried on, whether substantially or insubstantially, outside the United States.

(iii) *Manufacturing, producing, constructing, or assembling activity.* If a person who manufactures, produces, constructs, or assembles property is liable with regard to the consumption or use of such property, such liability will be considered to result from the activity performed of manufacturing, producing, constructing, or assembling such property. If such person manufactures, produces, constructs, or assembles more than one type of product, the liability with regard to the consumption or use of one of such products will be considered to result from the activity performed of manufacturing, producing, constructing, or assembling that particular product. For example, the liability of a building contractor, which constructs apartment buildings only in the United States, for the improper construction of, or the failure to construct, an apartment building, will be considered to result from an activity exclusively carried on in the United States and will be considered a liability which could arise from activity performed in the United States. In further illustration, the liability (which is covered by a single policy of insurance) of a domestic corporation, which assembles refrigerators exclusively in the United States and manufactures automobiles both in a foreign country and in the United States through substantial activity carried on in each of such countries, for the negligent manufacturing of a part for one of the automobiles by the foreign branch, will be considered to result from an activity ordinarily carried on in, but partly carried on outside, the United States and will be considered a liability which could arise from activity performed in the United States.

(iv) *Selling activity.* If a person is liable with regard to selling activity performed, such liability will be considered, except as provided in subdivisions (iii), (v), and (vi) of this subparagraph, to result from such selling activity. A person will be considered to be engaged in selling activity if such person engages in an activity resulting in the sale of property. Thus, it is immaterial that, under the Code, such activity would not constitute engaging in or carrying on a trade or business in the country in which such activity is carried on, the property in the goods does not pass in such country, or delivery of the property is not made in such country. For example, if a foreign wholesale distributor, which manages its entire business operations in a foreign country and sells its inventory exclusively in the United States—its only contact in the United States being the promotion of such sales to United States retail outlets by advertising in trade publications and distributing sales catalogues—is liable for a breach of warranty with regard to the sale of property to a United States retail outlet, such liability will be considered to result from an activity exclusively carried on in the United States and will be considered a liability

which could arise from activity performed in the United States.

(v) *Liability from service or driving activity—(a) In general.* If a person is liable with regard to any service activity performed, or is liable with regard to driving activity performed in connection with a motor vehicle, ship or boat, aircraft, or railroad rolling stock, whether or not exclusively used in the commercial transportation of persons or property, such liability will be considered to result from such service or driving activity. For example, if an oil company which drills for oil exclusively in a foreign country is liable with regard to the negligent handling by its employees of explosives in the course of such drilling there, such liability will be considered to result from an activity exclusively carried on outside the United States and will be considered a liability which could not arise from activity performed in the United States. In further illustration, if a corporation which services machinery exclusively in a foreign country under servicing contracts is liable with regard to the negligent repairing of a machine under such a contract, such liability will be considered to result from an activity exclusively carried on outside the United States and will be considered a liability which could not arise from activity performed in the United States.

(b) *Location of activities in connection with transportation property.* For purposes of subdivision (a) of this subdivision, service or driving activity performed in connection with a motor vehicle, ship or boat, aircraft, or railroad rolling stock, whether or not exclusively used in the commercial transportation of persons or property, will be considered activity performed in the United States if the activity is carried on at a time when such property is or will be considered, in accordance with subdivision (iv) or (v) of paragraph (b)(2) of this section, actually in the United States or ordinarily located in the United States. However, if the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with such service or driving activity which is carried on at a time when such property is, or will be considered, ordinarily located in the United States can be allocated to, or apportioned between, the risks incurred when such property is actually located in the United States and risks incurred when it is actually located outside the United States, such liability will be considered a liability which could arise from activity performed in the United States only when such property is actually located in the United States. Any allocation or apportionment of premium under the preceding sentence shall be made in accordance with the rules of allocation and apportionment provided in subdivision (iv) or (v) of paragraph (b)(2) of this section. For example, if a person is liable with regard to the performance of services outside the United States in the operation of a motor vehicle which is used exclusively in the commercial transportation of persons to and from the United States and which, because more than 50 percent of the miles traversed during the applicable policy period in the use of such property are traversed within the United States, is considered ordinarily located in the United States, such liability will be considered to be a liability which could not arise from activity performed in the United States only to the extent that the premium which is attributable to the reinsuring or issuing of any insurance contract in connection with such service activity is apportioned on a mileage basis between the risks incurred when such motor vehicle is actually located in the United States and when such vehicle is actually located outside the United States. See paragraph (b)(2)(iv) of this section. In further illustration, if a person is liable with regard to his negligent driving of a motor vehicle which is not used exclusively in the commercial transportation of persons or property, which is registered with any State, and which is driven both in the United States and a foreign country, such liability will be considered a liability which could arise from activity performed in the United States, unless the premium which is attributable to the reinsuring or issuing of an insurance contract in connection with such driving performed in such motor vehicle ordinarily located in the United States is specifically allocated under the contract to risks incurred with respect to driving performed in, and to risks incurred with respect to driving performed outside, the United States. See paragraph (b)(2)(v) of this section.

(c) *Illustration.* The application of this subdivision may be further illustrated by the following example:

*Example.* Controlled foreign corporation A is a wholly owned subsidiary of domestic corporation M. Both corporations are insurance companies and use the calendar year as the taxable year. Corporation M is exclusively engaged in issuing to owners of commercial rental property which is located in the United States insurance contracts which cover any harm which may be caused in 1963 by the tortious conduct of the owners' employees in managing and maintaining such property. The owners insured under such contracts include both residents and nonresidents of the United States. In 1963, M Corporation cedes to A Corporation one-half of the insurance contracts issued by M Corporation in that year, including the contracts issued to nonresidents. Income of A Corporation derived in 1963 from reinsuring the risks of M Corporation is income from the insurance of United States risks since all the insurance contracts reinsured by it are in connection with a liability which could arise from service activity performed in the United States.

(vi) *Liability from delivery of property.* If the person who is obligated to deliver property is liable with regard to such delivery, such liability will be considered to result from the activity performed of delivering such property. For example, if a corporation which exports all of its inventory from the United States to foreign countries or possessions of the United States is liable with regard to its failure to make delivery outside the United States of inventory it has sold, such liability will be considered to result from an activity exclusively carried on outside the United States and will be considered a liability which could not arise from activity performed in the United States. In further illustration, if a corporation which exports all of its inventory from a foreign country to the United States is liable with regard to its improper delivery in the United States of inventory it has sold, such liability will be considered to result from an activity exclusively carried on in the United States and will be considered a liability which could arise from activity performed in the United States.

(d) *Lives or health of United States residents.* Risks in connection with the lives or health of residents of the United States include those risks which are the subject of insurance contracts referred to in section 801(a), relating to the definition of a life insurance company. If the insured is a resident of the United States at the time the insurance contract is approved, the risk is in connection with the life or health of a resident of the United States for the period of coverage under the contract. However, if during such period of coverage the insured notifies the insurer, or circumstances known to the insurer indicate, that the insured is no longer a resident of the United States, the risk shall cease to be a risk in connection with the life or health of a resident of the United States for the policy period in which the insured gives such notice or such circumstances are known to the insurer, and for each subsequent policy period. Conversely, if the insured is a resident of a particular foreign country at the time the insurance contract is approved, the risk is in connection with the life or health of a resident of such foreign country for the period of coverage under the contract. However, if during such period of coverage the insured notifies the insurer, or circumstances known to the insurer indicate, that the insured is no longer a resident of such foreign country, the risk shall cease to be a risk in connection with the life or health of a resident of such particular foreign country for the policy period in which the insured gives such notice or such circumstances are known to the insurer, and for each subsequent policy period. In determining the country of residence of an insured, the principles of §§ 1.871–2 to 1.871–5, inclusive, and of paragraph (a) of § 1.911–2, relating to the determination of residence and nonresidence in the United States, and of foreign residence, shall apply. Citizens of the United States are not residents of the United States merely because of their citizenship. The application of this paragraph may be illustrated by the following example:

*Example.* Controlled foreign corporation A is a wholly owned subsidiary of domestic corporation M. Corporation A uses the calendar year as the taxable year and is engaged in the life insurance business in foreign country X. In 1963, A Corporation issues ordinary life insurance contracts on the lives of residents of the United States, including one issued on February 1, 1963, to R, a citizen of foreign country Y and a resident of the United States on such date. All activity in connection with the issuing of such contracts is transacted by mail. On May 1, 1963, R abandons his United States residence and establishes residence in foreign country Z. There are no circumstances known to A Corporation that R has changed his residence until R, on March 1, 1964, actually notifies A Corporation of that change. Income of A Corporation for the policy period of February 1, 1963, to January 31, 1964, from issuing such insurance contracts is income derived from the insurance of United States risks. However, income of A Corporation derived for the policy period of February 1, 1964, to January 31, 1965, from R's insurance contract is not income derived from the insurance of United States risks.

### § 1.953–3 Risks deemed to be United States risks.

(a) *Artificial arrangements.* For purposes of paragraph (a) of § 1.953–1, the term "United States risks" also includes under section 953(a)(1)(B) risks which are deemed to be United States risks. They are risks (other than United States risks described in section 953(a)(1)(A) and § 1.953–2) which a controlled foreign corporation reinsures under an insurance or annuity contract, or with respect to which a controlled foreign corporation issues any insurance or annuity contract, in accordance with any arrangement whereby another corporation which is not a controlled foreign corporation receives an amount of premiums (for reinsuring or issuing any insurance or annuity contract in connection with the United States risks described in section 953(a)(1)(A) and § 1.953–2) which is substantially equal to the amount of premiums which the controlled foreign corporation receives under its contracts. Arrangements to which this rule applies include those entered into by the controlled foreign corporation, by its United States shareholders, or by a related person.

(b) *Evidence of arrangements.* The determination of the existence of an arrangement referred to in paragraph (a) of this section shall depend on all the facts and circumstances in each case. In making this determination, it will be recognized that arrangements of this type generally are orally entered into outside the United States and that direct evidence of such an arrangement is not ordinarily available. Therefore, in determining the existence of such an arrangement, consideration will be given to whether or not there is substantial similarity between the type, location, profit margin expected, and loss experience of the risks which the corporation which is not a controlled foreign corporation insures or reinsures and the risks which the controlled foreign corporation insures or reinsures. Further, consideration will be given to the existence of prior similar arrangements between, and the identity of the directors or shareholders of, the corporation which is not a controlled foreign corporation, its shareholders, or related persons and the controlled foreign corporation, its shareholders, or related persons. However, the absence of such prior arrangements or identity of directors or shareholders will not of itself establish the nonexistence of an arrangement referred to in paragraph (a) of this section. In determining whether the amounts received by the controlled foreign corporation and the corporation which is not a controlled foreign corporation are substantially equal, the period in which the controlled foreign corporation receives premiums need not be the same as, or identical in length with, that of the corporation which is not a controlled foreign corporation nor limited to a taxable year of the controlled foreign corporation.

(c) *Illustrations.* The application of this section may be illustrated by the following examples:

*Example (1).* Controlled foreign corporation A is a wholly owned subsidiary of domestic corporation M. Foreign corporation B is a wholly owned subsidiary of foreign corporation R. All corporations use the calendar year as the taxable year. Corporations M and R, which are not related persons, agree that from July 1, 1963, through December 31, 1963, B Corporation will reinsure all risks of M Corporation which are United States risks described in section 953(a)(1)(A), and that from January 1, 1964, through June 30, 1964, A Corporation will reinsure all risks of R Corporation which are not United States risks described in section 953(a)(1)(A). The amount of premiums received by A Corporation and B Corporation, respectively, as a result of the agreement are substantially equal. The income of A Corporation derived in 1964 from reinsuring the risks of R Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(B).

*Example (2).* Assume the same facts as in example (1), except that M and R Corporations also agree, as part of their arrangement, that from July 1, 1964, through December 31, 1964, B Corporation will reinsure all risks of M Corporation which are United States risks described in section 953(a)(1)(A), and that from January 1, 1965, through June 30, 1965, A Corporation will reinsure all risks of R Corporation which are not United States risks described in section 953(a)(1)(A). The amount of premiums derived by B Corporation from July 1, 1963, through December 31, 1963, under the agreement is not substantially equal to the amount of premiums derived by A Corporation from January 1, 1964, through June 30, 1964, and the amount of premiums derived by B Corporation from July 1, 1964, through December 31, 1964, is not substantially equal to the amount of premiums derived by A Corporation from January 1, 1965, through June 30, 1965. However, the aggregate amount of premiums received by B Corporation under the arrangement is substantially equal to the aggregate amount of premiums received by A Corporation. The income of A Corporation derived in 1964 and 1965 from reinsuring the risks of R Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(B).

*Example (3).* Assume the same facts as in example (1), except that foreign corporation C is also a wholly owned subsidiary of R Corporation. Assume that C Corporation uses the calendar year as its taxable year. Assume further that M Corporation and R Corporation agree that from July 1, 1963, through December 31, 1963, B Corporation and C Corporation together will reinsure the United States risks described in section 953(a)(1)(A) of M Corporation. The amount of premiums received by B Corporation in respect of such United States risks is equal to one-third of the amount received by A Corporation in respect of the risks which are not United States risks described in section 953(a)(1)(A), and the amount of premiums received by C Corporation in respect of such United States risks is equal to two-thirds of the amount so received by A Corporation. The income of A Corporation derived in 1964 from reinsuring the risks of R Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(B).

*Example (4).* Assume the same facts as in example (3), except that controlled foreign corporation D is also a wholly owned subsidiary of M Corporation and uses the calendar year as its taxable year. Assume further that M Corporation and R Corporation agree that in 1964 R Corporation will pay premiums of $300,000 to A Corporation and $700,000 to D Corporation to reinsure all risks of R Corporation which are not United States risks described in section 953(a)(1)(A), and that in 1963 M Corporation will pay premiums of $400,000 to B Corporation and $600,000 to C Corporation to reinsure all risks of M Corporation which are United States risks described in section 953(a)(1)(A). The income of A Corporation and D Corporation derived in 1964 from reinsuring the risks of R Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(B).

*Example (5).* Controlled foreign corporation A is a wholly owned subsidiary of domestic insurance corporation M. Controlled foreign corporation B is a wholly owned subsidiary of domestic insurance corporation N. All corporations use the calendar year as the taxable year. As a result of an arrangement between M Corporation and N Corporation, in 1963 A Corporation reinsures all the United States risks described in section 953(a)(1)(A) of N Corporation, and B Corporation reinsures all the United States risks described in section 953(a)(1)(A) of M Corporation. The premiums and other consideration received by A Corporation and B Corporation in respect of such reinsurance are not substantially equal. The income of A Corporation and B Corporation in 1963 from reinsuring the risks of N Corporation and M Corporation, respectively, is income derived from the insurance of United States risks described in section 953(a)(1)(A) and is not income derived from the insurance of United States risks described in section 953(a)(1)(B).

*Example (6).* Assume the same facts as in example (5), except that B Corporation is not a controlled foreign corporation. The income of A Corporation in 1963 from reinsuring the risks of N Corporation is income derived from the insurance of United States risks described in section 953(a)(1)(A) and is not income derived from the insurance of United States risks described in section 953(a)(1)(B).

### § 1.953–4 Taxable income to which section 953 applies.

(a) *Taxable income defined—(1) Life insurance taxable income.* For a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as a life insurance company to which part I (sections 801

through 820) of subchapter L of the Code applies, the term "taxable income" means for purposes of paragraph (a) of § 1.953–1 the gain from operations, as defined in section 809(b) and as modified by this section, derived from, and attributable to, the insurance of United States risks. For purposes of determining such taxable income, the provisions of section 802(b) (relating to the definition of life insurance company taxable income) shall not apply. Determinations for purposes of this subparagraph shall be made without regard to section 501(a).

(2) *Mutual and other insurance taxable income.* For a controlled foreign corporation which is engaged in the business of reinsuring or issuing insurance or annuity contracts and which, if it were a domestic corporation engaged only in such business, would be taxable as a mutual insurance company to which part II (sections 821 through 826) of subchapter L of the Code applies or a mutual marine insurance or other insurance company to which part III (sections 831 and 832) of subchapter L of the Code applies, the term "taxable income" means for purposes of paragraph (a) of § 1.953–1 taxable income, as defined in section 832(a) and as modified by this section, derived from, and attributable to, the insurance of United States risks. Determinations for purposes of this subparagraph shall be made without regard to section 501(a).

(3) *Corporations not qualifying as insurance companies.* For special rules applicable under this section in the case of a controlled foreign corporation which, if it were a domestic corporation, would not qualify as an insurance company, see § 1.953–5.

(b) *Certain provisions inapplicable.* In determining taxable income under this section, the following provisions of subchapter L of the Code shall not apply:

(1) Section 809(d)(4), relating to the operations loss deduction;

(2) Section 809(d)(5), relating to certain nonparticipating contracts;

(3) Section 809(d)(6), relating to certain accident and health insurance and group life insurance;

(4) Section 809(d)(10), relating to small business deduction;

(5) Section 817(b), relating to gain on property held on December 31, 1958, and certain substituted property acquired after 1958; and

(6) Section 832(c)(5), relating to capital losses.

(c) *Computation of reserves required by law*—(1) *Law applicable in determining reserves.* The reserves which will be taken into account as reserves required by law under section 801(b)(2), both in determining for any taxable year whether a controlled foreign corporation is a controlled foreign corporation described in paragraph (a)(1) or paragraph (2) of this section and in determining taxable income of such corporation for the taxable year under paragraph (a) of this section, shall be the following reserves:

(i) *Reserves required by the law of a State.* The reserves which are required by the law of the State or States to which the insurance business of the controlled foreign corporation is subject, but only with respect to its United States business, if any, which is taxable under section 819(a).

(ii) *Reserves deemed to be required.* To the extent of such controlled foreign corporation's insurance business not taxable under section 819(a)—

(a) Except as provided in subdivision (b) of this subdivision (ii), the reserves which would result if such reserves were determined by applying the minimum standards of the law of New York as if such controlled foreign corporation were an insurance company transacting all of its insurance business (other than its United States business which is taxable under section 819(a)) for such taxable year in such State, and

(b) With respect to all risks covered by insurance ceded to such controlled foreign corporation by an insurance company to which apply the provisions of subchapter L of the Code (determined without regard to section 501(a)) and in respect of which an election is made by or on behalf of such controlled foreign corporation to determine its reserves in accordance with this subdivision (b), the amount of reserves against such risks which would result if all of such reserves were determined by applying the law of the State, to which the risks in the hands of such insurance company are subject, as if such controlled foreign corporation were an insurance company engaged in reinsuring such risks in such State.

(2) *Rules of application.* For purposes of subparagraph (1) of this paragraph, the following rules shall apply:

(i) *Life insurance reserves computed on preliminary term basis.* For purposes of determining under paragraph (a) of this section the taxable income of a controlled foreign corporation, an election may be made by or on behalf of such corporation that the amount of reserves which are taken into account as life insurance reserves with respect to contracts for which reserves are computed on a preliminary term basis shall be determined as provided in section 818(c). This election shall apply, subject to section 818(c), to all life insurance reserves of the controlled foreign corporation, whether or not reserves applicable to the United States business taxable under section 819(a). However, reserves determined as provided in section 818(c) shall not be taken into account in determining whether a controlled foreign corporation is a controlled foreign corporation described in paragraph (a)(1) or paragraph (2) of this section.

(ii) *Actual reserves required.* (a) A controlled foreign corporation will be considered to have a reserve only to the extent the reserve has been actually held during the taxable year for which such reserve is claimed.

(b) For determining when reserves are required by the law of a State, see paragraph (b) of § 1.801–5 of this chapter.

(iii) *Total reserves to be taken into account.* The total reserves of a controlled foreign corporation shall be taken into account in determining whether such corporation is a controlled foreign corporation described in paragraph (a)(1) or paragraph (2) of this section. Therefore, in making such determination, the reserves which, under subparagraph (1)(i) of this paragraph, are required by the law of any State shall be taken into account together with the reserves which, under subparagraph (1)(ii) of this paragraph, are deemed to be required. Moreover, reserves applicable to the reinsuring or the issuing of insurance or annuity contracts of both United States risks and foreign risks shall be taken into account. Finally, except as provided in subdivision (i) of this subparagraph, the reserves which are taken into account in determining whether a controlled foreign corporation is a controlled foreign corporation described in paragraph (a)(1) or paragraph (2) of this section shall be the same reserves which are taken into account in determining under paragraph (a) of this section the taxable income of such corporation.

(iv) *Method of comparing reserves when subject to more than one State.* If the insurance business of a controlled foreign corporation is subject to the law of more than one State, the amount of reserves taken into account under subparagraph (1)(i) of this paragraph shall be the amount of the highest aggregate reserve required by any State, determined as provided in paragraph (a) of § 1.801–5 of this chapter.

(d) *Domestic corporation tax attributes.* In determining taxable income of a controlled foreign corporation under this section there shall be allowed, except as provided in section 953(b), this section, and § 1.953–5, the exclusions and deductions from gross income which would be allowed if such corporation were a domestic insurance company engaged in the business of only reinsuring or issuing the insurance or annuity contracts which have been reinsured or issued by such corporation. For this purpose, the provisions of sections 819, 821(e), 822(e), 831(b), and 832(d), relating to foreign insurance companies, shall not apply; however, for the exclusion from the taxable income determined under section 953 of amounts derived from sources within the United States, see section 952(b) and paragraph (b) of § 1.952–1. Furthermore, taxable income shall be determined under this section without regard to section 882(b) and (c), relating to gross income and deductions of a foreign corporation, and without regard to whether the controlled foreign corporation is carrying on an insurance business in the United States. For other rules relating to the determination of gross income and taxable income of a foreign corporation for purposes of subpart F, see § 1.952–2.

(e) *Limitation on certain amounts in respect of United States risks.* In determining taxable income under this section the following amounts shall not, in accordance with section 953(b)(4), be taken into account except to the extent they are attributable to the reinsuring or issuing of any insurance or annuity contract in connection with United States risks described in § 1.953–2 or § 1.953–3:

(1) The amount of premiums determined under section 809(c)(1);

(2) The net decrease in reserves determined under section 809(c)(2);

(3) The net increase in reserves determined under section 809(d)(2); and

(4) The premiums earned on insurance contracts during the taxable year, as determined under section 832(b)(4).

For the allocation and apportionment of such amounts to income from the insurance of United States risks, see paragraphs (f) and (g) of this section.

(f) *Items allocated or apportioned*—(1) *Rules of allocation or apportionment.* In determining taxable income under this section, first determine all items of income, expenses, losses, and other deductions which directly relate to the premiums received for the reinsuring or the issuing of any insurance or annuity contract in connection with United States risks, as defined in §§ 1.953–2 and 1.953–3, and allocate such items to the insurance of United States risks. For example, the deductions allowed by section 809(d)(1), relating to death benefits, section 809(d)(3), relating to dividends to policyholders, and section 809(d)(7), relating to the assumption by another person of liabilities under insurance contracts, shall be allocated to the insurance of United States risks to the extent they relate directly to the premiums received for reinsuring or issuing insurance or annuity contracts in connection with United States risks. Next, determine all items of income, expenses, losses, and other deductions which directly relate to the premiums received for the reinsuring or the issuing of any insurance or annuity contract in connection with foreign risks and allocate such items to the reinsuring of foreign risks. Finally, determine all items of income, expenses, losses, and other deductions which relate to the premiums received for the reinsuring or the issuing of any insurance or annuity contract in connection with both United States risks and foreign risks, and, except as provided in paragraph (g) of this section, apportion such items between the insurance of United States risks and the insurance of foreign risks in the manner prescribed in subparagraph (2) or (3) of this paragraph, as the case may be. As used in this section, the term "foreign risks" means risks which are not United States risks as defined in § 1.953–2 or § 1.953–3.

(2) *Method of apportionment in determination of life insurance taxable income*—(i) *Investment yield and net long-term capital gain.* Unless they can be allocated to the insurance of United States risks, as provided in subparagraph (1) of this paragraph, in determining a controlled foreign corporation's taxable income for any taxable year under paragraph (a)(1) of this section—

(a) The investment yield under section 804(c),

(b) The amount (if any) under section 809(b)(1)(B) by which the net long-term capital gain exceeds the net short-term capital loss, and

(c) Those deductions allowed under section 809(d)(8), (9), and (12) which relate to gross investment income

shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with United States risks in an amount which bears the same ratio to each of such amounts of investment yield, excess gain, and deductions as the sum of the mean of each of the items described in section 810(c) at the beginning and end of the taxable year attributable to reinsuring and issuing any insurance and annuity contracts in connection with United States risks bears to the sum of the mean of each of the items described in section 810(c) at the beginning and end of the taxable year attributable to reinsuring and issuing all insurance and annuity contracts. Thus, for example, if the ratio which the sum of the mean of each of the items described in section 810(c) at the beginning and end of the taxable year attributable to reinsuring and issuing insurance and annuity contracts in connection with United States risks bears to the sum of the mean of each of the items described in section 810(c) at the beginning and end of the taxable year attributable to reinsuring and issuing all insurance and annuity contracts in one to three, then, unless an allocation to the insurance of United States risks can be made as provided in subparagraph (1) of this paragraph, one-third of each of such amounts of investment yield, excess gain, and deductions shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with United States risks, and two-thirds of each of such amounts shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with foreign risks.

(ii) *Other income and deductions*—(a) *Amount taken into account.* In determining a controlled foreign corporation's taxable income for any taxable year under paragraph (a)(1) of this section, all items of income taken into account under section 809(c)(3), relating to other amounts of gross income, and the other deductions allowed under section 809(d)(12) to the extent that such other deductions do not relate to gross investment income shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with United States risks in an amount which bears the same ratio to each of such items of income or of such other deductions as the numerator determined under (b) of this subdivision bears to the denominator determined under (c) of this subdivision.

(b) *Numerator.* The numerator used for purposes of the apportionment under (a) of this subdivision shall be an amount which equals the amount determined under (c) of this subdivision, but only to the extent that the amount so determined is taken into account under paragraph (e) of this section in determining taxable income for the taxable year.

(c) *Denominator.* The denominator used for purposes of the apportionment under (a) of this subdivision shall be an amount which equals—

(1) The amount of premiums determined under section 809(c)(1) for the taxable year, plus

(2) The net decrease in reserves determined under section 809(c)(2) for such year, minus

(3) The net increase in reserves determined under section 809(d)(2) for such year.

(iii) *Reserves used in apportionment formula.* The rules for determining which reserves are taken into account in determining the taxable income of a controlled foreign corporation under paragraph (a) of this section shall also apply under subdivision (ii) (b) and (c) of this subparagraph in determining the net decrease in reserves under section 809 (c)(2) or the net increase in reserves under section 809(d)(2). See paragraph (c) of this section.

(3) *Method of apportionment in determination of mutual and other insurance income*—(i) *In general.* In determining a controlled foreign corporation's taxable income for any taxable year under paragraph (a)(2) of this section, any item which is required to be apportioned under subparagraph (1) of this paragraph shall be apportioned to the reinsuring and issuing of insurance and annuity contracts in connection with United States risks in an amount which bears the same ratio to the total amount of such item as the amount of premiums earned on insurance contracts during the taxable year which is required to be taken into account by such corporation under paragraph (e)(4) of this section in determining such taxable income bears to the total amount of all its premiums earned (as determined under section 832(b)(4)) on insurance contracts during the taxable year.

(ii) *Reserves used in apportionment formula.* The principles of subparagraph (2)(iii) of this paragraph shall apply in determining the reserves included in premiums earned on insurance contracts during the taxable year for purposes of subdivision (i) of this subparagraph.

(g) *Separate accounting.* The methods of apportionment prescribed in subparagraphs (2) and (3) of paragraph (f) of this section for determining taxable income under this section shall not apply if the district director determines that the controlled foreign corporation, in good faith and unaffected by considerations of tax liability, regularly employs in its books of account a detailed segregation of receipts, expenditures, assets, liabilities, and net worth which clearly reflects the income derived from the reinsuring or issuing of insurance or annuity contracts in connection with United States risks. The district director, in making such determination, shall give effect to any foreign law, satisfactory evidence of which is presented by the United States shareholder to the district director, which requires a reasonable segregation of those items of income, expense, losses, and other deductions which relate to determining such taxable income.

(h) *Illustration.* The application of paragraphs (e) and (f) of this section may be illustrated by the following example:

*Example.* Controlled foreign corporation A, incorporated under, and engaged in an insurance business subject to, the laws of foreign country X, is a wholly owned subsidiary of domestic corporation M. Both corporations use the calendar year as the taxable year. Corporation M is a life insurance company as defined in section 801(a); A Corporation would, if it were a domestic corporation, be taxable under part I of subchapter L of the Code. In 1963, A Corporation derives income from the insurance of United States risks as a result of reinsuring the life insurance policies issued by M Corporation on lives of residents of the United States. In 1963, A Corporation also issues policies of life insurance on individuals who are not residents of the United States, but its premiums from the reinsuring of United States risks exceed the 5-percent minimum premium requirement prescribed in paragraph (b) of § 1.953–1. Based upon the facts set forth in paragraph (a) of this example, A Corporation for 1963 has taxable income under this section of $40,200, which is attributable to the reinsuring of life insurance contracts in connection with United States risks, determined in the manner provided in paragraphs (b), (c), and (d) of this example.

(a) A summary of the entire operations of A Corporation for 1963, determined under this section as though such corporation were a domestic life insurance company but without applying paragraph (f) of this section, is as follows:

| Item | Attributable to all insurance | Attributable to reinsuring U.S. risks | Attributable to insuring foreign risks |
|---|---|---|---|
| Investment Income: | | | |
| (1) Investment yield under sec. 804(c) | $90,000 | Unallocable | Unallocable |
| (2) Sum of the mean of each of the items described in sec. 810(c) at beginning and end of 1963 | 2,500,000 | $1,000,000 | $1,500,000 |
| (3) Ratio of (1) to (2) | 60,000 | 20,000 | 35,000 |
| (4) Deductions allowed under sec. 809(d)(8), (9), and (12) which relate to gross investment income. | 10,000 | Unallocable | Unallocable |
| Underwriting Income: | | | |
| (5) Premiums under sec. 809(c)(1) | 600,000 | 200,000 | 400,000 |
| (6) Net decrease in reserves under sec. 809(c)(2) | 10,000 | None | 10,000 |
| (7) Net increase in reserves under sec. 809(d)(2) | 40,000 | 40,000 | None |
| (8) Deductions allowed under sec. 809(d)(6), (9), and (12), which relate to gross investment income, unallocable but as apportioned under paragraph (b)(3) | 10,000 | 4,000 | 6,000 |
| (9) Deductions allowed under sec. 809(d)(8), (9), and (12) which relate to gross investment income: | | | |
| (i) allocable | 330,000 | 110,000 | 220,000 |
| (ii) unallocable | 60,000 | Unallocable | Unallocable |

(b) The unallocable investment yield ($90,000) under paragraph (a)(1) of this example and the unallocable deductions ($10,000) under paragraph (a)(4) relating to gross investment income are apportioned to the reinsuring of United States risks under paragraph (f)(1)(i) of this section in the amounts of $36,000, and $4,000, respectively, determined as follows:

| Item | Attributable to all insurance | Attributable to reinsuring U.S. risks | Attributable to insuring foreign risks |
|---|---|---|---|
| Item: | | | |
| (i) Investment yield under sec. 804(c) (paragraph (a)(1)), unallocable but as apportioned under paragraph (b)(4) | $90,000 | $36,000 | $54,000 |
| (ii) Less: Required interest under sec. 809(a)(2) (paragraph (a)(3)) | 60,000 | 25,000 | 35,000 |
| (iii) Life insurance company's share of investment yield under sec. 809(b)(1)(A) | $30,000 | $11,000 | $19,000 |
| Plus sum of: | | | |
| (iv) Premiums under sec. 809(c)(1) (paragraph (a)(5)) | 600,000 | 200,000 | 400,000 |
| (v) Net decrease in reserves under sec. 809(c)(2) (paragraph (a)(6)) | 10,000 | 10,000 | 10,000 |
| Sum determined under sec. 809(b)(1) | $40,000 | 211,000 | $29,000 |
| Less sum of: | | | |
| (vi) Net increase in reserves under sec. 809(d)(2) (paragraph (a)(7)) | 40,000 | 40,000 | None |
| (vii) Deductions allowed under sec. 809(d)(6), (9), and (12), which relate to gross investment income, unallocable but as apportioned under paragraph (b)(4) (paragraph (a)(8)) | 10,000 | 4,000 | 6,000 |
| (viii) Deductions allowed under sec. 809(d)(8), (9), and (12) which relate to gross investment income (other than deductions allowed under sec. 809(d)(6), (9), and (12)): | | | |
| (a) allocable | 330,000 | $110,000 | $220,000 |
| (b) unallocable | 60,000 | Unallocable | Unallocable |
| (ix) Less: Net increase in reserves under sec. 809(d)(2) attributable to all insurance (paragraph (a)(7)) | $600,000 | | |
| (x) Plus: Net decrease in reserves under sec. 809(c)(2) attributable to all insurance (paragraph (a)(6)) | 10,000 | | |
| (xi) Less: Net increase in reserves under sec. 809(d)(2) attributable to insurance (paragraph (a)(7)) | 40,000 | | |
| (xii) Ratio which constitutes its income derived from the insurance of United States risks for purposes of paragraph (a) of § 1.953–1 is | $570,000 | | |
| (xiii) Premiums under sec. 809(c)(1) attributable to all insurance (paragraph (a)(5)) | $600,000 | | |
| (xiv) Ratio which the numerator determined under subparagraph (1) bears to the denominator determined under subparagraph (2) ($160,000/$570,000)—28%. | | | |
| (xv) Amount of deductions attributable to reinsuring of U.S. risks (28% of $60,000)—$16,800. | | | |

(d) The taxable income of A Corporation for 1963 which constitutes its income derived from the insurance of United States risks for purposes of paragraph (a) of § 1.953–1 is $40,200, determined as follows:

| | | |
|---|---|---|
| (i) Sum of the mean of each of the items described in sec. 810(c) at beginning and end of 1963, attributable to reinsuring U.S. risks (paragraph (a)(2)) | | $1,000,000 |
| (2) Sum of the mean of each of the items described in sec. 810(c) at beginning and end of 1963, attributable to all insurance (paragraph (a)(2)) | | 2,500,000 |
| (3) Ratio of amount under subparagraph (1) to amount under subparagraph (2) ($1,000,000/$2,500,000) | 40% | |
| (4) Amount of investment yield attributable to reinsuring of U.S. risks (40% of $90,000) | $36,000 | |
| (5) Amount of such deductions attributable to reinsuring of U.S. risks (40% of $10,000) | $4,000 | |
| (c) The unallocable deductions ($60,000) under paragraph (a)(6)(ii) of this example which do not relate to gross investment income are apportioned to the reinsuring of United States risks under paragraph (f)(2)(ii)(b) of this section in the amount of $16,800, determined as follows: | | |
| (1) The numerator determined under paragraph (f)(2)(ii)(b) of this section is $160,000, determined as follows: | | |
| (i) Premiums under sec. 809(c)(1) attributable to reinsuring U.S. risks (paragraph (a)(5)) | $200,000 | |
| (ii) Plus: Net decrease in reserves under sec. 809(c)(2) attributable to reinsuring U.S. risks (paragraph (a)(6)) | none | |
| | $200,000 | |
| (2) The denominator determined under paragraph (f)(2)(ii)(c) of this section is $570,000, determined as follows: | | |
| (i) Premiums under sec. 809(c)(1) attributable to all insurance (paragraph (a)(6)) | 10,000 | |
| (ii) Plus: Net decrease in reserves under sec. 809(c)(2) attributable to all insurance (paragraph (a)(6)) | 10,000 | |
| (iii) Less: Net increase in reserves under sec. 809(d)(2) attributable to all insurance (paragraph (a)(7)) | 40,000 | |
| | $570,000 | |
| (3) Ratio which the numerator determined under subparagraph (1) bears to the denominator determined under subparagraph (2) ($160,000/$570,000)—28%. | | |
| (4) Amount of deductions attributable to reinsuring of U.S. risks (28% of $60,000)—$16,800.

derived from the reinsuring or issuing of insurance or annuity contracts. The district director, in making such determination, shall give effect to any foreign law, satisfactory evidence of which is presented by the United States shareholder to the district director, which requires a reasonable segregation of the insurance assets of the controlled foreign corporation.

**§ 1.953–6 Relationship of sections 953 and 954.**

(a) *Priority of application.* For purposes of determining the subpart F income of a controlled foreign corporation under section 952 for any taxable year, the provisions of section 954, relating to foreign base company income, shall be applied, after first applying section 953, only with respect to income which is not income derived from the insurance of United States risks under section 953. For example, the provisions of section 954 may be applied with respect to the income of a controlled foreign corporation which is not income derived from the insurance of United States risks under section 953 because such corporation does not satisfy the 5-percent minimum premium requirement prescribed in paragraph (b) of § 1.953–1, even though such corporation has taxable income, as determined under § 1.953–4, which is attributable to the reinsuring or the issuing of any insurance or annuity contracts in connection with United States risks. In addition, the provisions of section 954 may apply with respect to the income of a controlled foreign corporation to the extent such income is not allocated or apportioned under § 1.953–4 to the insurance of United States risks.

(b) *Decrease in income not material.* It is not material that the income of a controlled foreign corporation is decreased as a result of the application of paragraph (a) of this section. Thus, in applying § 1.953–4 to the income of a controlled foreign corporation described in paragraph (c)(2) of § 1.953–5 which would, but for paragraph (a) of this section, be subject to the provisions of section 954, there shall be allowed, in determining the taxable income derived from the insurance of United States risks under § 1.953–4, a deduction under section 809(a)(1) for the share of each and every item of investment yield set aside for policyholders; it is not material that in determining foreign base company income such deduction would not be allowed under section 954(b)(5). Further, income of a controlled foreign corporation which is required to be taken into account under section 953 in determining income derived from the insurance of United States risks and would, but for the provisions of paragraph (a) of this section, constitute foreign base company income under section 954 shall not be taken into account under section 954(b)(3)(B) in determining whether foreign base company income exceeds 70 percent of gross income for the taxable year.

(c) *Increase in income not material.* It is not material that the income of a controlled foreign corporation is increased as a result of the application of paragraph (a) of this section. Thus, in applying § 1.953–4 to income of a controlled foreign corporation which would, but for paragraph (a) of this section, be subject to the provisions of section 954, it is not material that the dividends, interest, and gains from the sale or exchange of stock or securities derived from certain investments which would not be included in foreign personal holding company income under section 954(c)(3)(B) are included under section 953 in income derived from the insurance of United States risks. Further, income of a controlled foreign corporation which is required to be taken into account under section 953 in determining income derived from the insurance of United States risks and would, but for paragraph (a) of this section, constitute foreign base company income shall not be excluded under section 954(b)(3)(A) for the taxable year.

**§ 1.954–2 Foreign personal holding company income.**

* * * * * *

(d) *Certain income received from unrelated persons in the active conduct of a trade or business.* * * *

(3) *Dividends, interest, and gains on securities, derived from investments by insurance companies and received from unrelated persons—*

(i) *In general.* Foreign personal holding company income of a controlled foreign corporation which is an insurance company does not include dividends or interest derived from, or the excess of gains over losses from sales or exchanges of stock or securities held as, investments if its unearned premiums or of its reserves which are ordinary and necessary for the proper conduct of its insurance business, if such dividends or interest is received from, or if such sales or exchanges are made to or with, unrelated persons, as defined in paragraph (e)(2) of § 1.954–1. See section 954(c)(3)(B). Although the name, charter powers, and subjection to the insurance laws of a foreign country are significant in determining the business which a controlled foreign corporation is authorized and intends to carry on, the character of the business actually done in the taxable year shall determine whether it is an insurance company for purposes of section 954(c)(3)(B). The term "unearned premium," as used in this subparagraph, means the amount which will cover the cost of carrying the insurance risk for the period for which the premium has been paid in advance.

(ii) *Reserves which are ordinary and necessary.* In determining, for purposes of this subparagraph, whether a reserve is ordinary and necessary for the proper conduct of an insurance business, an insurance company will be permitted to make use of the highest reserve which it is required to maintain with respect to such business by a foreign country or State or possession of the United States, in which it carries on insurance business. If no jurisdiction in which an insurance company carries on its insurance business requires a reserve to be maintained, the district director may require the United States shareholder of such insurance company to submit such detailed information with respect to such company's actual experience as is deemed necessary to establish that the reserve is ordinary and necessary for the proper conduct of its insurance business; however, for this purpose, reserves which are determined on the basis of recognized mortality or morbidity tables and assumed rates of interest will generally be accepted by the district director as being ordinary and necessary. For purposes of this subparagraph, a reserve must actually be held by the insurance company for the taxable year (or for such part of such year as may be applicable) for which the reserve is claimed in order to be considered ordinary and necessary for the proper conduct of the insurance business. Notwithstanding the foregoing provisions of this subdivision, a reserve will be considered ordinary and necessary for the proper conduct of the insurance business for purposes of this subparagraph if, assuming the controlled foreign corporation were for the taxable year an insurance company to which section 953 applies for such year, such reserve would be taken into account in determining the taxable income of such corporation for such year under paragraph (a) of § 1.953–4.

(Sec. 7805, Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805))

## PART 1421—GRAINS AND RELATED COMMODITIES

### Subpart—Provisions for Participation of Commercial Banks in Pools of CCC Price Support Loans on Certain Commodities

INCREASE IN RATE OF INTEREST

The regulations issued by the Commodity Credit Corporation published in 29 F.R. 3614, as amended, containing the terms and conditions for participation in pools of CCC price support loans on certain commodities, are hereby further amended to increase from 3.875 to 4.1 percent per annum, effective December 27, 1964, the rate of interest on certificates evidencing participation in financing price support loans.

I. Section 1421.3825(a) is amended to read as follows:

**§ 1421.3825 Rate of interest and basis of computation of interest earned.**

(a) *Rate of interest.* Certificates shall earn interest at the rate of 3.70 percent per annum through and including November 14, 1964, 3.875 percent per annum from November 15, 1964, through and including December 26, 1964, and 4.1 percent per annum thereafter.

## PART 1427—COTTON

### Subpart—Provisions for Participation of Commercial Banks in Pools of CCC Price Support Loans on Cotton

INCREASE IN RATE OF INTEREST

The regulations issued by the Commodity Credit Corporation published in 26 F.R. 6192, as amended, containing the terms and conditions under which commercial banks may participate in pools of CCC price support loans on cotton are hereby further amended to increase from 3.875 to 4.1 percent per annum, effective December 27, 1964 the rate of interest on certificates evidencing participation in financing cotton price support loans.

Section 1427.1238 is amended to read as follows:

**§ 1427.1238 Rate of interest and basis of computation of interest earned.**

Certificates shall earn interest at the rate of 3.70 percent per annum through and including November 14, 1964, 3.875 percent per annum from November 15, 1964, through and including December 26, 1964 and 4.1 percent per annum thereafter. This interest rate of 4.1 percent may be increased or decreased by CCC upon publication in the FEDERAL REGISTER of an amendment to these regulations providing for such increase or decrease: *Provided*, That with respect to any decrease in the interest rate, the effective date of such decrease shall be at least 15 days subsequent to the date of publication of such amendment in the FEDERAL REGISTER. Interest earned will be paid on a 365-day basis from and including the date shown on the certificate to, but not including, the maturity date of the certificate, the date the certificate is purchased by CCC, or the date the certificate is to be presented to CCC for purchase in accordance with notice given the holder of record pursuant to § 1427.1237, whichever date first occurs. If the amount of accrued interest on a certificate presented for purchase is $3.00 or less, CCC shall not be obligated to pay any interest on the certificate.

(Sec. 4, 62 Stat. 1070, as amended; 15 U.S.C. 714b. Interpret or apply Sec. 5, 62 Stat. 1072; 15 U.S.C. 714c)

Signed at Washington, D.C., on December 21, 1964.

E. A. JAENKE,

SUBCHAPTER E—AIRSPACE [NEW]

[Airspace Docket No. 63–SO–39]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zones and Designation of Transition Areas; Correction

On December 4, 1964, Federal Register Document No. 64–12385 was published in the FEDERAL REGISTER (29 F.R. 16245) which amended Part 71 of the Federal Aviation Regulations. A portion of the Greensboro, N.C., transition area extending upward from 700 feet above the surface was designated to 8 miles SE of the Rebel Intersection. The Rebel Intersection is established by the intersection of the Greensboro ILS SE course and the Greensboro VOR 087° radial. The designation of the transition area should have been within 2 miles each side of the Greensboro ILS SE course to 8 miles SE of the Greensboro VOR 087° radial in lieu of referring to the Rebel Intersection. Action is taken herein to correct this discrepancy.

Since this correction is editorial in nature, notice and public procedure hereon are unnecessary, and the effective date of the final rule as initially adopted may be retained.

In consideration of the foregoing, effective immediately, Federal Register Document No. 64–12385 is altered as follows: In the description of the Greensboro, N.C., transition area "Rebel Intersection;" is deleted and "Greensboro VOR 087° radial;" is substituted therefor.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348(a))

Issued in East Point, Ga., on December 15, 1964.

PAUL H. BOATMAN,
*Acting Director, Southern Region.*

[F.R. Doc. 64–13185; Filed, Dec. 22, 1964; 8:48 a.m.]

[Airspace Docket No. 64–SO–54]

## PART 71—DESIGNATION OF FEDERAL AIRWAYS, CONTROLLED AIRSPACE, AND REPORTING POINTS [NEW]

### Alteration of Control Zone and Designation of Transition Area; Correction

On November 5, 1964, Federal Register Document No. 64–11278 was published in the FEDERAL REGISTER (29 F.R. 14982) which amended Part 71 of the Federal Aviation Regulations. This amendment specified the location of the NAS Atlanta TACAN as latitude 33°54'08" N., longitude 84°30'35" W. whereas it is actually located at latitude 33°55'02.9" N., longitude 84°32'05.5" W.

The designated airspace based upon this facility is described as 2 miles each side of the 301° radial of the NAS Atlanta TACAN and the insertion of the latitude and longitude coordinates of the NAS Atlanta TACAN in the description serves no useful purpose. Action is taken herein to correct this discrepancy.

Since this correction is editorial in nature, notice and public procedure hereon are unnecessary, and the effective date of the final rule as initially adopted may be retained.

In consideration of the foregoing, effective immediately, Federal Register Document No. 64–11278 is altered as follows: In the description of the Atlanta, Ga. (Dobbins AFB/NAS Atlanta) control zone "(Lat. 33°54'08" N, Long. 84°30'35" W)" is deleted.

(Sec. 307(a), Federal Aviation Act of 1958; 49 U.S.C. 1348(a))

Issued in East Point, Ga., on December 15, 1964.

PAUL H. BOATMAN,
*Acting Director, Southern Region.*

# Title 18—CONSERVATION OF POWER AND WATER RESOURCES

## Chapter I—Federal Power Commission

[Docket Nos. R-232, R-231; Order 290]

## PART 101—UNIFORM SYSTEM OF ACCOUNTS PRESCRIBED FOR CLASS A AND CLASS B PUBLIC UTILITIES AND LICENSEES

## PART 104—UNIFORM SYSTEM OF ACCOUNTS FOR CLASS C PUBLIC UTILITIES AND LICENSEES

## PART 141—STATEMENTS AND REPORTS (SCHEDULES)

### Miscellaneous Amendments

DECEMBER 17, 1964.

The Commission, in this order, is concluding the portion of this proceeding wherein, by notice issued January 15, 1963 (28 F.R. 528), it proposed the prescription of accounting requirements with respect to public utilities and licensees to reflect the tax credit for investment in certain depreciable property (investment tax credit) provided under section 2 of the Internal Revenue Act of 1962 (26 U.S.C. 38).[1]

Following the receipt of numerous responses to the invitation in the notice for the submission of comments on the proposals, oral argument was had before the Commission on October 7, 1963. However, due to the pendency in the Congress of legislation dealing with the investment credit, further consideration was postponed until after the enactment of the Revenue Act of 1964 (P.L. 88-272, Feb. 26, 1964).

Thereafter, on May 1, 1964, the Commission announced the accounting treatment it proposed to provide—that the accounting to be prescribed should afford the various choices afforded by the Congress in that Act to the companies affected. Then, as also there announced, the Commission issued, on September 1, 1964, a notice of proposed rulemaking (29 F.R. 12735, Sept. 9, 1964) with respect to public utilities and licensees. It is the subject matter of that notice which is now before use for action.

The September 1 notice provided for the submission of comments from interested parties by October 15, 1964. Comments were received from 31 sources including licensees, public utilities, distributors, State regulatory agencies, firms of accountants, the National Association of Railroad and Utilities Commissioners Committee on Accounts and one Federal agency. The majority of the responses approve the basic accounting proposed in the notice. Some requested clarification in texts, 12 recommended deletion of the amendment (attachment C to the notice) which proposed an amendment with respect to annual reports to stockholders, 3 requested that we provide accounting for balances accumulated in 1962 and 1963 under the interim order of the Commission, 12 recommended removal of the provision that approval by the Commission is needed for accounting changes when a company changes its election to pass or not to pass on the benefits of the tax credit to consumers, 2 included recomendations for changes in the reporting schedules, 1, a public utility, questioned the authority to issue the regulations and requested a hearing, and 3 distribution companies requested opportunity to appear if a hearing should be held.

All comments, recommendations and objections have been carefully considered. Many of the clarifying suggestions have been adopted and we will provide, as requested by three respondents, for the disposition of the investment tax credits which have been accumulated in Account 253 pursuant to the Commission's Interim Order of January 9, 1963, in Docket No. R-231.

Many of the comments were most helpful, some with respect to substance and others which suggested pertinent clarifying changes in the text of the accounts. As a result, we are modifying certain language and account requirements that were originally proposed in the notice. Most significant is the change in paragraph A of Account 255, which we are modifying to permit changes in accounting methods used for the investment tax credits relating to nonelectric and other operations as authorized in paragraph C of that Account without specific authorization by the Commission. A similar conforming change has been made in Account 411.1. Paragraph B, as here adopted, refers solely to electric utility property rather than to total property as was implied in the notice. Finally, paragraph D has been modified so that companies will not be required to keep records on each of the properties acquired but rather on total properties acquired during the year on a weighted-average service life basis. An addition to the account also provides that tax investment records related to property acquisitions are not necessary when tax credits are not deferred. Slight conforming modifications have been made in the schedules being added to the annual report forms, FPC Nos. 1 and 1-F.

Since the Commission's authority to prescribe the basic accounting to be followed by public utilities and licensees is firmly established, questions raised on that issue by certain of the respondents are clearly without merit.

Paragraphs 2 and 3 of the September 1 notice herein fully explain the provisions of the Revenue Acts of 1962 and 1964 upon which this proceeding is based and the conclusions the Commission reached with respect to the proper and adequate accounting treatment for investment tax credits. The statements there made are still pertinent.

As we previously indicated, under section 2 of the Revenue Act of 1962 (26 U.S.C. 38), a credit is provided against Federal income tax, based on investment in certain depreciable property placed in service during the tax year. Limitations on the amount of the credit which may be applied against the tax in any 1 year are provided, as well as carry-back and carry-forward provisions. The amount of the credit is 7 percent for qualified property with the exception of public utility property, for which a credit of 3 percent is allowed. Section 203(e) of the Revenue Act of 1964 places limitations on the amount of the investment tax credit which may be used by the Commission in any 1 year to reduce the Federal income tax of public utilities and licensees for the purpose of establishing cost of service for these utilities. In the case of public utility property, the Commission may use for this purpose no more than "a proportionate part (determined with reference to the average useful life of the property with respect to which the credit was allowed) of the credit against tax allowed for any taxable year * * *," without the consent of the taxpayer. Section 203(e) specifically recognizes that such public utilities and licensees may voluntarily pass along the entire amount of the tax credit in the year that it is used to reduce tax liability to their customers in the form of lower rates. It should also be noted that the Revenue Act of 1964 does not restrict the states in their treatment of the investment tax credit for ratemaking purposes.

In interpreting section 203(e) the Commission has concluded that the accounting prescribed for public utilities and licensees should accommodate the choices afforded the public utilities and licensees by the Congress, and that it should give such companies the option in accounting for the investment tax credit to elect between (1) prorating the benefits of the investment tax credit over a period of years not to exceed the useful life of the property which gave rise to the credit, by means of a deferral account; or (2) reflecting the benefits of the investment tax credit in the income statement of the year in which the credit is used to reduce income taxes.

The accounting we have prescribed herein is sufficiently flexible to accommodate any requirement which might be imposed upon a company by one or more state regulatory bodies which might have cognizance over some of the company's operations. Accordingly, there should be no problems caused by the possibility of conflicts between state regulatory bodies or between such groups and this Commission.

Upon consideration of the entire record in this proceeding, the Commission further finds:

(1) The amendments herein adopted are necessary and appropriate for the purposes of the administration of the Federal Power Act.

(2) Since the amendments to the Uniform System of Accounts herein adopted will, in effect, supersede the interim accounting prescribed in Order No. 261, in Docket No. R-231, issued January 9, 1963, and the Interim Order in Docket No. R-232, issued January 23, 1964, it is appropriate to terminate those orders insofar as they relate to accounting by public utilities and licensees.

(3) In view of the termination referred to in finding clause (2), above, it is necessary and appropriate for the purposes of the Administration of the Federal Power Act to provide, as hereinafter ordered, for the disposition of amounts of investment tax credits which have been accumulated in Account 253, Other deferred credits, pursuant to the directions contained in Order No. 261.

(4) Since it is desirable that the new schedule being added to F.P.C. Form Nos. 1 and 1-F be made available for reporting for the year 1964, good cause exists for making the amendments herein effective forthwith.

The Commission, acting pursuant to the authority granted by the Federal Power Act, as amended, particularly sections 301, 304, and 309 thereof (49 Stat. 854, 855, 858; 16 U.S.C. 825(a), 825c(a) and 825h), orders:

(A) Parts 101, 104, and 105, Uniform System of Accounts prescribed for public utilities and licensees, Subchapter C of Chapter I, Title 18 of the Code of Federal Regulations, are amended by adding at appropriate points therein two new accounts, viz, Account 255, Accumulated deferred investment tax credits and Account 411.1, Investment tax credit adjustments, to read, respectively, as set out in Attachment A, hereto.

(B) F.P.C. Forms Nos. 1 and 1-F, prescribed for public utilities and licensees by §§ 141.1 and 141.2, Subchapter D, Chapter I, Title 18 of the Code of Federal Regulations, are amended, effective for the reporting year 1964, by adding at appropriate points therein, two new schedules, viz: Investment Tax Credits Generated and Utilized and Accumulated Deferred Investment Credits (Account 255), to read as set forth in Attachment B, hereto.[2]

(C) Paragraph (d) of the aforesaid § 141.1 and paragraph (c) of the aforesaid § 141.2 are amended respectively by inserting, to follow the line "Accumulated Deferred Income Taxes" in § 141.1 (d), and to precede the line "Verification" in § 141.2(c) the following new schedule titles:

Investment Tax Credits Generated and Utilized.
Accumulated Deferred Investment Tax Credits.

(D) The aforesaid Part 141 is amended by adding a new § 141.100 to read as follows:

**§ 141.100 General requirements for annual reports to stockholders and others.**

All annual reports to stockholders and others shall include an appropriate summary of the investment tax credits generated and utilized and a statement of the accounting method elected by the company in connection with the utilization of the credits.

(Secs. 301, 304, 309, 49 Stat. 854, 855, 858; 16 U.S.C. 825(a), 825c(a), 825h)

(E) Effective upon the issuance of this order, the provisions of Order No. 261 in Docket No. R-231 and the Interim Order of January 23, 1964, in Docket No. R-232 are terminated to the extent that they relate to public utilities and licensees.

(F) In view of our order herein terminating Order No. 261, issued January 9, 1963, insofar as it relates to the interim accounting of public utilities and licensees, such companies shall dispose of the amounts of accumulated investment tax credits in Account 253, Other deferred credits, accumulated in accordance with the interim procedure established by that order during 1962 and 1963 as follows:

1. Companies which will not follow deferral accounting for nonelectric and other operations whereby all or a part of the tax credits are not to be passed on to customers in accordance with the provisions of this order and the texts of accounts prescribed herein, shall credit all or such portion of those balances as applicable to Account 421, Miscellaneous Nonoperating Income, for the reporting period ending December 31, 1964.

2. Companies which will not follow deferral accounting whereby all or a part of the tax credits are to be passed on to electric utility customers in accordance with the provisions of this order and the texts of accounts prescribed herein, shall credit all or such portion of those balances as applicable to Account 411.1, Investment Tax Credit Adjustments, for the reporting period ending December 31, 1964.

3. Companies which will follow deferral accounting for all or a part of the investment tax credits in accordance with the provisions of this order and the texts of accounts prescribed herein, shall transfer the applicable balances from Account 253 to Account 255, Accumulated Deferred Investment Tax Credits. Any amounts in such balances shall be recorded in the same manner as if the procedures and instructions in texts of Accounts 255 and 411.1 as promulgated in this order, had been effective in 1962 and 1963. In other words, amounts under deferral accounting procedures pertaining to 1962 and 1963 that would have been amortized in those respective years to Account 411.1 or to nonelectric or to other operations accounts had this order been then in effect, shall be recorded in the same manner as the amounts to be amortized for 1964.

It is recognized that for 1964 the amounts that will be shown as credits to Account 411.1 and to other accounts will be overstated. It is believed that such amounts should not be sufficiently large in most instances to distort the net income of reporting companies. Separation of the amounts in Account 411.1 by years (1962, 1963 and 1964) will be shown in the schedules of F.P.C. Forms Nos. 1 and 1-F prescribed herein.

(G) The caption of Docket No. R-232 is amended, for the purposes of this order, to read as set forth above.

(H) The amendments herein made to Parts 101, 104 and 141 and to Annual Report F.P.C. Forms Nos. 1 and 1-F shall be effective upon the issuance of this order.

(I) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.[3]

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

PROPOSED NEW ACCOUNTS FOR UNIFORM SYSTEMS OF ACCOUNTS FOR PUBLIC UTILITIES AND LICENSEES

ACCOUNT 255—ACCUMULATED DEFERRED INVESTMENT TAX CREDITS

A. This account shall be credited and Account 411.1, Investment Tax Credit Adjustments, debited with investment tax credits deferred by companies which do not apply such credits as a reduction of the overall income tax expense in the year in which a tax credit is realized. There can be neither changes in accounting method for electric utility operations nor transfers from this account, except as authorized herein or as may otherwise be authorized by the Commission (see Account 411.1).

B. This account shall be debited and Account 411.1 credited with a proportionate amount determined in relation to the average useful life of electric utility property to which the tax credits relate, or such lesser period of time as may be adopted and consistently followed by the company.

C. Subdivisions of this account by department shall be maintained for deferred investment tax credits that are related to nonelectric utility or other operations. Contra entries affecting such account subdivisions shall be appropriately recorded in Account 414, Other Utility Operating Income; Account 416, Costs and Expenses of Merchandising, Jobbing, and Contract Work; Account 417, Income from Nonutility Operations; or Account 418, Nonoperating Rental Income. Use of deferral or nondeferral accounting procedures adopted for nonelectric utility or other operations are to be followed on a consistent basis.

D. Separate records for electric and nonelectric utility or other operations shall be maintained identifying the properties giving rise to the investment tax credits for each year with the weighted-average service life of such properties and any unused balances of such credits. Such records are not necessary unless the tax credits are deferred.

ACCOUNT 411.1—INVESTMENT TAX CREDIT ADJUSTMENTS

A. This account shall be debited with the amounts of investment tax credits related to electric utility property that are credited to Account 255, Accumulated Deferred Investment Tax Credits, by companies which do not apply the entire amount of the benefits of the investment credit as a reduction of the overall income tax expense in the year in which such credit is realized (see Account 255).

B. This account shall be credited with the amounts debited to Account 255 for proportionate amounts of tax credit deferrals allocated over the average useful life of electric utility property to which the tax credits relate or such lesser period of time as may be adopted and consistently followed by the company.

[F.R. Doc. 64-13156; Filed, Dec. 22, 1964; 8:46 a.m.]

[1] On Jan. 9, 1963, the Commission had prescribed an interim accounting treatment (Order No. 261 in Docket No. R-231, 29 FPC 62, 28 F.R. 402) to be followed by the companies in closing their books for the year 1962 and in accounting for income taxes. Order No. 261 was continued in effect by a subsequent Interim Order, still effective with respect to public utilities and licensees as of the date hereof, issued in the instant proceeding January 23, 1964 (31 FPC —, 29 F.R. 1567). The portion of this proceeding relating to natural gas companies was concluded by Order No. 289, issued Nov. 2, 1964 (32 FPC —, 29 F.R. 15020).

[2] Filed as part of the original document.

[3] Commissioner O'Connor's dissenting statement filed as part of the original document.

[Docket No. R-232; Order 289-A]

## PART 201—UNIFORM SYSTEM OF ACCOUNTS FOR NATURAL GAS COMPANIES

### Investment Tax Credit

DECEMBER 17, 1964.

On November 2, 1964, the Commission issued Order No. 289 (32 FPC —, 29 F.R. 10520) in which it prescribed, among other things, a new Account 255, Accumulated deferred investment tax credits for use by natural gas companies under the Natural Gas Act (15 U.S.C. 717g).

Concurrently herewith, we are issuing Order No. 290 in which we prescribe generally similar accounting requirements for public utilities and licensees under the Federal Power Act (16 U.S.C. 825). As a result of the comments received relating to public utilities and licensees in Docket No. R-232, we revised Paragraph B of Account 255, as originally proposed, to permit changes in accounting method with respect to other than electric utility operations. A similar change should be made, as well, to that account as it applies to natural gas companies. Accordingly, we are here amending Paragraph B of Account 255, as prescribed in Order No. 289 to clarify our intention that the instruction relates solely to gas utility property and related consumers.

The Commission finds:

(1) The amendment herein adopted is necessary and appropriate for the purpose of the administration of the Natural Gas Act.

(2) For the reasons expressed above and in Order No. 289, it is unnecessary to comply with the notice and effective date provisions of section 4 of the Administrative Procedure Act.

The Commission, acting pursuant to the authority set out in Order No. 289, orders:

(A) Effective upon the issuance of this order, Paragraph B of Account 255, prescribed by Order No. 289 as an amendment to Part 201, Subchapter F, Chapter I, Title 18 of the Code of Federal Regulations, is amended by changing the words "useful life of the property", to "useful life of gas utility property". As so amended, Paragraph B of Account 255 will read as follows:

B. Where the company's accounting provides that investment tax credits are to be passed on to customers, this account shall be debited and Account 411.1 credited with a proportionate amount determined in relation to the average useful life of gas utility property to which the tax credits relate or such lesser period of time as may be adopted and used by the company. If, however, the deferral procedure provides that investment tax credits are not to be passed on to customers, the proportionate restorations to income shall be credited to Account 420.

(Secs. 8, 16, 52 Stat. 825, 830; 15 U.S.C. 717g, 717o)

(B) The caption of Docket No. R-232 is amended, for the purposes of this order, to read as set forth above.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[F.R. Doc. 64-13155; Filed, Dec. 22, 1964; 8:46 a.m.]

# Title 21—FOOD AND DRUGS

## Chapter I—Food and Drug Administration, Department of Health, Education, and Welfare

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

## PART 121—FOOD ADDITIVES

### Subpart F—Food Additives Resulting From Contact With Containers or Equipment and Food Additives Otherwise Affecting Food

ROSINS AND ROSIN DERIVATIVES

Several comments were received in response to the notice of proposed rule making published in the FEDERAL REGISTER of April 17, 1964 (29 F.R. 5278), relative to the amendment of the regulations with respect to food additives resulting from the use of rosins and rosin derivatives as components of articles intended for use in contact with food. The Commissioner of Food and Drugs has studied the data submitted and the suggestions made were accepted in part and rejected in part as will be noted from the amendments published below.

Therefore, pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409, 72 Stat. 1784 et seq.; 21 U.S.C. 348), and under the authority delegated to the Commissioner by the Secretary of Health, Education, and Welfare (21 CFR 2.90; 29 F.R. 471), the food additive regulations are amended in the following respects:

1. By adding to Subpart F the following new section:

**§ 121.2592 Rosins and rosin derivatives.**

The rosins and rosin derivatives identified in paragraph (a) of this section may safely be used in the manufacture of articles or components of articles intended for use in producing, manufacturing, packing, processing, preparing, treating, packaging, transporting, or holding food, subject to the provisions of this section.

(a) The rosins and rosin derivatives are identified as follows:

(1) Rosins:

(i) Gum rosin, refined to color grade of K or paler.

(ii) Wood rosin, refined to color grade of K or paler.

(iii) Tall oil rosin, refined to color grade of K or paler.

(iv) Dark tall oil rosin, a fraction resulting from the refining of tall oil rosin produced by multicolumnar distillation of crude tall oil to effect removal of fatty acids and pitch components and having a saponification number of from 110–135 and 32 percent–44 percent rosin acids.

(v) Dark wood rosin, all or part of the residue after the volatile terpene oils are distilled from the oleoresin extracted from pine wood.

(2) Modified rosins manufactured from rosins identified in subparagraph (1) of this paragraph:

(i) Partially hydrogenated rosin, catalytically hydrogenated to a maximum refractive index of 1.5012 at 100° C., and a color of WG or paler.

(ii) Fully hydrogenated rosin, catalytically hydrogenated to a maximum dehydroabietic acid content of 2 percent, a minimum drop-softening point of 79° C., and a color of X or paler.

(iii) Partially dimerized rosin, dimerized by sulfuric acid catalyst to a drop-softening point of 95° C.–105° C., and a color of WG or paler.

(iv) Fully dimerized rosin, dimerized by sulfuric acid catalyst, and from which sufficient nondimerized rosin has been removed by distillation to achieve a minimum drop-softening point of 143° C., and a color of H or paler.

(v) Disproportionated rosin, catalytically disproportionated to a minimum dehydroabietic acid content of 45 percent, a maximum abietic acid content of 1 percent, a maximum content of substituted phenanthrenes (as retene) of 0.25 percent, and a color of WG or paler.

(3) Rosin esters manufactured from rosins and modified rosins identified in subparagraphs (1) and (2) of this paragraph:

(i) Glycerol ester of wood rosin purified by steam stripping to have an acid number of 5 to 9, a drop-softening point of 88° C.–96° C., and a color of N or paler.

(ii) Glycerol ester of partially hydrogenated wood rosin, having an acid number of 3 to 10, a drop-softening point of 79° C.–88° C., and a color of N or paler.

(iii) Glycerol ester of partially dimerized rosin, having an acid number of 3 to 8, a drop-softening point of 109° C.–119° C., and a color of M or paler.

(iv) Glycerol ester of fully dimerized rosin, having an acid number of 5 to 16, a drop-softening point of 165° C.–175° C., and a color of H or paler.

(v) Glycerol ester of maleic anhydride-modified wood rosin, having an acid number of 30 to 40, a drop-softening point of 138° C.–146° C., a color of M or paler, and a saponification number less than 280.

(vi) Methyl ester of rosin, partially hydrogenated, purified by steam stripping to have an acid number of 4 to 8, a refractive index of 1.5170 to 1.5205 at 20° C., and a viscosity of 23 to 66 poises at 25° C.

(vii) Pentaerythritol ester of wood rosin, having an acid number of 6 to 16, a drop-softening point of 109° C.–116° C., and a color of M or paler.

(viii) Pentaerythritol ester of partially hydrogenated wood rosin, having an acid number of 7 to 18, a drop-softening point of 102° C.–110° C., and a color of K or paler.

(ix) Pentaerythritol ester of maleic anhydride-modified wood rosin, having an acid number of 8 to 16, a drop-softening point of 154° C.–162° C., a color of M or paler, and having a saponification number less than 280.

(x) Pentaerythritol ester of maleic anhydride-modified wood rosin, having an acid number of 9 to 16, a drop-softening point of 130° C.–140° C., a color of N or paler, and having a saponification number less than 280.

(xi) Pentaerythritol ester of maleic anhydride-modified wood rosin, having an acid number of 134 to 145, a drop-softening point of 127° C.–137° C., a color of M or paler, and having a saponification number less than 280.

(xii) Pentaerythritol ester of maleic anhydride-modified wood rosin, having an acid number of 30 to 40, a drop-softening point of 131° C.–137° C., a color of N or paler, and having a saponification number less than 280.

(xiii) Pentaerythritol ester of maleic anhydride-modified wood rosin, further modified by reaction with 4,4'-isopropylidenediphenol-formaldehyde condensate, having an acid number of 10 to 22, a drop-softening point of 162° C.–172° C., a color of K or paler, a saponification number less than 280, and a maximum ultraviolet absorbance of 0.14 at 296 mμ (using a 1-centimeter cell and 200 milligrams of the rosin ester per liter of solvent consisting of ethyl alcohol made alkaline by addition of 0.1 percent of potassium hydroxide).

(xiv) Mixed methyl and pentaerythritol ester of maleic anhydride-modified wood rosin, having an acid number of 73 to 83, a drop-softening point of 113° C.–123° C., a color of M or paler, and a saponification number less than 280.

(xv) Triethylene glycol ester of partially hydrogenated wood rosin, having an acid number of 2 to 10, a color of K or paler, and a viscosity of 350 to 425 seconds Saybolt at 100° C.

(xvi) Glycerol ester of maleic anhydride-modified wood rosin, having an acid number of 17 to 23, a drop-softening point of 136° C.–140° C., a color of M or paler, and a saponification number less than 280. For use only in cellophane complying with § 121.2507.

(4) Rosin salts and sizes—Ammonium, calcium, potassium, sodium, or zinc salts of rosin manufactured by the partial or complete saponification of gum rosin, wood rosin, tall oil rosin, dark tall oil rosin, dark wood rosin, partially hydrogenated rosin, fully hydrogenated rosin, or disproportionated rosin as identified in subparagraphs (1) and (2) (i), (ii), and (v) of this paragraph, or blends thereof, and with or without modification by reaction with one or more of the following:

(i) Formaldehyde.

(ii) Fumaric acid.

(iii) Maleic anhydride.

(iv) Saligenin.

(b) The quantity used shall not exceed the amount reasonably required to accomplish the intended technical effect.

(c) The use in any substance or article that is the subject of a regulation in this Subpart F shall conform with any specifications and limitations prescribed by such regulation for the finished form of the substance or article.

(d) The provisions of this section are not applicable to rosins and rosin derivatives identified in § 121.2514(b)(3)(v) and used in resinous and polymeric coatings complying with § 121.2514.

(e) The provisions of this section are not applicable to rosins and rosin derivatives identified in § 121.2520(c)(5) and used in defoaming agents complying with § 121.2519, food-packaging adhesives complying with § 121.2520, and rubber articles complying with § 121.2562.

**§ 121.2507 [Amended]**

2. By amending paragraph (c) of § 121.2507 *Cellophane* as follows:

a. By deleting the following items:

| |
|---|
| Glycerin ester of dimerized rosin. |
| Maleic acid- or maleic anhydride-modified glycerin ester of rosin. |
| Rosin (wood, gum, or tall oil) esterified with methanol and condensed with the reaction product of maleic anhydride, ethylene glycol, and phthalic anhydride. |
| Rosin-maleic anhydride ester. |
| Rosin polymerized (from wood, gum, or tall oil rosin) minimum 20 percent dimer * * *. |

b. By inserting alphabetically the following new items:

| |
|---|
| Polyester resin formed by the reaction of the methyl ester of rosin, phthalic anhydride, maleic anhydride, and ethylene glycol, such that the polyester resin has an acid number of 4 to 11, a drop-softening point of 70° C.–92° C., and a color of K or paler. |
| Rosins and rosin derivatives as provided in § 121.2592. |

**§ 121.2514 [Amended]**

3. By amending paragraph (b)(3) of § 121.2514 *Resinous and polymeric coatings* as follows:

a. By changing the introduction to subdivision (v)(*a*) to read:

(*a*) Rosins, refined to color grade of K or paler:

b. By changing the item "Rosin-maleic acid adduct" in subdivision (vii)(*a*) to read:

| |
|---|
| Terpene-maleic acid adduct. |

c. By deleting from subdivision (vii)(*b*) the item "Rosin and rosin acids" and by inserting alphabetically the following new item:

| |
|---|
| Rosins listed in subdivision (v)(*a*) of this subparagraph, for use only as reactants in oil-based or fatty acid-based alkyd resins. |

**§ 121.2519 [Amended]**

4. By amending paragraph (d) of § 121.2519 *Defoaming agents used in the manufacture of paper and paperboard* as follows:

a. By deleting from the introduction to subparagraph (2) the term "rosin oils."

b. By inserting alphabetically in subparagraph (3) the following new item:

| |
|---|
| Rosins and rosin derivatives identified in § 121.2520(c)(5). |

**§ 121.2526 [Amended]**

5. By amending paragraph (b) of § 121.2526 *Resinous and polymeric coatings for paper and paperboard* as follows:

a. By changing subparagraph (1) to read as follows:

(b) * * *

(1) Substances identified in § 121.2514(b), with the exception of subparagraph (3)(v), (xxxi), and (xxxii) of that paragraph.

b. By deleting from subparagraph (2) the item "Rosin (wood, gum, or tall oil rosin) * * *".

c. By inserting alphabetically in subparagraph (2) the following new items:

| *List of substances* | *Limitations* |
|---|---|
| * * * | * * * |
| Polyester resin formed by the reaction of the methyl ester of rosin, phthalic anhydride, maleic anhydride, and ethylene glycol, such that the polyester resin has an acid number of 4 to 11, a drop-softening point of 70° C.–92° C., and a color of K or paler. | ---------- |
| Rosin and rosin derivatives. | As provided in § 121.2592. |

**§ 121.2530 [Amended]**

6. By amending paragraph (d)(3) of § 121.2530 *Reinforced wax* by inserting therein alphabetically the new item:

| |
|---|
| Rosins and rosin derivatives as provided in § 121.2592. |

**§ 121.2534 [Amended]**

7. By amending § 121.2534 *Animal glue* by changing the item "Rosin and rosin derivatives * * *" in paragraph (d)(3) to read as follows:

(d) * * *

(3) * * *

| *List of substances* | *Limitations* |
|---|---|
| * * * | * * * |
| Rosins and rosin derivatives. | As provided in § 121.2592. |

**§ 121.2550 [Amended]**

8. By amending § 121.2550 *Closures with sealing gaskets for food containers* in the following respects:

a. By changing the introduction to paragraph (b) to read as follows:

(b) Closure-sealing gaskets and overall discs are formulated from substances identified in § 121.2514(b), with the exception of subparagraph (3)(v), (xxxi), and (xxxii) of that paragraph, and from other optional substances, including the following:

* * * * *

b. By inserting in the "List of substances" in Table 1 of paragraph (b)(5) a new item, immediately following the item "Natural rubber * * *," as follows:

TABLE 1

| *List of substances* | *Limitations (expressed as percent by weight of closure-sealing gasket composition)* |
|---|---|
| * * * | * * * |
| Rosins and rosin derivatives. | As defined in § 121.2514(b)(3)(v) for use only in resinous and polymeric coatings on metal substrates; for all other uses as defined in § 121.2592. |

**§ 121.2556 [Amended]**

9. By amending § 121.2556 *Preservatives for wood* in the following respects:

a. By deleting from the "List of substances" in paragraph (b) the item "Hydrogenated methyl ester of rosin."

b. By inserting alphabetically in the "List of substances" in paragraph (b) a new item as follows:

| *List of substances* | *Limitations* |
|---|---|
| • • • | • • • |
| Rosins and rosin derivatives. | As provided in § 121.2592. |

**§ 121.2557 [Amended]**

10. By amending § 121.2557 *Defoaming agents used in coatings* by inserting alphabetically in the "List of substances" in paragraph (d) (3) a new item as follows:

| *List of substances* | *Limitations* |
|---|---|
| • • • | • • • |
| Rosins and rosin derivatives. | As provided in § 121.2592. |

**§ 121.2562 [Amended]**

11. By amending paragraph (c) (4) of § 121.2562 *Rubber articles intended for repeated use* in the following respects:

a. By deleting from subdivision (iv) the item "Rosin oil" and by changing the item "Rosin and rosin derivatives • • •" in that subdivision to read as follows:

(iv) • • •

Rosins and rosin derivatives identified in § 121.2520(c) (5).

b. By changing the item "Rosin acid salts • • •" in subdivision (viii) to read as follows:

Rosins and rosin derivatives identified in § 121.2520(c) (5).

**§ 121.2571 [Amended]**

12. By amending paragraph (b) of § 121.2571 *Components of paper and paperboard* • • • as follows:

a. By changing the items "Resinous and polymeric coatings • • •" and "Rosins and rosin derivatives" to read:

(b) • • •

| *List of substances* | *Limitations* |
|---|---|
| • • • | • • • |
| Resinous and polymeric coatings and their constituents listed in § 121.2514 (b), with the exception of subparagraph (3) (v), (xxxi), and (xxxii). | ---------- |
| • • • | • • • |
| Rosins and rosin derivatives. | As provided in § 121.2592. |

b. By inserting alphabetically the following new item:

| *List of substances* | *Limitations* |
|---|---|
| • • • | • • • |
| Polyester resin formed by the reaction of the methyl ester of rosin, phthalic anhydride, maleic anhydride, and ethylene glycol, such that the polyester resin has an acid number of 4 to 11, a drop-softening point of 70° C.–92° C., and a color of K or paler. | ---------- |

**§ 121.2577 [Amended]**

13. By amending paragraph (b) (2) of § 121.2577 *Pressure-sensitive adhesives* by deleting the items "Glycerol ester of partially hydrogenated wood rosin • • •" and "Pentaerythritol ester of partially hydrogenated wood rosin • • •" and by inserting alphabetically the following new item:

Rosins and rosin derivatives as provided in § 121.2592.

Any person who will be adversely affected by the foregoing order may at any time within 30 days from the date of its publication in the FEDERAL REGISTER file with the Hearing Clerk, Department of Health, Education, and Welfare, Room 5440, 330 Independence Avenue SW., Washington, D.C., 20201, written objections thereto, preferably in quintuplicate. Objections shall show wherein the person filing will be adversely affected by the order and specify with particularity the provisions of the order deemed objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought. Objections may be accompanied by a memorandum or brief in support thereof.

*Effective date.* This order shall be effective on the date of its publication in the FEDERAL REGISTER.

(Sec. 409, 72 Stat. 1784; 21 U.S.C. 348)

Dated: December 17, 1964.

JOHN L. HARVEY,
*Deputy Commissioner of Food and Drugs.*

# Title 36—PARKS, FORESTS, AND MEMORIALS

## Chapter I—National Park Service, Department of the Interior

## PART 7—SPECIAL REGULATIONS RELATING TO PARKS AND MONUMENTS

### Boating

Notice is hereby given that pursuant to authority contained in section 3 of the Act of August 25, 1916 (39 Stat. 535; 16 U.S.C. 3), and 245 DM–1 (28 F.R. 915), it is proposed to amend Part 7 of Title 36, Code of Federal Regulations, as is set forth below. The purpose of these amendments is to delete those portions of the special boating regulations which are no longer required because of newly adopted general boating regulations, and to bring others in line with the present general boating regulations.

Inasmuch as the following amendments and deletions relieve existing restrictions or eliminate duplicating special regulations, they are exempt from the requirements as to advance publication in the Administrative Procedures Act, and shall become effective immediately upon publication in the FEDERAL REGISTER.

Paragraph (g) of § 7.3 is deleted in its entirety.

**§ 7.3 Glacier National Park.**

• • • • • •

(g) *Boats.* [Deleted]

• • • • •

Subparagraph (2) of paragraph (h) of § 7.4 is deleted in its entirety, and paragraph (h) (1) is redesignated as paragraph (h).

**§ 7.4 Grand Canyon National Park.**

• • • • • •

(h) *Travel on water.* • • •
(2) *Sanitation.* [Deleted]

Subparagraphs (2), (5), (7), (8), (9), (10), and (13), of paragraph (d) of § 7.13 are deleted in their entirety. Subparagraph (3) is amended as shown below.

**§ 7.13 Yellowstone National Park.**

• • • • • •

(d) *Boats.* • • •
(2) *Commercial operation.* [Deleted]
(3) *Size and type limitation.* (i) The following waterborne craft are prohibited from being placed or operated upon the waters of the park:
(*a*) [Deleted]

• • • • •

(c) [Deleted]
(*d*) [Deleted]

• • • • •

(5) *Boat equipment and requirements.* [Deleted]

• • • • •

(7) *Rules of the road.* [Deleted]
(8) *Registration of trip.* [Deleted]
(9) *Sanitation.* [Deleted]
(10) *Limitation of boat loads.* [Deleted]

• • • • •

(13) *Accidents.* [Deleted]

• • • • •

Subparagraphs (2), (4), and (5), of paragraph (g) of § 7.22 are deleted in their entirety; subdivisions (ii) through (vii) of subparagraph (3); and (i) through (iv) and (ix) through (xv) of subparagraph (6) are deleted in their entirety.

**§ 7.22 Grand Teton National Park.**

• • • • • •

(g) *Boats.* • • •
(2) *Numbering of boats.* [Deleted]
(3) *Safety requirements and equipment.* • • •
(ii) through (vii) [Deleted]
(4) *Rules of the road.* [Deleted]
(5) *Accidents.* [Deleted]
(6) *Prohibited operation.*
(i) through (iv) [Deleted]

• • • • •

(ix) through (xv) [Deleted]

• • • • •

Paragraph (h) of § 7.34 is deleted in its entirety.

**§ 7.34 Blue Ridge Parkway.**

• • • • • •

(h) *Boating.* [Deleted]

• • • • •

Paragraph (d) of § 7.36 is deleted in its entirety.

**§ 7.36 Mammoth Cave National Park.**

• • • • • •

(d) *Boating.* [Deleted]

• • • • •

Subparagraph (1) of paragraph (e) of § 7.38 is deleted in its entirety.

**§ 7.38 Isle Royale National Park.**

• • • • • •

(e) *Boating.* (1) [Deleted]

• • • • •

The present heading and introductory text of paragraph (l) of § 7.45 are deleted in their entirety, and paragraph (l) (1) is redesignated paragraph (l) to read as follows:

**§ 7.45 Everglades National Park.**

• • • • • •

(l) *Speed of boats.* Except where different speed limits are indicated by posted signs or markers, speed of boats shall not exceed 40 miles per hour in the waters of the park.

• • • • •

Subparagraph (2) of paragraph (a) of § 7.60 is deleted in its entirety.

**§ 7.60 Grand Canyon National Monument.**

(a) *Travel on water.* • • •
(2) *Sanitation.* [Deleted]

Paragraph (b) of § 7.62 is deleted in its entirety.

**§ 7.62 Fort Sumter National Monument.**

• • • • • •

(b) *Prohibited boat landing and docking.* [Deleted]

JACKSON E. PRICE,
*Acting Director.*

[F.R. Doc. 64–13139; Filed, Dec. 22, 1964; 8:45 a.m.]

# Title 38—PENSIONS, BONUSES, AND VETERANS' RELIEF

## Chapter I—Veterans Administration

## PART 17—MEDICAL

### Authorization of Outpatient Dental Treatment

In § 17.123, paragraph (b) is amended to read as follows:

**§ 17.123 Authorization of outpatient dental treatment.**

• • • • • •

(b) *Class II.* Those having a service-connected noncompensable dental condition or disability shown to have been in existence at time of discharge or release from active service may be authorized any treatment indicated as reasonably necessary for the one-time correction of the service-connected noncompensable dental disability or condition, but only if application for treatment is made within 1 year after discharge or release, except that if a disqualifying discharge or release has been corrected by competent authority application may be made within 1 year after the date of correction or August 14, 1964, whichever is later. When the services rendered on a one-time basis, as provided in this Class II, are found unacceptable within the limitations of good professional standards, such additional services may be afforded as are required to complete professionally acceptable treatment. The foregoing limitations in this Class II as to existence of disability at time of separation from service, time of filing claim, and one-time completion of treatment are not applicable to Classes II (a) and (b).

• • • • • •

(72 Stat. 1114; 38 U.S.C. 210)

This VA Regulation is effective August 14, 1964.

Approved: December 17, 1964.

By direction of the Administrator.

# Title 47—TELECOMMUNICATION

## Chapter I—Federal Communications Commission

## PART 91—INDUSTRIAL RADIO SERVICES

### Allocation and Assignment of Frequencies

In the matter of editorial amendments to Part 91[1] of the Commission's rules governing the Industrial Radio Services to reflect substantive changes accomplished in previous omnibus rule making proceedings involving the allocation and assignment of frequencies in the 72–76 Mc/s and microwave frequency bands above 952 Mc/s.

The Commission, having under consideration the amendment of Part 91, Industrial Radio Services, to effect the editorial changes described below; and

[1] Prior to December 21, 1963, Part 91 of the Commission's rules had been designated Part 11. All references to Part 11 in the body of this document predate the redesignation of Part 11 as Part 91.

It appearing, that the Commission, by Report and Order (FCC 61–764) Docket No. 14029, in the matter of amendment of Parts 7, 9, 10, 11, 16 and 19 of the Commission's rules for licensing of private microwave systems on a regular basis above 952 Mc and to provide type acceptance requirements for such systems, released June 23, 1961, published in the FEDERAL REGISTER June 29, 1961 (26 F.R. 5798) amended the above enumerated parts to provide, inter alia, special provisions for stations operating above 952 Mc/s and type acceptance requirements, the formal codification of such changes to be accomplished by subsequent Order; and

It further appearing, that the Commission, by Report and Order (FCC 61–952), Docket No. 13953, in the matter of amendment of Parts 7, 8, 9, 10, 11 and 16 of the Commission's rules to provide frequency pairing in the 952-960 Mc frequency band, and to make the channel 952.5 Mc available to public safety licensees for omnidirectional operations, released July 27, 1961, published in FEDERAL REGISTER August 1, 1961 (26 F.R. 6849) amended the above enumerated Parts to provide, inter alia, for omnidirectional operation for traffic signal control, omnidirectional operation for other than traffic signal control, and certain paired frequencies to be available on a regular grant basis rather than developmental, the formal codification of such changes to be accomplished by subsequent Order; and

It further appearing, that the Commission, by Report and Order (FCC 62–1254), Docket No. 14712, in the matter of amendment of Parts 2, 6, 7, 9, 10, 11, 16, and 21 of the Commission's rules to designate portions of the 2110–2200 Mc/s band exclusively for the use of Domestic Fixed Public Stations and for the use of operational fixed and international control stations and to reserve a portion thereof for omnidirectional operations, released December 10, 1962, and published in the FEDERAL REGISTER on December 13, 1962 (27 F.R. 12372) amended the above enumerated Parts to provide, inter alia, that certain portions of the 2110–2200 Mc/s band be withdrawn from availability in the Industrial and certain other Radio Services, in order to accommodate certain specialized needs of Domestic Fixed Public Stations, the formal codification of such changes to be accomplished by subsequent Order; and

It further appearing, that the Commission, by Report and Order, (FCC 63–637), Docket No. 14729, in the matter of amendment of Parts 2, 4, 7, 8, 9, 10, 11, 16, and 21 of the Commission's rules concerning the Allocation of the frequency bands 6425–6575, 10550–10680 and 11700–12200 Mc/s, released July 12, 1963, and published in the FEDERAL REGISTER on July 23, 1963 (28 F.R. 7476), amended the above enumerated Parts to provide, inter alia, certain microwave allocations for mobile service uses and a division of certain bands between the common carrier and private mobile services, etc., the formal codification of such changes to be accomplished by subsequent Order; and

It further appearing, that the Commission, by Report and Order (FCC 63-722), Docket No. 14744, in the matter of amendment of Parts 2 and 4 of the Commission rules and regulations to establish a new class of educational television service for the transmission of instructional and cultural material to multiple receiving locations on channels in the 1990–2110 Mc/s or 2500–2690 Mc/s frequency band, amendment of Parts 1, 7, 9, 10, 11, and 16, released July 30, 1963, and published in the FEDERAL REGISTER on August 8, 1963 (28 F.R. 8103) amended the above enumerated parts of the rules to provide, inter alia, that industrial television transmitters operating in the 2500–2690 Mc/s band be governed by the technical standards established for the instructional television service, the formal codification of such changes to be accomplished by subsequent Order; and

It further appearing, that the Commission, by its Second Memorandum Opinion and Order (FCC 61-1235), Docket No. 13928, in the matter of amendment of Part 2, Frequency Allocations and Radio Treaty Matters; General Rules and Regulations to align that part with the Geneva (1959) Radio Regulations to the extent practicable, released Ocober 25, 1961, and published in the FEDERAL REGISTER on November 15, 1961 (26 F.R. 10655), amended the above-noted part to provide, inter alia, that the frequency band 73.0–74.6 Mc/s be reallocated to the Radio Astronomy Service, the formal codification of such changes to be accomplished by subsequent Order; and

It further appearing, that the Commission, by Report and Order (FCC 64-224) Docket No. 14785, in the matter of amendment of Parts 2, 21, 81, 87, 89, 91, and 93 (formerly Parts 2, 21, 7, 9, 10, 11, and 16, respectively) of the Commission's rules to provide for 20 kc/s channeling in the 72–76 Mc/s band for fixed stations in the Domestic Public Radio Services and Operational Fixed Stations in the Safety and Special Radio Services, released March 19, 1964, and published in the FEDERAL REGISTER on March 25, 1964 (29 F.R. 3702) amended the above enumerated parts to provide, inter alia, for 20 kc/s channeling in the subject band and that 10 channels be made available on an exclusive basis to the Manufacturers Radio Service, the formal codification of such changes to be accomplished by subsequent Order; and

It further appearing, that by virtue of the reallocations that have been effected concerning the 72–76 Mc/s band, the charts for determining radius from fixed station in 72–76 Mc/s band to interference contour along which 10 percent of service from adjacent television station would be destroyed, which appear at § 91.8(g), must be and are revised; and

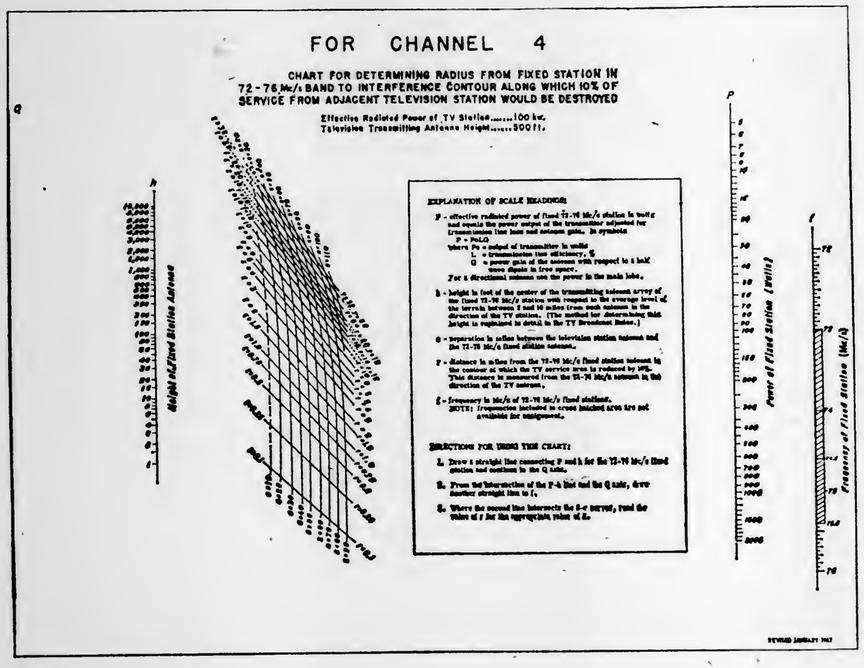
It further appearing, that Part 91 should be editorially amended to conform to Part 2; and

It further appearing, that the formal codification of the changes herein ordered conform without any substantive change to the terms in the above-described Orders and, being editorial in nature, the prior public notice and effective date provisions of section 4 of the Administrative Procedure Act are not applicable; and

It further appearing, that the amendments adopted herein are issued pursuant to authority contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended, and § 0.261 of the Commission's Statement of Delegations of Authority;

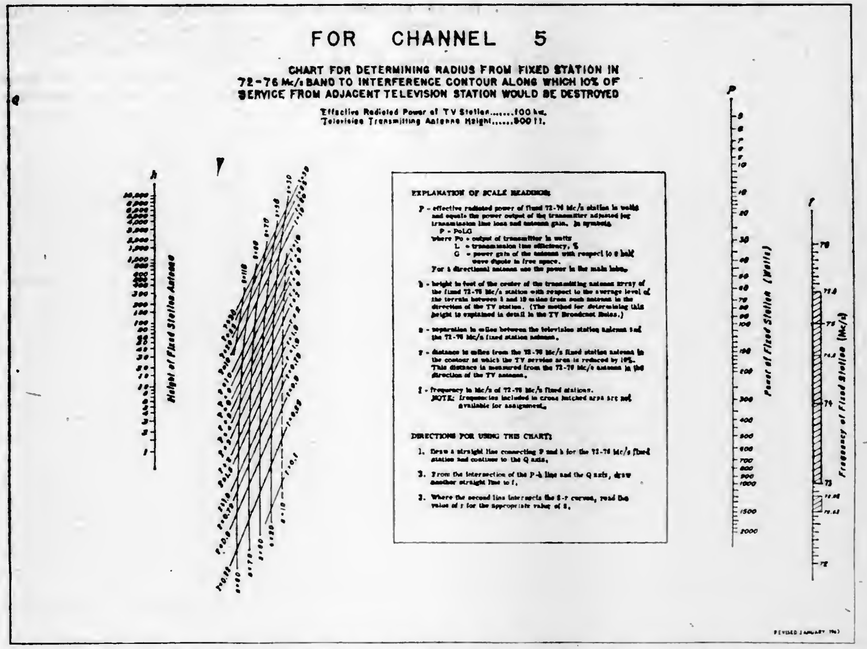
*It is ordered*, This 14th day of December 1964, that, effective December 31, 1964, Part 91 is amended as set forth below.

(Sec. 4, 48 Stat. 1066, as amended; 47 U.S.C. 154. Interprets or applies sec. 303, 48 Stat. 1082, as amended; 47 U.S.C. 303)



Released: December 15, 1964.

FEDERAL COMMUNICATIONS COMMISSION,
[SEAL] BEN F. WAPLE,
*Secretary.*



1. Notes 1 and 2 at the beginning of Part 91 are deleted.

§ 91.8 [Amended]

2. In § 91.8(g), the charts for channels 4 and 5 are deleted; and the following new charts for channels 4 and 5 are substituted therefor:

3. In § 91.104, the table in paragraph (b)(2) is amended to read as follows:

§ 91.104 **Emission limitations.**

• • • • • •

(b) • • •
(2) • • •

| Frequency band Mc/s | Authorized bandwidth (kc/s) | Frequency deviation (kc/s) |
|---|---|---|
| 25–50 | 20 | 5 |
| 50–150 | 20 | 5 |
| 150–450 | 20 | 5 |
| 450–1000 | 40 | 15 |

• • • • • •

4. In § 91.109, a new paragraph (c) is added to read as follows:

§ 91.109 **Acceptability of transmitters for licensing.**

• • • • • •

(c) Transmitters to be operated in any of the frequency bands between 952 and 12700 Mc/s, except the 8400–8500 Mc/s band, authorized under this part shall be type accepted if specified in an application filed after July 20, 1962, except that equipment authorized to be used prior thereto may continue to be used provided such operation does not result in harmful interference to other stations or systems which are conforming to the microwave technical standards specified in § 91.111.

5. Section 91.111 is amended to read as follows:

§ 91.111 **Microwave technical standards.**

(a) The technical standards indicated in the table in this section shall govern, beginning July 20, 1961, the issuance of authorizations for private microwave systems using the frequency bands above 952 Mc/s listed in the table. However, these standards shall not be applicable to transmitting equipment (including antennas) which were authorized to be operated on these frequencies prior to July 20, 1961, or for which an authorization is issued based on an application filed with the Commission prior to July 20, 1961. Such licensees of equipment and systems not subject to these technical standards, including their successors or assigns in business, will be permitted to utilize such equipment provided such operation does not result in harmful interference to another station or system which is conforming to these technical standards. In case of such harmful interference, such nonconforming licensee will be required to take whatever measures are necessary to alleviate the interference.

MICROWAVE TECHNICAL STANDARDS TABLE

| Frequency band Mc/s | Power [1] (watts) | Tolerance (percent) | Bandwidth [2] | Beamwidth [3] (degrees) |
|---|---|---|---|---|
| 952–960 | [9] 30 | 0.0005 | 100 kc/s | [9] 20 |
| 1850–1990 | 18 | .02 | 8 Mc/s | 10 |
| 2130–2150 | 15 | [7] .001 | 800 kc/s [7] | 10 |
| 2150–2160 | 15 | [7] .001 | 10 Mc/s | 360 |
| 2180–2200 | 15 | [7] .001 | 800 kc/s | 10 |
| 2450–2500 [4] | 12 | ([5]) | ([5]) | ([5]) |
| 2500–2690 [6] | 12 | .02 | 4 Mc/s | 10 |
| 6525–6575 | 7 | .02 | 25 Mc/s | 7 |
| 6575–6875 | 7 | .02 | 10 Mc/s | 5 |
| 10550–10680 | 5 | ([5]) | 25 Mc/s | 4 |
| 12200–12700 | 5 | .05 | 20 Mc/s | 4 |
| Above 16000 | 5 | ([5]) | 50 Mc/s | ([5]) |

[1] Maximum rated power output of transmitter. Power in excess of that shown herein will be authorized only if specifically provided on a particular frequency or under exceptional circumstances based upon a factual showing of need. For pulsed systems average power shall be limited to the values shown, peak power shall not exceed 5 times this limit.

[2] Maximum bandwidth (necessary or occupied, whichever is greater) which will be authorized. Except in the 2130–2150 and 2180–2200 Mc/s bands, consideration will be given, on a case-by-case basis, to requests for additional adjacent channels based upon a complete and specific factual showing of unique or unusual circumstances, apart from economic considerations, requiring such additional channels. In the band 952–960 Mc/s, bandwidths up to 500 kc/s may be authorized.

[3] Maximum beamwidth of major lobe between 0.5 power points in horizontal plane. Exceptions may be granted for stations in remote areas or until harmful interference is caused to other stations operating in accordance with these provisions.

[4] Subject to no protection from ISM equipment on 2450 Mc/s.

[5] To be specified in the station authorization.

[6] Operational fixed stations employing television transmissions in this band must utilize transmitting equipment which meets the technical requirements for Instructional Television Fixed stations as contained in Part 74, Subpart I, § 74.901, et seq. of this chapter. See also Part 2 of this chapter, § 2.106, footnote NG 47.

[7] Stations authorized prior to Jan. 15, 1963, will not be required to comply with these standards until Jan. 15, 1968.

[8] Except for the frequencies 952.1, 952.2, 952.3, and 952.4 Mc/s and the frequency pairs 952.8 and 956.4; 952.9 and 956.5; 956.2 and 959.8; and 956.3 and 959.9 Mc/s, where the beamwidth may be 360°.

[9] Except for the frequencies 952.1, 952.2, 952.3, and 952.4 Mc/s, where the maximum power may be 100 watts.

(b) Stations authorized to operate on those frequencies above 952 Mc/s which are not restricted to assignment for developmental operation only, shall be constructed and used in such a manner as to conform with all the technical and operating requirements of Subparts C and D of this part, unless deviation therefrom is specifically provided in the station authorization.

6. In § 91.254(a) the table of frequencies is amended to change the entries for 72.02 through 75.98 and 952–960 through 26000–30000 Mc/s, and paragraph (b) is amended by adding new subparagraphs (13), (14), (15), and (16), to read as follows:

**§ 91.254 Frequencies available.**

(b) • • •

(13) Available only for duplex omnidirectional operations on a developmental basis.

(14) Available on a developmental basis only for omnidirectional operation.

(15) The maximum rated power output of transmitters authorized to operate on this frequency is 100 watts.

(16) Only operational fixed stations employing television transmissions will be authorized in this band. The transmitting equipment for such stations must meet the technical standards for Instructional Television Fixed stations as contained in Part 74, Subpart I, § 74.901, et seq., of this chapter. Operational fixed systems authorized in this band prior to September 9, 1963, may continue to be authorized herein. Such systems may also be modified, or expanded by the addition of new stations, upon appropriate application therefor.

7. In § 91.255, paragraphs (b), (c), (d), (e), and (f) are added to read as follows:

**§ 91.255 Unlisted frequencies.**

• • • • •

(b) Stations authorized for operation on or before December 1, 1961, in the frequency band 73.0–74.6 Mc/s may continue such operation; but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(c) Operations in the frequency band 952–960 Mc/s authorized prior to July 20, 1961, which are not in accordance with the frequency pairing plan for this band contained in § 91.254(a), may continue provided interference is not caused to the operations of systems which utilize frequencies in accordance with that plan.

(d) Stations authorized to operate in the bands 2110–2130, 2150–2160, and 2160–2180 Mc/s prior to January 15, 1963, will be authorized to continue to operate in those bands until January 15, 1968.

(e) Stations authorized to operate in the band 6425–6525 Mc/s prior to July 15, 1963, will be authorized to continue to operate in that band until July 15, 1968.

(f) Operational fixed stations authorized to operate in the 10550–10680 Mc/s band prior to July 15, 1963, will be authorized to continue to operate in that band until July 15, 1968.

8. In § 91.304(a) the table of frequencies is amended to change the entries for 72.02 through 75.98 and 952–960 through 26000–30000 Mc/s, and paragraph (b) is amended by adding new subparagraphs (17), (18), (19), and (20), to read as follows:

**§ 91.304 Frequencies available.**

(b) * * *

(8) Available only for duplex omnidirectional operations on a developmental basis.

(9) Available on a developmental basis only for omnidirectional operation.

(10) The maximum rated power output of transmitters authorized to operate on this frequency is 100 watts.

(11) Only operational fixed stations employing television transmissions will be authorized in this band. The transmitting equipment for such stations must meet the technical standards for Instructional Television Fixed stations as contained in Part 74, Subpart I, § 74.901, et seq., of this chapter. Operational fixed systems authorized in this band prior to September 9, 1963, may continue to be authorized herein. Such systems may also be modified, or expanded by the addition of new stations, upon appropriate application therefor.

13. In § 91.405, paragraphs (b), (c), (d), (e), and (f) are added to read as follows:

**§ 91.405 Unlisted frequencies.**

* * * * *

(b) Stations authorized for operation on or before December 1, 1961, in the frequency band 73.0–74.6 Mc/s may continue such operation; but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(c) Operations in the frequency band 952.960 Mc/s authorized prior to July 20, 1961, which are not in accordance with the frequency pairing plan for this band contained in § 91.404(a), may continue provided interference is not caused to the operations of systems which utilize frequencies in accordance with that plan.

(d) Stations authorized to operate in the bands 2110–2130, 2150–2160, and 2160–2180 Mc/s prior to January 15, 1963, will be authorized to continue to operate in those bands until January 15, 1968.

(e) Stations authorized to operate in the band 6425–6525 Mc/s prior to July 15, 1963, will be authorized to continue to operate in that band until July 15, 1968.

(f) Operational fixed stations authorized to operate in the 10550–10680 Mc/s band prior to July 15, 1963, will be authorized to continue to operate in that band until July 15, 1968.

14. In § 91.454(a) the table of frequencies is amended to change the entries for 72.02 through 75.98 and 952–960 through 26000–30000 Mc/s, and paragraph (b) is amended by adding new subparagraphs (6), (7), (8), and (9), to read as follows:

**§ 91.454 Frequencies available.**

(15) Available only for duplex omnidirectional operations on a developmental basis.

(16) Available on a developmental basis only for omnidirectional operation.

(17) The maximum rated power output of transmitters authorized to operate on this frequency is 100 watts.

(18) Only operational fixed stations employing television transmissions will be authorized in this band. The transmitting equipment for such stations must meet the technical standards for Instructional Television Fixed stations as contained in Part 74, Subpart I, § 74.901, et seq., of this chapter. Operational fixed systems authorized in this band prior to September 9, 1963, may continue to be authorized herein. Such systems may also be modified, or expanded by the addition of new stations, upon appropriate application therefor.

18. Section 91.506, is revised to read as follows:

**§ 91.506 Unlisted frequencies.**

(a) Stations authorized for operation on or before December 1, 1961, in the frequency band 73.0–74.6 Mc/s may continue such operation; but no new stations will be authorized in this band, nor will expansion of existing systems be permitted.

(b) Operations in the frequency band 952–960 Mc/s authorized prior to July 20, 1961, which are not in accordance with the frequency pairing plan for this band contained in § 91.504(a), may continue provided interference is not caused to the operations of systems which utilize frequencies in accordance with that plan.

(c) Stations authorized to operate in the bands 2110–2130, 2150–2160, and 2160–2180 Mc/s prior to January 15, 1963, will be authorized to continue to operate in those bands until January 15, 1968.

(d) Stations authorized to operate in the band 6425–6525 Mc/s prior to July 15, 1963, will be authorized to continue to operate in that band until July 15, 1968.

(e) Operational fixed stations authorized to operate in the 10550–10680 Mc/s band prior to July 15, 1963, will be authorized to continue to operate in that band until July 15, 1968.

19. In § 91.553, paragraph (b) is deleted, and the word "[Reserved]" is inserted in lieu thereof, as follows:

**§ 91.553 Station limitations.**

• • • • •

(b) [Reserved]

• • • • •

20. In § 91.554(a) the table of frequencies is amended to change the entries for 72.02 through 75.98 and 952–960 through 26000–30000 Mc/s, and paragraph (b) is amended by adding new subparagraphs (22), (23), and (24), to read as follows:

**§ 91.554 Frequencies available.**

# Title 50—WILDLIFE AND FISHERIES

## Chapter I—Bureau of Sport Fisheries and Wildlife, Fish and Wildlife Service, Department of the Interior

## PART 33—SPORT FISHING

### Upper Mississippi River Wildlife and Fish Refuge; Illinois, Iowa, Minnesota and Wisconsin

The following special regulation is issued and is effective on date of publication in the FEDERAL REGISTER.

**§ 33.5 Special regulations; sport fishing; for individual wildlife refuge areas.**

ILLINOIS, IOWA, MINNESOTA AND WISCONSIN

UPPER MISSISSIPPI RIVER WILDLIFE AND FISH REFUGE

Sport fishing on the Upper Mississippi River Wildlife and Fish Refuge, Illinois, Iowa, Minnesota, and Wisconsin, is permitted on all water areas of the refuge. The refuge water areas comprising 125,000 acres are delineated on maps available at the refuge headquarters and from the office of the Regional Director, Bureau of Sport Fisheries and Wildlife, 1006 West Lake Street, Minneapolis, Minn., 55408. Sport fishing shall be in accordance with all applicable State regulations subject to the following special conditions:

(1) Open season: Date of publication in FEDERAL REGISTER through December 31, 1965, subject further to applicable States' seasons.

The provisions of this special regulation supplement the regulations which govern fishing on wildlife refuge areas generally which are set forth in Title 50, Part 33, and are effective through December 31, 1965.

W. P. SCHAEFER,
*Acting Regional Director, Bureau of Sport Fisheries and Wildlife.*

DECEMBER 11, 1964.

# Proposed Rule Making

## CIVIL AERONAUTICS BOARD

**[ 14 CFR Part 399 ]**

[Docket No. 15731]

### STATEMENTS OF GENERAL POLICY

**Wet Leases to Foreign Air Carriers; Extension of Time for Comments**

DECEMBER 21, 1964.

The Board, by publication in 29 F.R. 17042, and by circulation of a Notice of Proposed Rule Making, PSDR–9, dated December 8, 1964, gave notice that it is considering the desirability of amending Part 399, its Statements of General Policy, to establish a new Board policy with respect to so-called "wet leases" by United States air carriers to foreign air carriers. Interested persons were invited to participate in the rule making proceeding through the submission of ten (10) copies of written data, views, or arguments, addressed to the Docket Section, Civil Aeronautics Board, Washington, D.C., 20428, on or before December 23, 1964.

British Overseas Airways Corp., British West Indian Airways, Ltd., and Bahamas Airways Ltd. have jointly requested that the time for filing comments be extended thirty days. The undersigned finds that the additional time requested is not warranted. However, an additional ten days will be allowed.

Accordingly, pursuant to authority delegated under Section 7.3C of Public Notice PN–15, dated July 3, 1961, the undersigned hereby extends the date for submitting comments on the subject proposal until January 4, 1965. All relevant matter in communications received on or before that date will be considered by the Board before taking action on this proposal. Copies of such communications will be available for examination by interested persons in the Docket Section of the Board, Room 710, Universal Building, 1825 Connecticut Avenue NW., Washington, D.C.

(Secs. 204(a), 412 and 416, Federal Aviation Act of 1958, 72 Stat. 743, 770, 771; 49 U.S.C. 1324, 1382, 1386 and sec. 3 of the Administrative Procedure Act, 60 Stat. 238; 5 U.S.C. 1002)

By the Civil Aeronautics Board.

[SEAL] ARTHUR H. SIMMS,
*Associate General Counsel,*
*Rules and Special Counsel Division.*

[F.R. Doc. 64–13254; Filed, Dec. 22, 1964; 8:48 a.m.]

## FEDERAL AVIATION AGENCY

**[ 14 CFR Part 71 [New] ]**

[Airspace Docket No. 64–WE–62]

### FEDERAL AIRWAYS

**Proposed Alteration**

The Federal Aviation Agency is considering amendments to Part 71 [New] of the Federal Aviation Regulations which would alter VOR Federal airway No. 23 between Portland, Oreg., and Seattle, Wash., and which would alter VOR Federal airway No. 287 between Portland and Olympia, Wash.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Agency, 5651 West Manchester Avenue, Post Office Box 90007, Airport Station, Los Angeles, Calif., 90009. All communications received within 45 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendments. The proposals contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The proposed amendments would realign V–23 via the intersection of the Portland VORTAC 350° and the Seattle VORTAC 197° True radials, and would realign V–287 from the Portland VORTAC direct to the Olympia VORTAC. This would permit the lowering of the MEA from 6,000 to 5,000 feet on V–23 between the Portland VORTAC and the Rainier Intersection, and on V–287 between Portland and Olympia. The resulting increased IFR capacity of these airway segments is needed to facilitate the movement of IFR traffic at lower altitudes between Portland and Seattle and Portland and Olympia.

These amendments are proposed under the authority of section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on December 16, 1964.

DANIEL E. BARROW,
*Chief, Airspace Regulations and Procedures Division.*

[F.R. Doc. 64–13133; Filed, Dec. 22, 1964; 8:45 a.m.]

**[ 14 CFR Parts 71, 75 [New] ]**

[Airspace Docket No. 64–EA–54]

### JET ROUTES AND REPORTING POINTS

**Proposed Designation, Realignment and Revocation**

The Federal Aviation Agency is considering amendments to Parts 71 and 75 [New] of the Federal Aviation Regulations which would designate a jet route from Appleton, Ohio to Westminster, Md., and which would realign Jet Routes Nos. 6, 8, 12, 48, 61, 75, and 77 via the Westminster VOR instead of the Baltimore, Md. VORTAC.

Interested persons may participate in the proposed rule making by submitting such written data, views, or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Agency, Federal Building, John F. Kennedy International Airport, Jamaica, N.Y., 11430. All communications received within 45 days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendments. The proposals contained in this notice may be changed in the light of comments received.

An official docket will be available for examination by interested persons at the Federal Aviation Agency, Office of the General Counsel, Attention: Rules Docket, 800 Independence Avenue SW., Washington, D.C. An informal docket also will be available for examination at the office of the Regional Air Traffic Division Chief.

The FAA is considering using the Westminster VOR (latitude 39°29'42" N., longitude 76°58'44" W.) in lieu of the Baltimore VORTAC in the jet route structure in order to facilitate traffic control in the Baltimore-Washington, D.C. area. Elimination of the Baltimore VORTAC would necessitate realignment of Jet Routes Nos. 6, 8, 12, 48, 61, 75, and 77. Additionally, in order to facilitate traffic control of arrivals to, and departures from, the Baltimore area a jet route from Appleton, Ohio, direct to Westminster, is proposed. If this proposal is adopted amendments to existing jet routes would be made as hereinafter set forth.

1. In § 75.100 (29 F.R. 1287) the following actions would be taken:

(a) Jet Route No. 6 would be amended by deleting "Front Royal, Va.; Yardley, Pa." and substituting therefor, "Front Royal, Va.; Westminster, Md.; Yardley, Pa."

(b) Jet Route No. 8 would be amended by deleting "Front Royal, Va.; Yardley, Pa.;" and substituting therefor, "Front Royal, Va.; Westminster, Md.; Yardley, Pa."

(c) Jet Route No. 12 would be amended by deleting from the caption "to Baltimore, Md.)." and substituting "to Westminster, Md.)." therefor; and by deleting from the text "Baltimore, Md." and substituting therefor, "Westminster, Md."

(d) Jet Route No. 48 would be amended by deleting from the caption "to Delta, Pa.)." and substituting "to Westminster, Md.)." therefor; and by deleting from the text "From Pulaski, Va., via Herndon, Va., to the INT of the

direct radials between Gordonsville, Va., and Huguenot, N.Y., and between Front Royal, Va., and Yardley Pa." and substituting "From Pulaski, Va., to Westminster, Md." therefor.

(e) Jet Route No. 61 would be amended by deleting from the caption "(Baltimore, Md." and substituting "(Westminster, Md." therefor; and by deleting from the text "From Baltimore, Md., via Philipsburg, Pa.," and substituting "From Westminster, Md., via Philipsburg, Pa.," therefor.

(f) Jet Route No. 75 would be amended by deleting "Gordonsville, Va.; Huguenot, N.Y." and substituting "Gordonsville, Va.; Westminster, Md.; Huguenot, N.Y." therefor.

(g) Jet Route No. 77 would be amended by deleting "Gordonsville, Va., Huguenot, N.Y." and substituting "Gordonsville, Va.; Westminster, Md.; Huguenot, N.Y." therefor.

2. In § 71.207 (29 F.R. 1223), Westminster, Md., would replace Baltimore, Md., as a high altitude reporting point.

These amendments are proposed under section 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348).

Issued in Washington, D.C., on December 16, 1964.

DANIEL E. BARROW,
*Chief, Airspace Regulations and Procedures Division.*

**[ 14 CFR Part 71 [New] ]**

[Airspace Docket No. 64–SO–60]

### CONTROL ZONE AND TRANSITION AREA

**Proposed Designation and Redesignation; Supplemental Notice**

In a notice of proposed rule making published in the FEDERAL REGISTER on November 7, 1964 (29 F.R. 15092) it was stated, in part, that the Federal Aviation Agency proposed to redesignate the transition area at Crossville, Tenn.

The proposed redesignated Crossville transition area was described as follows:

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Crossville Memorial Airport (latitude 35°57'05" N., longitude 85°05'05" W.); within 5 miles SW and 8 miles NE of the Crossville VORTAC 154° radial, extending from the VORTAC to 12 miles SE, excluding the area SE of a line 16 miles NW of and parallel to the Chattanooga, Tennessee, VORTAC 037° radial; within 8 miles S and 5 miles N of the 073° bearing from the Crossville RBN (latitude 35°58'06" N., longitude 84°59'40" W.) extending from the 6-mile radius area to 12 miles E of the RBN, excluding that airspace within a 10-mile radius of Fowler Field, Rockwood, Tenn. (latitude 35°55'15" N., longitude 84°41'25" W.).

It was stated that the proposed transition area would provide protection for the proposed new instrument approach procedure to be established on the non-directional radio beacon the City of Crossville is installing at latitude 35°-58'06" N., longitude 84°59'40" W. The new instrument approach procedure will be published under Part 97 of the Federal Aviation Regulations.

Subsequent to the publication of the notice, it was disclosed that the procedure turn could be executed at a lower altitude and the landing minimums would be lower if the proposed instrument approach procedure were modified.

The modification of the proposed instrument approach procedure would have no effect upon the proposed control zone but would alter the proposed transition area redesignation. As altered, the transition area would be redesignated as follows:

That airspace extending upward from 700 feet above the surface within a 6-mile radius of the Crossville Memorial Airport (latitude 35°57'55" N., longitude 85°05'05" W.); within 5 miles SW and 8 miles NE of the Crossville VORTAC 154° radial, extending from the VORTAC to 12 miles SE, excluding the area SE of a line 16 miles NW of and parallel to the Chattanooga, Tennessee, VORTAC 037° radial; within 8 miles N and 5 miles S of the 062° bearing from the Crossville RBN (latitude 35°58'06" N., longitude 84°-59'40" W.) extending from the 6-mile radius area to 12 miles NE of the RBN, excluding that airspace within a 10-mile radius of Fowler Field, Rockwood, Tennessee (latitude 35°55'15" N., longitude 84°41'25" W.).

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in duplicate to the Director, Southern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, Post Office Box 20636, Atlanta, Ga., 30320. All communications received within thirty days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Chief, Air Traffic Division. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Southern Regional Office, Federal Aviation Agency, Room 724, 3400 Whipple Street, East Point, Ga.

This amendment is proposed under section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)).

Issued in East Point, Ga., on December 15, 1964.

PAUL H. BOATMAN,
*Acting Director, Southern Region.*

[F.R. Doc. 64–13187; Filed, Dec. 22, 1964; 8:48 a.m.]

**[ 14 CFR Part 71 [New] ]**

[Airspace Docket No. 63–SO–43]

### CONTROL AREA EXTENSION, CONTROL ZONES AND TRANSITION AREAS

**Proposed Revocation, Alteration, and Designation**

The Federal Aviation Agency is considering amendments to Part 71 [New] of the Federal Aviation Regulations which would revoke the control area extension in the vicinity of Valdosta, Ga., alter the control zones in the Valdosta terminal area and designate transition areas in the vicinity of Valdosta, Moultrie, and Waycross, Ga.

The Valdosta, Ga., control area extension is presently designated as that airspace bounded on the N by latitude 32°00'00" N., on the E by V–5, on the S by V–22, and on the W by V–35.

The Valdosta, Ga. (Valdosta Municipal Airport) control zone is presently designated as within a 5-mile radius of the Valdosta Municipal Airport and within 2 miles either side of the Valdosta VOR 004° and 184° radials extending from the 5-mile radius zone to 10 miles SW of the VOR, excluding the portion within the Moody AFB control zone.

The Valdosta, Ga. (Moody AFB) control zone is presently designated within a 10-mile radius of Moody AFB, Valdosta, Ga.

The Federal Aviation Agency, having completed a comprehensive review of the terminal airspace structure requirements in the Valdosta, Moultrie, and Waycross, Ga., terminal areas, including studies attendant to the implementation of the provisions of CAR Amendments 60–21/60–29 (26 F.R. 570, 27 F.R. 4012), proposes the airspace actions hereinafter set forth.

1. The Valdosta, Ga., control area extension would be revoked.

2. The Valdosta, Ga. (Valdosta Municipal Airport) control zone would be redesignated within a 5-mile radius of the Valdosta Municipal Airport (latitude 30°46'58" N., longitude 83°16'44" W.); within 2 miles each side of the Valdosta VOR 007° radial, extending from the 5-mile radius zone to the VOR.

3. The Valdosta, Ga. (Moody AFB) control zone would be redesignated within a 5-mile radius of Moody AFB (latitude 30°58'01" N., longitude 83°11'27" W.); within 2 miles each side of the Moody VOR 007° radial, extending from the 5-mile radius zone to 12 miles N of the VOR; within 2 miles each side of the Moody VOR 173° radial, extending from the 5-mile radius zone to 12 miles SE of the VOR; within 2 miles each side of the Valdosta VOR 016° radial, extending from the 5-mile radius zone to the Valdosta Municipal Airport 5-mile radius control zone; within 2 miles each side of the Moody TACAN 360° radial, extending from the 5-mile radius zone to 8 miles N of the TACAN; within 2 miles each side

of the Moody TACAN 180° radial, extending from the 5-mile radius zone to the Valdosta Municipal Airport 5-mile radius control zone. This control zone shall be effective only during specific dates and times established 30 days in advance by a Notice to Airmen and continuously published in the Airman's Information Manual.

4. A Valdosta, Ga., transition area would be designated as that airspace extending upward from 700 feet above the surface within 2 miles each side of the Valdosta VOR 187° radial, extending from the VOR to 8 miles S of the VOR; and that airspace extending upward from 1,200 feet above the surface bounded on the S by V–22, on the W by V–35/97, on the NW by a 30-mile arc centered on Albany Airport (latitude 31°32'00" N., longitude 84°11'35" W.), on the N by latitude 31°35'00" N., on the NE by V–243 and on the E by V–157; and that airspace extending upward from 2,000 feet MSL bounded on the N by latitude 32°00'00" N., on the E by V–243, on the S by latitude 31°35'00" N. and on the W by a 40-mile arc centered on Turner Air Force Base (latitude 31°35'55" N., longitude 84°05'39" W.); excluding that airspace which coincides with the Waycross, Ga., transition area.

5. The Valdosta, Ga. (Moody AFB) transition area would be designated as that airspace extending upward from 700 feet above the surface within a 7-mile radius of Moody AFB (latitude 30°58'01" N., longitude 83°11'27" W.); within 2 miles each side of the Moody ILS localizer N course, extending from the 7-mile radius area to 12 miles N of the LOM; within 2 miles each side of the Moody TACAN 180° radial, extending from the 7-mile radius area to 12 miles S of the TACAN. The transition area shall be effective only during specific dates and times established 30 days in advance by a Notice to Airmen and continuously published in the Airman's Information Manual.

6. The Moultrie, Ga., transition area would be designated as that airspace extending upward from 700 feet above the surface within a 5-mile radius of Sunset Airport (latitude 31°04'48" N., longitude 83°48'15" W.); within a 6-mile radius of Spence Field (latitude 31°08'26" N., longitude 83°42'24" W.); within 2 miles each side of the Moultrie VOR 271° radial, extending from the 5-mile radius area to 8 miles W of the VOR; within 2 miles each side of the Moultrie VOR 199° and 230° radials, extending from the 5-mile radius area to 8 miles S and SW of the VOR.

7. The Waycross, Ga., transition area would be designated as that airspace extending upward from 700 feet above the surface within a 5-mile radius of Waycross-Ware County Airport (latitude 31°14'55" N., longitude 82°23'48" W.); within 2 miles each side of the Waycross, Ga., VOR (proposed at latitude 31°16'09" N., longitude 82°33'12" W.) 100° radial, extending from the 5-mile radius area to Waycross VOR 207° and 027° radials; including that airspace extending upward from 1200 feet above the surface within 8 miles N and 5 miles S of the Waycross VOR 297° radial, extending from the VOR to 12 miles NW of the VOR; within 8 miles N and 5 miles S of the 086° bearing from a point at latitude 31°15'42" N., longitude 82°19'26" W., extending from this point to 12 miles E of this point.

The proposed control zone alterations and transition area designations are required to protect prescribed (and proposed) instrument approach and departure procedures at Valdosta Municipal Airport, Moody AFB, Sunset Airport (Moultrie), Waycross-Ware County Airport, Thomasville Airport, and Spence (Air Force) Auxiliary Field (Moultrie). They are also required for protection of approved holding patterns and aircraft being radar vectored by Valdosta Approach Control and Jacksonville Air Route Traffic Control Center.

The redesignated Valdosta, Ga. (Moody AFB) control zone and the Valdosta (Moody AFB) 700-foot transition area would be part-time, effective only during the dates and times the Moody AFB traffic control tower is in operation. Since the hours of operation of the Moody AFB traffic control tower vary with the seasons of the year, appropriate military authority will issue, 30 days in advance, a Notice to Airmen specifying the dates and times the control zone will be effective. This Notice to Airmen will appear continuously in the Airman's Information Manual.

The floors of airways which traverse the transition areas proposed herein would automatically coincide with the floors of the transition areas.

Certain minor revisions to prescribed instrument approach procedures would be effected in conjunction with the actions proposed herein, but operational complexities would not be increased nor would aircraft performance characteristics or present landing minimums be adversely affected.

Specific details of the changes to minimum instrument flight rules altitudes that would be required may be examined by contacting the Chief, Airspace Utilization Branch, Air Traffic Division, Southern Region, Federal Aviation Agency, Post Office Box 20636, Atlanta, Ga., 30320.

Interested persons may submit such written data, views or arguments as they may desire. Communications should be submitted in duplicate to the Director, Southern Region, Attn: Chief, Air Traffic Division, Federal Aviation Agency, Post Office Box 20636, Atlanta, Ga., 30320. All communications received within thirty days after publication of this notice in the FEDERAL REGISTER will be considered before action is taken on the proposed amendment. No hearing is contemplated at this time, but arrangements for informal conferences with Federal Aviation Agency officials may be made by contacting the Chief, Air Traffic Division. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

The official Docket will be available for examination by interested persons at the Southern Regional Office, Federal Aviation Agency; Room 724, 3400 Whipple Street, East Point, Ga.

This amendment is proposed under section 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a)).

Issued in East Point, Ga., on December 15, 1964.

PAUL H. BOATMAN,
*Acting Director,*
*Southern Region.*

[F.R. Doc. 64–13188; Filed, Dec. 22, 1964; 8:48 a.m.]

## [ 14 CFR Parts 91 [New], 129 [New] ]

[Reg. Docket No. 6395; Notice 64–53]

## AIRBORNE DISTANCE MEASURING EQUIPMENT; FOREIGN AIRCRAFT

### Notice of Proposed Rule Making

The Federal Aviation Agency is considering a proposal to require foreign civil aircraft when operating within the 48 contiguous States and the District of Columbia to be equipped with distance measuring equipment (DME).

This equipment must be installed on each foreign civil aircraft when operated at and above 24,000 feet MSL after December 31, 1965. In addition, it must be installed on each of the following airplanes operated by a foreign air carrier, regardless of the altitude flown, after the indicated dates.

(1) Turbojet airplanes—December 31, 1965.

(2) Turboprop airplanes—June 30, 1966.

(3) Pressurized reciprocating engine airplanes—December 31, 1966.

(4) Other airplanes having a maximum certificated takeoff weight of more than 12,500 pounds—December 31, 1967.

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the Federal Aviation Agency, Office of the General Counsel: Attention Rules Docket, 800 Independence Avenue SW., Washington, D.C., 20553. All communications received on or before February 22, 1965, will be considered by the Administrator before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

By amendments to Parts 40, 41, 42, and 43 (now 91 [New]) similar requirements were prescribed for U.S. air carrier airplanes and other civil aircraft of the United States. A discussion of the DME including its need for the safe and efficient use of the airspace was set forth in the notice of proposed rule making and the final amendments to those parts (Draft Release 61–11, 26 F.R. 4455; amendments 40–38, 41–2, 42–44, 43–16, 28 F.R. 479–484). Interested persons may obtain copies of the draft release and amendments by directing a request to the Publications Division, Federal Aviation Agency, Washington, D.C., 20553. The Agency now finds that in order to achieve the maximum safety and efficiency provided by the VORTAC system of navigation the DME equipment requirement should be extended to foreign civil aircraft operating within the same environment in the United States.

At the present time, positive control for both VFR and IFR flights is exercised along approximately 11,637 nautical miles of VOR airways. All DME installations serving the high route structure of these airways are nearly completed. Those installations serving other route structures, although behind schedule, are being installed as rapidly as possible. In addition, VORTACs have been commissioned by the Agency for all principal terminal airports into which foreign air carriers are now authorized to operate. Therefore, the use of DME equipment on foreign civil aircraft will not only provide the pilots of those aircraft with continuous and accurate information regarding holding fixes, crossing points, and other information for the safe operation of the airplane in an environment of very high speed traffic, but will also provide the Agency with an efficient aid in the exercise of air traffic control within those areas.

The installation of these DME facilities along the VOR airways is in accord with the aeronautical telecommunications standards and recommendations of Annex 10 to the Convention on International Civil Aviation. As in the case of other equipment used on foreign civil aircraft, the DME equipment will not be required to be approved by the Administrator. However, such equipment should meet the specifications of Annex 10 and provide continuous and accurate information in the airplane for measurement of distance along the VORTAC system established by the Administrator.

In consideration of the foregoing, it is proposed to amend Parts 91 [New] and 129 [New] of the Federal Aviation Regulations as follows:

1. By amending § 91.43 by adding a new paragraph (e) to read:

§ 91.43 Special rules for foreign civil aircraft.

* * * * *

(e) *Flight at and above 24,000 feet MSL.* After December 31, 1965, if VOR navigational equipment is required under paragraph (c) (1) (ii) of this section, no person may operate a foreign civil aircraft in the 48 contiguous States or in the District of Columbia, at and above 24,000 feet MSL, unless the aircraft is equipped with distance measuring equipment (DME) capable of receiving and indicating distance information from the VORTAC facilities to be used. When DME required by this paragraph fails at and above 24,000 feet MSL, the pilot in command of the aircraft shall notify ATC immediately, and may then continue operations at and above 24,000 feet MSL to the next airport of intended landing at which repairs or replacement of the equipment can be made.

2. By amending § 129.17 by designating the provisions of that section as paragraph (a), and adding a paragraph (b) to read as follows:

§ 129.17 Radio equipment.

* * * * *

(b) Whenever VOR navigational equipment is required by paragraph (a) of this section, at least one distance measuring equipment (DME), capable of receiving and indicating distance information from the VORTAC facilities to be used, must be installed on each airplane when operated within the 48 contiguous States and the District of Columbia at and above 24,000 feet MSL after December 31, 1965, and must be installed on each of the following airplanes, regardless of the altitude flown, when operating within the 48 contiguous States and the District of Columbia after the indicated dates.

(1) Turbojet airplanes—December 31, 1965.

(2) Turboprop airplanes—June 30, 1966.

(3) Pressurized reciprocating engine airplanes—December 31, 1966.

(4) Other airplanes having a maximum certificated takeoff weight of more than 12,500 pounds—December 31, 1967.

This amendment is proposed under the authority of sections 313(a), 307, and 601 of the Federal Aviation Act of 1958 (49 U.S.C. 1354, 1348 and 1421).

Issued in Washington, D.C., on December 18, 1964.

C. W. WALKER,
*Acting Director,*
*Flight Standards Service.*

# FEDERAL HOME LOAN BANK BOARD

## [ 12 CFR Part 561 ]

[No. FSLIC–1,943]

## FEDERAL SAVINGS AND LOAN INSURANCE CORPORATION

### Proposed Amendment Relating to Definition of Slow Loans

DECEMBER 17, 1964.

Resolved that, pursuant to Part 508 of the General Regulations of the Federal Home Loan Bank Board (12 CFR Part 508) and § 567.1 of the Rules and Regulations for Insurance of Accounts (12 CFR 567.1), it is hereby proposed that § 561.16 of the Rules and Regulations for Insurance of Accounts (12 CFR 561.16) be amended by an amendment the substance of which is as follows:

Amend paragraph (e) of § 561.16 of the Rules and Regulations for Insurance of Accounts to read as follows:

§ 561.16 Slow loans.

* * * * *

(e) Any loan or land contract that has been modified or refinanced within the preceding 12 months while contractually delinquent, except a mortgage loan or land contract more than 2 years old and less than 30 days delinquent at the time of the modification or refinancing and not previously modified or refinanced subsequent to January 1, 1964.

(Secs. 402, 403, 48 Stat. 1256, 1257, as amended; 12 U.S.C. 1725, 1726. Reorg. Plan No. 3 of 1947, 12 F.R. 4981, 3 CFR, 1947 Supp.)

Resolved further that all interested persons are hereby given the opportunity to submit written data, views, or arguments on the following subjects and issues: (1) Whether said proposed amendment should be adopted as proposed; (2) whether said proposed amendment should be modified and adopted as modified; (3) whether said proposed amendment should be rejected. All such written data, views, or arguments must be received through the mail or otherwise at the Office of the Secretary, Federal Home Loan Bank Board, Federal Home Loan Bank Board Building, 101 Indiana Avenue NW., Washington, D.C., 20552, not later than January 8, 1965, to be entitled to be considered, but any received later may be considered in the discretion of the Federal Home Loan Bank Board.

By the Federal Home Loan Bank Board.

# FEDERAL POWER COMMISSION

## [ 18 CFR Part 154 ]

[Docket No. R–242]

## GAS PIPELINE TARIFFS

### Unauthorized Overrun Penalty Provisions; Order Terminating Proceeding

DECEMBER 17, 1964.

The Commission issued a notice on July 15, 1963, wherein it proposed to amend § 154.38 of the regulations under the Natural Gas Act by prescribing uniform unauthorized overrun penalty provisions to be included in rate schedules filed, pursuant to section 4 of the Natural Gas Act, by natural gas pipeline companies where a contracted volume is specified. The notice was published in the FEDERAL REGISTER on July 20, 1963 (28 F.R. 7432) and mailed to persons who would be affected or interested including Federal and State agencies. Comments on the proposed rule were received from 79 respondents, including 19 pipeline companies, 48 distributors, 12 State commissions, municipalities, and municipal associations. Of these, sixty respondents strongly opposed the proposal for a variety of reasons.

We have concluded, in the light of the opposition expressed by all segments of the industry and various regulatory bodies, that the regulations as proposed are not necessary for general application at this time. We have decided to withdraw the proposal for the present.

However, as indicated in paragraph (3) of the July 15, 1963 notice, the existence of overrun penalty provisions in contracts between pipeline companies and their buyers could result in discriminatory practices in administering the penalty provisions among buyers who seek or take overrun gas. Hence, while the regulations originally proposed in this proceeding may not be necessary for general application at this time, it is important that we obtain from the pipeline companies information as to their actual experience and practice in administering the overrun penalty provisions. We have, therefore, instructed the staff to prepare a notice of proposed rulemaking to add a schedule to FPC Form No. 2 for the purpose of obtaining such information.

The Commission, therefore, orders:

(A) Effective upon the issuance of this order, the proceeding in Docket No. R-242 is terminated.

(B) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission.

[SEAL] JOSEPH H. GUTRIDE, *Secretary.*

[F.R. Doc. 64-13157; Filed, Dec. 22, 1964; 8:46 a.m.]

# SECURITIES AND EXCHANGE COMMISSION

**[ 17 CFR Parts 230, 240 ]**

**[Release 33-4742, 34-7470]**

## REGISTRATION AND REPORTING PROCEDURES

### Notice of Proposed Rule Making

Notice is hereby given that the Securities and Exchange Commission has under consideration certain proposed amendments to its general rules and regulations under the Securities Act of 1933 and the Securities Exchange Act of 1934.

The amendments to the rules under the Securities Act of 1933 would reflect the new numbering of the subsections of section 4 of the Act effected by the Securities Acts Amendments of 1964. The purpose of the proposed amendments to the general rules and regulations under the Securities Exchange Act of 1934 is to make those rules generally applicable to issuers required to register securities pursuant to the new section 12(g) of the Act. The result would be that registrants under that section of the Act would follow the same registration and reporting procedures as registrants which have securities registered on a national securities exchange. The proposed changes are described in more detail below.

Rule 0-6 (to be redesignated 17 CFR 240.0-6) under the Securities Exchange Act of 1934 relating to disclosure detrimental to the national security would be amended to include a reference to registration statements as well as other documents filed with the Commission.

Regulation 12B (17 CFR 240.12b-1 to 240.12b-36) under the Securities Exchange Act of 1934 as now in effect contains general rules relating to the preparation and filing of applications for registration of securities on a national securities exchange pursuant to section 12(b) of that Act, reports by listed companies pursuant to section 13 of the Act and reports pursuant to section 15(d) of the Act by certain registrants under the Securities Act of 1933. The amendments to Regulation 12B would make the provisions of that regulation applicable to registration statements filed pursuant to the new section 12(g) of the Act.

Regulation 13A (17 CFR 240.13a-1 to 240.13a-15) under the Securities Exchange Act of 1934 contains certain special rules relating to the filing of periodic and other reports pursuant to section 13 of the Act by issuers having securities registered on a national securities exchange. The amendments to this regulation would extend the applicability of those rules to reports filed pursuant to section 13 of the Act by issuers having securities registered pursuant to section 12(g).

Regulation 15D (17 CFR 240.15d-1 to 240.15d(21)) under the Securities Exchange Act of 1934 contains certain special rules relating to the filing of periodic and other reports required by section 15(d) of the Act by certain issuers having securities registered under the Securities Act of 1933. The amendments to these rules are designed to conform them to the provisions of section 15(d) of the Act as amended by the Securities Acts Amendments of 1964. In addition, Rule 15d-20 (17 CFR 240.15d-20), containing an exemption for certain closely held issuers from the reporting requirements of section 15(d) of the Act, would be rescinded since it is no longer necessary under the provisions of the amended section 15(d).

Section 16(a) of the Securities Exchange Act of 1934, as amended by the Securities Acts Amendments of 1964, requires the directors, officers, and principal equity security holders of listed companies and companies registered pursuant to the new section 12(g) of the Act to file reports of their beneficial ownership of equity securities of their respective companies. The rules under this section would be amended to make them applicable to the additional reports required by the amended section.

The Securities Acts Amendments of 1964 redesignated section 16(d) of the Act as "Section 16(e)." Rule 16d-1 (17 CFR 240.16d-1), which relates to arbitrage transactions under section 16, would be amended to redesignate it as "Rule 16e-1" (17 CFR 240.16e-1) and to make it apply to securities registered pursuant to the new section 12(g) of the Act.

The text of the proposed amendments is set forth below. Rules and portions of rules not referred to would remain unchanged.

I. Part 230 of Title 17 would be amended as follows:

Sections 230.151, 230.152, 230.155, and 230.156 would be amended by changing "section 4(1)," wherever it appears in the caption or text of those sections, to "section 4(2)."

Section 230.152A would be amended by changing the phrase "within the meaning of the first clause of section 4(1) of the Act" to "within the meaning of section 4(1) of the Act."

Sections 230.133 and 230.154 would be amended by changing "section 4(2)," wherever it appears in the caption or text of those sections, to "section 4(4)."

II. Section 240.6 of Title 17 would be redesignated as § 240.0-6 and would be amended as follows:

**§ 240.0-6 Disclosure detrimental to the national security.**

(a) Any requirement to the contrary notwithstanding, no application for registration, registration statement, report, proxy statement or other document filed with the Commission or any securities exchange shall contain any document or information that has been classified or determined by an appropriate department or agency of the United States to require protection in the interests of national defense.

* * * * *

III. The heading "Applications and reports" following § 240.12a-5 would be changed to read "Regulation 12B: Registration and reporting." The following sections of Regulation 12B (§§ 240.12b-1 to 240.12b-36) would be amended as indicated below.

**§ 240.12b-1 Scope of regulation.**

The rules contained in §§ 240.12b-1 to 240.12b-36, inclusive, shall govern all applications for registration and registration statements filed pursuant to section 12 of the act and all reports filed pursuant to sections 13 and 15(d) of the act, including all amendments to such applications, statements and reports, except that any provision in a form covering the same subject matter as any such rule shall be controlling.

**§ 240.12b-2 Definitions.**

Unless the context otherwise requires, the following terms, when used in the rules contained in §§ 240.12b-1 to 240.12b-36, inclusive, or in §§ 240.13a-1 to 240.13b-1, inclusive, or §§ 240.15d-1 to 240.15d-21, inclusive, or in the forms for applications, statements and reports filed pursuant to section 12, 13, or 15(d) of the act, shall have the respective meanings indicated in this rule:

* * * * *

(m) *Previously filed or reported.* The terms "previously filed" and "previously reported" mean previously filed with, or reported in, an application or statement under section 12, a report under section 13 or 15(d), a definitive proxy statement under section 14 of the act, or a registration statement under the securities act of 1933: *Provided,* That information contained in any such document shall be deemed to have been previously filed with, or reported to, an exchange only if such document is filed with such exchange.

* * * * *

**§ 240.12b-10 Requirements as to proper form.**

Every application, statement or report shall be on the form prescribed therefor by the Commission, as in effect on the date of filing. Any application, statement or report shall be deemed to be filed on the proper form unless objection to the form is made by the Commission within 30 days after the date of filing.

**§ 240.12b-11 Number of copies; signatures; binding.**

(a) Except as provided in a particular form, three complete copies of each application, statement or report, including exhibits and all other papers and documents filed as a part thereof, shall be filed with the Commission. At least one complete copy of each application shall be filed with each exchange on which the securities covered thereby are being registered. At least one complete copy of each report under section 13 of the act shall be filed with each exchange on which the registrant has securities registered.

(b) At least one copy of each application, statement or report filed with the Commission and one copy of each application or report filed with each exchange shall be manually signed in the manner prescribed by the appropriate form. If the application, statement or report is typewritten, one of the signed copies filed with the Commission shall be an original "ribbon" copy. Unsigned copies shall be conformed. If the signature of any person is affixed pursuant to a power of attorney or other similar authority, a copy of such power of attorney or other authority shall also be filed with the application, statement or report.

(c) Each copy of an application, statement or report filed with the Commission or with an exchange shall be bound in one or more parts. Copies filed with the Commission shall be bound without stiff covers. The application, statement or report shall be bound on the left side in such a manner as to leave the reading matter legible.

**§ 240.12b-12 Requirements as to paper, printing and language.**

(a) Applications, statements and reports shall be filed on good quality, unglazed, white paper 8½ x 13 inches in size, insofar as practicable. However, tables, charts, maps and financial statements may be on larger paper if folded to that size.

(b) The application, statement or report and, insofar as practicable, all papers and documents filed as a part thereof, shall be printed, lithographed, mineographed, or typewritten. However, the application, statement or report or any portion thereof may be prepared by a similar process which, in the opinion of the Commission, produces copies suitable for a permanent record. Irrespective of the process used, all copies of any such material shall be clear, easily readable and suitable for repeated photocopying. Debits in credit categories and credits in debit categories shall be designated so as to be clearly distinguishable as such on photocopies.

(c) The body of all printed applications, statements and reports shall be in roman type at least as large as ten-point modern type. However, to the extent necessary for convenient presentation, financial statements and other statistical or tabular data and the notes thereto may be in type at least as large as eight-point modern type. All type shall be leaded at least two points.

(d) Applications, statements and reports shall be in the English language. If any exhibit or other paper or document filed with an application, statement or report is in a foreign language, it shall be accompanied by a translation into the English language.

**§ 240.12b-13 Preparation of application, statement or report.**

The application, statement or report shall contain the numbers and captions of all items of the appropriate form, but the text of the items may be omitted provided the answers thereto are so prepared as to indicate to the reader the coverage of the items without the necessity of his referring to the text of the items or instructions thereto. However, where any item requires information to be given in tabular form, it shall be given in substantially the tabular form specified in the item. All instructions, whether appearing under the items of the form or elsewhere therein, are to be omitted. Unless expressly provided otherwise, if any item is inapplicable or the answer thereto is in the negative, an appropriate statement to that effect shall be made.

**§ 240.12b-14 Riders; inserts.**

Riders shall not be used. If the application, statement or report is typed on a printed form, and the space provided for the answer to any given item is insufficient, reference shall be made in such space to a full insert page or pages on which the item number and caption and the complete answer are given.

**§ 240.12b-15 Amendments.**

All amendments shall be filed under cover of Form 8 and shall comply with all pertinent requirements applicable to applications, statements and reports. Amendments shall be filed separately for each separate application, statement or report amended. Amendments to an application or statement may be filed either before or after registration becomes effective.

**§ 240.12b-20 Additional information.**

In addition to the information expressly required to be included in an application, statement or report, there shall be added such further material information, if any, as may be necessary to make the required statements, in the light of the circumstances under which they are made not misleading.

**§ 240.12b-23 Incorporation by reference.**

(a) Matter contained in any part of an application, statement or report, other than exhibits, may be incorporated by reference in answer or partial answer to any item of the same application, statement or report. Matter contained in an exhibit may be so incorporated to the extent permitted in § 240.12b-24. An application for registration of an additional class of securities of the registrant on the same exchange may incorporate by reference any item contained in any application pursuant to which such prior registration is effective.

(b) Any financial statement filed with the Commission pursuant to any Act administered by the Commission may be incorporated by reference in an application, statement or report, filed with the Commission by the same or any other person, if it substantially conforms to the requirements of the form on which the application, statement or report is filed. Any financial statement filed with an exchange pursuant to the Act may be incorporated by reference in any application or report filed with the exchange by the same or any other person, if it substantially conforms to the requirements of the form on which the application or report is filed. If any financial statement filed with the Commission is incorporated by reference in copies of an application or report filed with the Commission pursuant to section 12 or 13 of the act, copies of the financial statement may be filed with the exchange in lieu of the corresponding financial statement required by the form on which the application or report is filed.

(c) Material incorporated by reference shall be clearly identified in the reference. An express statement that the specified matter is incorporated by reference shall be made at the particular place in the application, statement or report where the information is required. Matter shall not be incorporated by reference in any case where such incorporation would render the application, statement or report incomplete, unclear or confusing.

**§ 240.12b-32 Incorporation of exhibits by reference.**

(a) Any document or part thereof filed with the Commission pursuant to any act administered by the Commission may, subject to § 201.24 of this chapter, be incorporated by reference as an exhibit to any application, statement or report filed with the Commission by the same or any other person. Any document or part thereof filed with an exchange pursuant to the Act may be incorporated by reference as an exhibit to any application or report filed with the exchange by the same or any other person.

* * * * * *

**§ 240.12b-33 Annual reports to other Federal agencies.**

Notwithstanding any rule or other requirement to the contrary, whenever copies of an annual report by a registrant to any other Federal agency are required or permitted to be filed as an exhibit to an application, statement or report filed by such registrant with the Commission or with a securities exchange, only one copy of such annual report need be filed with the Commission and one copy thereof with each such exchange, provided appropriate reference to such copy is made in each copy of the application, state-

ment or report filed with the Commission or with such exchange.

**§ 240.12b–36 Use of financial statements filed under other acts.**

Where copies of certified financial statements filed under other acts administered by the Commission are filed with an application, statement or report, the accountant's certificate shall be manually signed, or manually-signed copies of the certificate shall be filed with the financial statements. Where such financial statements are incorporated by reference in an application, statement or report, the written consent of the accountant to such incorporation by reference shall be filed with the application, statement or report. Such consent shall be dated and signed manually.

IV. The heading "Reports of issuers of listed securities" following § 240.12f–6 would be changed to read "Regulation 13A: Reports of issuers of securities registered pursuant to section 12." The following section of Regulation 13A (§§ 240.13a–1 to 240.13a–15) would be amended as indicated below.

**§ 240.13a–1 Requirement of annual reports.**

Every issuer having securities registered pursuant to section 12 of the act shall file an annual report for each fiscal year after the last full fiscal year for which financial statements were filed in its application for registration or registration statement. Registrants on Form 8–B shall file an annual report for each fiscal year beginning on or after the date as of which the succession occurred. The report shall be filed within 120 days after the close of the fiscal year or within such other period as may be specified in the appropriate form.

**§ 240.13a–2 Annual reports of predecessors.**

Every issuer having securities registered pursuant to section 12 of the act on Form 8–B shall file an annual report pursuant to § 240.13a–1 for each of its predecessors which had securities registered pursuant to section 12 covering the last full fiscal year of the predecessor prior to the registrant's succession, unless such report has been filed by the predecessor. Such annual report shall contain the information that would be required if filed by the predecessor.

**§ 240.13a–3 Reports in case of new registration.**

(a) Notwithstanding § 240.13a–1, any registrant which has filed, within the period prescribed for filing an annual report pursuant to that section:

(1) A registration statement under the Securities Act of 1933 which has become effective and is not subject to any proceeding under section 8(d) of that act or to an order entered thereunder, or

(2) An application for registration or registration statement pursuant to section 12 of the act, which has become effective and is not subject to any proceeding under section 15(c)(4) or 19(a)(2) of the act or to an order thereunder,

may file as its annual report pursuant to § 240.13a–1 copies of the registration statement or application in lieu of an annual report on the appropriate annual report form if the statement or application covers the fiscal period that would be covered by a report on the appropriate annual report form and contains all of the information, including financial statements and exhibits, required by the appropriate annual report form.

• • • • •

**§ 240.13a–10 Interim reports.**

(a) Every issuer which changes its fiscal closing date after the last fiscal year for which financial statements were filed in its application for registration or registration statement pursuant to section 12 of the act shall file a report covering the resulting interim period not more than 120 days after the close of the interim period or after the date of the determination to change the fiscal closing date, whichever is later.

(b) Every issuer having securities registered on Form 8–B shall file an interim report for the period, if any, between the close of the fiscal year covered by the last annual report of its predecessor or predecessors and the beginning of the first fiscal year of the registrant subsequent to the succession. The report shall be filed within 120 days after the close of the period. It shall include information regarding the predecessor or predecessors from the close of the most recent fiscal year prior to the succession as if such predecessor or predecessors were the registrant. The financial statements filed with the report shall give effect to the operations of, and transactions by the predecessor or predecessors during the period as if they were the registrant. A statement that effect has been given to such operations and transactions shall be made in a note or otherwise. Separate financial statements for the predecessor or predecessors need not be filed .

• • • • •

**§ 240.13a–13 Semiannual reports on Form 9–K.**

(a) Every issuer of a security registered pursuant to section 12 of the act which is required to file annual reports on Form 10–K (§ 249.310 of this chapter) or Form U5S (§ 259.5s of this chapter), or which is required to file a report on one of such forms as Part II of Form 16–K (§ 249.316 of this chapter) or Form 19–K (§ 249.319 of this chapter), shall file a semiannual report on Form 9–K (§ 249.309 of this chapter) for the first half of each fiscal year ending after the close of the latest fiscal year for which financial statements of such issuer were filed in an application for registration or registration statement pursuant to section 12: *Provided, however,* That no such report need be filed for any semiannual period ending prior to June 30 1955.

(b) Such reports on Form 9–K (§ 249.309 of this chapter) shall be filed not more than 45 days after the end of the six-month period for which they are filed. However, the report for any period ending prior to the date on which a class of securities of the issuer first becomes effectively registered pursuant to section 12 may be filed not more than 45 days after the effective date of such registration.

• • • • •

**§ 240.13a–15 Quarterly reports of certain real estate companies.**

(a) Except as provided in paragraph (b) of this section every issuer of a security registered pursuant to section 12 of the act (i) which is a real estate investment trust, as defined in section 856 of the Internal Revenue Code, or (ii) whose business is primarily that of acquiring and holding for investment real estate or interests in real estate or interests in other issuers whose business is primarily that of acquiring and holding real estate or interests in real estate for investment, shall file a report on Form 7–K (§ 249.307) for each fiscal quarter ending on or after June 1, 1962, or the date on which such issuer's registration statement under the Securities Act of 1933 becomes effective, whichever date is later. Such reports shall be filed not more than 45 days after the end of the fiscal quarter for which they are filed.

• • • • •

V. The heading "Reports of registrants under the Securities Act of 1933" following § 240.15c3–2 would be changed to read "Regulation 15D: Reports of registrants under the Securities Act of 1933." Section 240.15d–20 would be rescinded. The following sections of Regulation 15D (§§ 240.15d–1 to 240.15d–21) would be amended as indicated below.

**§ 240.15d–1 Requirements of annual reports.**

Every registrant under the Securities Act of 1933 which is subject to section 15(d) of the Securities Exchange Act of 1934 shall file an annual report for each fiscal year after the last full fiscal year for which certified financial statements were contained in its registration statement at the time such statement became effective. The report shall be filed within 120 days after the close of the fiscal year or within such other periods as may be specified in the appropriate annual report form.

**§ 240.15d–13 Semiannual reports on Form 9–K.**

(a) Every issuer which, pursuant to § 240.15d–1 is required to file annual reports on Form 10–K (§ 249.310) or Form U5S (§ 259.5s) shall file a semiannual report on Form 9–K (§ 249.309) for the first half of each fiscal year ending after the close of the latest fiscal year for which financial statements of such issuer were filed in a registration statement under the Securities Act of 1933: *Provided, however,* That no such report need be filed for any semiannual period prior to June 30, 1955.

• • • • •

**§ 240.15d–15 Quarterly reports of certain real estate companies.**

(a) Except as provided in paragraph (b), every issuer which is subject to section 15(d) of the act and (1) which is a real estate investment trust, as defined in section 856 of the Internal Revenue Code, or (2) whose business is primarily that of acquiring and holding for investment real estate or interests in real estate or interests in other issuers whose business is primarily that of acquiring and holding real estate or interests in real estate for investment, shall file a report on Form 7–K (§ 249.307) for each fiscal quarter ending on or after June 1, 1962, or the date on which such issuer's registration statement under the Securities Act of 1933 becomes effective, whichever date is later. Such reports shall be filed not more than 45 days after the end of the fiscal quarter for which they are filed.

• • • • •

VI. The following sections of Part 240 of Title 17 would be amended as indicated below.

**§ 240.16a–1 Filing of statements.**

• • • • •

(b) A person who is already filing statements pursuant to section 16(a) with respect to securities registered pursuant to either section 12(b) or 12(g) of the act need not file an additional statement on Form 3 (§ 249.103):

(1) When an additional class of securities of the same issuer becomes registered pursuant to the same subsection of the act or, in the case of a class of securities registered pursuant to section 12(b), when another class of securities of the same issuer becomes registered pursuant to section 12(g); or

(2) When such person assumes another or an additional relationship to the issuer; for example, when an officer becomes a director.

• • • • •

**§ 240.16a–2 Ownership of more than 10 percent of an equity security.**

In determining, for the purpose of section 16(a) of the act whether a person is the beneficial owner, directly or indirectly, of more than 10 percent of any class of any equity security, such class shall be deemed to consist of the total amount of such class which has been issued, regardless of whether any part of such amount is held by or for the account of the issuer; except that for the purpose of determining the percentage of ownership of voting trust certificates or certificates of deposit for equity securities, the class of voting trust certificates or certificates of deposit shall be deemed to consist of the entire amount of voting trust certificates or certificates of deposit issuable in respect of the class of equity securities which may be deposited under the voting trust agreement or deposit agreement in question, whether or not all of such class has been so deposited.

**§ 240.16a–4 Exemptions from sections 16(a) and 16(b).**

(a) During the period of 12 months following their appointment and qualification, securities held by the following persons shall be exempt from sections 16(a) and 16(b) of the act:

(1) Executors or administrators of the estate of a decedent;

(2) Guardians or committees for an incompetent; and

(3) Receivers, trustees in bankruptcy, assignees for the benefit of creditors, conservators, liquidating agents, and other similar persons duly authorized by law to administer the estate or assets of other persons.

(b) After the 12-month period following their appointment or qualification the foregoing persons shall be required to file reports with respect to the securities held by the estates which they administer under section 16(a) and shall be liable for profits realized from trading in such securities pursuant to section 16(b) only when the estate being administered is a beneficial owner of more than 10 percent of any class of equity security (other than an otherwise exempted security) which is registered pursuant to section 12 of the act.

(c) Securities reacquired by or for the account of an issuer and held by it for its account shall be exempt from sections 16(a) and 16(b) during the time they are held by the issuer.

**§ 240.16a–8 Ownership of securities held in trust.**

• • • • •

(c) In the event that 10 percent of any class of any equity security (other than an exempted security) which is registered pursuant to section 12 of the act is held in a trust, that trust and the trustees thereof as such shall be deemed a person required to file the reports specified in section 16(a) of the act.

• • • • •

(f) In determining, for the purposes of section 16(a) of the act, whether a person is the beneficial owner, directly or indirectly, of more than 10 percent of any class of any equity security, the interest of such person in the remainder of a trust shall be excluded from the computation.

• • • • •

VII. Section 240.16d–1 would be redesignated § 240.16e–1 and would be amended as follows:

**§ 240.16e–1 Arbitrage transactions under section 16.**

It shall be unlawful for any director, or officer of an issuer of an equity security which is registered pursuant to section 12 of the act to effect any foreign or domestic arbitrage transaction in any equity security of such issuer, whether registered or not, unless he shall include such transaction in the statements required by section 16(a) and shall account to such issuer for the profits arising from such transaction, as provided in section 16(b). The provision of section 16(c) shall not apply to such arbitrage transactions. The provisions of section 16 shall not apply to any bona fide foreign or domestic arbitrage transaction insofar as it is effected by any person other than such director or officer of the issuer of such security.

(Secs. 4 and 19, 48 Stat. 77, 85, as amended, 15 U.S.C. 77d, 77s; secs. 12, 13, 15 and 16, 48 Stat. 892, 894, 895 and 896, as amended; 15 U.S.C. 78l, 78m, 78o and 78p)

All interested persons are invited to submit their views and comments on the proposed amendments, in writing, to the Securities and Exchange Commission, Washington, D.C., 20549, on or before December 30, 1964. Except where it is requested that such communications not be disclosed, they will be considered available for public inspection.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

## POST OFFICE DEPARTMENT

### POSTAL EMPLOYEE UNIFORM APPAREL

#### Maroon Neckties; Specifications

On November 4, 1964, the Post Office Uniform Quality Control Office, U.S. Army Natick Laboratories, issued to the uniform industry PODUQC—No. 7, specifications for Maroon Necktie.

1. *Ties.* Effective April 1, 1965, a a maroon necktie conforming to the new specifications is authorized for wear. Reimbursement is authorized for purchases made of such ties on and after April 1, 1965, by the following categories of employees:

a. Male letter carriers.
b. Special delivery messengers.
c. Male window service personnel.
d. Guards and watchmen.
e. Male elevator operator or elevator starter.
f. Letter box mechanics.

Until November 1, 1965, Post Office Department employees may continue to purchase and be reimbursed for ties which conform to specifications which were in effect prior to November 4, 1964. On and after November 1, 1965, reimbursement shall be made only for uniform ties manufactured with the specifications issued on November 4, 1964.

Wear-out period. Uniform ties which conform to the specifications which were in effect prior to November 4, 1964, may continue to be worn until no longer serviceable.

2. *Quality Control Provisions.* The Quality Control Certificate number used on a label indicating that the tie has been manufactured in accordance with requirements of this new specification must be attached to each tie.

(R.S. 161, as amended; 38 Stat. 1084, as amended, 68 Stat. 1114, as amended; 5 U.S.C. 22, 2131–2133, 31 U.S.C. 686, 39 U.S.C. 501, 3116)

LOUIS J. DOYLE,
*General Counsel.*

## DEPARTMENT OF THE INTERIOR

### Bureau of Land Management

### ALASKA

#### Notice of Amendment of Proposed Withdrawal and Reservation of Lands

DECEMBER 16, 1964.

The Federal Aviation Agency has filed an application to amend Serial Number Fairbanks 031968, application for withdrawal to include the lands described below. These lands are to be withdrawn from all forms of appropriation under the public land laws, including the mining laws, mineral leasing laws, grazing laws, and disposal of materials under the Materials Act of 1947, as amended. The applicant desires the land for establishing an Air Navigational Facility, under section 303c of the Federal Aviation Act of 1958, Public Law 85–726 (72 Stat. 748) and (63 Stat. 377; 40 U.S.C. 471).

For a period of 30 days from the date of publication of this notice, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawal may present their views in writing to the undersigned officer of the Bureau of Land Management, Department of the Interior, Fairbanks District and Land Office, Post Office Box 1150, Fairbanks, Alaska.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demand for the lands and their resources. He will also undertake negotiations with the applicant agency with the view of adjusting the application to reduce the area to the minimum essential to meet the applicant's needs, to provide for the maximum concurrent utilization of the lands for purposes other than the applicant's, to eliminate lands needed for purposes more essential than the applicant's and to reach agreement on the concurrent management of the lands and their resources.

He will also prepare a report for consideration by the Secretary of the Interior, who will determine whether or not the lands will be withdrawn as requested by the Federal Aviation Agency.

The determination of the Secretary on the application will be published in the FEDERAL REGISTER. A separate notice will be sent to each interested party of record.

If circumstances warrant it, a public hearing will be held at a convenient time and place, which will be announced.

The lands involved in the application are:

KOTZEBUE, ALASKA

TRACT A

Commencing at the point of beginning of the State of Alaska, Division of Aviation's Tract V, proceed S. 79°15'00" E. 2,007.89 feet along the south boundary line of said Tract V to the true point of beginning of this description; thence continuing along said boundary S. 79°15'00" E. 4,692.87 feet to the Southeast Corner of Tract V; thence N. 10°45'00" W. 2,500 feet to the Northeast Corner of said Tract V; thence along the north boundary line of Tract V, N. 79°15'00" W. 4,154.39 feet to a point; thence S. 10°45'00" W. 705.63 feet to a point; thence S. 5°32'08" W. 1,343.80 feet to a point; thence S. 66°18'01" W. 806.33 feet to the point of beginning. An area containing 238.543 acres more or less.

DONALD E. HARDING,
*Acting Manager, District and Land Office.*

## DEPARTMENT OF AGRICULTURE

### Agricultural Marketing Service

### WALLACE STOCKYARDS ET AL.

#### Proposed Posting of Stockyards

The Chief of the Rates and Registrations Branch, Packers and Stockyards Division, Agricultural Marketing Service, United States Department of Agriculture, has information that the livestock markets named below are stockyards as defined in section 302 of the Packers and Stockyards Act 1921, as amended (7 U.S.C. 202), and should be made subject to the provisions of the Act.

Wallace Stockyards, Ashville, Ala.
Ripon Horse Auction, Ripon, Calif.
Kelley Live Stock Marketing Co., Vandalia, Ill.
Maquoketa Sales Co., Maquoketa, Iowa.
Dawson Sales Barn, Dawson, Minn.
Lewis Brothers Livestock & Commission Sales Company, Cleveland, Tenn.

Notice is hereby given, therefore, that the said Chief, pursuant to authority delegated under the Packers and Stockyards Act, 1921, as amended (7 U.S.C. 181 et seq.), proposes to issue a rule designating the stockyards named above as posted stockyards subject to the provisions of the Act, as provided in section 302 thereof.

Any person who wishes to submit written data, views, or arguments concerning the proposed rule may do so by filing them with the Chief, Rates and Registrations Branch, Packers and Stockyards Division, Agricultural Marketing Service, United States Department of Agriculture, Washington 25, D.C., within 15 days after publication hereof in the FEDERAL REGISTER.

All written submissions made pursuant to this notice will be made available for public inspection at such times and places in a manner convenient to the public business (7 CFR 1.27(b)).

Done at Washington, D.C., this 17th day of December 1964.

K. A. POTTER,
*Acting Chief, Rates and Registrations Branch, Packers and Stockyards Division, Agricultural Marketing Service.*

### AMERICAN CYANAMID CO.

#### Notice of Filing of Petition for Food Additive Sulfachloropyrazine, Sodium Sulfachloropyrazine

Pursuant to the provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409(b)(5), 72 Stat. 1786; 21 U.S.C. 348(b)(5)), notice is given that a petition (FAP 4D1292) has been filed by American Cyanamid Company, Fine Chemicals Department, Pearl River, New York, proposing the issuance of a regulation to provide for the safe use of sulfachloropyrazine or sodium sulfachloropyrazine as follows:

| Principal ingredient | Amount | Limitations | Indications for use |
|---|---|---|---|
| Sulfachloropyrazine | 950 mg. per gallon (0.025%). | For growing chickens; treat 3 to 6 days; as sole source of drinking water; withdraw 72 hours before slaughter; as sulfachloropyrazine or sodium sulfachloropyrazine. | Treatment of coccidiosis. |
| Sulfachloropyrazine | 950 mg.-1420 mg. per gallon (0.025%-0.0375%). | For growing chickens; treat with 1420 mg. per gallon for first 3 days followed by 950 mg. per gallon for 2 to 3 days; withdraw 72 hours before slaughter; as sulfachloropyrazine or sodium sulfachloropyrazine; as sole source of drinking water. | Treatment of severe outbreaks of coccidiosis. |

Dated: December 17, 1964.

## ATOMIC ENERGY COMMISSION

[Docket No. 27–10]

### NUCLEAR ENGINEERING CO., INC.

#### Notice of Amendment of Byproduct, Source and Special Nuclear Material License

Please take notice that the Atomic Energy Commission has issued Amendment No. 21 to License No. 4–3766–1 which amends the license to provide for the following:

1. Receipt at General Atomics, San Diego, Calif., of one hundred ninety-two (192) 55-gallon drums and two 6' x 4' x 4' boxes of radioactive waste material containing a total of 3,000 grams of Uranium 235, transportation to the Nuclear Engineering Co. facility near Beatty, Nev., and burial in the soil upon arrival at the burial facility. No single drum or box contains more than 20 grams of Uranium 235.

2. Receipt at General Electric Co.'s Vallecitos, Calif., facility of 1933.25 grams of special nuclear material contained in liners prepared by General Electric Company, transportation to the Nuclear Engineering Co. facility near Beatty, Nev., in Bureau of Explosives approved shipping casks, and removal of the liners from the shipping casks and burial in the soil. The maximum quantity which may be contained in a cask at any one time shall be 250 grams of special nuclear material. The liners shall be buried at a minimum distance of 10 feet apart.

License No. 4-3766-1 provides for the possession of a maximum of 500 grams of Uranium 235 provided that there is not more than 100 grams of Uranium 235 in a single package. The license also provides that no special nuclear material may be removed from shipping containers. This amendment is to provide for possession of a quantity in excess of the 500 gram limit and to provide for more than 100 grams of Uranium 235 in a single package. This amendment is valid only for the receipt, transportation and burial of the special nuclear material described above in containers which have been prepared by General Atomics and General Electric.

The Commission has determined that under the conditions of transportation and the licensee's procedures for burial there is no possibility of accidental criticality. The Commission has also determined that prior public notice of proposed issuance of this amendment is not required since the amendment does not involve hazard considerations different from those previously evaluated.

The Atomic Energy Commission has found that:

A. The licensee's equipment, facilities, and procedures are adequate to protect health and minimize danger to life or property;

B. The licensee is qualified by training and experience to use the material for the purpose requested in such manner as to protect health and minimize danger to life or property.

C. The application for the amendment complies with the requirements of the Atomic Energy Act of 1954, as amended, and Title 10, Code of Federal Regulations, and is for a purpose authorized by the Act.

Within fifteen (15) days from the date of publication of this notice in the FEDERAL REGISTER, the applicant may file a request for a hearing, and any person whose interest may be affected by this proceeding may file a petition for leave to intervene. Requests for a hearing and petition for leave to intervene shall be filed in accordance with the provisions of the Commission's regulations (10 CFR Part 2). If a request for a hearing or a petition for leave to intervene is filed within the time prescribed in this notice, the Commission will issue a notice of hearing or an appropriate order.

The text of this amendment is set forth below.

Dated at Bethesda, Md., on December 15, 1964.

For the Atomic Energy Commission.

LYALL JOHNSON,
*Acting Director,*
*Division of Materials Licensing.*

[License No. 4-3766-1; Amdt. 21]

In accordance with application dated October 21, 1964, and application dated October 30, 1964, and amendments thereto dated November 10, 1964, and November 13, 1964, License No. 4-3766-1 is amended to add the following new conditions:

26. Notwithstanding Condition 1.C.(2), the licensee is authorized to receive, transport, and dispose of the one hundred ninety-two 55-gallon drums and the two 6'x4'x4' boxes prepared by General Atomics, San Diego, Calif., as described in the licensee's application dated October 21, 1964. No single 55-gallon drum or box prepared by General Atomics shall contain more than 20 grams of Uranium 235. The drums and boxes shall be buried immediately upon arrival at the licensee's Nevada facility without opening any box or drum.

This authorization is valid only for the containers prepared by General Atomics, San Diego, Calif., as specified in the licensee's application dated October 21, 1964.

27. Notwithstanding Condition 1.C.(2) and Condition 22., the licensee is authorized to receive, transport, and dispose of 1933.25 grams of Uranium 235 contained in sealed liners in Bureau of Explosives-approved shipping casks prepared by the General Electric Co., Vallecitos, Calif. No cask transported by the licensee shall contain more than 250 grams of Uranium 235 and the total quantity of Uranium 235 transported at any one time shall not exceed 500 grams. The licensee may remove the sealed liners from the shipping cask and shall bury them at a distance of not less than 10 feet apart.

This authorization is valid only for the containers prepared by the General Electric Co., Vallecitos, Calif., as specified in the licensee's application dated October 30, 1964, and amendments thereto dated November 10, 1964, and November 13, 1964.

Dated at Bethesda, Md., on December 15, 1964.

For the Atomic Energy Commission.

[Docket No. 15353; Order E-21591]

## INTERNATIONAL AIR TRANSPORT ASSOCIATION

### Order Relating to Passenger Fare Matters

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 16th day of December 1964.

Agreement adopted by the Traffic Conferences of the International Air Transport Association at meetings in Athens relating to passenger fare matters, Docket 15353, Agreement C.A.B. 18086.[1]

There has been filed with the Board, pursuant to section 412(a) of the Federal Aviation Act of 1958 (the Act) and Part 261 of the Board's Economic Regulations, an agreement between various air carriers, foreign air carriers, and other carriers, embodied in the resolutions of the Traffic Conferences of the International Air Transport Association (IATA), and adopted at the Athens Traffic Conference meetings (October-November 1964). The agreement, which has been assigned the above-designated C.A.B. Agreement number, includes resolutions with intended early effectiveness dates of December 1 and 15, 1964, and January 1, 1965.

Among other things, the agreement (1) establishes special rules governing sales of transportation by air, including sales under installment plans, in South American countries, (2) subject to outstanding government conditions, proposes restrictions precluding carriers from entering into additional credit card agreements pending Conference action on recommendations to be developed by a Credit Study Group,[2] (3) encompasses a number of resolutions relating to procedural and technical matters and amendments of a limited nature to existing fare resolutions.

[1] Including only R-8, R-8a, R-18 through R-20, R-22, R-30 through R-39, R-41, R-59, R-66 through R-70, and R-75 through R-78.

The Board, acting pursuant to sections 102, 204(a), and 412 of the Act, does not find the following resolutions incorporated in Agreement C.A.B. 18086 to be adverse to the public interest or in violation of the Act:

| CAB No. | IATA No. | Title | Application |
|---|---|---|---|
| R-8 | 003 | Standard Rescission Resolution | 1 |
| R-8a | 003 | Standard Rescission Resolution insofar as it relates to: | |
| | | 035 Unethical Disclosure of Information | 2 |
| | | 310 Free Baggage Allowance | 2 |
| | | 311 Baggage Excess Weight Charges | 2 |
| R-18 | 019 | Worldwide Credit Cards | 1; 2; 3 |
| R-19 | 021b | Rates of Exchange—Revalidating and Amending | 1; 2; 3 |

| R-59 | 092 | Student Fares—Revalidating and Amending | 2; 3; 1/2 |
| R-66 | 200 | Free and Reduced Fare or Rate Transportation—Revalidating and Amending. | Worldwide |
| R-67 | 200a | Free and Reduced Fare Transportation—Avianca—Amending | 1; 1½ |
| R-68 | 200f | Effective Government Orders | Worldwide |
| R-69 | 200g | Government Orders for Free and Reduced Fare or Rate Transportation—Revalidating. | Worldwide |
| R-70 | 200h | Free and Reduced Fare Transportation for Inaugural Flights | 2 |
| R-75 | 281 | Sale of Tickets under Instalment Plans—South America | 1 |
| R-76 | 281a | Sale of Tickets under Instalment Plans—Brazil | 1 |
| R-77 | 281b | Sale of Tickets under Instalment Plans—Argentina, Paraguay, and Uruguay. | 1 |
| R-78 | 281e | Sale of Tickets under Instalment Plans—Chile | 1 |

*Accordingly, it is ordered,* That:

Agreement C.A.B. 18086 as set forth in the above finding paragraph is approved.

Any air carrier party to the agreement, or any interested person, may, within 15 days from the date of service of this order, submit statements in writing containing reasons deemed appropriate, together with supporting data, in support of or in opposition to the Board's action herein. An original and nineteen copies of the statements should be filed with the Board's Docket Section. The Board may, upon consideration of any such statements filed, modify or rescind its action herein by subsequent order.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HAROLD R. SANDERSON,
*Secretary.*

[F.R. Doc. 64-13127; Filed, Dec. 22, 1964; 8:45 a.m.]

[Docket Nos. 6599, etc.; Order E-21596]

## DOMESTIC TRUNKLINE AND LOCAL-SERVICE CARRIER

### Service Mail Rates; Order To Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C., on the 17th day of December 1964.

Domestic trunkline and local-service carrier, service mail rates; Dockets 6599 et al., Docket 7251.

By Order E-21514, issued November 19, 1964, new service mail rates were established for the international transatlantic services of Pan American World Airways, Inc., Seaboard World Airlines, Inc., and Trans World Airlines, Inc., and for the transpacific services of Pan American World Airways, Inc., and Northwest Airlines, Inc. That order contained a provision authorizing those carriers to equalize their rates (1) between Post Office Department international exchange offices and the points to which such offices are authorized to dispatch mail and (2) between foreign points. Such equalization may involve the participation of a carrier which receives its mail compensation under the domestic multielement service mail rate formula (21 C.A.B. 8, E-9284, June 7, 1955, and 21 C.A.B. 894, E-9630, October 7, 1955), which for the most part does not authorize equalization of rates for services other than those between domestic points.

Amendment of the domestic multielement service mail rate formula will therefore be necessary in order to bring it into line with the equalization concepts adopted and expressed in the new transatlantic and transpacific rates. In order that there shall be no confusion in the application of the new equalization provisions, we will use the show cause procedure in accomplishing such amendment.

The Board proposes to issue an order amending Order E-9284, June 7, 1955, as amended, and Order E-9630, October 7, 1955, as amended, by adding the following paragraph after section B.4(e) of the respective orders:

(f) Effective December 16, 1964, the provisions of Order E-21514, November 19, 1964, relating to equalization of rates, notice of election to equalize rates, division of equalized rates, and divisions of equalized rates prescribed by the Board shall also be applicable to carriers which provide domestic services pursuant to the mail rate formula established by Orders E-9284 and E-9630, as amended, for purposes of equalizing rates between any point where a United States Post Office Department international exchange office is located[1] and any other point to which such international exchange office is authorized to dispatch air mail.

Accordingly, pursuant to the Federal Aviation Act of 1958 and particularly sections 204(a) and 406 thereof, and pursuant to the regulations promulgated in 14 CFR Part 302: *It is ordered,* That:

1. All interested persons are directed to show cause why the Board should not adopt an order in the form proposed above to be effective on and after the date of the final order herein.

2. Further procedures herein shall be in accordance with 14 CFR Part 302; and, if there is any objection to issuance of an order in the form proposed above, notice of objection shall be filed within seven days, and, if notice is filed, written answer and supporting documents shall be filed within 15 days, after the date of service of this order.

3. If notice of objection or answer is not filed, as specified in 14 CFR Part 302 and this order, all persons shall be deemed to have waived further procedural steps herein before issuance of an order in the form proposed above.

4. If any answer is filed presenting issues for hearing, the issues involved thereafter shall be limited to those specifically raised by the answer, except insofar as other issues are raised in accordance with 14 CFR 302.307.

5. This order shall be served upon all trunkline and local service air carriers and the Postmaster General.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

[SEAL] HAROLD R. SANDERSON,
*Secretary.*

[F.R. Doc. 64-13129; Filed, Dec. 22, 1964; 8:45 a.m.]

[1] International exchange offices currently authorized to dispatch mail for the transatlantic area are located in Boston, New York, Washington, Chicago, Miami, San Francisco, Los Angeles, Seattle, and San Juan. Such offices for the transpacific area are currently located in Seattle, Anchorage, San Francisco, Los Angeles, Honolulu, Wake, Guam, Pago Pago, Washington, Chicago, and New York. The terms of this paragraph shall apply to points at which international exchange offices are hereafter established and shall cease to apply to any points at which international exchange offices are discontinued. The Postmaster General will file a notice of such new and discontinued offices in this docket and serve a copy on each carrier subject to this order.

[2] In Order E-15020, the Board conditioned its approval of IATA provisions prohibiting the use of credit cards in settlement of sales of air transportation other than a U.A.T.P. card or member's credit card so as to render such provisions inapplicable to the United States or air transportation. Our approval herein of the Resolution in question (Resolution 019) is predicated on the understanding that the restriction precluding credit card agreements pending Conference action is not intended to and does not apply to sales within the United States or to sales of air transportation as defined by the Act.

# SECURITIES AND EXCHANGE COMMISSION

[File No. 1–3421]

## CONTINENTAL VENDING MACHINE CORP.

### Order Suspending Trading

DECEMBER 17, 1964.

The common stock, 10 cents par value, of Continental Vending Machine Corp., being listed and registered on the American Stock Exchange and having unlisted trading privileges on the Philadelphia-Baltimore-Washington Stock Exchange, and the 6 percent convertible subordinated debentures due September 1, 1976 being listed and registered on the American Stock Exchange, pursuant to provisions of the Securities Exchange Act of 1934; and

It appearing to the Securities and Exchange Commission that the summary suspension of trading in such securities on such Exchanges and otherwise than on a national securities exchange is required in the public interest and for the protection of investors:

*It is ordered,* Pursuant to sections 15 (c) (5) and 19(a) (4) of the Securities Exchange Act of 1934, that trading in such securities on the American Stock Exchange, the Philadelphia-Baltimore-Washington Stock Exchange and otherwise than on a national securities exchange be summarily suspended, this order to be effective for the period December 18, 1964, through December 27, 1964, both dates inclusive.

By the Commission.

[SEAL] ORVAL L. DUBOIS,
*Secretary.*

# FEDERAL MARITIME COMMISSION

## CONTINENTAL-ATLANTIC CORP. AND MEDITERRANEAN TRANSPORT CORP.

### Notice of Agreement Filed for Approval

Notice is hereby given that the following Agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement(s) at the Washington office of the Federal Maritime Commission, 1321 H Street NW., Room 301; or may inspect agreements at the offices of the District Managers, New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments with reference to an agreement including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the comments should indicate that this has been done.

Notice of cancellation of agreement filed by:

Raymond Horgan, Executive Vice President,
Stockard Shipping Co., Inc.,
17 Battery Place,
New York, N.Y. 10004

Agreement 7812–10, between Continental-Atlantic Corp. and Mediterranean Transport Corp., provides for the cancellation of Agreement 7812, as amended, covering the establishment and maintenance of the "Levant Line" joint service, and an arrangement for the sharing on an equal basis of the net revenues, as well as the net losses, resulting from the operation thereof, in the trades between U.S. Atlantic and Gulf ports and Canadian ports, on the one hand, and ports in Portugal, Spain, France, Italy, Yugoslavia, Albania, Greece, Bulgaria, Rumania, Union of Soviet Socialist Republics, Turkey, Cyprus, Lebanon, Israel (Palestine), Suez, United Arab Republics (Egypt and Syria), Libya, Tunisia, Algeria, Morocco, and the various islands in the Mediterranean, ports of the Red Sea and Persian Gulf, India, Pakistan, Ceylon, Burma, Federation of Malaya, Colony of Singapore, the United States of Indonesia, British North Borneo and to also include ports in Mexico, Central America, and the islands in the West Indies, on the other hand.

Dated: December 18, 1964.

By order of the Federal Maritime Commission.

THOMAS LISI,
*Secretary.*

## INTERNATIONAL HOUSEHOLD GOODS RATE AGREEMENT

### Notice of Agreement Filed for Approval

Notice is hereby given that the following Agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement(s) at the Washington office of the Federal Maritime Commission, 1321 H Street NW., room 301; or may inspect agreements at the offices of the District Managers, New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments with reference to an agreement including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, with in 20 days after publication of this notice in the FEDERAL REGISTER. A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter), and the comments should indicate that this has been done.

Notice of agreement filed for approval by:

William J. Lippman, Esq.,
Galland, Kharasch, Calkins & Lippman,
1824 R Street NW.,
Washington, D.C. 20009

Agreement 8470–4 between the member lines of the International Household Goods Rate Agreement has been filed with the Commission for approval to establish a Self-Policing System, pursuant to General Order 7 (46 CFR Part 528) and to modify the Admission, Withdrawal and Expulsion provisions of the basic agreement, pursuant to General Order 9 (46 CFR Part 523).

Dated: December 18, 1964.

By order of the Federal Maritime Commission.

THOMAS LISI,
*Secretary.*

[F.R. Doc. 64–13148; Filed, Dec. 22, 1964; 8:46 a.m.]

## NEW ZEALAND NORTH AMERICAN LINE

### Notice of Agreement Filed for Approval

Notice is hereby given that the following Agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement(s) at the Washington office of the Federal Maritime Commission, 1321 H Street NW., room 301; or may inspect agreements at the offices of the District Managers, New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments with reference to an agreement including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter), and the comments should indicate that this has been done.

Notice of agreement filed for approval by:

Elmer C. Haddy, Esq.,
Kirlim, Campbell & Keating,
One Twenty Broadway,
New York, N.Y. 10005

Agreement 9410 between the Federal New Zealand Line (a joint service under approved Agreement 7786), Allerman & Bucknall Associated Line (a joint service under approved Agreement 7788),

Port and Associated Lines (a joint service under approved Agreement 7791), Shaw, Savill & Albion Co., Ltd. and Blue Star Line Ltd., establishes a new joint service (New Zealand North American Line) from ports in the Dominion of New Zealand and Pacific Islands to all U.S. ports (excluding Pacific Coast, Alaska and Hawaii), Puerto Rico, Virgin Islands, and Panama Canal.

Dated: December 18, 1964.

By order of the Federal Maritime Commission.

THOMAS LISI,
*Secretary.*

[F.R. Doc. 64-13149; Filed, Dec. 22, 1964; 8:46 a.m.]

## PORT OF SEATTLE AND SEA-LAND SERVICE, INC.

### Notice of Agreement Filed for Approval

Notice is hereby given that the following Agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement(s) at the Washington office of the Federal Maritime Commission, 1321 H Street NW., room 301; or may inspect agreements at the offices of the District Managers, New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments with reference to an agreement including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter), and the comments should indicate that this has been done.

Notice of agreement filed for approval by:

Sea-Land Service, Inc.,
Post Office Box 1050,
Elizabeth, N.J.

Agreement No. T-170-2, between the Port of Seattle (Port) and Sea-Land Service, Inc. (Sea-Land), amends the basic agreement which provides for the lease of certain property on Pier 5, Seattle, for the accommodation of Sea-Land's vessels and for operations incidental thereto. The purpose of the modification is to permit Sea-Land to make certain additions to buildings on the leased premises and to provide additional berthing space for the accommodation of barges or vessels operated by Sea-Land. The modification also provides for increases in the annual rental as a result of additions to the facility.

Dated: December 18, 1964.

By order of the Federal Maritime Commission.

THOMAS LISI,
*Secretary.*

[F.R. Doc. 64-13150; Filed, Dec. 22, 1964; 8:46 a.m.]

## SCANDINAVIA BALTIC GREAT LAKES WESTBOUND FREIGHT CONFERENCE

### Notice of Agreement Filed for Approval

Notice is hereby given that the following Agreements have been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement(s) at the Washington office of the Federal Maritime Commission, 1321 H Street NW., room 301; or may inspect agreements at the offices of the District Managers, New York, N.Y., New Orleans, La., and San Francisco, Calif. Comments with reference to an agreement including a request for hearing, if desired, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, within 20 days after publication of this notice in the FEDERAL REGISTER. A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter), and the comments should indicate that this has been done.

Notice of agreement filed for approval by:

Mr. Lars Inge Carlsio, Secretary,
Scandinavia Baltic Great Lakes Westbound Freight Conference,
Packhusplatsen 6,
Gothenburg, Sweden

Agreement 9408 between the Fjell Line Joint Service (No. 7762), Swedish Chicago Line Joint Service (No. 8036), Aktiebolaget Svenska Amerika Linien (Swedish American Line) and Den Norske Amerikalinje A/S (Norwegian America Line), cancels and supersedes the present Scandinavia Baltic Great Lakes Westbound Freight Conference Agreement No. 8360, in the trade westbound from ports in Finland, Sweden, Denmark, Norway, Estonia, Latvia, Lithuania, Poland, and Russian Baltic ports to ports of the Great Lakes of the United States and Canada, the St. Lawrence River, Nova Scotia, Newfoundland, and New Brunswick. The terms of the superseded agreement are modified to the extent that member lines shall not file rates on commodities declared open for cargo loaded and carried in bulk without mark or count with the Governmental Agency charged with the Administration of section 15, Shipping Act of 1916. In addition, provision is made to bring the agreement into conformity with the Admission, Withdrawal and Expulsion provisions of General Order 9 (46 CFR Part 523).

Dated: December 18, 1964.

By order of the Federal Maritime Commission.

THOMAS LISI,
*Secretary.*

# FEDERAL POWER COMMISSION

[Docket Nos. G-6080 etc.]

## SHARPLES AND COMPANY PROPERTIES ET AL.

### Notice of Applications for Certificates, Abandonment of Service and Petitions To Amend Certificates [1]

DECEMBER 16, 1964.

Sharples and Company Properties (Operator), et al., and other applicants listed herein:

Take notice that each of the Applicants listed herein has filed an application or petition pursuant to section 7 of the Natural Gas Act for authorization to sell natural gas in interstate commerce or to abandon service heretofore authorized as described herein, all as more fully described in the respective applications and amendments which are on file with the Commission and open to public inspection.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure (18 CFR 1.8 or 1.10) on or before January 11, 1965.

Take further notice that, pursuant to the authority contained in and subject to the jurisdiction conferred upon the Federal Power Commission by sections 7 and 15 of the Natural Gas Act and the Commission's rules of practice and procedure, a hearing will be held without further notice before the Commission on all applications in which no protest or petition to intervene is filed within the time required herein, if the Commission on its own review of the matter believes that a grant of the certificates or the authorization for the proposed abandonment is required by the public convenience and necessity. Where a protest or petition for leave to intervene is timely filed, or where the Commission on its own motion believes that a formal hearing is required, further notice of such hearing will be duly given.

Under the procedure herein provided for, unless otherwise advised, it will be unnecessary for Applicants to appear or be represented at the hearing.

JOSEPH H. GUTRIDE,
*Secretary.*

[Project No. 2488]

## CENTRAL VERMONT PUBLIC SERVICE CORP.

### Notice of Application for License

DECEMBER 17, 1964.

Public notice is hereby given that application has been filed under the Federal Power Act (16 U.S.C. 791a–825r) by Central Vermont Public Service Corporation (correspondence to: Porter E. Noble, Clerk and General Counsel, 77 Grove Street, Rutland, Vt.) for a license for constructed Project No. 2488, known as the Bradford Plant, located on Waits River, in Orange County, Vt., in Village of Bradford, Vt.

The project consists of: (1) A dam (founded on rock and constructed of large cut stones capped with concrete) approximately 200 feet long, 22 feet wide at the base tapering to four feet at the top, and a maximum height of 70 feet which contains a spillway section, five stanchion sections adjacent to the north abutment, and a concrete structure housing a set of trash racks and head gates adjacent to the south abutment; (2) a 116-foot spillway which is the main portion of the dam; (3) a 6.3-acre reservoir; (4) a steel penstock five feet six inches in diameter extending 128 feet to a surge tank with a diameter of six feet and 80 feet of five-foot diameter penstock between the surge tank and the powerhouse; (5) a powerhouse with stone masonry foundation, concrete floor and brick superstructure equipped with one 600 hp horizontal turbine with two wheels and two draft tubes which drive two generators having a capacity of 180 kw each; (6) a 2,400 volt transmission line to the 44 kv Bradford substation; and (7) appurtenant electrical and mechanical facilities.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10). The last day upon which protests or petitions may be filed is February 2, 1965. The application is on file with the Commission for public inspection.

JOSEPH H. GUTRIDE,
*Secretary.*

[F.R. Doc. 64-13158; Filed, Dec. 22, 1964; 8:46 a.m.]

[Docket No. RP61-8]

## NATURAL GAS PIPELINE COMPANY OF AMERICA

### Notice Fixing Oral Argument

DECEMBER 18, 1964.

Upon consideration of the motion by Natural Gas Pipeline Company of America filed herein for an opportunity to present oral argument;

Notice is given that an oral argument is hereby scheduled to be held at 10:00 a.m., January 12, 1965, in a hearing room of the Federal Power Commission on the reserved issue of the proper treatment of liberalized depreciation in this proceeding;

Any party desiring to participate in the oral argument should notify the Secretary of the Federal Power Commission, Washington, D.C., 20426, on or before December 24, 1964, of the time desired for the presentation of argument.

By direction of the Commission.

JOSEPH H. GUTRIDE,
*Secretary.*

[Project No. 2225]

## PUBLIC UTILITY DISTRICT NO. 1 OF PEND OREILLE COUNTY, WASHINGTON

### Notice of Application for Amendment of License

DECEMBER 17, 1964.

Public notice is hereby given that application has been filed under the Federal Power Act (16 U.S.C. 791a–825r) by Public Utility District No. 1 of Pend Oreille County, Washington (correspondence to: F. R. Jordan, President, PUD No. 1 of Pend Oreille County, Washington, Newport, Washington) for amendment of its license for proposed Project No. 2225 located on Sullivan Lake, Outlet Creek and Sullivan Creek, a tributary of Pend Oreille River, in the vicinity of Metaline Falls, Pend Oreille County, Washington, and affecting lands of the United States within the Kaniksu National Forest.

The application seeks to eliminate from the license the proposed Mill Pond Dam and Reservoir. The proposed elimination is based upon a feasibility study of possible enlargement of the Sullivan Lake Project made by the licensee, pursuant to Article 30 of its license for the project.

Protests or petitions to intervene may be filed with the Federal Power Commission, Washington, D.C., 20426, in accordance with the rules of practice and procedure of the Commission (18 CFR 1.8 or 1.10). The last day upon which protests or petitions may be filed is February 10, 1965. The application is on file with the Commission for public inspection.

JOSEPH H. GUTRIDE,
*Secretary.*

# FEDERAL RESERVE SYSTEM

## WELLS FARGO BANK

### Order Approving Merger of Banks

In the matter of the application of Wells Fargo Bank for approval of merger with Bank of Amador County.

There has come before the Board of Governors, pursuant to the Bank Merger Act of 1960 (12 U.S.C. 1828(c)), an application by Wells Fargo Bank, San Francisco, Calif., a State member bank of the Federal Reserve System, for the Board's prior approval of the merger of that bank and Bank of Amador County, Jackson, Calif., under the charter and title of Wells Fargo Bank. As an incident to the merger, the three offices of Bank of Amador County would become branches of Wells Fargo Bank.

Notice of the proposed merger, in form approved by the Board, has been published pursuant to said Act.

Upon consideration of all relevant material in the light of the factors set forth in said Act, including reports furnished by the Comptroller of the Currency, the Federal Deposit Insurance Corporation, and the Department of Justice on the competitive factors involved in the proposed transaction,

*It is hereby ordered*, for the reasons set forth in the Board's Statement[1] of this date, that said application be and hereby is approved, provided that said merger shall not be consummated (a) within seven calendar days after the date of this Order, or (b) later than three months after said date.

Dated at Washington, D.C., this 16th day of December 1964.

By order of the Board of Governors.[2]

[SEAL] MERRITT SHERMAN,
*Secretary.*

[F.R. Doc. 64-13131; Filed, Dec. 22, 1964; 8:45 a.m.]

[1] Filed as part of the original document. Copies available upon request to the Board of Governors of the Federal Reserve System, Washington, D.C., 20551, or to the Federal Reserve Bank of San Francisco. Dissenting Statement of Governor Robertson also filed as part of the original document and available upon request.

[2] Voting for this action: Chairman Martin, and Governors Balderston, Mills, Shepardson, Mitchell, and Daane. Voting against this action: Governor Robertson.

# INTERSTATE COMMERCE COMMISSION

[Notice 712]

## MOTOR CARRIER APPLICATIONS AND CERTAIN OTHER PROCEEDINGS

DECEMBER 18, 1964.

The following publications are governed by the new special rule 1.247 of the Commission's rules of practice, published in the FEDERAL REGISTER, issue of December 3, 1963, which became effective January 1, 1964.

MOTOR CARRIERS OF PROPERTY

No. MC 1801 (Sub-No. 17), filed October 12, 1962. Applicant: FORD VAN LINES, INCORPORATED, 56th and Cornhusker Highway, Lincoln, Nebr. Applicant's attorney: Paul F. Sullivan, 1821 Jefferson Place NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *New dental, church, hospital, household, institutional, library, laboratory, medical, office, physicians, scientific and school appliances, equipment, fixtures, furniture and furnishings; helicopters; organs, pianos, consoles, benches, claviers, speakers, and other musical instruments; vehicle seats; animal cages; antennas, coolers and refrigerators; duplicating and reproducing equipment; vending machines and coin operated amusement devices; voting machines;* all uncrated (except that small parts and pieces accompanying shipments may be packed in a container and attached to individual article of which it is a component part or shipped separately), between points in the United States (except Alaska and Hawaii).

NOTE: Applicant states that nothing here described is intended to duplicate any authority presently held by applicant as a Household Goods Carrier, but only includes those articles which do not properly come within the Commodity description Household Goods as defined by the Commission in 17 M.C.C. 467.

*HEARING:* January 25, 1965, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner Donald R. Sutherland.

No. MC 126772, filed December 1, 1964, Applicant: P. M. BROOKS, JR., INC., High Street Extended, Chestertown, Md. Applicant's attorney: Paul Coyle, 5631 Utah Avenue NW., Washington 15, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry fertilizer and fertilizer materials*, in bulk, in tank vehicles, (1) from Baltimore, Md., to points in Delaware, Maryland, New Jersey, Pennsylvania, Virginia, and West Virginia, and (2) from points in Virginia (except Chesapeake, Va.), to points in North Carolina, and West Virginia.

*HEARING:* January 26, 1965, at the Offices of the Interstate Commerce Commission, Washington, D.C., before Examiner William J. Cave.

APPLICATIONS FOR CERTIFICATES OR PERMITS WHICH ARE TO BE PROCESSED CONCURRENTLY WITH APPLICATIONS UNDER SECTION 5 GOVERNED BY SPECIAL RULE 1.240 TO THE EXTENT APPLICABLE

No. MC 59680 (Sub-No. 142), filed December 7, 1964. Applicant: STRICKLAND TRANSPORTATION CO., INC., Post Office Box 5689, Dallas, Tex. Applicant's attorney: W. T. Brunson, 419 Northwest Sixth Street, Oklahoma City 3, Okla. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, Classes A and B explosives, commodities in bulk, and commodities requiring special equipment), between New Orleans, La., and Shreveport, La.; from New Orleans, La., over U.S. Highway 61 to junction U.S. Highway 190, thence over U.S. Highway 190 to junction U.S. Highway 71, thence over U.S. Highway 71 to Shreveport, La., and return over the same route, serving all points within 10 miles of New Orleans, La., as off-route points, and restricted against traffic originating at, or destined to points more than 10 miles from New Orleans, La., corporate limits and on U.S. Highway 61 on or south of junction of U.S. Highway 190.

NOTE: This is a matter directly related to MC–F 8798, published in FEDERAL REGISTER issue July 8, 1964. Applicant states that the purpose of this application is to convert (subject to the outcome of the MC–F 8798 proceeding) a portion of the irregular-route authority of England Transportation Company, Inc. to regular-route authority. It also proposes to tack the above proposed authority to its presently authorized regular-route authority.

MOTOR CARRIER OF PASSENGER

No. MC 109736 (Sub-No. 21) (CORRECTION), filed November 25, 1964, published FEDERAL REGISTER issue of December 16, 1964, and republished as corrected this issue. Applicant: CAPITOL BUS COMPANY, a corporation, Fourth and Chestnut Streets, Harrisburg, Pa. Applicant's attorney: James E. Wilson, 1111 E Street NW., Washington 4, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage and express and newspapers* in the same vehicle with passengers, between Tamaqua and South Tamaqua, Pa., over U.S. Highway 309, serving all intermediate points.

NOTE: This matter was erroneously published as directly related to MC–F–8745.

APPLICATIONS UNDER SECTIONS 5 AND 210a(b)

The following applications are governed by the Interstate Commerce Commission's Special Rules governing notice of filing of applications by motor carriers of property or passengers under sections 5(a) and 210a(b) of the Interstate Commerce Act and certain other proceedings with respect thereto (49 CFR 1.240).

MOTOR CARRIERS OF PROPERTY

No. MC–F–8968. Authority sought for purchase by JAMES L. BOWMAN, doing business as BOWMAN TRUCKING CO., Post Office Box 6, Stephens City, Va., of the operating rights of R. H. McILWEE, Post Office Box 836, Winchester, Va. Applicants' representative: Eston H. Alt, Post Office Box 81, Winchester, Va. Operating rights sought to be transferred: *Agricultural lime, limestone*, and *fertilizer*, in bulk, as a *common carrier*, over irregular routes, from Alexandria, Va., and points in Clarke, Frederick, Loudoun, and Warren Counties, Va., and Frederick County, Md., to points in Maryland (except Baltimore City and points in Harford County), points in Adams, Franklin, and Fulton Counties, Pa., points in Clarke, Fairfax, Frederick, Fauquier, Prince Williams, Loudoun, Shenandoah, and Warren Counties, Va., and points in Grant, Berkeley, Hampshire, Hardy, Jefferson, Mineral, and Morgan Counties, W. Va. Vendee is authorized to operate as a *common carrier* in Virginia, Maryland, Pennsylvania, West Virginia, Delaware, New Jersey, North Carolina, New York, Ohio, South Carolina, and the District of Columbia. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–8969. Authority sought for control by MIDWEST FREIGHT FORWARDING COMPANY, INC., 3220 South Wolcott Avenue, Chicago, Ill., of CATANIA BROTHERS CARTAGE COMPANY, INC., 539 West 14th Place, Chicago, Ill., and for acquisition by A. E. DeCEANNE and ROSE DeCEANNE, both of 3220 South Wolcott Avenue, Chicago, Ill., of control of CATANIA BROTHERS CARTAGE COMPANY, INC., through the acquisition by MIDWEST FREIGHT FORWARDING COMPANY, INC. Ap-

plicants' attorneys: Axelrod, Goodman & Steiner, 39 South La Salle Street, Chicago, Ill., 60603, and Isadore Goodman, 10 South La Salle Street, Chicago, Ill., 60603. Operating rights sought to be controlled: Under a certificate of registration, in Docket No. MC–120297 Sub-1, covering the transportation of commodities general, as a common carrier, in intrastate commerce, within the state of Illinois. MIDWEST FREIGHT FORWARDING COMPANY, INC., is authorized to operate as a *common carrier* in Connecticut, Illinois, Massachusetts, and New York. Application has been filed for temporary authority under section 210a(b).

NOTE: No. MC–120297 Sub-2 is a matter directly related.

No. MC–F–8970. Authority sought for purchase by R–C MOTOR LINES, INC., Post Office Box 2501, 2500 Laura Street., Jacksonville, Fla., of a portion of the operating rights of BIANCHI MOTOR TRANSPORTATION, INC., 338 Copeland Street, Quincy 69, Mass., and for acquisition by B. S. REID, and GEORGE D. JOYNER, both, also of Jacksonville, Fla., of control of such rights through the purchase. Applicants' attorneys: McCarthy Crenshaw, Post Office Box 1086, 1205 Universal Marion Building, Jacksonville, Fla., John F. Dargin, Jr., 18 Tremont Street, Boston, Mass., and Bowes & Millner, 1060 Broad Street, Newark, N.J. Operating rights sought to be transferred: *General commodities*, except those of unusual value, classes A and B explosives, commodities requiring refrigeration, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, quarry products, artificial stone, quarry machinery, and machinery incidental to the manufacture, preparation for use, or erection of artificial or natural stone, as a *common carrier*, over irregular routes, between New York, N.Y., on the one hand, and, on the other, Providence, R.I., Worcester, Mass., and Boston, Mass., and points within 25 miles of the State House of Boston; *solid fuel*, from Providence, R.I., to Bridgewater, Mass.; *roofing materials*, from East Rutherford, N.J., to Norwood, Mass.; *nails*, from Wareham, Mass., to New York and Albany, N.Y.; and *lumber*, between Middleboro, Mass., on the one hand, and, on the other, Portsmouth, Providence, and Woonsocket, R.I. Vendee is authorized to operate as a *common carrier* in Florida, Maryland, Virginia, South Carolina, Georgia Pennsylvania, North Carolina, New York, Delaware, New Jersey, Alabama, Tennessee and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

No. MC–F–8972. Authority sought for purchase by RENNER'S EXPRESS, INC., 1350 South West Street, Indianapolis, Ind., of the operating rights of EXPRESSWAYS, INC. (JOHN G. REIBER, TRUSTEE), 1418 Anthony Wayne Bank Building, Fort Wayne, Ind., 46802, and for acquisition by L. B. RENNER, also of Indianapolis, Ind., of control of such rights through the purchase. Applicants' attorneys: Robert C. Smith, 512 Illinois Building, Indianapolis 4, Ind., and Donald W. Smith, 511 Fidelity Building, Indianapolis 4, Ind. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier*, over regular routes, between Marshall, Mich., and Lansing, Mich., between Jackson, Mich., and Lansing, Mich., between Coldwater, Mich., and Marshall, Mich., serving all intermediate points. RESTRICTION: The next above authority between Marshall and Tekonsha, Mich., and intermediate points thereto is restricted against any service except on traffic moving to or from other points on the above-specified routes; between Adrian, Mich., and Lansing, Mich., between Tecumseh, Mich., and Adrian, Mich., between Adrian, Mich., and Morenci, Mich., serving no intermediate points, two alternate routes for operating convenience only; *general commodities*, between junction U.S. Highway 27 and Indiana Highway 327, at or near Garrett, Ind., and Jackson, Mich., between Fort Wayne, Ind., and Jonesville, Mich., between Angola, Ind., and Orland, Ind., serving all intermediate points, between Waterloo, Ind., and Corunna, Ind., serving no intermediate points. Vendee is authorized to operate as a *common carrier* in the State of Indiana; and in pending Docket No. MC–57239 Sub-8, seeks a certificate of registration in the State of Indiana. Application has been filed for temporary authority under section 210a(b).

NOTE: No. MC–57239 Sub-9 is a matter directly related.

No. MC–F–8974. Authority sought for purchase by ST. JOHNSBURY TRUCKING COMPANY, INC., 38 Main Street, St. Johnsbury, Vt., of the operating rights and certain property of MONTOURI BROS., INC., 310 Broad Street, Fitchburg, Mass., and for acquisition by HARRY J. ZABARSKY, also of St. Johnsbury, Vt., and MILTON J. ZABARSKY and MAURICE ZABARSKY, both of 40 Erie Street, Cambridge, Mass., of control of such rights and property through the purchase. Applicants' attorneys: Francis E. Barrett, 25 Bryant Avenue, East Milton, Mass., 02186, and Kenneth B. Williams, 111 State Street, Boston, Mass., 02109. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier*, over regular routes, between Boston, Mass., and Bellows Falls, Vt., between Worcester, Mass., and Bellows Falls, Vt., serving all intermediate and certain off-route points; *general commodities*, with exceptions as specified above, over irregular routes, between Fitchburg, Mass., on the one hand, and, on the other, New York, N.Y., Newark, N.J., and points in New Jersey within 15 miles of Newark, and those in Rhode Island and Connecticut. Vendee is authorized to operate as a *common carrier* in Vermont, New Hampshire, Maine, Massachusetts, Connecticut, Rhode Island, New Jersey, New York, Pennsylvania, Maryland, Delaware, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

No. MC–F–8975. Authority sought for purchase by RELIABLE DELIVERY SERVICE, INC., 7701 East Rosecrans Boulevard, Paramount, Calif., of the operating rights and property of L. H. DOWE, doing business as PIONEER TRANSFER CO. OF CALEXICO, 337 Emerson Avenue, Calexico, Calif., and for acquisition by BABE TALSKY, also known as ABE TALSKY, 9610 Cresta Drive, Los Angeles, Calif., GORDON TALSKY, 5835 Natick, Van Nuys, Calif., JACQUELINE RADIS, 2415 Guthrie Court, Los Angeles, Calif., and GOLDIE TALSKY, also of 9610 Cresta Drive, Los Angeles, Calif., of control of such rights and property through the purchase. Applicants' attorneys: Donald Murchison, 211 South Beverly Drive, Beverly Hills, Calif., 90212, and Arthur H. Glanz, 639 South Spring Street, Los Angeles, Calif., 90014. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods, but not excepting commodities in bulk, as a *common carrier*, over irregular routes between points in California within ten miles of Calexico, Calif., including Calexico; *bran, cotton*, and *cotton-seed by-products*, from ports of entry at the boundary of the United States and Mexico near Calexico, Calif., to points in Imperial, San Diego, Riverside, San Bernardino, and Los Angeles Counties, Calif.; *furniture, hides*, and *flour-mill rolls*, from ports of entry at the boundary of the United States and Mexico near Calexico, Calif., to Los Angeles, Los Angeles Harbor, and Long Beach, Calif.; *steel drums, grain bags, cork, fullers earth, chemicals, bale ties and hoops, iron ore, iron shavings, fire brick, culverts, lumber, iron and steel plates, tin cans, machinery, coke, bottles, bagging, pipe, turpentine, fertilizer*, and *pyrites*, from Los Angeles, Los Angeles Harbor and Long Beach, Calif., to Calexico, Calif., and ports of entry at the boundary of the United States and Mexico near Calexico; *cement*, from Riverside and Colton, Calif., to Calexico, Calif., and ports of entry at the boundary of the United States and Mexico near Calexico; *feed, fertilizer, malt beverages*, and *empty malt-beverage containers*, between ports of entry at the boundary of the United States and Mexico near Calexico, Calif., on the one hand, and, on the other, points in Imperial County, Calif.; *honey, flour, lumber, feed, paste, fertilizer, malt beverages*, and *empty malt-beverage containers*, between points at the boundary of the United States and Mexico near Calexico, Calif., on the one hand, and, on the other, points in San Diego County, Calif.; and *cement*, in bulk and in sacks, from Cushenbury, Calif., to ports of entry at or near Calexico, Calif., on the United States-Mexico Boundary line; and in pending Docket No. MC–44837 Sub-4, seeking a certificate of registration, covering the transportation of property as a common carrier in intrastate commerce within the State of California. Vendee is authorized to operate as a *common carrier* in the State of California. Application has been filed for temporary authority under section 210a(b).

No. MC–F–8976. Authority sought for purchase by EAGLE MOTOR LINES, INC., 830 North 33d Street, Birmingham, Ala., of a portion of the operating rights of VICTORY FREIGHT LINES, INC., 214 South 10th, Birmingham, Ala., and for acquisition by F. W. EDWARDS and O. M. COOK, both of 830 North 33d Street, Birmingham, Ala., of control of such rights through the purchase. Applicants' attorney: Donald L. Morris, 2027 City Federal Building, Birmingham, Ala., 35203. Operating rights sought to be transferred: In pending Docket No. MC–99653 Sub-2, seeking a certificate of registration, covering the transportation of building materials, lumber, paints, glass, roofing and tar, machinery, culvert pipe, boilers, and stacks, boiler parts, petroleum products, empty drums and auto parts, as a common carrier, in intrastate commerce, between Birmingham, Ala., on the one hand, and points located within a radius of 130 miles of Birmingham, on the other hand, in truckloads only, minimum 5,000 pounds; and cast iron pipe, iron and steel articles, as described in Alabama Motor Bureau Tariff No. 1 APSC No. 1, and contractors' equipment, between Birmingham, Ala., on the one hand, and, between points located within a radius of 150 miles of Birmingham, on the other hand, in truckloads only, minimum 10,000 pounds. Vendee is authorized to operate as a *common carrier* in Georgia, Mississippi, Tennessee, Alabama, Florida, Louisiana, Texas, Virginia, Arkansas, South Carolina, North Carolina, Iowa, Kansas, Missouri, Illinois, Michigan, Ohio, Wisconsin, Kentucky, and Indiana. Application has been filed for temporary authority under section 210a(b).

No. MC–F–8977. Authority sought for purchase by W. T. BYRNS MOTOR EXPRESS, INC., 646 Coffeen Street, Watertown, N.Y., of a portion of the operating rights of APEX EXPRESS, INC., 455 Seaman Avenue, Perth Amboy, N.J., and for acquisition by LAWRENCE E. SMITH and HELEN E. SMITH, both also of Watertown, N.Y., of control of such rights through the purchase. Applicants' attorneys: Francis E. Barrett, Jr., 182 Forbes Building, Forbes Road, Braintree, Mass., and Maxwell A. Howell, 1511 "K" Street NW., Washington, D.C. Operating rights sought to be transferred: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier*, over regular routes, between Philadelphia, Pa., and certain points in New Jersey, serving all intermediate points, and the off-route point of Pedricktown, N.J.; *general commodities*, excepting, among others, household goods, but not excepting commodities in bulk, between New York, N.Y., and Philadelphia, Pa., serving no intermediate points in Pennsylvania except Philadelphia, and serving the off-route points of Gloucester and Palmyra, N.J. Vendee is authorized to operate as a *common carrier* in New York, New Jersey, Pennsylvania, Massachusetts, Connecticut, Rhode Island, Maryland, Delaware, Illinois, Michigan, Ohio, and the District of Columbia. Application has been filed for temporary authority under section 210a(b).

No. MC–F–8978. Authority sought for control and merger by RYDER TRUCK LINES, INC., 2050 Kings Road, Jacksonville, Fla., of the operating rights and property of RYDER TRUCK LINES OF TENN., INC., Memphis, Tenn., and for acquistion by RYDER SYSTEM, INC., and, in turn by, JAR CORPORATION and TEMCO INDUSTRIES, INC., and, in turn by J. A. RYDER, R. B. RYDER and R. N. REEDY, all of 2701 South Bayshore Drive, Miami, Fla., of control of such rights and property through the transaction. Applicants' attorneys: David G. Macdonald, 1000 16th Street NW., Washington, D.C., and Raymond H. Mathisen, 2701 South Bayshore Drive, Miami 33, Fla. Operating rights sought to be controlled and merged: *General commodities*, excepting, among others, household goods and commodities in bulk, as a *common carrier*, over regular routes, between Corinth, Miss., and Athens, Ala., serving certain intermediate points, between Huntsville, Ala., and Atlanta, Ga., serving certain intermediate and off-route points, between Memphis, Tenn., and junction U.S. Highway 45 and U.S. Highway 72 near Corinth, Miss., serving no intermediate points, from Corinth, Miss., to Iuka, Miss., serving all intermediate points, and the off-route point of Rienzi, Miss.; three alternate routes for operating convenience only; *general commodities*, excepting, among others, household goods, but not excepting commodities in bulk, between Athens, Ala., and Huntsville, Ala., serving all intermediate points, between Sheffield, Ala., and site of aluminum plant near Listerhill, Ala., serving no intermediate points; *general commodities*, excepting, among others, commodities in bulk, but not excepting, household goods, between Corinth, Miss., and Tishomingo, Miss., serving all intermediate points, and the off-route point of Rienzi, Miss., between Corinth, Miss., and Blue Mountain, Miss., serving all intermediate points. RYDER TRUCK LINES, INC., is authorized to operate as a *common carrier* in Alabama, Georgia, South Carolina, North Carolina, Tennessee, Virginia, Texas, Louisiana, Mississippi, and Florida. Application has not been filed for temporary authority under section 210a(b).

No. MC–F–8979. Authority sought for control and merger by RYDER TRUCK LINES, INC., 2050 Kings Road, Jacksonville, Fla., of the operating rights and property of RYDER TANK LINE, INC., Greensboro, N.C., and for acquisition by RYDER SYSTEM, INC., and, in turn by, JAR CORPORATION and TEMCO INDUSTRIES, INC., and, in turn by J. A. RYDER, R. B. RYDER, and R. N. Reedy, all of 2701 South Bayshore Drive, Miami, Fla., of control of such rights and property through the transaction. Applicants' attorneys: David G. Macdonald, 1000 16th Street NW., Washington, D.C., and Raymond H. Mathisen, 2701 South Bayshore Drive, Miami 33, Fla. Operating rights sought to be controlled and merged: Numerous specified commodities, in bulk, in tank vehicles, as a *common carrier*, over irregular routes, from, to, and between specified points in the United States (except Alaska and Hawaii) and the District of Columbia, with certain restrictions, as more specifically described in Docket No. MC–110698 and Subnumbers thereunder. This notice does not purport to be a complete description of all of the operating rights of the carrier involved. The foregoing summary is believed to be sufficient for purposes of public notice regarding the nature and extent of this carrier's operating rights, without stating in full, the entirety thereof. RYDER TRUCK LINES, INC., is authorized to operate as a *common carrier* in Alabama, Georgia, South Carolina, North Carolina, Tennessee, Virginia, Texas, Louisiana, Mississippi, and Florida. Application has not been filed for temporary authority under section 210a(b).

MOTOR CARRIERS OF PASSENGERS

No. MC–F–8973. Authority sought for control by CONNECTICUT LIMOUSINE SERVICE, INC., 1060 State Street, New Haven, Conn., of SHER-WILL CORP., doing business as FAIRFIELD COUNTY AIRPORT SERVICE, 83 Wall Street, Norwalk, Conn., and for acquisition by EDWARD DiLAURO, JR., 855 Prospect Street, Hamden, Conn., of control of SHER-WILL CORP., doing business as FAIRFIELD COUNTY AIRPORT SERVICE, through the acquisition by CONNECTICUT LIMOUSINE SERVICE, INC. Applicants' attorney: Palmer S. McGee, Jr., One Constitution Plaza, Hartford, Conn. Operating rights sought to be controlled: Passengers and their baggage, limited to the transportation of not more than eight passengers in any one vehicle, not including the driver thereof, as a *common carrier*, over regular routes between Danbury, Conn., and La Guardia Field Airport, New York, N.Y., and New York International Airport, Idlewild, N.Y., serving the intermediate points of Wilton, Ridgefield, and Norwalk, Conn.; and in pending Docket No. MC–124732 Sub 5, covering the transportation of passengers and their baggage, and express, mail and newspapers in the same vehicle with passengers, between Danbury, Conn., and La Guardia Airport, New York, N.Y., and New York International Airport, Idlewild, N.Y. CONNECTICUT LIMOUSINE SERVICE, INC. is authorized to operate as a *common carrier* in Connecticut, New York, and New Jersey. Application has been filed for temporary authority under section 210a(b).

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary*.

[Notice No. 718]

## MOTOR CARRIER, BROKER, WATER CARRIER AND FREIGHT FORWARDER APPLICATIONS

DECEMBER 18, 1964.

The following applications are governed by Special Rule 1.247[1] of the Commission's general rules of practice (49 CFR 1.247), published in the FEDERAL REGISTER, issue of December 3, 1963, effective January 1, 1964. These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after date of notice of filing of the application is published in the FEDERAL REGISTER. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with § 1.40 of the general rules of practice which requires that it set forth specifically the grounds upon which it is made and specify with particularity the facts, matters, and things relied upon, but shall not include issues or allegations phrased generally. Protests not in reasonable compliance with the requirements of the rules may be rejected. The original and six (6) copies of the protests shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or applicant if no representative is named. If the protest includes a request for oral hearing, such request shall meet the requirements of § 1.247(d)(4) of the special rule. Subsequent assignment of these proceedings for oral hearing, if any, will be by Commission order which will be served on each party of record.

No. MC 409 (Sub-No. 16), filed December 1, 1964. Applicant: O. E. POULSON, INC., Elm Creek, Nebr. Applicant's attorney: J. Max Harding, Box 2028, Lincoln, Nebr., 68501. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Anhydrous ammonia* and *fertilizer solutions* in bulk, in tank vehicles, and *dry fertilizer* in bulk, from the plant site of Cominco Products, Inc. located at or near Hoag, Nebr., to points in Iowa, Kansas, South Dakota, Minnesota, Missouri, and Illinois, and *damaged or rejected shipments* of same commodities, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 1124 (Sub-No. 201), filed December 4, 1964. Applicant: HERRIN TRANSPORTATION COMPANY, a corporation, 2301 McKinney Avenue, Houston, Tex. Applicant's attorney: Leroy Hallman, First National Bank Building, Dallas 2, Tex. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, household goods as defined by the Commission, and commodities in bulk) between Jasper, Tex., and Leesville, La.: From Jasper over Texas Highway 63 to the Texas-Louisiana State line, thence over Louisiana Highway 8 to Leesville, and return over the same route, serving no intermediate points as an alternate route for operating convenience only in connection with applicant's authorized regular route operations between Dallas, Tex., and Leesville, La.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New Orleans, La., or Dallas, Tex.

No. MC 2202 (Sub-No. 273), filed December 7, 1964. Applicant: ROADWAY EXPRESS, INC., 1077 Gorge Boulevard, Post Office Box 471, Akron, Ohio, 44309. Applicant's attorney: William O. Turney, 2001 Massachusetts Avenue NW., Washington, D.C., 20036. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) between Montgomery, Ala., and Baton Rouge, La.; from Montgomery, Ala., over U.S. Highway 31 to junction U.S. Highway 29, thence over U.S. Highway 29 to Pensacola, Fla., thence over U.S. Highway 90 to New Orleans, La., thence over U.S. Highway 61 to Baton Rouge, La., and return over the same route, serving all intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New Orleans, La.

No. MC 8768 (Sub-No. 29), filed December 8, 1964. Applicant: SECURITY VAN LINES, INC., 100 West Airline Highway, Kenner (New Orleans), La. Applicant's attorney: W. T. Croft, Federal Bar Building, 1815 H Street NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission, between points in Louisiana.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New Orleans, La.

No. MC 10297 (Sub-No. 19), filed December 1, 1964. Applicant: CAPITOL MOTOR TRANSPORTATION CO., INC., 69 Norman Street, Everett, Mass. Applicant's representative: Bert Collins, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wallboard and pulpboard, and incidental materials and supplies* used in or in connection with the installation thereof, when moving in the same vehicle therewith, from Lisbon Falls, Maine, to points in Pennsylvania, and *returned, rejected and damaged shipments*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 16682 (Sub-No. 66), filed December 3, 1964. Applicant: MURAL TRANSPORT, INC., 2900 Review Avenue, Long Island City, N.Y. Applicant's attorney: S. S. Eisen, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Store and office fixtures and equipment, and new furniture, and returned, rejected and damaged shipments*, between Flemington, N.J., on the one hand, and, on the other, points in Delaware, New York, Pennsylvania, Maryland, Ohio, Virginia, and the District of Columbia.

NOTE: Applicant states that no duplicating authority is sought. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 21170 (Sub-No. 60), filed December 7, 1964. Applicant: BOS LINES, INC., 408 South 12th Avenue, Marshalltown, Iowa. Applicant's attorney: Jack H. Blanshan, 402 West Main Street, Marshalltown, Iowa, 50158. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods* and *potato products*, frozen or other than frozen, from points in Montcalm County, Mich., to points in Illinois, Wisconsin, Minnesota, Iowa, Missouri, Kansas, Nebraska, and Colorado.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 21170 (Sub-No. 61), filed December 7, 1964. Applicant: BOS LINES, INC., 408 South 12th Avenue, Marshalltown, Iowa. Applicant's attorney: Jack H. Blanshan, 402 West Main Street, Marshalltown, Iowa, 50158. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen foods and potato products, frozen or other than frozen* from points in Montcalm County, Mich., to points in Indiana, Ohio, West Virginia, Virginia, District of Columbia, Delaware, Maryland, New Jersey, Pennsylvania, New York, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, and Maine.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 25828 (Sub-No. 2), filed December 7, 1964. Applicant: THOMAS R. TRAVERS, doing business as WESTERN VAN & STORAGE COMPANY, 1055 Harrison Street, Berkeley 10, Calif. Applicant's attorney: Marvin Handler, 625 Market Street, San Francisco, Calif. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Used household goods*, as defined by the Commission in 17 M.C.C. 467, between points in Alameda, Contra Costa, Marin, Napa, San Francisco, San Mateo, Santa Clara, Solano, and Sonoma Counties, Calif.

NOTE: If a hearing is deemed necessary, applicant requests it be held at San Francisco, Calif.

No. MC 25869 (Sub-No. 27), filed December 7, 1964. Applicant: NOLTE BROS. TRUCK LINE, INC., Post Office Box 184, South Omaha Station, 2509 Q Street, South Omaha, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, and except dangerous explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), serving the plant site of Bethlehem Steel Company Burns Harbor plant located in Porter County, Ind., as an off-route point in connection with applicant's authorized regular route operations to and from Chicago, Ill.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 31600 (Sub-No. 577), filed December 4, 1964. Applicant: P. B. MUTRIE MOTOR TRANSPORTATION, INC., Calvary Street, Waltham, Mass., 02154. Applicant's attorney: Harry C. Ames, Jr., Transportation Building, Washington, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry silica gel desiccant*, in bulk, in pneumatic tank vehicles, from Paulsboro, N.J., to points in Illinois, Indiana, Iowa, Kentucky, Michigan, Mississippi, New York, Ohio, Pennsylvania, and West Virginia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 32882 (Sub-No. 29), filed December 3, 1964. Applicant: MITCHELL BROS. TRUCK LINES, a corporation, 2300 NW. 30th Avenue, Portland, Oreg. Applicant's attorney: Norman E. Sutherland, 1200 Jackson Tower, Portland, Oreg., 97205. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wood chips*, from points in Del Norte County, Calif., to Brookings, Oreg.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Portland, Oreg.

No. MC 35334 (Sub-No. 57), filed November 25, 1964. Applicant: COOPER-JARRETT, INC., 23 South Essex Avenue, Orange, N.J. Applicant's attorney: Harris J. Klein, 280 Broadway, New York 7, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving Plymouth Township, Pa., as an off-route point in connection with applicant's authorized regular route operations to and from Philadelphia, Pa.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 35334 (Sub-No. 58), filed November 25, 1964. Applicant: COOPER-JARRETT, INC., 23 South Essex Avenue, Orange, N.J. Applicant's attorney: Harris J. Klein, 280 Broadway, New York, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Nonferrous metal scrap*, in bulk, not requiring special equipment, serving the plant site of the Chase Brass & Copper Co., Jefferson Township, Williams County, Ohio, as an off-route point in connection with applicant's authorized regular-route operations to and from Cleveland, Ohio.

NOTE: If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 35469 (Sub-No. 27), filed December 7, 1964. Applicant: MODERN TRANSFER CO., INC., 1300 Hanover Avenue, Allentown, Pa. Applicant's attorney: Carl L. Steiner, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, and *equipment and supplies*, used or useful in the production and distribution of such articles, between the site of the Bethlehem Steel Company, Burns Harbor plant located in Porter County, Ind., on the one hand, and, on the other, points in Illinois, Iowa, Michigan, Minnesota, Ohio, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Indianapolis, Ind.

No. MC 35484 (Sub-No. 58), filed December 4, 1964. Applicant: VIKING FREIGHT COMPANY, a corporation, 614 South 6th Street, St. Louis, Mo., 63102. Applicant's attorney: Harold D. Miller, Jr., Suite 700 Petroleum Building, Post Office Box 1250, Jackson, Miss., 39205. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving Yazoo City, Miss., as an intermediate point in connection with applicant's authorized regular-route operations between Jackson, Miss., and Greenville, Miss.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Jackson, Miss.

No. MC 38320 (Sub-No. 11), filed December 7, 1964. Applicant: CENTRAL MOTOR EXPRESS, INC., Post Office Box 216, Campbellsville, Ky. Applicant's attorney: Robert M. Pearce, 221 St. Clair, Frankfort, Ky. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Greensburg, Ky. and Nashville, Tenn., from Greensburg over U.S. Highway 68 to Glasgow, Ky., thence over U.S. Highway 31E to Nashville, Tenn., and return over the same route serving no intermediate points and (2) between Columbia, and Edmonton, Ky., from Columbia over Kentucky Highway 80 to Edmonton serving no intermediate points and serving Edmonton for purposes of joinder only.

NOTE: Applicant states it proposes to tack the authority sought with present authority so as to render through service between points sought and present points authorized. If a hearing is deemed necessary, applicant requests it be held at Bowling Green, Ky.

No. MC 41309 (Sub-No. 26), filed December 7, 1964. Applicant: JEFERIES-EAVES, INC., 333 Osuna Road NW., Albuquerque, N. Mex. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Aluminum pipe or tubing, culvert, and accessories and parts thereof*, in truckload lots, on ordinary flat-bed-trailers, from the plant site of Kaiser Aluminum and Chemical Sales, Inc. located near Gallup, N. Mex., to points in Arizona, Utah, Colorado, and points in Texas on and north of U.S. Highway 180 and on and west of U.S. Highway 83, and *rejected shipments*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Albuquerque, N. Mex.

No. MC 43654 (Sub-No. 59), filed December 7, 1964. Applicant: DIXIE OHIO EXPRESS, INC., 237 Fountain Street, Post Office Box 750, Akron 9, Ohio. Applicant's attorney: Harry McChesney, Jr., 711 McClure Building, Frankfort, Ky., 40601. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except perishables, livestock, petroleum and its products in tank trucks, coal, sand, gravel, grain, household goods as defined by the Commission, Classes A and B explosives, and those requiring special equipment), serving Lordstown, Ohio, an unincorporated town at the junction of Ohio Highway 45 and Saltsprings Road in Lordstown Township, Trumbull County, Ohio, and points within the commercial zone (2½ air miles of said road junction) of Lordstown, as intermediate or off-route points in connection with carrier's authorized regular-route operations.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Detroit, Mich.

No. MC 51104 (Sub-No. 3), filed December 7, 1964. Applicant: G. F. KIESEL (GEORGE F. KIESEL, JR. AND ROBERT S. KIESEL, ADMINISTRATORS), doing business as PARAMOUNT HAULING, 1936 South Vandeventer, St. Louis 10, Mo. Applicant's attorney: Ernest A Brooks II, 1301–02 Ambassador Building, St. Louis, Mo., 63101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry fertilizer*, in bulk, between points in that part of Illinois on and south of U.S. Highway 136, on the one hand, and, on the other, points in Missouri.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 51510 (Sub-No. 1), filed December 9, 1964. Applicant: R. T. SKEWES FREIGHT LINES, INC., 1501 East Chicago Avenue, East Chicago, Ind. Applicant's attorney: Robert C. Smith, 512 Illinois Building, Indianapolis 4, Ind. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Iron and steel articles*, from the site of the Bethlehem Steel Company, Burns Harbor plant, located in Porter County, Ind., to points in In-

[1] Copies of Special Rule 1.247 can be obtained by writing to the Secretary, Interstate Commerce Commission, Washington, D.C., 20423.

diana, and *damaged or rejected shipments*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill., or Indianapolis, Ind.

No. MC 52574 (Sub-No. 15), filed December 8, 1964. Applicant: ELIZABETH FREIGHT FORWARDING CORP., 120 South 20th Street, Irvington, N.J. Applicant's attorney: August W. Heckman, 297 Academy Street, Jersey City, N.J., 07306. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Bakery products and containers therefor*, (1) from Newark, N.J., to Middle Island, Bay Shore and Huntington, N.Y., and (2) from Newark, N.J., and Bronx, N.Y., to Wethersfield and Hartford, Conn., under continuing contract or contracts with Ward Baking Co.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Newark, N.J.

No. MC 52953 (Sub-No. 29), filed December 7, 1964. Applicant: ET&WNC TRANSPORTATION COMPANY, a corporation, 132 Legion Street, Johnson City, Tenn. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods, as defined by the Commission, commodities in bulk, commodities requiring special equipment and those injurious or contaminating to other lading) between Athens and Etowah, Tenn., (1) from Athens over Tennessee Highway 30 to Etowah and return over the same route serving all intermediate points and (2) from Athens over Tennessee Highway 30 to junction Tennessee Highway 39, thence over Tennessee Highway 39 to junction U.S. Highway 411, thence over U.S. Highway 411 to Etowah and return over the same route serving all intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chattanooga, Tenn.

No. MC 55236 (Sub-No. 100), filed December 7, 1964. Applicant: OLSON TRANSPORTATION COMPANY, a corporation, 1970 South Broadway, Green Bay, Wis. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Inedible tallow and grease*, in bulk, in tank vehicles, from Green Bay, Wis., to points in Illinois, Indiana (except those points within that area bounded by a line drawn from Zion, Ill., to Grays Lake, Ill., thence southeast to Libertyville, Ill., thence southwest through Elgin and Sycamore, to De Kalb, Ill., thence southeast through Aurora to Joliet, Ill., thence east through Chicago Heights and Gary, Ind., to Lake Michigan, thence north along the shore of Lake Michigan to a point directly east of Zion, Ill., and thence west to Zion, Ill.), Minnesota, New York, Ohio, Pennsylvania, and Wisconsin.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 57880 (Sub-No. 6), filed December 4, 1964. Applicant: JAMES E. ASHTON, doing business as ASHTON TRUCKING COMPANY, 1201 North Broadway, Monte Vista, Colo. Applicant's attorney: Alvin J. Meiklejohn, Jr., Suite 526 Denham Building, Denver, Colo., 80202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Potato starch*, from Monte Vista, Colo., and points within five (5) miles thereof, to the plantsite of the Texas-Gulf Sulphur Co., located approximately eight (8) airline miles (18 highway miles) southwest of Moab, Utah.

NOTE: Applicant holds contract carrier authority in MC 62538 and Subs, therefore dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 61396 (Sub-No. 117), filed December 3, 1964. Applicant: HERMAN BROS. INC., 2501 North 11th Street, Omaha, Nebr. Applicant's attorney: Donald L. Stern, 924 City National Bank Building, Omaha, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Anhydrous ammonia and fertilizer solutions* in bulk in tank vehicles, from the site of Cominco Products, Inc., located at or near Hoag, Nebr., to points in Illinois, and (2) *dry fertilizer* in bulk and in bags, from the site of Cominco Products, Inc., located at or near Hoag, Nebr., to points in Iowa, Illinois, Kansas, South Dakota, Minnesota, and Missouri, and *returned* and *rejected shipments*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Omaha, Nebr.

No. MC 65271 (Sub-No. 7), filed December 4, 1964. Applicant: LOUIS MAX CO., INC., 192 Water Street, Brooklyn, N.Y. Applicant's attorney: A. David Millner, 1060 Broad Street, Newark, N.J. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Department store merchandise, and returned, unsold and damaged department store merchandise*, between Long Island City and Manhattan, N.Y., on the one hand, and, on the other, Radnor, Pa.

NOTE: Applicant states the above proposed operations will be restricted to service to be performed under a continuing contract with B. Altman & Co., New York, N.Y. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 65802 (Sub-No. 32), filed December 3, 1964. Applicant: LYNDEN TRANSFER, INC., Post Office Box 433, Lynden, Wash., 98264. Applicant's attorney: James T. Johnson, 609 Norton Building, Seattle, Wash., 98104. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except household goods as defined by the Commission), between Seattle, Wash., on the one hand, and, on the other, points in Alaska.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash.

No. MC 69833 (Sub-No. 74), filed December 10, 1964. Applicant: ASSOCIATED TRUCK LINES, INC., 15 Andre Street SE., Grand Rapids 7, Mich. Applicant's attorney: Walter N. Bieneman, Suite 1700 One Woodward Avenue, Detroit, Mich., 48226. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities requiring special equipment, and those injurious or contaminating to other lading), serving the plantsite of Welsh Industries, Inc., located approximately four (4) miles east of Vassar, Mich., and one and one-eighth miles south of Michigan Highway 38 as an off-route point in connection with applicant's authorized regular-route service at Vassar, Mich.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lansing, Mich.

No. MC 69695 (Sub-No. 9), filed December 7, 1964. Applicant: RAY L. BRANDT TRUCKING CO., a corporation, 460 West Philadelphia Street, York, Pa. Applicant's attorney: John E. Fullerton, 509 North Second Street, Harrisburg, Pa., 17101. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Limestone and limestone products*, from the plantsite of Thomasville Stone and Lime Company, Thomasville, Pa., to points in New York New Jersey, Ohio, Virginia, West Virginia, Maryland, Delaware, and the District of Columbia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 70451 (Sub-No. 247), filed November 6, 1964. Applicant: WATSON-WILSON TRANSPORTATION SYSTEM, INC., 1910 Harney Street, Omaha, Nebr. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Silver bars*, between Selby, Calif., and Denver, Colo.; (1) from Selby, Calif., over unnumbered highway to junction U.S. Highway 40, thence over U.S. Highway 40 to Denver, Colo., and return over the same route, serving all intermediate points, and (2) from Selby, Calif., over unnumbered highway to junction U.S. Highway 40, thence over U.S. Highway 40 to Oakland, Calif., thence over U.S. Highway 50 to junction U.S. Highway 99, thence over U.S. Highway 99 to junction U.S. Highway 466 at Bakersfield, Calif., thence over U.S. Highway 466 to Barstow, Calif., thence over U.S. Highway 66 to junction U.S. Highway 89, thence over U.S. Highways 89 and 66 to Flagstaff, Ariz., thence over U.S. Highway 89 to junction Arizona Highway 64 (Navajo Trail Route No. 1), thence over Arizona Highway 64 (Navajo Trail Route No. 1) through Tuba City, Kayenta, and Mexican Water, Ariz., to junction Arizona Highway 364, thence over Arizona Highway 364 to the Arizona-New Mexico State line, thence over unnumbered highway to the New Mexico–Colorado State line, thence over Colorado Highway 40 to junction U.S. Highway 666, thence over U.S. Highway 666 to junction U.S. Highway 160 at Cortez, Colo., thence over U.S. Highway 160 to junction U.S. Highway 87, thence over U.S. Highway 87 to Denver, Colo., and return over the same route, serving all intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 76032 (Sub-No. 192), filed December 3, 1964. Applicant: NAVAJO FREIGHT LINES, INC., 1205 South Platte River Drive, Denver, Colo., 80223. Applicant's attorney: O. Russell Jones, 207 Bokum Building, 142 West Palace Avenue, Santa Fe, N. Mex., 87501. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except Classes A and B explosives, those of unusual value, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between Phoenix and Holbrook, Ariz.; from Phoenix over Arizona Highway 87 to junction Arizona Highway 160 at or near Payson, Ariz., thence over Arizona Highway 160 to junction Arizona Highway 277 at or near Heber, Ariz., thence over Arizona Highway 277 to junction Arizona Highway 77 at or near Snowflake, Ariz., thence over Arizona Highway 77 to Holbrook, and return over the same route, serving no intermediate points, as an alternate route for operating convenience only in connection with carrier's authorized regular-route operations.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Phoenix, Ariz.

No. MC 76177 (Sub-No. 298), filed December 8, 1964. Applicant: BAGGETT TRANSPORTATION COMPANY, a corporation, 2 South 32d Street, Birmingham 5, Ala. Applicant's attorney: Harold G. Hernly, 711 14th Street NW., Washington 5, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), from Perry, Iowa, to points in Illinois, Kansas, Missouri, Minnesota, North Dakota, Nebraska, and South Dakota.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa, or Washington, D.C.

No. MC 114045 (Sub-No. 166), filed December 2, 1964. Applicant: TRANSCOLD EXPRESS, INC., Post Office Box 5842, Dallas, Tex. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products and meat byproducts*, as defined in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk, in tank vehicles and hides), from Mason City, Iowa, to points in Connecticut, Delaware, Maine, Maryland, Massachusetts, New Hampshire, New Jersey, New York, Virginia, North Carolina, Pennsylvania, Rhode Island, South Carolina, Vermont, and the District of Columbia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa, or Washington, D.C.

No. MC 114552 (Sub-No. 23) (CORRECTION), filed November 18, 1964, published in FEDERAL REGISTER issue of December 2, 1964, and republished as corrected this issue. Applicant: SENN TRUCKING COMPANY, a corporation,

Post Office Box 333, Newberry, S.C. Applicant's attorney: Frank A. Graham, Jr., 707 Security Federal Building, Columbia, S.C., 29201. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pallets*, and *wood boxes* knocked down, between points in Georgia, on the one hand, and, on the other, points in Alabama, Arkansas, Connecticut, Delaware, District of Columbia, Florida, Illinois, Indiana, Kentucky, Louisiana, Maryland, Massachusetts, Michigan, Mississippi, Missouri, New Jersey, New York, North Carolina, Ohio, Pennsylvania, Rhode Island, South Carolina, Tennessee, Texas, Virginia, West Virginia, and Wisconsin.

NOTE: The purpose of this republication is to remove the comma in the commodity description after the words wood boxes. If a hearing is deemed necessary, applicant requests it be held at Columbia, S.C.

No. MC 114569 (Sub-No. 69), filed November 13, 1964. Applicant: SHAFFER TRUCKING, INC., Elizabethville, Pa. Applicant's attorney: James W. Hagar, Commerce Building, Harrisburg, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Underwear and component parts thereof*, and *accessories therefor*, and *material, supplies, machinery and machinery parts*, no single piece or package of machinery or machinery parts to weigh more than 2,000 pounds, such machinery and parts, and material and supplies to be used in the manufacture or sale of underwear, between Ephrata, Pa., and Casa Grande, Ariz.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 114789 (Sub-No. 13), filed December 1, 1964. Applicant: NATIONWIDE CARRIERS, INC., 721 Second Street SE., Minneapolis, Minn. Applicant's attorney: William S. Rosen, 400 Minnesota Building, St. Paul, Minn., 55101. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Cheese and cheese products* from Lena and Crivitz, Wis., to Anaheim, Oakland, and San Francisco, Calif., Denver, Colo., Spokane and Seattle, Wash., Portland, Oreg., Albuquerque, N. Mex., Tucson and Phoenix, Ariz., Kansas City, Mo., Wichita, Kans., Salt Lake City, Utah, and Pocatello, Idaho.

NOTE: Applicant is also authorized to conduct operations as a common carrier in Certificate MC 117940 sub 1, therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 115113 (Sub-No. 6), filed December 7, 1964. Applicant: IOWA PACKERS XPRESS, INC., Post Office Box 448, Fort Dodge, Iowa. Applicant's representative: William A. Landau, 1307 East Walnut, Des Moines, Iowa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), from Mason City, Iowa, to points in Connecticut, Delaware, District of Columbia, Maryland, Massachusetts, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, and West Virginia.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Des Moines, Iowa.

No. MC 115117 (Sub-No. 1), filed December 3, 1964. Applicant: SAM GORDON TRUCKING COMPANY, INC., 2440 North Main Street, Warren, Ohio. Applicant's attorney: Taylor C. Burneson, 3430 LeVeque-Lincoln Tower, 50 West Broad Street, Columbus, Ohio, 43215. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General Commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between Niles, Ohio, on the one hand, and, on the other, the sites of the plants of General Motors Corporation located in or near Lordstown Township, Trumbull County, Ohio.

NOTE: Applicant states it proposes to tack the applied-for authority with its existing authority (as specified in Certificate MC 115117) between Niles, Ohio, on the one hand, and, on the other, points in that part of Pennsylvania west of a line beginning at the Pennsylvania-New York State line and extending along U.S. Highway 62 to Tionesta, Pa., thence along unnumbered highway to its junction with Pennsylvania Highway 66, thence along Pennsylvania Highway 66 to Greensburg, Pa., and thence along U.S. Highway 119 to the Pennsylvania-West Virginia State line, including points on the involved portions of the highways specified. If a hearing is deemed necessary, applicant does not specify a place of hearing.

No. MC 115322 (Sub-No. 41), filed December 4, 1964. Applicant: BLYTHE MOTOR LINES, INC., Post Office Box 489, Sanford, Fla. Applicant's attorney: Frank B. Hand, Jr., 921 17th Street NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, from Westfield, and Buffalo, N.Y., and Erie, and North East, Pa., to points in Florida, Georgia, and South Carolina.

NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y., or Washington, D.C.

No. MC 115322 (Sub-No. 42), filed December 4, 1964. Applicant: BLYTHE MOTOR LINES, INC., Post Office Box 489, Sanford, Fla. Applicant's attorney: Frank B. Hand, Jr., 921 17th Street NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foods, food ingredients, and food materials, and related advertising and promotional materials*, from points in Dade and Broward Counties, Fla., to points in South Carolina, North Carolina, Virginia, Delaware, Maryland, Pennsylvania, New Jersey, New York, Connecticut, Maine, Rhode Island, New Hampshire, Vermont, and the District of Columbia.

NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Miami, Fla.

No. MC 115322 (Sub-No. 43), filed December 4, 1964. Applicant: BLYTHE MOTOR LINES, INC., Post Office Box 489, Sanford, Fla. Applicant's attorney: Frank B. Hand, Jr., 921 17th Street NW., Washington 6, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs*, in mixed shipments with frozen foods, from Westfield and Buffalo, N.Y., and Erie and North East, Pa., to points in North Carolina.

NOTE: Applicant states it holds authority to transport fruit juices, fruit concentrates, fruit drinks, fruit crystals, fruit sauces, jams, jellies, preserves, and tomato juice, except canned goods from points in North Carolina, as well as various frozen commodities including frozen fruit juices from Westfield, N.Y., and points within 100 miles thereof in MC 115322 Sub-No. 26 and Sub-No. 32. Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 115818 (Sub-No. 8), filed December 7, 1964. Applicant: WESTBURY TRANSPORT, INC., 397 East 54th Street, East Paterson, N.J. Applicant's attorney: Edward M. Alfano, 2 West 45th Street, New York 36, N.Y. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such merchandise* as is dealt in by retail furniture stores, uncrated and crated, (1) from Jessup, Md., to points in Delaware, Maryland, New Jersey, Pennsylvania, Virginia, and the District of Columbia, and (2) from New Cassel, N.Y., to points in New Jersey and Connecticut, and *returned shipments* of the above-described commodities, from the above-described destination points, to the above-described points of origin. RESTRICTION: The proposed operation shall be limited to a transportation service to be performed under a continuing contract with H. L. Klion, Inc. of East Paterson, N.J.

NOTE: Common control may be involved. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 115826 (Sub-No. 33), filed December 2, 1964. Applicant: W. J. DIGBY, INC., 1960 31st Street, Post Office Box 5088, Terminal Annex, Denver, Colo. Applicant's attorney: Michael T. Corcoran, 1360 Locust Street, Denver, Colo., 80220. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Bananas* and (2) *commodities*, the transportation of which is partially exempt under section 203(b)(6) of the Interstate Commerce Act, when moving in the same vehicle at the same time with bananas, from Los Angeles and San Francisco, Calif., to Boise and Twin Falls, Idaho.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Boise, Idaho.

No. MC 115826 (Sub-No. 34), filed December 2, 1964. Applicant: W. J. DIGBY, INC., 1960 31st Street, Denver, Colo. Applicant's attorney: Michael T. Corcoran, 1360 Locust Street, Denver, Colo., 80220. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Frozen fruits and canned fruits*, from Delta, Colo., to points in New Mexico, Oklahoma, Texas, Nebraska, Kansas, and Missouri.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 115826 (Sub-No. 35), filed December 2, 1964. Applicant: W. J. DIGBY, INC., 1960 31st Street, Denver, Colo. Applicant's attorney: Michael T. Corcoran, 1360 Locust Street, Denver, Colo., 80220. No. MC 120906 (Sub-No. 3), filed December 9, 1964. Applicant: SPECIAL SERVICE DELIVERY, INC., 828 Prouty Avenue, Toledo, Ohio. Applicant's attorney: Paul F. Beery, 44 East Broad Street, Columbus 15, Ohio. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined in *Practices of Motor Common Carriers of Household Goods*, 17 M.C.C. 467, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading), between Toledo, Ohio, on the one hand, and, on the other, points in Allen, Crawford, Defiance, Erie, Fulton, Hancock, Hardin, Henry, Huron, Lucus, Ottawa, Paulding, Putnam, Sandusky, Seneca, Van Wert, Williams, Wood, and Wyandot Counties, Ohio, and points in Lenawee, Monroe, Wayne, and Washtenaw Counties, Mich., restricted to the transportation of shipments not exceeding 100 pounds in weight and to the delivery of shipments on the same day on which they are received.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Toledo, Ohio.

No. MC 120931 (Sub-No. 2) filed November 16, 1964. Applicant: NORTH TENNESSEE FREIGHT LINE, INC., Post Office Box 12, Portland, Tenn. Applicant's attorney: Walter Harwood, Nashville Bank & Trust Building, Nashville 3, Tenn. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except household goods as defined by the Commission, Classes A and B explosives, and articles requiring special equipment), (1) between Portland, Tenn., and Nashville, Tenn.; (a) from Portland, Tenn., over Tennessee Highway 52 to junction U.S. Highway 31–W, thence over U.S. Highway 31–W to Nashville, Tenn., and return over the same route, serving all intermediate points between Goodlettsville and Portland, Tenn. (but restricted against service at Goodlettsville), (b) from Portland, Tenn., over Tennessee Highway 109 to Gallatin, Tenn., thence over U.S. Highway 31–E to Nashville, Tenn., and return over the same route serving no intermediate points between Gallatin and Nashville, Tenn., including Gallatin, and serving Fountain Head, Tenn., as an off-route point; (2) between junction Tennessee Highway 52 and U.S. Highway 31–W, and Mitchellville, Tenn.; from junction Tennessee Highway 52 and U.S. Highway 31–W, north over U.S. Highway 31–W to junction unnumbered highway near the Tennessee-Kentucky State line, thence east over unnumbered highway to Mitchellville, Tenn., and return over the same route, serving all intermediate points, (3) between junction U.S. Highway 31–W and Tennessee Highway 109, and Portland, Tenn., over Tennessee Highway 109, serving all intermediate points, (4) between junction U.S. Highway 31–W and Tennessee Highway 52, and junction Tennessee Highway 25 and U.S. Highway 31–W; from junction U.S. Highway 31–W and Tennessee Highway 52, west over Tennessee Highway 52 to Orlinda, Tenn., thence south over new unnumbered highway to Cross Plains, Tenn., thence east over Tennessee Highway 25 to junction U.S. Highway 31–W, and return over the same route, serving all intermediate points, (5) between Mitchell, Tenn., and Lexington, Ky.; from Mitchell, Tenn. (approximately one-half mile south of the Tennessee-Kentucky State line), over U.S. Highway 31–W to Elizabethtown, Ky., thence over U.S. Highway 62 to junction U.S. Highway 60, thence over U.S. Highway 60 to Lexington, Ky., and return over the same route, serving Elizabethtown, Ky., and all points on U.S. Highways 62 and 60 between Elizabethtown and Lexington, Ky., as intermediate points, and serving Cave City, Ky., as a point of joinder only, (6) between Cave City, Ky., and Lexington, Ky.; from Cave City, Ky., over Kentucky Highway 70 to junction U.S. Highway 68, thence over U.S. Highway 68 to junction U.S. Highway 127, at or near Harrodsburg, Ky., thence over U.S. Highway 127 to Frankfort, Ky., thence over U.S. Highway 60 to Lexington, Ky., and return over the same route, serving Greensburg, Ky., and all points between Greensburg and Lexington, Ky., as intermediate points, and all points within five miles of Frankfort, Ky., as off-route points, and serving Cave City, Ky., as a point of joinder only, (7) between Danville, Ky., and Bardstown, Ky., over U.S. Highway 150, serving all intermediate points, (8) between Springfield, Ky., and Lebanon, Ky., over Kentucky Highway 55, serving all intermediate points, and (9) between Danville, Ky., and Harrodsburg, Ky., over U.S. Highway 127, serving all intermediate points.

NOTE: Applicant states that it proposes to tack the authority sought in sections (1) through (4) above, to the authority sought in (5) through (9) above, at Mitchell, Tenn., and the authority sought in sections (5) through (9) are to be restricted against service by applicant between points in Kentucky, except applicant does propose to provide service between Elizabethtown, and Lexington, Ky. If a hearing is deemed necessary, applicant requests it be held at Nashville, Tenn., and Frankfort, Ky.

No. MC 123135 (Sub-No. 8), filed December 4, 1964. Applicant: CHARLES BEIL & SONS, INC., Millstadt, Ill. Applicant's attorney: Delmar O. Koebel, Suite 500 Spivey Building, East St. Louis, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Flour, starch* and *whey*, in bags and in bulk, from points in Missouri to Millstadt, Ill., (2) *manufactured and prepared food products*, from Millstadt, Ill., to points in Indiana and Missouri, and (3) *flour*, in bulk, from Chester, Ill., to points in Missouri.

NOTE: If a hearing is deemed necessary, applicant requests it be held at St. Louis, Mo.

No. MC 124230 (Sub-No. 3), filed December 2, 1964. Applicant: C. B. JOHNSON, INC., Post Office Drawer "S," Cortez, Colo. Applicant's attorney: Alvin J. Meiklejohn, Jr., 526 Denham Building, Denver, Colo., 80202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (1) *Ore and concentrates*, (a) between points in San Juan County, Utah, and points in Montrose, Ouray, San Miguel, Hinsdale, Dolores, San Juan, Montezuma, LaPlata, Mesa, Delta, Gunnison, Mineral, and Archuleta Counties, Colo., and (b) from points in San Juan County, Utah, and points in Montrose, Ouray, San Miguel, Hinsdale, Dolores, San Juan, Montezuma, LaPlata, Mesa, Delta, Gunnison, Mineral, and Archuleta Counties, Colo., to El Paso and Amarillo, Tex., Tooele and Midvale, Utah, and Bernalillo and Gallup, N. Mex., (2) *fly-ash*, from Albuquerque and Gallup, N. Mex., to Shiprock, N. Mex., and points within five (5) miles thereof, and (3) *sand, gravel, and aggregates*, between points in Apache County, Ariz., San Juan County, N. Mex., San Juan County, Utah, and Montezuma County, Colo.

NOTE: Applicant states it seeks no duplicating authority. If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 125777 (Sub-No. 40), filed December 2, 1964. Applicant: JACK GRAY TRANSPORT, INC., 3200 Gibson Transfer Road, Hammond, Ind. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Pig iron*, in bulk, in dump vehicles, from Chicago, Ill., to points in Missouri.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No. MC 125777 (Sub-No. 41), filed December 2, 1964. Applicant: JACK GRAY TRANSPORT, INC., 3200 Gibson Transfer Road, Hammond, Ind. Applicant's attorney: David Axelrod, 39 South La Salle Street, Chicago 3, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sand*, in removable containers, from Bridgman, Mich., to South Bend, Ind.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Chicago, Ill.

No MC 126333 (Sub-No. 2), filed December 2, 1964. Applicant: CLIFFORD EARL FARNSWORTH, doing business as FARNSWORTH'S AIR FREIGHT SERVICE, 4765 Barrville Road, Elba, N.Y. Applicant's attorney: William J. Hirsch, 43 Niagara Street, Buffalo, N.Y., 14202. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, commodities in bulk, and those requiring special equipment), restricted to traffic having an immediately prior or immediately subsequent movement by aircraft, (1) between The Great Buffalo International Airport (Erie County), N.Y., Rochester-Monroe County Airport (Monroe County), N.Y., and points in Genesee County, N.Y., and (2) between The Greater Buffalo International Airport (Erie County), N.Y., and Rochester-Monroe County Airport (Monroe County), N.Y., on the one hand, and, on the other, the following airports: Clarence E. Hancock Airport (Onondaga County), Chemung County Airport (Chemung County), Oneida County Airport (Oneida County), Albany County Airport (Albany County), Broome County Airport (Broome County), Tompkins County Airport (Tompkins County), John F. Kennedy International Airport (Nassau and Queens Counties), La Guardia Airport (Queens County), Watertown Airport (Jefferson County), Massena Airport (St. Lawrence County), Jamestown Municipal Airport (Chautauqua County), Olean Municipal Airport (Cattaraugus County), N.Y., and Newark Airport (Essex County), N.J., Bradford-McKean County Airport (McKean County), Pa., and Cleveland-Hopkins Municipal Airport (Cuyahoga County), Ohio.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Buffalo, N.Y.

No. MC 126579 (Sub-No. 2), filed December 9, 1964. Applicant: EDMOND WALLACE, doing business as WALLACE TRUCKING COMPANY, 826 Grove Street SW., Gainesville, Ga. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Soybean meal, alfalfa meal, and meal ground food stuffs (wafer meal)*, (1) from Guntersville, Ala., and Chattanooga, Tenn., to points in Hall and Forsyth Counties, Ga., and (2) from Morrow, Ga., to Guntersville, Ala.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Atlanta, Ga.

No. MC 126626 (AMENDMENT) filed October 2, 1964, published FEDERAL REGISTER issue of November 4, 1964, amended November 12, and December 4, 1964, and republished this issue. Applicant: HAROLD TIMPERLEY, doing business as TIMPERLEY TRUCKING, 607 North 8th, Norfolk, Nebr. Applicant's attorney: George H. Moyer, Jr., Loan Association Building, Madison, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities*, including *anhydrous ammonia*, which requires special equipment, and *commodities in bulk* (but excluding Classes A and B explosives, and household goods, as defined by the Commission), between Madison, Nebr., and points within a 25 mile radius thereof, on the one hand, and, on the other, points in Nebraska, Kansas, Iowa, South Dakota, points in Henry, Whiteside, Carroll, Jo Daviess, Rock Island, Mercer, Pike, Brown, Schuyler, Fulton, Peoria, Stark, Quincy, Hancock, McDonough, Henderson, Warren, and Knox Counties, Ill., Lafayette, Green, Dane, Grant, Iowa, Sauk, Juneau, Monroe, Crawford, Richland, Vernon, La Crosse, Jackson, Trempealeau, Buffalo, Pepin, Eau Claire, Chippewa, Dunn, Pierce, Barron, St. Croix, Polk, Washburn, and Burnett Counties, Wis., Pine, Kanabec, Aitkin, Crow Wing, Cass, Wadena, Otter Tail, Becker, Clay, Chisago, Washington, Dakota, Goodhue, Wabasha, Winona, Houston, Fillmore, Olmstead, Rice, Scott, Hennepin, Ramsey, Anoka, Isanti, Mille Lacs, Morrison, Benton, Sherburne, Wright, Carver, Le Sueur, Dodge, Mower, Freeborn, Steele, Waseca, Faribault, Blue Earth, Nicollet, Sibley, McLeod, Meeker, Stearns, Todd, Kandiyohi, Renville, Brown, Watonwan, Martin, Jackson, Cottonwood, Redwood, Grant, Douglas, Stevens, Pope, Swift, Chippewa, Wilkin, Traverse, Big Stone, Lac Qui Parle, Yellow Medicine, Lincoln, Lyon, Pipestone, Murray, Rock, and Nobles Counties, Minn., Cass, Barnes, Stutsman, Kidder, Burleigh, Morton, Grant, Hettinger, Slope, Bowman, Adams, Sioux, Emmons, Logan, McIntosh, La Moure, Dickey, Ransom, Sargent, and Richland Counties, N. Dak., Weston, Niobrara, Goshen, and Laramie Counties, Wyo., Larimer, Weld, Adams, Denver, Arapahoe, Elbert, Lincoln, Cheyenne, Kiowa, Prowers, Baca, Kit Carson, Yuma, Washington, Phillips, Sedgwick, Logan, and Morgan Counties, Colo., Cimarron, Texas, Beaver, Harper, Woodward, Dewey, Blaine, Canadian, Oklahoma, Lincoln, Creek, Tulsa, Rogers, Mayes, Craig, Ottowa, Woods, Major, Kingfisher, Garfield, Alfalfa, Grant, Logan, Payne, Noble, Kay, Osage, Pawnee, Washington, and Nowata Counties, Okla., and Newton, Jasper, Barton, Vernon, Cedar, St. Clair, Hickory, Camden, Miller, Cole, Callaway, Audrain, Pike, Bates, Henry, Benton, Morgan, Moniteau, Boone, Monroe, Ralls, Cass, Johnson, Pettis, Cooper, Jackson, Lafayette, Saline, Howard, Platte, Clay, Ray, Carroll, Chariton, Randolph, Buchanan, Clinton, Caldwell, Linn, Livingston, Macon, Shelby, Marion, Holt, Andrew, DeKalb, Daviess, Grundy, Sullivan, Adair, Knox, Lewis, Atchison, Nodaway, Gentry, Worth, Harrison, Mercer, Putnam, Schuyler, Scotland, and Clark Counties, Mo.

NOTE: The purpose of this republication is to show that applicant seeks radial authority, rather than nonradial as previously published. The amendment also eliminates the transportation of household goods. If this eliminates any protests filed as a result of the former publication, said protestants

should immediately advise the Commission of its withdrawal. Applicant states that on return trips it proposes to transport farm products, grain, and livestock. If a hearing is deemed necessary, applicant requests it be held at Madison, Nebr.

No. MC 126651 (Sub-No. 1), filed December 7, 1964. Applicant: CARVER TRUCKING, INC., Post Office Box 2101, Houston, Tex. Applicant's attorney: Joe G. Fender, 2033 Norfolk Street, Houston 6, Tex. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Fruitcake*, from Houston, Tex., and New Orleans, La., to points in the United States (except Alaska and Hawaii), and *exempt commodities*, on return.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Houston, Tex.

No. MC 126771, filed December 2, 1964. Applicant: JOHN H. WOLF, doing business as JOHN H. WOLF EXCAVATING & TRUCKING COMPANY, 101 Spring Street, Alton, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Concrete asphalt*, in bulk, *sand, rock, cinders, dirt, coal, cement, ready mix concrete, lumber and heavy equipment* from points in Madison County, Ill., to points in St. Charles and St. Louis Counties, Mo., St. Clair County, Ill., and the city of St. Louis, Mo.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Alton, Ill.

No. MC 126777, filed December 4, 1964. Applicant: EVELYN E. DU BOIS, doing business as BORO TAXI SERVICE, 9 Charleston Street, Wellsboro, Pa. Applicant's attorney: Thomas A. Walrath, 7 Central Avenue, Wellsboro, Pa. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Parcels* not exceeding 250 lbs. in weight, from Wellsboro, Pa., to points in New York.

NOTE: If a hearing is deemed necessary, applicant does not specify place of hearing.

No. MC 126778, filed December 7, 1964. Applicant: PRESGRAVE BROS., INC., 8114 Harvard, Cleveland, Ohio, 44105. Applicant's attorney: Earl N. Merwin, 85 East Gay Street, Columbus 15, Ohio. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Drums, pails, and related materials, and rejected and returned drums, pails, and related materials*, between Cleveland, Ohio, on the one hand, and, on the other, points in Pennsylvania, West Virginia, Kentucky, Michigan, and New York.

NOTE: Applicant states the above proposed operations will be under a continuing contract with Inland Steel Container Company, of Cleveland, Ohio. Applicant is also authorized to conduct operations as a common carrier in Certificate MC 80998, therefore, dual operations may be involved. If a hearing is deemed necessary, applicant requests it be held at Columbus, Ohio.

No. MC 126784, filed December 1, 1964. Applicant: ERVIN ERIKSEN, Mora, Minn. Applicant's representative: Henry A. Archambo, 4005 Wood End Drive, Minneapolis, Minn., 55424. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Ice cream, ice cream products, ice cream containers*, and *cartons*, for Land O'Lakes Creameries, Inc., between Mora, Minn., on the one hand, and, on the other, Grand Forks, N. Dak., and Amery and Whitehall, Wis.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Minneapolis, Minn.

No. MC 126785, filed December 3, 1964. Applicant: LOVINGTON STORAGE COMPANY, a corporation, Box 11, Lovington, N. Mex. Applicant's attorney: H. J. Blanchard, Suite 1706 Great Plains Building, Lubbock, Tex. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dehydrated beet pulp with or without molasses*, in pellet or bulk, from points in Deaf Smith County, Tex., to points in Hidalgo, Grant, Luna, Sierra, Dona Ana, Otero, Eddy, Chaves, Lea, Roosevelt, Lincoln, DeBaca, Curry, Quay, Guadalupe, San Miguel, Socorro, Harding, Mora, Union, and Colfax Counties, N. Mex.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Lubbock, Tex.

No. MC 126786, filed December 2, 1964. Applicant: MARION J. PERRET, doing business as L & M TRANSPORTATION CO., 650 South Galvez Street, New Orleans, La. Applicant's representative: Bert Collins, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Such commodities*, as are manufactured, distributed, or sold by persons engaged in the manufacture of gypsum, gypsum products, building materials, and insulating materials, from New Orleans, La., to points in Louisiana, Arkansas, Texas, Tennessee, Mississippi, and Alabama, and *returned shipments* of the commodities specified above on return.

NOTE: Applicant states that the above service will be performed under contract with Bestwall Gypsum Company of Paoli, Pa. If a hearing is deemed necessary, applicant requests that it be held at Washington, D.C.

No. MC 126790, filed December 8, 1964. Applicant: STEVE TESTA, 46 Beechwood Terrace, Matawan, N.J. Applicant's representative: Bert Collins, 140 Cedar Street, New York 6, N.Y. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Agricultural insecticides and fungicides*, in containers between Robbinsville, N.J., on the one hand, and, on the other, points in Hudson and Essex Counties, N.J., Westchester, Nassau, and Suffolk Counties, N.Y., and New York, N.Y.

NOTE: Applicant states the proposed operations will be under contract with Agrisec Chemical Corp. and/or its affiliates. If a hearing is deemed necessary, applicant requests it be held at New York, N.Y.

No. MC 126791, filed December 9, 1964. Applicant: RICHARD E. PAGANO, doing business as BEAR TRANSFER & STORAGE, 1855 East Avenue, Sand City, Calif. Applicant's attorney: Alan F. Wohlstetter, 1 Farragut Square South, Washington, D.C., 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Household goods*, as defined by the Commission (a) between points in Santa Barbara, San Luis Obispo, Monterey, San Benito, and Santa Cruz Counties, Calif., restricted to shipments having a prior or subsequent movement beyond said counties, and (b) from points in Santa Barbara, San Luis Obispo, Monterey, San Benito, and Santa Cruz Counties, Calif., to points in the Port of San Francisco, Calif., and further restricted to pickup and delivery service incidental to and in connection with packing, crating, and containerization or unpacking, uncrating and decontainerization of such shipments.

NOTE: If a hearing is deemed necessary, applicant requests it be held at San Francisco, Calif.

MOTOR CARRIERS OF PASSENGERS

No. MC 61016 (Sub-No. 21), filed December 4, 1964. Applicant: PETER PAN BUS LINES, INC., 144 Bridge Street, Springfield, Mass. Applicant's attorney: Frank Daniels, 11 Beacon Street, Boston, Mass. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special operations consisting of round-trip conducted, sightseeing and pleasure tours, beginning and ending at points in Hampden, and Hampshire Counties, Mass., and extending to points in the continental United States.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Springfield, Mass.

No. MC 95127 (Sub-No. 3), filed December 2, 1964. Applicant: HOWARD MOUNTAIN LINE, INC., 833 Empire Boulevard, Brooklyn, N.Y. Applicant's attorney: Robert E. Goldstein, 24 West 40th Street, New York 18, N.Y. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Passengers and their baggage*, in special operations, in nonscheduled, door-to-door service, limited to the transportation of not more than eight (8) passengers in any one vehicle, but not including the driver thereof and not including children under ten (10) years of age who do not occupy a seat or seats, between New York, N.Y., on the one hand, and, on the other, points in Liberty, Thompson, and Fallsburg Townships, Sullivan County, and Wawarsing Township, Ulster County, N.Y.

NOTE: Applicant states by this application it seeks to amend its Certificate MC 95127 to read "8 passengers in any one vehicle" rather than "6 passengers in any one vehicle", and to eliminate the seasonal restriction contained in the present certificate. If a hearing is deemed necessary, applicant requests it be held at New York City, N.Y.

No. MC 100853 (Sub-No. 8), filed November 30, 1964. Applicant: W. HOWARD PINKETT, 517 Gay Street, Denton, Md. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, between Atlanta, Del., and Federalsburg, Md.; from Atlanta over Delaware Highway 30 to junction Delaware Highway 561, thence over Delaware Highway 561 to junction Delaware Highway 18, thence over Delaware Highway 18 to junction Delaware Highway 46, thence over Delaware Highway 46 to junction Delaware Highway 516, thence over Delaware Highway 516 to junction Delaware Highway 20, thence over Delaware Highway 20 to junction Delaware Highway 30, thence over Delaware Highway 30 to junction Delaware Highway 18, thence over Delaware Highway 18 to the Delaware-Maryland State line and thence over Maryland Highway 318 to Federalsburg, and return over the same route serving all intermediate points.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Washington, D.C.

No. MC 109736 (Sub-No. 21) (CORRECTION), filed November 25, 1964, published FEDERAL REGISTER issue of December 16, 1964, and republished as corrected this issue. Applicant: CAPITOL BUS COMPANY, a corporation, 4th and Chestnut Streets, Harrisburg, Pa. Applicant's attorney: James E. Wilson, 1111 E Street NW., Washington 4, D.C. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage and express and newspapers* in the same vehicle with passengers, between Tamaqua and South Tamaqua, Pa. over U.S. Highway 309, serving all intermediate points.

NOTE: The purpose of this republication is to show this is a matter *not* directly related to MC-F-8745.

No. MC 115116 (Sub-No. 16), filed December 3, 1964. Applicant: SUBURBAN TRANSIT CORP., 750 Somerset Street, New Brunswick, N.J. Applicant's attorney: Michael J. Marzano, 17 Academy Street, Newark, N.J., 07102. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage, and newspapers and express* in the same vehicle with passengers, (1) between points in Montgomery Township, N.J., as follows: from Belle Mead in Montgomery Township, over U.S. Highway 206 to its junction with Somerset County Highway 518 in Montgomery Township, and return over the same route serving all intermediate points; and (2) between Montgomery Township, N.J., and New Brunswick, N.J., as follows: from Belle Mead in Montgomery Township, over U.S. Highway 206 to its junction with County Highway 514 in Hillsborough Township, N.J., thence over County Highway 514 to New Brunswick, N.J., and return over the same route, serving all intermediate points.

NOTE: Applicant states that it proposes to provide service to and from New York, N.Y., by joining the proposed routes to its presently authorized routes. If a hearing is deemed necessary, applicant requests it be held at Newark, N.J.

No. MC 126783, filed December 7, 1964. Applicant: WILLIAM E. HESSELGRAVE, doing business as PUYALLUP SUMNER STAGES, 1208 Main Street, Sumner, Wash. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage*, and *newspapers, express* and *mail*, in the same vehicle with passengers, (1) between Tacoma, Wash., and Fairfax, Wash.; from Tacoma, Wash., over U.S. Highway 410 to Buckley, Wash., thence over Washington Highway 165 (formerly Washington Highway 5) to junction Washington Highway 162, thence over Washington Highway 162 to South Prairie, Wash., thence return over Washington Highway 162 to junction Washington Highway 165, thence over Washington Highway 165 to junction unnumbered road, thence over unnumbered road to Fairfax, Wash., and return over the same route, serving the intermediate points of Fife, Puyallup, Sumner, Bonney Lake, Buckley, South Prairie, Wilkeson, and Carbonado, Wash., and (2) between Tacoma, Wash., and Orting, Wash.; from Tacoma, Wash., over U.S. Highway 410 to Sumner, Wash., thence over unnumbered road to junction Washington Highway 162, thence over Washington Highway 162 to Orting, Wash., and return over the same route, serving the intermediate points of Fife, Puyallup, and Sumner, Wash.

NOTE: If a hearing is deemed necessary, applicant requests it be held at Seattle, Wash.

APPLICATION FOR BROKERAGE LICENSES

MOTOR CARRIERS OF PASSENGERS

No. MC 12720 (Sub-No. 1), filed December 2, 1964. Applicant: TRAVEL & TOUR SERVICE, INC., 722 North Third Street., Milwaukee, Wis., 53203. Applicant's attorney: William C. Dineen, 412 Empire Building, 710 North Plankinton Avenue, Milwaukee, Wis., 53203. For a license (BMC 5) to engage in operations as a *broker* at Milwaukee, Wis., in arranging for transportation in interstate or foreign commerce of *passengers and their baggage*, in groups and as individuals, in charter or special operations, beginning and ending at points in Illinois, Iowa, Michigan, Minnesota, and Wisconsin, and extending to points in the United States, including Alaska and Hawaii.

No. MC 12935, filed December 3, 1964. Applicant: RAVENEL AGENCY, INC., 67 Broad Street, Charleston, S.C. For a license (BMC 5) to engage in operations as a *broker* at Charleston, S.C., in arranging for transportation in interstate or foreign commerce of *Passengers and their baggage*, in groups, between points in the United States.

APPLICATIONS IN WHICH HANDLING WITHOUT ORAL HEARING HAS BEEN REQUESTED

MOTOR CARRIERS OF PASSENGERS

No. MC 28573 (Sub-No. 26), filed December 3, 1964. Applicant: GREAT NORTHERN RAILWAY COMPANY, a corporation, 175 East Fourth Street, St. Paul 1, Minn. Applicant's attorney: James R. Walker (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Minot, N. Dak, and the site of the United States Air Force Base, located approximately eleven (11) miles north of Minot, N. Dak., restricted to traffic having an immediately prior or subsequent movement by rail.

NOTE: Applicant states this application duplicates the same authority granted it in MC 28573 Sub 11, except that it would delete the condition that the prior or subsequent rail movement between Minot, N. Dak. and the United States Air Force Base be "in so-called piggy-back service."

No. MC 29116 (Sub-No. 14), filed December 2, 1964. Applicant: DIRECT TRANSPORTS, INC., 1400 Kansas Avenue, Kansas City, Kans., 66105. Applicant's representative: Vernon M. Masters (address same as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, commodities requiring special equipment, and those injurious or contaminating to other lading) between Omaha, Nebr. and St. Joseph, Mo., (1) from Omaha over U.S. Highway 275 to Sidney, Iowa, thence over Iowa Highway 2 to Clarinda, Iowa, thence over U.S. Highway 71 to junction Missouri Highway 48, thence over Missouri Highway 48 to junction Missouri County Road M, thence over Missouri County Road M to junction U.S. Highway 169, thence over U.S. Highway 169 to St. Joseph, Mo., and (2) from Omaha, over U.S. Highway 75 to junction Nebraska Highway 2 at Nebraska City, thence over Nebraska Highway 2 across the Missouri River to junction Iowa Highway 2, thence over Iowa Highway 2 to junction U.S. Highway 275, thence over U.S. Highway 275 to junction Iowa Highway 333, thence over Iowa Highway 333 to junction U.S. Highway 59, thence over U.S. Highway 59 to Tarkio, thence over U.S. Highway 136 to junction U.S. Highway 71, thence over U.S. Highway 71 to junction Missouri Highway 48, thence over Missouri Highway 48 to junction Missouri County Road M, thence over Missouri County Road M to junction U.S. Highway 169, thence over U.S. Highway 169 to St. Joseph, Mo. and return over the same routes serving no intermediate points.

NOTE: This application is filed pursuant to MC-C-4366, dated April 21, 1964, served April 28, 1964, which provides the special rules for conversion of irregular-route to regular-route motor carrier operations.

SPECIAL NOTE: Protests to this application may be filed within 45 days instead of 30 days.

No. MC 50069 (Sub-No. 310), filed December 1, 1964. Applicant: REFINERS TRANSPORT & TERMINAL CORPORATION, 111 West Jackson Boulevard, Chicago, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lime* in bulk, in tank or hopper vehicles from Pontiac, Ill. to points in Indiana and Ohio.

No. MC 50069 (Sub-No. 309), filed December 1, 1964. Applicant: REFINERS

TRANSPORT & TERMINAL CORPORATION, 111 West Jackson Boulevard, Chicago, Ill. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Hydrolyzed fats*, in bulk, in tank vehicles, from Chicago, Ill. to Buffalo, N.Y.

No. MC 107107 (Sub-No. 331), filed December 3, 1964. Applicant: ALTERMAN TRANSPORT LINES, INC., Post Office Box 65, Allapattah Station, Miami 42, Fla. Applicant's attorney: Donald L. Stern, 924 City National Bank Building, Omaha 2, Nebr. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat byproducts*, and *articles distributed by meat packinghouses* (except commodities in bulk, in tank vehicles), from Minden, Nebr., and points within five miles thereof, to points in Alabama, Florida, Georgia, North Carolina, South Carolina, and Tennessee (except Memphis and its commercial zone).

No. MC 109478 (Sub-No. 78), filed December 7, 1964. Applicant: WORSTER MOTOR LINES, INC., East Main Road, R.D. 1, North East, Pa. Applicant's attorney: William W. Knox, 23 West Tenth Street, Erie, Pa. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Foodstuffs, and such materials and supplies* as are used in the distribution and sale of such foodstuffs when moving therewith (excluding commodities in bulk, in tank vehicles), from North East, Pa., and Westfield, N.Y., to points in Ohio, Indiana, and Illinois.

No. MC 109637 (Sub-No. 270), filed December 4, 1964. Applicant: SOUTHERN TANK LINES, INC., 4107 Bells Lane, Louisville, Ky., 40211. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Liquid fluorine*, in bulk, in tank vehicles, from Metropolis, Ill., to points in Minnesota.

NOTE: Applicant states it proposes to transport *"empty shipper-owned fluorine trailers* from points in Minnesota to Metropolis, Ill."

No. MC 116347 (Sub-No. 1), filed December 4, 1964. Applicant: PRATT'S TRANSPORTATION INCORPORATED, 1929 Center Avenue NW., Roanoke, Va. Applicant's attorney: Wilmer B. Hill, Transportation Building, Washington, D.C., 20006. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Roanoke and Lynchburg, Va.; (1) from Roanoke over U.S. Highway 460 to Lynchburg, and (2) from Roanoke over U.S. Highway 460 to junction Virginia Highway 297 at Bedford, Va., thence over Virginia Highway 297 to Lynchburg, and return over the same routes, serving the intermediate point of Bedford and serving points in Virginia within 100 miles of Roanoke as off-route points.

NOTE: Applicant holds irregular-route authority between Roanoke and Lynchburg, Va. which it will cancel if and when the regular-route authority is granted. This application is filed pursuant to MC-C-4366, dated April 21, 1964, served April 28, 1964, which provides the special rules for conversion of irregular-route to regular-route motor carrier operations.

SPECIAL NOTE: Protests to this application may be filed within 45 days instead of 30 days.

No. MC 118318 (Sub-No. 6), filed December 7, 1964. Applicant: IDA-CAL FREIGHT LINES, INC., 1798 Floral Avenue, Post Office Box 455, Twin Falls, Idaho. Applicant's attorney: Marvin Handler, 625 Market Street, San Francisco 5, Calif. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, and meat byproducts*, as described in Section A of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766, from Caldwell, Idaho to Reno, Nev.

NOTE: Common control may be involved.

No. MC 126254 (AMENDMENT), filed May 7, 1964, published in FEDERAL REGISTER issue of June 10, 1964, amended December 10, 1964, and republished as amended this issue. Applicant: SAM PARLAPIANO, 1827 East 10th Street, Pueblo, Colo. Applicant's attorney: John H. Lewis, The 1650 Grant Street Building, Denver 3, Colo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Wine* (including but not limited to vermouth, brandy and champagne) *scotch and other whiskey*, in containers, in truck load lots, from Los Angeles, Calif., including Los Angeles Harbor, Ripon, Reedley and Madera, Calif., to Pueblo, Denver and Sterling, Colo., restricted (1) on service from Los Angeles commercial zone or the Los Angeles Harbor commercial zone to partial loading at Ripon, Reedley or Madera, Calif., and (2) all deliveries must be made at the site of the Diodosio Wholesale Liquor Company, Pueblo, Colo., Western Distributing Co., Denver, Colo., or Pomeroy and Pomeroy Distributing Co., at Sterling, Colo.

NOTE: Applicant states that dual operations may be involved. It is respectfully requested that should the authority be granted herein as a common carrier, the authority that might be granted in MC 125269 to the same carrier as a contract carrier be canceled. This is necessary because of the liquor code of California. The purpose of this republication is to add Sterling, Colo., as a destination point. If a hearing is deemed necessary, applicant requests it be held at Denver, Colo.

No. MC 126463, filed August 3, 1964. Applicant: GREER BROS. TRUCKING CO., a corporation, North Main Street, London, Ky. Applicant's attorney: J. Milton Luker, 108 East 4th Street, London, Ky. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: (A) *Stone and gravel:* (1) from the plant sites of Naley and Boone Stone Company, located three miles south of Jellico, Campbell County, Tenn. and Keystone Lime Company, located approximately four miles south of LaFollette, Tenn. to points in Campbell and Anderson Counties, Tenn., and Whitley and Laurel Counties, Ky.; (2) from Somerset Stone Company located at Somerset, Ky., and Strunk Construction Company located at Burnside, Pulaski County, Ky. to points in Scott County, Tenn.; (3) from Middlesboro, Ky. to points in Bell County, Ky. and Claiborne County, Tenn., restricted to shipments having a prior or subsequent movement by railroad, (4) from Barbourville, Knox County, Ky. to points in Knox County, Ky., restricted to shipments having a prior or subsequent movement by railroad, (B) *sand, cement, blacktop* and *asphalt material* restricted to shipments having a prior or subsequent movement by railroad (1) from Williamsburg, Whitley County, Ky. to points in Campbell and Anderson Counties, Tenn., and Whitley County, Ky., (2) from Whitley City, McCreary County, Ky. to points in Scott County, Tenn.; (3) from Middlesboro, Ky. to points in Claiborne County, Tenn., and Bell County, Ky.; (4) from London, Laurel County, Ky. to points in Laurel and Clay Counties, Ky.; (5) from Corbin, Ky. to points in Whitley County, Ky. (C) *Salt* in bulk and in bags in dump or self-unloading type vehicles, between points in Bell, Harlan, Letcher, Perry, Breathitt, Lee, Owsley, Jackson, Rockcastle, Laurel, Clay, Leslie, Knox, Whitley, McCreary, Pulaski, and Wayne Counties, Ky. restricted to shipments having a prior or subsequent movement by railroad.

NOTE: Applicant states it will transport empty containers or other such incidental facilities used in transporting the commodities in A, B, and C above on return.

No. MC 126749 (Sub-No. 1), filed December 3, 1964. Applicant: K. P. MOVING & STORAGE, INC., 1475 South Acoma Street, Denver, Colo. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Live bees*, in hives and *supplies* used by beekeepers, to include *used furniture*, when such supplies are moving on the same vehicle and at the same time with live bees in hives, between points in Texas, Oklahoma, and New Mexico, on the one hand, and, on the other, points in Arkansas, Louisiana, Mississippi, Alabama, Georgia, Florida, California and Arizona.

NOTE: Common control may be involved.

No. MC 126792, filed December 9, 1964. Applicant: BAILEY M. BUSH, doing business as BAILEY M. BUSH TRUCKING, 343 North River Avenue, Weston, W. Va. Applicant's attorney: M. Bruce Morgan, 201 Azar Building, Glen Burnie, Md., 21061. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Sand*, in bulk, in dump vehicles from Berkeley Springs, W. Va., to Clarksburg, W. Va.

MOTOR CARRIERS OF PASSENGERS

No. MC 1515 (Sub-No. 67), filed November 30, 1964. Applicant: GREYHOUND LINES, INC., 140 South Dearborn Street., Chicago, Ill., 60603. Applicant's attorney: W. T. Meinhold, 371 Market Street, San Francisco, Calif., 94106. Authority sought to operate as a *common carrier*, by motor vehicle, over regular routes, transporting: *Passengers and their baggage, and express and newspapers*, in the same vehicle with passengers; *Revision of California Route No. 116 on Certificate Sheet No. 25.* Establish a new regular route of operation over a relocated segment of U.S. Highway 99 between North Selma Junction and South Kingsburg Junction, to be included as a segment of regular Route No. 116, in lieu of the presently authorized segment of route between said termini over former U.S. Highway 99 herein proposed to be revoked, to read as follows: "between San Francisco and Los Angeles: from San Francisco over San Francisco-Oakland Bay Bridge to Oakland, thence over unnumbered highway via San Leandro and Hayward to junction U.S. Highway 50 northeast of Hayward (Hayward Junction), thence over U.S. Highway 50 to junction California Highway 120 (San Joaquin Bridge), thence over California Highway 120 to junction unnumbered highway (Manteca), thence over unnumbered highway to junction U.S. Highway 99 south of Manteca (South Manteca), thence over U.S. Highway 99 to junction Interstate Highway 5 (San Fernando Junction), thence over Interstate Highway 5 to Los Angeles, and return over the same route. Authority is granted to serve all intermediate points and also the points of Malaga, Fowler, Selma, and Kingsburg over available access highways to U.S. Highway 99," subject to the general conditions and orders set forth on First Revised Sheet No. 1A of former Certificate No. 1501 (Sub-No. 138), now assigned No. 1515 (Sub-No. 7).

NOTE: The change in operating authority hereinabove shown and explained is proposed to be incorporated in the designated revised sheet to said Certificate No. MC 1501 (Sub-No. 138), now MC 1515 (Sub-No. 7). Common control may be involved.

No. MC 1515 (Sub-No. 68), filed December 10, 1964. Applicant: GREYHOUND LINES, Inc., 140 South Dearborn Street, Chicago 3, Ill. Applicant's attorney: Robert J. Bernard (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over a regular route, transporting: *Passengers and their baggage, and express and newspapers*, in the same vehicle with passengers, between Hamilton, Ala. and junction New U.S. Highway 78 and Old U.S. Highway 78, approximately 6½ miles east of Tremont, Miss., over New U.S. Highway 78, serving all intermediate points.

NOTE: Common control may be involved.

By the Commission.

[SEAL] HAROLD D. McCOY, *Secretary.*

## MOTOR CARRIER TRANSFER PROCEEDINGS

DECEMBER 18, 1964.

Synopses of orders entered pursuant to section 212(b) of the Interstate Commerce Act, and rules and regulations prescribed thereunder (49 CFR Part 179), appear below:

As provided in the Commission's special rules of practice any interested person may file a petition seeking reconsideration of the following numbered proceedings within 20 days from the date of publication of this notice. Pursuant to section 17(8) of the Interstate Commerce Act, the filing of such a petition will postpone the effective date of the order in that proceeding pending its disposition. The matters relied upon by petitioners must be specified in their petitions with particularity.

No. MC-FC 35393. By order of December 16, 1964, the Transfer Board approved the lease to D. F. Rogers, 3408 Quirt Street, Lubbock, Tex., of the divided portion of SMC Certificate 5134, assigned Certificate No. 22273, on August 25, 1964, for a period extending from July 16, 1964 and expiring July 16, 1967, Certificate of Registration No. MC 37681 Sub 2 having been issued to L. G. Blumentritt, doing business as Iraan Motor Freight Line, Post Office Box 342, Iraan, Tex., on April 24, 1964. The lessee to be authorized to transport specified commodities between all points in Texas and oilfield equipment and pipe when moving as oilfield equipment.

No. MC-FC 67323. By order of December 16, 1964, the Transfer Board approved the transfer to C. W. Bedford of Certificates Nos. MC 2718 and MC 2718 Sub 1, issued November 3, 1939 and October 25, 1943, respectively, in the name of Larry Reicks, Carroll, Iowa, authorizing the transportation of livestock, between Carroll, Iowa, and Omaha, Nebr.; commodities generally, including household goods but excluding commodities in bulk, over the regular route, serving intermediate and off-route points within 10 miles of Carroll; and empty containers, from Carroll, Iowa, to Omaha, Nebr., with service authorized to and from the intermediate and off-route points within 10 miles of Carroll, Iowa. Joseph N. Wittry, East 5th Street, Carroll, Iowa, Representative for applicants.

No. MC-FC 67410. By order of December 16, 1964, the Transfer Board approved the transfer to Duffy Bros., Inc., Columbus, Wis., of the operating rights in Certificate No. MC 53989, issued February 24, 1955, to Thomas Duffy, doing business as Duffy Bros., Columbus, Wis., authorizing the transportation, over irregular routes, of livestock, from Columbus, Wis., and points within 20 miles of Columbus, to Chicago, Ill. Jack W. Van Metre, The Law Building, 159 S. Ludington Street, Columbus, Wisconsin, Attorney for applicants.

No. MC-FC 67419. By order of December 16, 1964, the Transfer Board approved the transfer to Johnson Trucking Service, Inc., Hornbrook, Calif., of the Certificate of Registration in No. MC 99723 Sub 1, issued February 5, 1964, to Thomas B. Watt, Jr., and Walter J. Nelson, doing business as Johnson's Trucking Service, Hornbrook, Calif., authorizing the transportation in interstate and foreign commerce corresponding to the grant of authority in State Certificate No. 61589, issued February 28, 1961, by the Public Utilities Commission of the State of California. Bertram S. Silver, 140 Montgomery Street, San Francisco, Calif., 94104, Attorney for applicants.

No. MC-FC 67426. By order of December 16, 1964, the Transfer Board approved the transfer to James H. Swiney, Jr., doing business as Commercial Hot Shot Service, Vidalia, La., of the operating rights in Certificate No. MC 123752 Sub 1, issued July 25, 1962, to Samuel P. Tiffee, doing business as Tiffee's Light Oil Field Hauling, Natchez, Miss., authorizing the transportation, over irregular routes, of: Machinery, equipment, materials and supplies used in replacing, servicing, and repair of machinery and equipment used in, or in connection with the discovery, development and production of natural gas and petroleum and their products and byproducts, restricted to shipments weighing 1,500 pounds or less each, between points in Adams County, Miss., on the one hand, and, on the other, points in Alabama, Arkansas, and Louisiana. Joseph S. Zuccaro, 133 South Commerce Street, Natchez, Miss., Attorney for applicants.

No. MC-FC 67437. By order of December 16, 1964, the Transfer Board approved the transfer to Ciro Trucking Corp., Brooklyn, N.Y., of the operating rights in Certificate No. MC 18302, issued January 17, 1941, to Beisner Storage Co., Inc., Bronx, N.Y., authorizing the transportation of: Household goods, over irregular routes, between New York, N.Y., on the one hand, and, on the other, points and places in Connecticut, Maryland, Massachusetts, New Jersey, New York, and Pennsylvania, traversing Rhode Island. Morris Honig, 150 Broadway, New York, N.Y., 10038, Attorney for applicants.

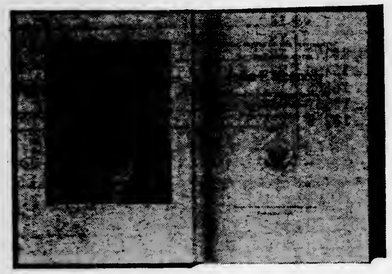
FEDERAL REGISTER

Area Code 202 Phone 963-3261

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration (mail address National Archives Building, Washington, D.C. 20408), pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.



The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

*Latest Edition in the series of . . .*

**PUBLIC PAPERS OF THE PRESIDENTS OF THE UNITED STATES**

*1007 Pages Price: $9.00*

## *John F. Kennedy, 1963*

Contains verbatim transcripts of the President's news conferences and speeches and full texts of messages to Congress and other materials released by the White House during the period January 1–November 22, 1963.

Among the 478 items in the book are: special messages to the Congress on education, youth conservation, needs of the Nation's senior citizens, and on improving the Nation's health; radio and television addresses to the American people on civil rights and on the nuclear test ban treaty and the tax reduction bill; joint statements with leaders of foreign governments; and the President's final remarks at the breakfast of the Fort Worth Chamber of Commerce. Also included is the text of two addresses which the President had planned to deliver on the day of his assassination; President Johnson's proclamation designating November 25 a national day of mourning; and remarks at the White House ceremony in which President Kennedy was posthumously awarded the Presidential Medal of Freedom.

A valuable reference source for scholars, reporters of current affairs and the events of history, historians, librarians, and Government officials.

VOLUMES *of* PUBLIC PAPERS *of the* PRESIDENTS
*currently available:*

HARRY S. TRUMAN

1945 ---------- $5.50

# Codification Guide

The following numerical guide is a list of the parts of each title of the Code of Federal Regulations affected by documents published in today's issue. A cumulative list of parts affected, covering the current month to date, appears at the end of each issue beginning with the second issue of the month.

A cumulative guide is published separately at the end of each month. The guide lists the parts and sections affected by documents published since January 1, 1964, and specifies how they are affected.

Compiled by Office of the Federal Register, National Archives and Records Service, General Services Administration

Order from Superintendent of Documents, United States Government Printing Office, Washington, D.C. 20402

FEDERAL REGISTER
Area Code 202 Phone 963–3261

Published daily, Tuesday through Saturday (no publication on Sundays, Mondays, or on the day after an official Federal holiday), by the Office of the Federal Register, National Archives and Records Service, General Services Administration (mail address National Archives Building, Washington, D.C. 20408), pursuant to the authority contained in the Federal Register Act, approved July 26, 1935 (49 Stat. 500, as amended; 44 U.S.C., ch. 8B), under regulations prescribed by the Administrative Committee of the Federal Register, approved by the President (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $1.50 per month or $15.00 per year, payable in advance. The charge for individual copies (minimum 15 cents) varies in proportion to the size of the issue. Remit check or money order, made payable to the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402.

The regulatory material appearing herein is keyed to the CODE OF FEDERAL REGULATIONS, which is published, under 50 titles, pursuant to section 11 of the Federal Register Act, as amended. The CODE OF FEDERAL REGULATIONS is sold by the Superintendent of Documents. Prices of books and pocket supplements are listed in the first FEDERAL REGISTER issue of each month.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER or the CODE OF FEDERAL REGULATIONS.

# Rules and Regulations

## Title 9—ANIMALS AND ANIMAL PRODUCTS

### Chapter I—Agricultural Research Service, Department of Agriculture

SUBCHAPTER D—EXPORTATION AND IMPORTATION OF ANIMALS AND ANIMAL PRODUCTS

### PART 92—IMPORTATION OF CERTAIN ANIMALS AND POULTRY AND CERTAIN ANIMAL AND POULTRY PRODUCTS

#### Importation of Animal Semen

On May 29, 1964, there was published in the FEDERAL REGISTER (29 F.R. 7122) a notice of proposed amendments to Part 92, Title 9, Code of Federal Regulations, with respect to the importation of animal semen. Interested persons were given an opportunity to submit written data, views, or arguments concerning the proposed amendments by filing them with the Director, Animal Inspection and Quarantine Division, Agricultural Research Service, U.S. Department of Agriculture, Washington, D.C., 20250, within 60 days after publication in the FEDERAL REGISTER. The acceptable date for submitting written data, views, or arguments concerning the proposed amendments was extended on two occasions. The first appeared in the FEDERAL REGISTER (29 F.R. 11458) of August 8, 1964, which extended the time until August 31, 1964; and the second was in the FEDERAL REGISTER (29 F.R. 13037) on September 17, 1964, which extended the time until November 30, 1964.

After due consideration of all relevant matters in connection with the proposed amendments and pursuant to the provisions of sections 6, 7, 8, and 10 of the Act of August 30, 1890, as amended (21 U.S.C. 102–105), section 2 of the Act of February 2, 1903, as amended (21 U.S.C. 111), section 306 of the Act of June 17, 1930, as amended (19 U.S.C. 1306), section 203 of the Act of August 14, 1946 (7 U.S.C. 1622), and the Act of July 2, 1962 (21 U.S.C. 134 et seq.), Part 92, Subchapter D, Chapter I, Title 9, Code of Federal Regulations, as amended, is amended in the following respects:

1. Section 92.4 of Part 92 is amended by adding at the end of paragraph (a) (2), the phrase "except as provided in paragraph (d) of this section."

2. A new paragraph (d) is added to § 92.4 to read as follows:

**§ 92.4 Import permits for ruminants, swine, and poultry and for animal semen.**

* * * * *

(d) *Animal semen from countries where rinderpest or foot-and-mouth disease exists.* Importation of semen of ruminants or swine, originating in any country designated in paragraph (a) of section 94.1 of this subchapter as a country where rinderpest or foot-and-mouth disease is determined to exist, is prohibited, except that semen from ruminants or swine originating in such a country may be offered for entry into the United States at the port of New York and later released from such port provided the following conditions have been fulfilled:

(1) The importer has applied for and obtained an import permit for the semen in accordance with the provisions of this section and related requirements concerning application therefor, which permit is in effect at the time of importation, and has deposited with the Department prior to the issuance of the permit sufficient funds so as to be available for defraying estimated expenses to be incurred in connection with the proposed semen importation and following the issuance of the permit has deposited such other amounts as may be required from time to time to defray unanticipated costs or increased expenses. Such an import permit may be denied for the reasons specified in subparagraph (a) (3) of this section. Furthermore, an import permit will be revoked unless the following conditions have been complied with:

(i) The donor animal shall have been inspected on the farm of origin by a veterinarian of the United States Department of Agriculture who, in cooperation with the veterinary service of the country of origin of the donor animal, shall have determined, insofar as possible, that the donor animal was never infected with rinderpest or foot-and-mouth disease; that the donor animal was never on a farm or other premise where rinderpest or foot-and-mouth disease then existed; that no animal on the farm of origin which was susceptible to the virus of rinderpest or foot-and-mouth disease was exposed to either disease during the 12 months immediately prior to the date of inspection of the donor animal; that the donor animal has never been vaccinated against rinderpest or foot-and-mouth disease; and that the donor animal was free from evidence of other communicable disease;

(ii) The donor animal shall have been permanently identified in a manner satisfactory to a veterinarian of this Department; blood samples from such donor animal for virus neutralization and fluorescent antibody tests or other tests shall have been collected by a veterinarian of the United States Department of Agriculture and transported by air to the New York Port Veterinarian for delivery to the Plum Island Animal Disease Laboratory of the United States Department of Agriculture in containers approved by a veterinarian of this Department, sealed in the country of origin by a veterinarian of this Department; and pending the results of the tests, the donor animal shall have been kept in isolation on the farm of origin or other acceptable location under the supervision of a veterinarian of this Department, and during such isolation period no animal susceptible to rinderpest or foot-and-mouth disease shall have been permitted to enter such farm or location and no other source of exposure to rinderpest or foot-and-mouth disease shall have been present;

(iii) The blood samples from the donor animal shall have been negative to the virus neutralization and fluorescent antibody tests made at the Plum Island Animal Disease Laboratory of the United States Department of Agriculture and to any other test for rinderpest, foot-and-mouth disease or other communicable disease prescribed by the Director of Division;

(iv) Following isolation, preliminary veterinary inspection, and testing while the donor animal was on the farm of origin or other acceptable location, the donor animal shall have been transported, under such conditions as the Department veterinarian prescribed to prevent exposure of the animal to the virus of rinderpest or foot-and-mouth disease, to an isolation facility properly equipped for the necessary care and maintenance of the donor animal and for the proper collection and handling of semen, approved by a veterinarian of this Department and under the direct supervision of such veterinarian;

(v) The semen of the donor animal shall have been collected at the approved isolation facility under the direct supervision of a veterinarian of this Department; and all handling procedures, such as examination, dilution, refrigeration, and preparation of the semen for shipment, shall have been under the direct supervision of a veterinarian of this Department.

(2) The semen collected at the approved isolation facility shall have been at all times, except during air transportation to New York, in the custody of a veterinarian of this Department.

(3) The semen for which an import permit has been issued shall have been transported by air to the port of New York in liquid nitrogen containers approved by a veterinarian of this Department; sealed in the country of origin by a veterinarian of this Department; and accompanied by a statement by such veterinarian showing the identification of the donor animal and the dates the semen was collected, along with a certificate regarding the health status of the donor animal as of the date of shipment of the semen to the port of New York. All semen received at the port of New York shall be held under quarantine in liquid nitrogen storage at such port in the custody of the Animal Inspection and Quarantine Division until released or otherwise disposed of as provided in this section. Quarantine of the semen at the port of New York shall be for a minimum period of 60 days in facilities and under conditions prescribed by the Director of Division, during which time additional tests shall be conducted as provided in subparagraphs (4), (5), and (6) of this paragraph.

(4) The donor animal shall have been retained at the approved isolation facility in the country where the semen was collected for at least 60 days after such collection; and after such 60-day retention period, blood samples shall have been collected from the donor animal by a veterinarian of this Department for virus neutralization and fluorescent antibody tests at the Plum Island Animal Disease Laboratory of the United States Department of Agriculture, and any other tests as required by the Director of Division.

(5) While the imported semen is in storage under quarantine at the port of New York, a sample of each lot of semen collected from the donor animal shall have been tested at the Plum Island Laboratory. Such test shall consist of injecting not less than 10 percent of the volume of each lot of semen into test animals which are susceptible to rinderpest or foot-and-mouth disease. The Director of Division may also require such other tests as he deems necessary to determine whether the semen harbors the virus of rinderpest or foot-and-mouth disease, or any other communicable disease.

(6) If it is determined that the requirements set forth in this paragraph have been complied with and there are no indications that the donor animal or the semen from the donor animal harbors the virus of rinderpest or foot-and-mouth disease or any other communicable disease and if the donor animal, blood samples from the donor animal, and semen samples from the donor animal are negative to all other tests required, the semen shall be released for shipment to the consignee listed by the importer; otherwise the semen shall be destroyed or disposed of as the Director of Division may direct.

(Secs. 6, 7, 8, 26 Stat. 416, as amended, sec. 10, 26 Stat. 417, as amended, sec. 2, 32 Stat. 792, as amended, sec. 306, 46 Stat. 689, as amended, sec. 203, 60 Stat. 1087, sec. 2, 76 Stat. 129, secs. 3, 4, 76 Stat. 130, sec. 11, 76 Stat. 132; 7 U.S.C. 1622, 19 U.S.C. 1306, 21 U.S.C. 102–105, 111, 134 et seq.; 19 F.R. 74, as amended)

The purpose of these amendments is to provide for procedures whereby the semen of ruminants or swine from certain countries where rinderpest or foot-and-mouth disease exists may be imported under conditions which are considered to be adequate for the prevention of the introduction of these diseases and other communicable diseases in order that new bloodlines may be established for herd improvements. The available facilities at the Department's Plum Island Animal Disease Laboratory for testing purposes make it impossible to process more than 20 lots of semen per year on the basis of one lot being the amount of semen collected from one donor animal over a period not to exceed 60 days.

The costs of providing necessary Department personnel and services related to a proposed semen importation shall be borne by the importer and are in addition to other expenses involved in the procurement and operation of the isolation facility, the care, feed, and handling of the donor animal, and the actual semen collection. These latter expenses shall also be borne by the importer through whatever arrangements are necessary between the importer and the various people concerned. However, the isolation facilities must be approved by the Department and the operation thereof must be supervised by a Department veterinarian.

Before an import permit is issued, the importer must deposit with the Department a sum of money, the amount of which will vary depending upon many factors which cannot be definitely determined until all applications have been received and a determination made concerning the permits that are to be issued. Variations in costs will depend upon factors such as the number of donor animals involved, the number of isolation facilities under supervision, and the assignment of Department personnel. In requesting an import permit, the importer must designate the country in which the donor animal is presently maintained, the species and breed of the donor animal, the general location in which the isolation facility is contemplated, and the target date for starting the 60-day Department supervised semen collection from such animal in the isolation facility. An application for an import permit must contain a statement by the importer as follows: "The specified amount of money will be deposited with the Department upon request." If the initial application is accepted, the importer will be so advised in order that he can obtain the additional information requested and proceed with the completion of further details as required by the Department before further consideration can be given to the issuance of the import permit. These include, but are not limited to, the identity of the donor animal and a complete list of premises showing the names, locations, and dates where such donor animal has been kept since birth. The amount of money requested by the Department must be deposited with the Department before an import permit is issued. If, after the importer has deposited the amount of money requested by the Department, an import permit is not issued, the importer may withdraw his application and the total amount of his deposit will be refunded. At any time after the permit is issued, it may be cancelled by the Department upon request of the importer, or it may be revoked by the Department if the donor animal fails to meet the requirements stipulated in these regulations, if other conditions specified in these regulations are not fulfilled, or if there is reason to believe that the proposed semen importation will constitute a disease hazard insofar as it concerns foot-and-mouth disease, rinderpest, or certain other diseases of similar importance. Under such circumstances, the importer will be refunded the unobligated portion of the deposit. If, at any time, the total number of lots of semen to be imported drops below the number that was used as a basis for computing the amount of each importer's deposit, each remaining importer may be required to deposit additional funds with the Department to cover the added costs.

The Department will accept applications for semen import permits following the effective date of these amendments to the regulations, and all applications received on or before March 1, 1965, will be considered as a group so that the permits can be issued on an equitable basis. From time to time, when appropriate, other dates for the acceptance and consideration of applications for import semen permits under these regulations will be established by publication of notice thereof in the FEDERAL REGISTER.

*Effective date.* The foregoing amendments shall become effective on January 30, 1965.

Done at Washington, D.C., this 18th day of December 1964.

B. T. SHAW,
*Administrator,*
*Agricultural Research Service.*

## Title 32—NATIONAL DEFENSE

### Chapter VI—Department of the Navy

SUBCHAPTER A—OFFICIAL RECORDS

### PART 701—AVAILABILITY OF OFFICIAL RECORDS

#### Official Records in Civil Court

*Scope and purpose.* Section 701.2(e) is revised in order to cite the current edition of the Navy Civilian Personnel Instruction referred to therein.

Section 701.2(e) and its footnote are revised to read as follows:

**§ 701.2 Official records in civil court.**

* * * * *

(e) *Medical and other records of civilian employees.* Production of medical certificates or other medical reports concerning civilian employees is controlled by the provisions of Executive Order 10561, 19 F.R. 5963, as implemented by Navy Civilian Personnel Instruction 290.4–61.[1]

b. *Disclosure of medical information.* Agencies have not been delegated authority to release medical information relating to employees subject to the Civil Service Act. Therefore, requests received by agencies from whatever source (other Federal agencies; State governmental organizations, including law offices; courts; corporations; or individuals) for copies of medical certificates or for information from medical certificates should be referred to the Civil Service Commission together with the medical certificates or other medical reports concerned. After review of the evidence the Commission will decide when and to what extent to comply with the requests.

Records of civilian employees other than medical records may be produced upon receipt of a court order without procuring specific authority from the Secretary of the Navy provided there is not involved any classified or otherwise confidential material such as loyalty and security records. Records relating to compensation benefits administered by the Bureau of Employees' Compen-

[1] NCPI 290.4–6b reads as follows:

sation may not be disclosed except upon the written approval of the Bureau (20 CFR 1.21). Further, in any case of doubt, the matter should be handled in accordance with the general rule under paragraph (a) of this section. Where information is furnished hereunder in response to a court order, it is advisable that certified copies rather than originals be furnished and that, where original records shall be produced, the assistance of the U.S. Attorney or U.S. Marshal be required so that custody be kept of the records.

(R.S. 161, sec. 5031, 70A Stat. 278, as amended; 5 U.S.C. 22, 10 U.S.C. 5031; E.O. 10561, 19 F.R. 5963, 3 CFR 1954–58 Comp. p. 205)

Dated: December 18, 1964.

By direction of the Secretary of the Navy.

[SEAL] WILFRED HEARN,
*Rear Admiral, U.S. Navy, Judge Advocate General of the Navy.*

[F.R. Doc. 64–13193; Filed, Dec. 23, 1964; 8:48 a.m.]

SUBCHAPTER C—PERSONNEL

## PART 713—NAVAL RESERVE AND MARINE CORPS RESERVE

## PART 730—ADMINISTRATIVE DISCHARGES AND RELATED MATTERS CONCERNING SEPARATIONS FROM THE NAVAL SERVICE

### Miscellaneous Amendments

*Scope and purpose.* The amendments update Parts 713 and 730 in accordance with Change 10 to the Bureau of Naval Personnel Manual as distributed to naval commands in due course.

1. Section 713.36 is revised to read as follows:

**§ 713.36 Termination of status.**

(a) A Reservist who completes the courses of study required for graduation from an approved school of medicine, dentistry or theology must request appointment or reappointment in the appropriate Staff Corps, resignation or discharge. Failure to take one of these actions will result in discharge through administrative action due to his possessing a rating or designator incompatible with his civilian qualifications. A waiver to retain his present designator may be requested if a grave injustice, through rank disparity, would result because of his appointment in the Staff Corps. Such waiver, however, will not in itself authorize retention in the Ready Reserve, active duty for training with pay, or assignment in a pay billet.

(b) A Medical or Dental Officer in the Ready Reserve who is an Intern or Resident, including a Berry Plan participant:

(1) Will be assigned to the Active Status Pool while deferred from active duty, unless he volunteers for assignment to a Reserve Unit for a minimum of one year.

(2) Will not be issued mobilization orders while a member of the Active Status Pool. (The Berry Plan is the Armed Forces Physicians' Appointment and Residency Consideration Program as disseminated to medical interns.)

(c) A member of the Ready Reserve who is enrolled in an approved school of medicine or dentistry:

(1) Will be relieved of training requirements if he requests and accepts an appointment as Ensign 1915 or 1925.

(2) Will be transferred to Standby Reserve if he is eligible and is not appointed as Ensign 1915 or 1925 and is needed as an individual reinforcement.

(3) Will be required to serve on active duty if he remains in the Ready Reserve other than as Ensign 1915 or 1925 and is needed as an individual reinforcement.

(4) Is not eligible for assignment to a Naval Reserve unit in pay status.

(d) A member of the Ready Reserve who is enrolled in an approved school of theology:

(1) Will be transferred to the Standby Reserve, unless he accepts an appointment as Ensign 1945, or otherwise executes a written agreement to remain in the Ready Reserve for at least 1 year.

(2) Is not eligible for assignment to a Naval Reserve unit in pay status.

2. Section 713.68 is revised to read as follows:

**§ 713.68 Equipment loaned to States for use of Naval Militia.**

Such vessels, equipment, material, armament, or other facilities of the Navy as are or may be made available for the Naval Reserve may also be made available for issue or loan to the several states, territories or the District of Columbia for the use of the Naval Militia. No such facilities of the Navy will be furnished for use by any portion or unit of the Naval Militia, however, unless at least 95 percent of its personnel are members of the Naval or Marine Corps Reserve and are attached to or associated with pay units of the Naval or Marine Corps Reserve, and unless its training, organization, and administration conform to standards that will be prescribed from time to time by the Secretary of the Navy. (BUPERS Instruction 4423.1 (series) concerns loan of rifles.)

3. Section 713.214 is amended by revising paragraph (d) to read as follows:

**§ 713.214 Officer service record, inactive officers.**

* * * * * * *

(d) *Maintenance responsibility.* An officer service record shall be maintained for each inactive officer. Where this will be depends upon whether or not the officer is participating.

(1) For those who are not participating (do not have orders for any type of inactive duty training) the service record will be maintained by the Commanding Officer, Naval Reserve Manpower Center, Bainbridge, Md.

(2) The service records of inactive officers who are participating in any program (those who have orders to appropriate and/or other duty), except under the cognizance of the Chief of Naval Air Reserve Training, will be maintained by the commandant who wrote the orders. In most cases, this will be in the same naval district where the officer resides.

(3) For officers participating in a training program under the cognizance of the Chief of Naval Air Reserve Training, the officer service record will be maintained by the commanding officer of the naval air station or naval air reserve training unit, having responsibility for the training program.

* * * * * * *

4. Section 713.222 is amended by deleting paragraph (b).

**§ 713.222 Enlisted service record.**

* * * * * * *

(b) [Deleted]

5. Section 713.325 is amended by revising paragraph (a) to read as follows:

**§ 713.325 Qualifications for original appointment.**

(a) Except as otherwise approved by the Secretary of the Navy, the limiting ages for original appointments in the Naval Reserve of all officers are prescribed as follows:

| Grade | Line (less SDO (law)) SC [1] | CEC [2] | Medical Service Corps | Nurse Corps [3] | MC, DC, ChC, and SDO (law) | MC and DC students |
|---|---|---|---|---|---|---|
| LCDR | 39½–48½ | 39½–48½ | 39½–48½ | | 39½–48½ | |
| LT | 33½–39½ | 33½–39½ | 33½–39½ | 21–40 | 33½–39½ | |
| LTJG | 27½–33½ | 21–33½ | 21–33½ | 21–35 | 21–33½ | |
| ENS | 19–27½ | 19–27½ | [4] 21–32 | 21–34 | | |
| ENS 19X5 | | | | | 19–30 | [4] 19–33 |
| Warrant | 21–44 | 21–44 | | | | |

[1] Minimum age for Line/SC, USNR is 20 years for women.
[2] Grade to be offered will depend on professional experience.
[3] Minimum age for appointment in the Women's Specialists Section is 18.
[4] At time of expected graduation. "19X5" designates a Naval Reserve officer (unrestricted line—prospective staff corps) and applies only to officers under instruction in civilian schools.

NOTE: The maximum age limit for men and women with prior active military service may be adjusted on a month-for-month basis, depending upon the number of months of active military service performed, but in no case to exceed 36 months.

* * * * * * *

6. Section 713.337 is amended by revising paragraphs (a)(1), (b) and (c) to read as follows:

**§ 713.337 Extension of enlistment.**

(a) *Definitions.* In the discussion of extensions of enlistments in this section the following definitions are applicable:

(1) "Agreement to Extend Enlistment" or "Enlistment as extended"—Whenever these terms are used, the legal form of agreement (Page 1A of the service record (NAVPERS 601–1A/NAVCOMPT 513) is meant and not an unofficial agreement or personal assurance of intention to extend. Agreements on other than the legal form are of an informal and unofficial nature and could be repudiated or withdrawn by the individual.

* * * * * * *

(b) *Terms of extensions.* Provided they are serving under an enlistment contract, Naval Reserve personnel on inactive duty who meet the qualifications for reenlistment, may extend their enlistments for periods of 1, 2, 3, or 4 years provided such extension together with other extensions, if any, since enlistment or the last reenlistment does not exceed an aggregate of 4 years. Personnel not eligible for reenlistment may not extend their enlistments without prior approval of the Chief of Naval Personnel. Commanding officers should set forth all pertinent facts and their recommendation on the forwarding endorsement to the request for such approval. Former Regular Navy personnel who have been transferred to inactive duty in the Naval Reserve to complete their UMT&S obligation are not eligible to execute an extension of enlistment contract unless they have reenlisted and are serving under an enlistment contract at the time the extension is executed. (Article C–1407 of the Bureau of Naval Personnel Manual should be consulted for provisions regarding extension of enlistment of Naval Reservists on active duty.)

(c) *Execution of extension agreement.* Extensions shall be prepared on the latest revision of Form NAVPERS 601–1A/NAVCOMPT 513 only and, except as otherwise provided in this section, shall be executed by the organization having custody of the service record of the individual concerned. When it is inconvenient or impracticable for the individual to appear in person for the purpose of executing the extension of enlistment at the activity having custody of his service record, the extension form may be mailed to the member for execution and return. See paragraphs (d) and (e) of this section for further information regarding requirements of extensions executed by mail. In order to be valid, an agreement to extend enlistment must be entered into by the individual concerned prior to, or on the date of, expiration of enlistment. In mailing extension forms, necessary precautions must be taken to insure their receipt and execution not later than the individual's expiration of enlistment. An individual should not normally be permitted to agree to extend his enlistment more than 3 months prior to the end of the term of his enlistment, unless agreement to extend is required to acquire sufficient obligated service for recall to active duty.

* * * * * * *

7. Section 713.375 is amended by revising paragraph (b) to read as follows:

**§ 713.375 Selection boards.**

* * * * * * *

(e) For the purpose of complying with paragraph (a) of this section, selection boards will be convened by order of the Secretary of the Navy, from time to time, as may be required. Each such board will normally be composed of not less than 5 officers of the corps and of or above the grade for which selections are to be made. The membership of selection boards considering both regular and reserve personnel shall include an appropriate number of reserve officers otherwise qualified to serve. The membership of selection boards considering reserve personnel only shall include at least a majority of reserve members. The procedure will, in general, be the same as that followed by selection boards for the Regular Navy.

* * * * * * *

8. Section 713.412 is amended by revising paragraph (a)(3)(iv), adding paragraph (a)(6), revising paragraph (b), redesignating old paragraphs (c) to (e) as (d) to (f), and adding paragraph (c), to read as follows:

**§ 713.412 Discharge of inactive-duty enlisted personnel.**

(a) * * *

(3) * * *

(iv) Upon request for transfer to a reserve component of another armed service in accordance with the procedures outlined in paragraph (c) of this section.

* * * * * * *

(6) *Physical disability.* When authorized in accordance with procedures outlined in § 713.413, or when otherwise directed by the Chief of Naval Personnel.

(b) Discharge for cause: Enlisted Reservists on inactive duty are subject to discharge by reason of unsuitability, security, unfitness or misconduct in accordance with articles C–10310 through C–10313 of the Bureau of Naval Personnel Manual (§§ 730.10 to 730.15 of this chapter). The commandant of the naval district in which the Reservist resides is responsible for processing or designating an activity to process such cases. An enlisted person who is subject to undesirable discharge by reason of unfitness or misconduct shall, if his whereabouts is known, be informed as to the basis for the contemplated action and be afforded an opportunity to request or waive, in writing, any or all of the privileges set forth in article C–10311 or C–10312 of the Bureau of Naval Personnel Manual (§ 730.12 or 730.13 of this chapter).

(1) In general, field board hearings afforded under article C–10313 of the Bureau of Naval Personnel Manual (§ 730.15 of this chapter) are to be held at the location of the individual's commanding officer. However, a hearing at that location or at the district headquarters may, in some cases, seriously inconvenience or deprive the individual of substantial rights. Accordingly, if such a Reservist requests that a hearing be held in his case, it is permissible for the commandant to refer the matter to a conveniently located naval activity which has facilities for conducting the hearing. The commanding officer to whom the case is referred should be designated as the individual's commanding officer for this purpose, furnished the individual's service record, or be advised to obtain the record from the NRMC Bainbridge as appropriate, and instructed to afford the individual the privileges. The commandant is to ensure that a sufficient number of officers, including Reserve officers on active duty, are available for appointment to the board. (Note that the privilege of having a service lawyer appointed as the individual's counsel applies only if such a lawyer is reasonably available.) Regardless of where the hearing is to be held, it is incumbent upon the inactive Reservist to furnish his own transportation to the hearing. After the case has been processed at the command, it should be forwarded via the commandant to the Chief of Naval Personnel.

(2) Considerable latitude is afforded for the presentation of the respondent's case. If he requests a hearing but is unable or does not desire to attend the hearing, he may submit written statements for consideration of the field board and may waive representation by counsel. If he is to be represented by counsel, the counsel may take any or all of the following actions:

(i) Present the respondent's written statements.

(ii) Make representations in respondent's behalf.

(iii) Introduce testimony of witnesses for the respondent either orally or in writing, or both.

(iv) Cross-examine government witnesses.

(c) Interservice transfers:

(1) Interservice transfer of persons, not on active duty, between reserve components of the Armed Forces, may be accomplished only in cases wherein the Reservist requests or consents to such transfer and wherein it is mutually agreed by the two Military Departments concerned that such transfers are in the best interests of the Armed Forces.

(2) Service-initiated requests for transfers of individual reservists may be initiated at the area commander level or higher level and transmitted direct to the corresponding service area commander level or higher level for approval. Such requests normally will not be forwarded to the Departments of the Army, Navy, Air Force or Commandant (PR) U.S. Coast Guard, level except in cases of disapproval where the requesting service feels that adjudication at higher level is necessary to the best interests of the Department of Defense. Such transfers will normally be handled at area commander level. For purposes of this paragraph, "area commander" is defined as Army Area Commanders, Naval District Commandants, Chief of Naval Air Reserve Training, Marine Corps District Directors, Commanding General, Marine Corps Air Reserve Training Command, Coast Guard District Commanders, Commanding Generals of the Numbered Air Forces and the Army State Instructors.

(3) Individual reservists may initiate requests for transfer to a reserve component of another armed service. Such requests will be processed in accordance with the procedures outlined herein. Final action on such requests will normally be taken at area commander level unless adjudication at higher level is desired or necessary to the best interests of the Department of Defense.

(4) Under procedures established by the Secretary of Defense, requests for transfer between reserve components of the Armed Forces will be approved under the following conditions:

(i) When the individual concerned will be enlisted in a reserve component of another branch of the Armed Forces incident to enrollment in any officers training program, or will be appointed as a student in an officers training program wherein the individual will have a mili-

tary status. (In such cases member will be discharged pursuant to § 713.412(a)(3)(ii); or

(ii) When the service to which transfer is desired has a specific vacancy for the individual in an accredited training program within a reasonable distance of the individual's domicile or place of business and will assign him to such program, provided one of the following conditions is met:

(*a*) The service to which the individual belongs has no accredited training program within a reasonable distance of the individual's domicile or place of business to which the reservist may be usefully assigned, or

(*b*) The individual has special experience or professional, educational or technical background which is clearly of greater use to the service to which transfer is requested and outweighs the value of his previous training in his present service.

(5) Requests for transfer to another reserve component will include, (i) a statement from appropriate authority in the service to which transfer is desired covering in detail the requirement specified in paragraph (c)(4)(i) or (ii) of this section as applicable, and (ii) a statement by the individual that in the event of approval of the transfer he will accept assignment to and participate in the accredited training program of the service to which transferred.

(6) Upon approval of a request for transfer, the corresponding service authority will be advised that discharge will be issued upon receipt of notification that the individual has signed enlistment papers or accepted appointment in the gaining service. Disapproved requests will be returned to the corresponding service authority for information or action as desired. Discharges in connection with transfers between reserve components shall be effective the date preceding enlistment or appointment in the gaining service. Cite § 713.402(a)(3)(iv) as authority in effecting discharges, except that in the case of discharge to enlist or enroll in an officer training program, § 713.402(a)(3)(ii) will be cited as the authority. (Where membership in the officer training program does not confer military status, discharge will be for the purpose of immediate enlistment in the reserve component of the gaining armed force.) Discharge certificate should be forwarded to the cognizant authority of the gaining service for delivery. Discharge for this purpose does not constitute a fulfillment of the military obligation. Additional service performed after such discharge will be counted toward fulfillment of such obligation. If appropriate, cognizant authority of the gaining service will be notified of the number of constructive credit points earned by the reservist as of the date of discharge.

(7) *Enlistment of a Naval Reservist in another reserve component without obtaining a conditional release.* When information is received of the enlistment of a Naval Reservist in another reserve component without obtaining a conditional release, the command holding the member's service record is authorized to take the following action:

(i) Discharge effective the date preceding enlistment in the gaining service citing BUPERS Manual Article H–31202(1)(c)4 (§ 713.402(a)(3)(iv)) as authority, provided one of the following conditions exists:

(*a*) The member is serving on extended active duty of more than six months duration as a member of the reserve component of the other service.

(*b*) The member's transfer to the reserve component of the other service would have been approved under the conditions prescribed in paragraph (c)(4) of this section, and the enlistment appears to have been contracted in good faith by the other service.

(ii) If none of the conditions in subdivision (i) of this subparagraph exists, action shall be initiated to obtain member's discharge from the other service.

(iii) The following cases shall be forwarded to the Chief of Naval Personnel for decision:

(*a*) The other service requests adjudication of the case at the departmental level.

(*b*) The other service requests reconsideration of the case due to certain unusual circumstances and the command holding member's service record considers such referral is appropriate.

(c) The individual is performing, or has performed, six months active duty for training in the reserve component of the other service.

(*d*) Reservists will be discharged with the same type and character of discharge as provided for enlisted personnel of the Regular Navy.

(*e*) Full information regarding the reason for discharge together with substantiating evidence where appropriate, shall be filed in the individual's service record.

(*f*) The service records of members of the Naval Reserve on inactive duty who have failed to reply to official correspondence and for whom there is no valid address should be closed out at expiration of obligated service and forwarded to the Chief of Naval Personnel. A discharge certificate will be prepared in accordance with the instructions contained in article C–10504 of the Bureau of Naval Personnel Manual and inserted in the closed-out service record for subsequent delivery to the dischargee. Appropriate entries shall be made in the service record of the fact that discharge was effected at expiration of obligated service.

9. Part 713 is amended by inserting section 713.413 to read as follows:

**§ 713.413 Physically disqualified reservists.**

Upon notification by the Chief of Naval Personnel that an enlisted reservist on inactive duty has been found by the Chief, Bureau of Medicine and Surgery to be not physically qualified for retention in the Naval Reserve, the Command holding his service record will take the following action:

(a) Inform the member of his status using the following sample:

From: Commanding Officer.
To: (Name of reservist).
Subj: Finding of Physical Disqualification.
Ref: (a) Title 10, United States Code, (b) Section 18, Chapter 3, Part H, BUPERS Manual [§§ 713.421 to 713.430].
Encl: (1) Form for requesting discharge.

1. I regret to inform you that the Chief, Bureau of Medicine and Surgery, Department of the Navy, has found that you are not physically qualified for retention in the Naval Reserve by reason of (state defect. Example: Diabetes mellitus.)

2. Section 1004(c) of reference (a) provides for the removal from the Reserve rolls of the naval service of any person who is not physically qualified for assignment to active duty.

3. In view of the foregoing, it is requested that you take one of the following courses of action:

a. Request discharge by reason of being not physically qualified. Enclosure (1) is a form you may use for this.

b. Request transfer to the Retired Reserve if eligible under the provisions of reference (b).

c. Request a hearing before a physical evaluation board. The purpose of such a hearing is to comply with Section 1214 of reference (a), quoted herewith for your information:

"No member of the armed forces may be retired or separated for physical disability without a full and fair hearing if he demands it."

Appearance must be at your own expense. Moreover, you are not eligible to receive retirement pay, severance pay or any other benefits specified in Chapter 61 of reference (a). Do not use enclosure (1) to request a hearing.

4. If no reply is received from you within 30 days, it will be considered that you do not desire a hearing. Therefore, at that time, action will be taken to discharge you involuntarily by reason of being physically not qualified.

---
(Signature of Commanding Officer)

Enclosure (1) to Sample Letter to Reservists:

From:
---
(Rate)
---
(First Name) (Middle Name) (Last Name)
---
(Service No.)
---
(Street Number) (City) (State)

To: Commanding Officer.
Subj: Discharge, request for.
Ref: (a) CO ---------- ltr dated ----------

1. Having been informed in reference (a) that the Chief, Bureau of Medicine and Surgery, Department of the Navy, has found that I am not physically qualified for retention in the Naval Reserve, I request discharge by reason of Physical Disability.

---
(Signature)

(b) If discharge is requested, issue appropriate discharge certificate citing Bureau of Naval Personnel Manual, article H–31202(1)(f) (§ 713.412(a)(6)) and the letter informing member of his status as authority therefor. Make appropriate service record entries and forward closed out record to the Chief of Naval Personnel.

(c) If transfer to the Retired Reserve is requested, provided the reservist is eligible therefor under the provisions of Part H, Chapter 3, Section 13 of the Bureau of Naval Personnel Manual (§§ 713.421 to 713.430), transfer to Retired Reserve in accordance therewith.

(d) If Physical Evaluation Board Hearing is requested, issue authorization as shown in Sample Orders for Physical Evaluation Board Hearing (in this subparagraph, below) for reservist to appear before the board listed in Physical Evaluation Board Address List (see mailing list in this subparagraph, below) nearest the reservist's home.

SAMPLE ORDERS FOR PHYSICAL EVALUATION BOARD HEARING

From: Commanding Officer.
To:
Via: Senior Member, Physical Evaluation Board (insert appropriate mailing address shown in listing below).
Subj: Authorization to appear before a Physical Evaluation Board.
Ref: (a) Disability Separation Manual (NAVEXOS P–1990) [Part 725 of this chapter].
Encl: (1) Statement of Rights in triplicate (NAVEXOS–3332 can be requisitioned from the Forms and Publications Supply Distribution points).

1. When notified by the via addressee that the necessary records are available for presentation of your case, you are authorized to report to that officer for an evaluation of your present physical condition.

2. In the evaluation of your physical condition, the Physical Evaluation Board is directed to conduct the proceedings in all respects as provided for hearings in the case of active duty members except that it will make only the recommended finding that you are or are not physically qualified for active service, and if not so qualified, will set forth the disqualifying defect or disability with the diagnostic nomenclature number therefor and an opinion whether such disability is or is not due to intentional misconduct or willful neglect. The Board's attention is invited to paragraph 0427 of reference (a) [§ 725.427 of this chapter] which sets forth the authority for your hearing.

3. The above is authorized with the understanding that you will not be entitled to reimbursement for mileage or expense in connection therewith. In case you do not desire to bear this expense or if for any reason you fail to report to the Physical Evaluation Board on the date specified, you will regard paragraph 1 of this authorization as revoked.

4. You are advised that if for any reason you are unable to report in person to the Physical Evaluation Board on the date specified, you may waive your right to appear in person. If you waive your right to appear in person, your case will be submitted to the Physical Evaluation Board for an examination on the record. It is requested that you execute the enclosed Statement of Rights and return it to the via addressee prior to the date set for your examination.

5. Whether you appear in person or waive your right to appear in person, you may be represented by counsel if you so desire. You are advised that if you desire counsel to assist or represent you in presenting your case before the Physical Evaluation Board, competent legal assistance is available without expense to you. Should you desire to avail yourself of this service, you may apply to the Senior Member of the Physical Evaluation Board.

6. By endorsement hereon the via addressee is requested to notify you of the date and place you are to appear.

---

MAILING LIST OF PHYSICAL EVALUATION BOARDS

NOTE: Address all correspondence to Senior Member:

Example: Senior Member, Physical Evaluation Board, Headquarters, Ninth Naval District, Great Lakes, Ill., 60088.

First Naval District:
U.S. Naval Hospital
Chelsea, Mass. 02150
Third Naval District:
U.S. Naval Hospital
St. Albans, L.I., N.Y. 11412
Fourth Naval District:
U.S. Naval Hospital
Philadelphia, Pa. 19145
Fifth Naval District:
U.S. Naval Hospital
Portsmouth, Va. 23708
Sixth and Eighth Naval Districts:
U.S. Naval Hospital
U.S. Naval Base
Charleston, S.C. 29408
U.S. Naval Hospital
Camp Lejeune, N.C. 28542
Ninth Naval District:
Headquarters, Ninth Naval District
Great Lakes, Ill. 60088
Eleventh Naval District:
U.S. Naval Hospital
San Diego, Calif. 92134
U.S. Naval Hospital
Camp Pendleton, Calif. 92055
Twelfth and Thirteenth Naval Districts:
U.S. Naval Hospital
Oakland, Calif. 94614
Potomac River Naval Command:
U.S. Naval Hospital
Bethesda, Md. 20014

NOTE: Do not include entitlement to travel allowance in the authorization to appear before the board, since such must be at the member's own expense. As explained in the letter to the individual (see sample letter in paragraph (a) of this section), the option of requesting a hearing before a physical evaluation board is offered solely to comply with the provision of 10 U.S.C. 1214, which states that no member of the armed forces may be retired or separated for physical disability without a full and fair hearing. Since such hearing will usually serve no useful purpose, particularly in cases of individuals who have never served on active duty and who are not qualified for retention in the Naval Reserve by reason of conditions arising in civilian life, individuals who inquire relative to the advisability of requesting a hearing should be so advised and discouraged from requesting a hearing due to the time and expense involved.

(e) If no reply to the letter informing the reservist of his status is received within 30 days, issue an appropriate discharge certificate citing the Bureau of Naval Personnel Manual, article H–31202(1)(f) (§ 713.412) and the letter informing the reservist of his status as authority therefor.

10. Section 713.441 is revised to read as follows:

**§ 713.441 Travel and residence overseas.**

(a) This section pertains to Naval Reserve personnel on inactive duty, including those in retired status, who travel or reside in any country not within the jurisdiction of a Naval District. Those employed aboard merchant vessels or aircraft of the United States or friendly foreign registry are excepted unless homeported in a foreign country.

(b) Upon arrival in and departure from each country, except for brief tours, the reservist shall report to the nearest U.S. Naval Attache.

(c) If travel or residence will exceed 30 days, the Reservist shall submit advance notice to the command holding his service record, giving (1) date of departure from the United States, (2) duration of absence, (3) itinerary, including approximate dates of arrival in and departure from countries where the U.S. Naval Attache will be contacted, and (4) overseas mail addresses (official mail will be forwarded via the nearest U.S. Naval Attache).

(d) Return to the United States shall be reported to the command holding the service record.

(e) The uniform may be worn only when attending, by formal invitation, ceremonies or social functions at which the wearing of the uniform is required by the terms of the invitation or by the regulations or customs of the country, and then only with the approval of the nearest U.S. Naval Attache.

(f) Official naval titles shall not be used in connection with public appearances unless authorized by the nearest U.S. Naval Attache.

(g) Overseas training is covered in § 713.521.

11. Section 713.443 is revised to read as follows:

**§ 713.443 Use of official Naval titles.**

The use of official naval titles by Reserve personnel on inactive duty is authorized except as provided in § 713.441(f) and in § 137.8(b) of this title.

12. Section 713.451 is revised to read as follows:

**§ 713.451 Requirements.**

(a) Officers and enlisted personnel of the Naval Reserve on inactive duty shall possess the minimum uniform items specified in U.S. Navy Uniform Regulations and Bureau of Naval Personnel Instruction 1020.4 (series), respectively.

(b) U.S. Navy Uniform Regulations govern the occasions when wearing of the uniform is mandatory and when it is permissive.

(c) Additionally, commanding officers of Specialist units, Naval Reserve Officers Schools, and Composite companies shall designate a minimum of one drill per quarter as a "drill in uniform" for all nonpay members. Such drills shall begin with a formal personnel inspection.

(d) Commanding officers of all Naval Reserve units shall encourage the wearing of name plates by all members during drills. Name plates shall conform to the standards prescribed in U.S. Navy Uniform Regulations, and shall be positioned on the uniform as prescribed therein.

13. Section 713.517 is amended by revising paragraph (c)(1)(i) and (2)(i) to read as follows:

**§ 713.517 Appropriate duty (including air).**

* * * * * *

(c) * * *

(1) * * *

(i) To 2105, 2205, 2305, and 2905 officers for the performance of medical and dental examinations, and essential services of an administrative nature for Na-

val Reserve or Marine Corps Reserve units.

• • • • •

(2) • • •

(i) To 2105, 2205, and 2305 officers for duty as consultants at naval activities. (Appointments of officers for this duty must be approved by the commanding officer of the activity concerned and by the Chief, Bureau of Medicine and Surgery.)

• • • • •

14. Section 730.4 is amended by revising paragraphs (e) (5), (10), (11) and (12) to read as follows:

**§ 730.4 Separation of enlisted personnel by reason of expiration of enlistment, fulfillment of service obligation, or expiration of tour of active service.**

• • • • •

(e) • • •

(5) *Undergoing medical treatment or hospitalization.*

(i) Enlisted personnel of the Regular Navy or Naval Reserve on active duty whose enlistments or enlistments as extended expire while they are suffering disease or injury incident to the service and who are in need of medical care or hospitalization may be retained in service beyond the normal date of expiration of their enlistments or enlistments as extended, with their consent which should be indicated in writing and signed by the individual concerned on the administrative remarks page of the service record. They may be retained until they shall have recovered to the extent which would enable them to meet the physical requirements for discharge and reenlistment, or until it shall have been ascertained that the disease or injury is of a character that recovery to such an extent would be impossible. Tacit consent may be assumed for retention in service beyond expiration of enlistment in cases of mental incompetency or physical incapacity. A person in this category ordinarily will not be retained in excess of 6 months beyond expiration of enlistment. Further retention may be authorized, however, in meritorious cases upon proper recommendation accompanied by the supporting facts. (10 U.S.C. 5537.)

(ii) In the event the member persists in his desire to be separated, effect his separation provided he signs the following entry on page 13 of his service record and on Standard Form 88, witnessed by an officer, at time examined for separation:

I, ----------, desire to be
(Name)
separated from the Naval Service on my normal expiration of active obligated service date. I understand that I will not be eligible for further follow-up studies or treatment at a U.S. Armed Forces medical facility; that I will be ineligible for disability benefits under laws administered by the Navy and that any further treatment and/or benefits would be under the jurisdiction of the Veterans Administration.

Personnel being processed before a physical evaluation board will not normally be released from active duty or discharged until final action on their case has been completed by the Secretary of the Navy and instructions received from the Chief of Naval Personnel. An untimely separation of a member who is the subject of a physical evaluation board proceeding may prejudice his case in view of the fact that the law requires that the Secretary make the necessary physical disability determinations while the member is entitled to receive basic pay, except in cases of Reservists on training duty of 30 days or less. This should be explained to any member whose enlistment or term of active service is about to expire and who requests discharge or release from active duty prior to the time such determinations are made. Any request for separation which is not withdrawn following such explanation shall be entered on page 13 of the Service Record as follows:

I, ----------, desire to be
(Name)
separated from the Naval Service notwithstanding the fact that such separation may prejudice any rights or benefits to which I may be entitled as a result of the physical evaluation board hearings under Title 10, U.S. Code, Chapter 61. I have been fully advised of my rights in this matter and request that I be discharged from the Naval Service as soon as possible without further hearing and without disability retirement pay or severance pay and without any compensation whatsoever. I understand that I am not required, and am under no obligation, to give this certificate and I hereby certify that I give the certificate voluntarily.

The foregoing statement shall be signed by the individual and witnessed by an officer.

• • • • •

(10) *Retention as party to a court of inquiry.* When an enlisted member has been named a party to a court of inquiry, and the proceedings have been entered upon prior to the expiration of enlistment or term of obligated service, the individual may be retained in the service as a party to the said court of inquiry, and for resultant trial if such is indicated.

(11) *Voluntarily making up lost time.* Enlisted personnel who before 24 July 1956 lost time in excess of 24 consecutive hours from their enlistments or enlistments as extended due to unauthorized absence, confinement, or nonperformance of duty (civil arrest) as defined in paragraph 044019–1 of the Navy Comptroller Manual (§ 719.203 of this chapter) may be permitted to make up such lost time in order to complete the term for which they enlisted or extended their enlistments. In order to be valid, application to make up lost time must be submitted by the individual and approved by or on behalf of the commanding officer prior to expiration of the enlistment or extension of enlistment during which the time was lost. Appropriate entry shall be made on the administrative remarks page of the service record which shall reflect the date on which the application was approved.

(12) *Mandatorily making up lost time.* Instructions concerning mandatorily making up lost time due to sickness misconduct occurring before, on, or after July 24, 1956, and unauthorized absence, confinement, and nonperformance of duty (civil arrest) occurring on or after July 24, 1956, are contained in § 730.4a.

• • • • •

15. Section 730.5 is amended by revising paragraph (e) (2) to read as follows:

**§ 730.5 Separation of enlisted personnel by reason of physical disability.**

• • • • •

(e) • • •

(2) If processing of a case by a physical evaluation board has been authorized, retain the individual in service until final disposition is directed by the Chief of Naval Personnel, unless the individual concerned states in writing that he does not desire to be retained until final action has been taken on the recommended findings and proceedings of a physical evaluation board. (See § 730.4(e) (5).)

• • • • •

16. Section 730.6 is revised to read as follows:

**§ 730.6 Separation of enlisted personnel for convenience of the Government.**

(a) The Chief of Naval Personnel may authorize or direct the separation of enlisted or inducted personnel prior to the expiration of their active obligated service dates for any one of the reasons listed in this section. The term "separation" as used in this section includes discharge or transfer to the Naval Reserve and concurrent release to inactive duty, or release to inactive duty in certain cases of Naval Reservists serving on active duty who have time remaining in service obligation or enlistment contract.

(1) General demobilization, reduction in authorized strength, or by an order applicable to all members of a class of personnel specified in the order.

(2) Acceptance of a permanent appointment as officer in any branch of the armed services.

(3) To permit immediate reenlistment at the request of the individual prior to normal expiration of enlistment in accordance with instructions issued from time to time by the Chief of Naval Personnel.

(4) National health, safety or interest.

(5) Erroneous enlistment, reenlistment, extension or induction.

(6) Other good and sufficient reasons when determined by the Chief of Naval Personnel.

(b) Subject to the following instructions, the commanding officer shall, as appropriate, discharge or transfer for discharge for the convenience of the Government, an enlisted woman for any one of the following reasons: (The instructions contained in this paragraph should not be interpreted as precluding the commanding officer from forwarding any case to the Chief of Naval Personnel for decision should he consider such action appropriate. In the case of either parenthood or pregnancy of a married enlisted woman who has over 18 years of service but insufficient time for retirement the commanding officer will forward the case to the Chief of Naval Personnel for a decision.)

(1) Parenthood, when it is established that a woman is the parent, by birth or adoption, of a child under 18; has personal custody of a child under 18; is the stepparent of a child under 18 and the child resides within the household of the woman for a period of more than 30 days a year; or during her current enlistment or extension of enlistment, has given birth to a living child. In any case wherein a woman is the natural parent of a child born prior to her entry into the naval service and wherein all rights to custody and control of the child are asserted to have been lost through formal adoption proceedings prior to the woman's entry into the service, the commanding officer shall not effect discharge of the woman concerned without specific authorization of the Chief of Naval Personnel.

(2) Pregnancy, regardless of marital status, upon determination by a naval medical officer. The type of discharge shall be as warranted by her service record regardless of marital status. If pregnancy is terminated prior to separation, a full report of the circumstances shall be submitted to the Chief of Naval Personnel including whether or not the termination was a result of a spontaneous or therapeutic abortion or a still birth, or if there is evidence of nontherapeutic abortion, together with servicewoman's desires as to retention in the service and the Commanding Officer's recommendation thereon.

(3) Marriage, upon written request to the commanding officer provided she is not serving at a duty station which is sufficiently close to the location of her husband to permit the establishment of a joint household and further provided member meets all the conditions set forth below which are applicable in her case. (If two or more of the conditions apply, the period of time which results in retaining her to the latest date shall govern). In any case discharge will not be effected earlier than six months from the date of submission of written request therefor except that commanding officers may waive the six months' delay in discharge in those cases wherein a contact relief is not required or at such time as a relief becomes available.

(i) Must have served not less than 12 months subsequent to completion of recruit training and not less than 12 months at current duty station, or not less than 12 months at new duty station if separation requested after issuance of transfer orders.

(ii) If member attended a service school during her enlistment:

(*a*) If length of course was 24 weeks or less, must have served 18 months after completion of the course or disenrollment therefrom.

(*b*) If length of course was over 24 weeks, must have served 24 months after completion of the course or disenrollment therefrom.

Ensure that a copy of the member's request and information as to the command's action thereon is submitted to the Bureau of Naval Personnel (Pers B2122) and the cognizant personnel distributor in all cases. (Article A–4204 of the Bureau of Naval Personnel Manual contains instructions relative to recoupment of reenlistment bonus, if paid.)

(c) Attend college:

(1) Commanding officers are hereby authorized to separate or transfer for separation enlisted personnel for the purpose of commencing or resuming their college education provided eligibility is established in accordance with the following:

(i) The requested date of separation must be within 3 months of the individual's normal expiration of active-obligated service and, within this limitation, not earlier than 10 days prior to the date of registration as prescribed by the educational institution. (Normal expiration of active-obligated service is the date on which the individual would normally be eligible for release to inactive duty. It is not the "advanced" separation date established by any early separation program which may be in effect.)

(ii) The applicant must demonstrate an ability and willingness to make the required payment of an entrance fee, if required, provided he has not already done so. The applicant must also demonstrate that the specific school term for which he is seeking early release is academically the most opportune time for him to begin or resume his education; and that delay of enrollment until a date subsequent to normal separation date would handicap him in the pursuit of his education.

(iii) The applicant must obtain a statement from the educational institution which establishes:

(*a*) That the applicant has been accepted for enrollment without qualification for entrance in a specified school term. (A summer term may be used to fulfill this requirement.)

(*b*) That the applicant will be enrolled in a full-time course of instruction leading to a baccalaureate or higher degree. (Enrollment in an accredited Junior College may be used to fulfill this requirement.)

(*c*) The convening date of class for the specified school term.

(*d*) The registration dates for the specified school term.

(*e*) That the educational institution is currently listed in Part III of the Educational Directory published by U.S. Department of Health, Education and Welfare.

(iv) The applicant's performance of duty must have been such that he is deserving of consideration for early separation. Additionally, requirements for honorable discharge in article C–7821 (10) (b) of the Bureau of Naval Personnel Manual must be met.

(v) The loss occasioned by the early release of the applicant, without immediate replacement, will not reduce the operational readiness of the command to an unacceptable degree.

(vi) The commanding officer will assure, to his satisfaction, that early release is not being requested for the purpose of avoiding service.

(2) Exceptions: The Chief of Naval Personnel, as a policy, will not authorize the early separation of personnel who do not fully meet the requirements set forth in paragraph (c) (1) of this section. In no case will early release for educational purposes be authorized earlier than 3 months in advance of normal expiration of active-obligated service. While the Chief of Naval Personnel does not desire to prevent personnel who are not fully qualified under paragraph (c) (1) of this section above from applying for early release, such personnel should be carefully and completely informed of the Bureau's firm policy in this regard and discouraged from submitting an official request except for unusual reasons. However, if the individual concerned still wishes to submit a request for early release in accordance with article B–1105 of the Bureau of Naval Personnel Manual, the request should be forwarded to the Chief of Naval Personnel (Attn: Pers B222) with the information listed in paragraphs (c) (1) (i) to (iii) of this section. The commanding officer in his endorsement will comment on the factors listed in subdivisions (iv) to (vi) of paragraph (c) (1) of this section.

(3) Personnel not eligible for early release to attend college. Personnel in the following categories are not eligible for early release under the provisions of paragraph (c) (1) of this section.

(i) Aliens seeking to qualify for citizenship by completion of 3 years' active military service, since early release might jeopardize their expeditious naturalization.

(ii) Personnel who will have a reserve obligation remaining upon separation, as determined by article C–1402 of the BUPERS Manual, will not be separated until they have completed 21 months' active duty on their current term of active-obligated service.

(iii) Personnel who are ordered to 6 months' active duty for training.

(iv) Personnel whose services are essential to the mission of the command.

(d) Commanding officers shall discharge or transfer for discharge those non-petty officers serving in their first enlistment who have served continuously on active duty for more than 12 months and are considered to be a burden to the Command due to substandard performance or inability to adapt to military service provided (1) they have a tenth grade education or less or a GCT of 41 or less, (2) are not potential petty officer material, and (3) have average performance marks below the minimum required for honorable discharge and reenlistment.

(e) Full information regarding the reason for separation and a recommendation concerning reenlistment in accordance with article C–10103 of the Bureau of Naval Personnel Manual based upon enlisted performance evaluations (article C–7821 of the Bureau of Naval Personnel Manual and applicable Bureau directives) shall be entered on page 13 of the service record in connection with all cases within the purview of this section.

17. Section 730.7 is amended by revising paragraph (a) (2) to read as follows:

**§ 730.7 Discharge of enlisted personnel for own convenience and furlough without pay.**

(a) • • •

(2) Returning to school, except as provided in § 730.6(c).

• • • • •

18. Section 730.8 is amended by revising paragraphs (b) to (e) to read as follows:

**§ 730.8 Discharge or release to inactive duty for reasons of dependency and hardship.**

• • • • •

(b) Enlisted personnel who desire to request discharge or release to inactive duty, as appropriate, for dependency or hardship reasons shall be informed of the proper procedure to follow. It should be clearly explained to each applicant that a request shall be submitted via official channels and that submission of a request is no assurance that discharge or release to inactive duty will be authorized. While each request received is carefully and sympathetically considered, final decision is based upon its individual merits.

(c) Policies governing discharge or release to inactive duty on account of dependency or hardship—

(1) Dependency or hardship discharges, or releases to inactive duty, will not be authorized solely for financial or business reasons; for indebtedness; for personal convenience; when an individual is under charges or in confinement; or because of the member's physical or mental condition.

(2) Discharges or releases to inactive duty will not be disapproved under the provisions of this section solely because an individual's services are needed in his assigned duties, or because he is indebted to the Government or to an individual.

(3) The Chief of Naval Personnel may direct discharge or release to inactive duty when it is considered that undue and genuine hardship exists, that the hardship is not of a temporary nature, that the conditions have arisen or have been aggravated to an excessive degree since entry into the service, and the member has made every reasonable effort by means of application for basic allowance for quarters and voluntary contributions which have proven inadequate; that the discharge or release of the individual will result in the elimination of, or will materially alleviate, the condition and that there are no means of alleviation readily available other than by such discharge or release. Examples of meritorious cases are those in which the evidence shows that, either as a result of the death or disability of a member of an enlisted person's family, the separation of the person concerned is necessary for the support or care of a member or members of the family; or that the individual or the family is undergoing hardships more severe than normally encountered by dependents of families of members of the naval service. Undue hardship does not necessarily exist solely because of altered present or expected income or because the individual is separated from his family or must suffer the inconveniences normally incident to military service. Pregnancy of an enlisted man's wife is not in itself a circumstance for which separation will be authorized.

(d) A written application for discharge or release to inactive duty for dependency or hardship shall be forwarded to the Chief of Naval Personnel via the enlisted person's commanding officer. In unusual circumstances, personnel in an authorized leave status may submit requests for dependency or hardship discharge to the Chief of Naval Personnel. To facilitate and expedite the request and to ensure that it is properly prepared in accordance with existing instructions, it should be prepared by and submitted via the nearest naval activity. The anticipated date of the individual's departure from the leave address must be included in the request. All requests must be accompanied by affidavits substantiating the dependency or hardship claim. Where practicable, one affidavit should be from the dependent concerned. The request should contain the following additional information:

(1) Reason in full for request.

(2) Complete home address of dependent and applicant.

(3) Names and addresses of persons familiar with the situation.

(4) Statement as to marital status and date of marriage.

(5) Financial statement: Complete itemized budget for serviceman and/or dependent family members, including rent, food, clothing, utilities, fuel, medical expenses, and other regular expenses; list of existing debts, including names of creditors, original amount of debt, amount of debt remaining to be paid, amount of monthly payments, date debt contracted and purpose; specific amounts and modes of contributions of serviceman to dependents.

(6) Names, ages, occupations, and monthly incomes of members of the individual's family, if any, and the reasons why these members cannot contribute to the necessary care or support of the individual's family. If dependency is the result of death of a member of the enlisted person's family occurring after entrance into the service, a certificate or other valid proof of death should be furnished. If dependency or hardship is the result of disability of a member of the enlisted person's family occurring after entrance into the service, a physician's certificate should be furnished showing specifically when such disability occurred, diagnosis, duration of hospitalization and/or convalescence.

(7) Other income of dependent family members such as from pensions, insurance, Veterans Administration compensation, rental or sale of real estate, interest on bank deposits or funds invested, fees, alimony, or moneys received of any description whatsoever, whether regular or occasional, or social security benefits.

(8) Documentary evidence if the request is based solely on marital difficulties, i.e., divorce, separation, desertion of wife, or where the serviceman or persons other than the legal spouse have been awarded custody of minor children.

(e) Before forwarding the request the commanding officer shall interview the enlisted person concerned in order to elicit any further information and to insure that the required information is supplied. The forwarding endorsement shall include:

(1) A definite recommendation for approval or disapproval of the request.

(2) A statement regarding the status of any disciplinary action pending with recommended action.

(3) An itemization of all sources of income, including type family separation allowance, if any, as determined from individual's pay record.

(4) An itemization of pay record deductions, including allotments, the amount, to whom registered and effective date.

The Commanding Officer's recommendation on an individual's request for hardship discharge should be confined to the above areas. In no case should this endorsement include a recommendation for a substitute type of discharge, i.e., general, undesirable, etc. A hardship discharge is intended to be used as an instrument to alleviate personal hardships encountered by enlisted personnel when such discharge is the only solution. It is not intended to be used as a means to rid the service of undesirables, misfits or persons considered unsuitable for continuation in the naval service.

• • • • •

19. Section 730.10 is revised to read as follows:

**§ 730.10 Discharge of enlisted personnel by reason of unsuitability.**

(a) Enlisted personnel may be separated, by reason of unsuitability, with an honorable or general discharge as warranted by their military record. A discharge by reason of unsuitability, regardless of the attendant circumstances, will be effected only when directed by or authorized by the Chief of Naval Personnel.

(b) An enlisted person may be discharged by reason of unsuitability because of:

(1) Inaptitude: Applicable to those persons who are best described as inapt due to lack of general adaptability, want of readiness or skill, unhandiness, or inability to learn.

(2) Character and behavior disorders: Duly diagnosed character and behavior disorders, disorders of intelligence, and transient personality disorders due to acute or special stress, as listed in "Department of Defense Disease and Injury Codes" (NAVMED P–5082).

(3) Apathy, defective attitudes and inability to expend effort constructively: A significant observable defect, apparently beyond the control of the individual, elsewhere not readily describable.

(4) Homosexual tendencies: When there is also evidence of involvement in homosexual acts in the current enlistment, processing must be in accordance with Secretary of the Navy Instruction 1900.9 or revision and § 730.12. Likewise, if there is evidence of homosexual acts prior to enlistment or during a previous enlistment and homosexual tendencies were denied on SF 89, processing in accordance with § 730.13 for fraudulent enlistment should be considered.

(5) Enuresis.

(6) Alcoholism: Chronic, or addiction to alcohol.

(7) Other good and sufficient reasons, as determined by the Chief of Naval Personnel.

(c) Prior to processing an individual under this section, review §§ 730.12 and 730.13 to insure that processing under one of those sections is not more appropriate. In this regard, chronic military misbehavior or serious involvement with civilian authorities should not be used as the basis for unsuitability processing unless there is accompanying evidence of a psychiatric disorder which significantly contributed to the misbehavior. Military misbehavior and involvement with civilian police subject the respondent to the possibility of undesirable discharge and, therefore should normally be processed under the provisions of § 730.12 or § 730.13 as appropriate.

(d) In each case processed in accordance with this section, the enlisted person shall be informed in writing of the reason(s) he is being considered for discharge and shall be afforded an opportunity to make a statement in his own behalf. In the event a statement cannot be obtained, a page 13 entry of explanation shall be made and a copy of the page 13 forwarded as an enclosure to the letter of transmittal.

(e) Recommendations for discharge by reason of unsuitability shall include the following:

(1) A letter of transmittal prepared in the format given in paragraph (g) of this section.

(2) The respondent's signed statement of awareness and his statement in his own behalf, or statement that he does not desire to make a statement in his own behalf.

(3) Psychiatric or medical evaluation as appropriate.

(4) Copy of page 9 of the service record.

(5) Comment and recommendation of the commanding officer.

(f) Enlisted personnel serving on board ships, overseas stations, and continental U.S. activities lacking separation facilities who are recommended for discharge in accordance with paragraph (b)(2), (4) or (5) of this section, whose immediate transfer is clearly indicated in the best interest of the man concerned, may be transferred to the nearest separation activity to await instructions from the Chief of Naval Personnel. The transfer orders and records must accurately reflect the person's status and reason for transfer in order to ensure that the individual is held pending receipt of the instructions from the Chief of Naval Personnel. In this connection, forward a copy of the letter of transmittal to the separation activity under a separate letter. All other personnel recommended for discharge in accordance with this section shall be retained on board pending receipt of instructions from the Chief of Naval Personnel.

(g) Format of letter of transmittal:

January 15, 1963

From: Commanding Officer, U.S.S. EVERSAIL (DD–00).

To: Chief of Naval Personnel.

Subj: DOE, John Robert, 123 45 67, SN, USN; Recommendation for discharge by reason of unsuitability.

Encl: (1) Statement of DOE; (2) Copy of page 9; (3) Psychiatric evaluation.

1. The following information is submitted in the case of subject man:

a. *Basic record data.*

Date of current enlistment: Nov. 15, 1961 for four years. EAOS: Nov. 16, 1965.

Marital Status: Single. Dependents: 0. Months on Board: 12. Age: 22. GCT: 45. Years education: 12. Total Service: (Active) 1 yr. 2 mos (Inactive) 0.

b. *Diagnosis.* Emotional instability reaction (3210).

c. Military Offenses: Feb. 15, 1962. NJP Page 13–(3)—UA 2 days—2 wks. restr.

d. *Comment and Recommendation of Commanding Officer.* It is recommended that DOE be separated from the naval service by reason of unsuitability. Because of his personality disorder, further retention in the service would not be in the best interest of DOE or the naval service.

A. B. SEE,
*Commander, USN.*

20. Section 730.12 is revised to read as follows:

**§ 730.12 Discharge of enlisted personnel by reason of unfitness.**

(a) Enlisted personnel may be separated by reason of unfitness with an undesirable discharge, or with a higher type discharge when it is warranted by the particular circumstances in a given case. A discharge by reason of unfitness, regardless of the attendant circumstances, will be effected only when directed by or authorized by the Chief of Naval Personnel. The provisions of this section are not to be used as a substitute for action under the Uniform Code of Military Justice. Therefore, discharge by reason of unfitness will not be issued in lieu of disciplinary action, except upon the determination by the Chief of Naval Personnel that the interests of the service as well as the individual will best be served by administrative discharge. Accordingly, discharge by reason of unfitness normally will not be recommended in lieu of disciplinary action. Also, where there is a suspended punitive discharge pending, an administrative discharge normally will not be recommended under this section.

(b) An enlisted person may be recommended for discharge by reason of unfitness to free the service of persons whose military record is characterized by one or more of the following:

(1) Frequent involvement of a discreditable nature with civil or military authorities.

(2) Sexual perversion including but not limited to (i) lewd and lascivious acts, (ii) homosexual acts, (iii) sodomy, (iv) indecent exposure, (v) indecent acts with or assault upon a child under age 16, or (vi) other indecent acts or offenses. (Secretary of the Navy Instruction 1900.9 or revision sets forth controlling policy and additional action required in homosexual cases).

(3) Drug addiction or the unauthorized use or possession of habit-forming narcotic drugs or marijuana.

(4) An established pattern of shirking.

(5) An established pattern showing dishonorable failure to pay just debts.

(6) Other good and sufficient reasons, as determined by the Chief of Naval Personnel.

(c) In each case processed in accordance with this section, the individual is subject to an undesirable discharge. If his whereabouts is known, he must be informed in writing as to the circumstances which are the basis for the contemplated action and must be afforded in writing an opportunity to request or waive in writing any or all of the following privileges: (If held by the civil authorities or not on active duty, this may be accomplished by mail).

(1) To have his case heard by a board of not less than three officers.

(2) To appear in person before such board (unless in civil confinement or otherwise unavailable).

(3) To be represented by counsel who, if reasonably available, should be a lawyer.

(4) To submit statements in his own behalf.

If the individual requests that his case be heard by a field board of officers, the commanding officer shall convene an administrative board in accordance with § 730.15. The recorder for the field board shall be furnished a brief of the case completed to the extent possible and the service record of the individual concerned. In the event attempts to obtain a request for or waiver of privileges fail, make a page 13 entry of explanation and forward a copy of the page 13 along with the other processing papers to the Chief of Naval Personnel.

(d) Enlisted personnel, except those processed under paragraph (b)(2) or (3) of this section, shall be retained on board pending receipt of instructions from the Chief of Naval Personnel. Enlisted personnel serving on board ships, overseas stations, and continental U.S. activities lacking separation facilities, who are recommended for discharge in accordance with paragraph (b)(2) or (3) of this section, may be transferred to the nearest separation activity to await instructions from the Chief of Naval Personnel. The transfer orders and records must accurately reflect the person's status and reason for transfer in order to ensure that the individual is held pending receipt of the instructions from the Chief of Naval Personnel. In this connection, forward a copy of the letter of transmittal (less the field board proceedings) to the separation activity under a separate letter.

(e) A letter of transmittal shall be prepared in the format given in paragraph (f) of this section and shall contain the following information:

(1) *Principal reason for processing.* Indicate reason as given in paragraph (b) of this section, such as repeated military offenses, indebtedness, homosexual involvement, etc.

(2) *Summary of military offenses.* List in chronological order all disciplinary action during current enlistment. Include service record entry page numbers, date of nonjudicial punishment or court-martial by type, description of offense(s), nonjudicial punishment or sentence as approved and approval date, and all violations of brig or disciplinary command regulations during current confinement with action taken thereon.

(3) *Unclean habits, if any.* Substantiate all unclean habits including the occurrence of repeated venereal disease infections during the current enlistment. When reporting venereal diseases, indicate the date of each admission and nature of the infection.

(4) *Civil convictions, if any, on the basis of information contained in the service record or otherwise readily available.* List date and court in which convicted, offense, and sentence awarded.

(5) *Remarks.* Include location of the individual and his records, any disciplinary action pending, identification of any other military personnel involved and action taken or contemplated in regard thereto, and other information pertinent to the case.

(6) *Findings and recommendation of field board, if held.*

(7) *Comment and recommendation of the Commanding Officer.* (If discharge is recommended, include type and reason.)

(8) *Enclosures.* (i) Request for or waiver of privileges. Must include the following signed statement:

I understand that I am being considered for an administrative discharge because of (one or more of the reasons listed in this section) and that I am subject to and may be separated with an undesirable discharge. I understand that an undesirable discharge is under other than honorable conditions and may deprive me of virtually all veteran's benefits based upon my current period of active service, and that I may expect to encounter substantial prejudice in civilian life in situations wherein the type of service rendered in any branch of the Armed Forces or the character of discharge received therefrom may have a bearing. I understand that I may request or waive the privileges listed below. Understanding all of the foregoing, I desire to avail myself of the privileges I have checked below:

- ☐ None of the privileges.
- ☐ To have my case heard by a board of not less than three officers.
- ☐ To appear in person before such board (unless in civil confinement or otherwise unavailable).
- ☐ To be represented by counsel who, if reasonably available, should be a lawyer.
- ☐ To submit statements in my own behalf.

(ii) Copy of page 9 of the service record.

(iii) Statements of subject, if made.

(iv) Proceedings of field board, if held.

(v) Other available documents such as psychiatric or medical evaluation, police reports, etc. If being processed as result of indebtedness, include financial statement as required by article C–11104A of the Bureau of Naval Personnel Manual.

(f) Format of letter of transmittal:

January 15, 1963

From: Commanding Officer, U.S.S. "Eversail" (DD–00).

To: Chief of Naval Personnel.

Subj: DOE, John Robert, 123 45 67, SN, USN; Recommendation for discharge by reason of unfitness.

Encl: (1) Subject's request for privileges; (2) Page 9 (copy of); (3) Statement of subject; (4) Proceedings of field board, if held; (5) Other exhibits.

1. The following information is submitted in the case of subject man:

a. *Primary reason for processing.* (Repeated military offenses, indebtedness, homosexual involvement, etc.)

b. *Basic record data.*

Date of current enlistment: November 15, 1960 for four years. EAOS: February 6, 1965. Marital status: Single. Dependents: 0. Months on board: 12. Age: 22. GCT: 45. Years of education: 12. Total service (Active) 2 yrs 2 mos. (Inactive) 0.

c. Military offenses:

February 15, 1961 NJP; Pg 13–(3); UA 2 days—2 wks. restr.

April 11, 1961 NJP; Pg 13 –(5); UA 1 day—1 wk. extra duty.

August 5, 1961 NJP; Pg 13–(7); Failed to obey lawful order—2 wks. extra duty.

May 1, 1962 SPCM; Pg 6–(1); UA 15 days—15 days conf. approved.

October 1, 1962 SPCM; Pg 6–(2); UA 20 days—1 month conf. forf. $30.00 a month for 1 mo. approved.

January 5, 1963 NJP; Pg 13–(9); UA 5 hrs.—1 wk. restr.

d. *Other involvements.*

September 12, 1961—Convicted by civil authorities of drunkenness and fined $5.00.

December 5, 1962—Contracted VD infection.

e. *Remarks.* DOE retained on board to await action by Chief of Naval Personnel. (In accordance with authority contained in § 730.12(d), DOE being transferred on January 20, 1963 to RecSta, T. I., to await action by CNP.) Other naval personnel involved: SMITH, T. H., 645 32 21, TN, USN. Commanding Officer, U.S.S. "Lexington" has been notified.

f. *Findings, recommendation, and opinion of Board.* Had frequent involvement of a discreditable nature with military authorities. Discharge under other than honorable conditions (discharge under honorable conditions, retain, etc.).

g. *Comment and recommendation of Commanding Officer.* Concur in recommendation and opinion of field board. Recommend undesirable discharge by reason of unfitness (or other appropriate recommendation).

A. B. SEE,
*Commander, USN.*

21. Section 730.13 is revised to read as follows:

**§ 730.13 Discharge of enlisted personnel by reason of misconduct.**

(a) Enlisted personnel may be separated by reason of misconduct with an undesirable discharge, or with a higher type discharge when it is warranted by the particular circumstances in a given case. A discharge by reason of misconduct, regardless of the attendant circumstances, will be effected only when directed by or authorized by the Chief of Naval Personnel.

(b) Processing in accordance with this section is mandatory in any of the following cases:

(1) Conviction by civil authorities (foreign or domestic) or action taken which is tantamount to a finding of guilty of an offense for which the maximum penalty under the Uniform Code of Military Justice (10 U.S.C. 801–940) is death or confinement in excess of one year; or which involves moral turpitude; or where the offender is adjudged a juvenile delinquent, wayward minor or youthful offender as a result of an offense involving moral turpitude. If the offense is not listed in the MCM Table of Maximum Punishments or is not closely related to an offense listed therein, the maximum punishment authorized by the U.S. Code or the District of Columbia Code, whichever is lesser, applies. For the purpose of this subparagraph only, an individual shall be considered as having been convicted even though an appeal is pending or is subsequently filed.

(2) Procurement of a fraudulent enlistment, induction, or period of obligated service through any deliberate material misrepresentation or concealment which, except for such misrepresentation or concealment, may have resulted in rejection. The enlistment of a minor with false representation as to age or without proper consent will not in itself be considered as a fraudulent enlistment.

(3) Prolonged unauthorized absence. When unauthorized continuous absence of 1 year or more has been established but punitive discharge has not been authorized by competent authority.

(c) In each case processed in accordance with this section, the individual is subject to an undesirable discharge. If his whereabouts is known, he must be informed in writing as to the circumstances which are the basis for the contemplated action and must be afforded in writing an opportunity to request or waive, in writing, any or all of the following privileges: (If held by civil authorities or not on active duty this may be accomplished by mail.)

(1) To have his case heard by a board of not less than three officers.

(2) To appear in person before such board (unless in civil confinement or otherwise unavailable).

(3) To be represented by counsel who, if reasonably available, should be a lawyer.

(4) To submit statements in his own behalf.

If the individual requests that his case be heard by a field board of officers, the commanding officer shall convene an administrative board in accordance with § 730.15. The recorder for the field board shall be furnished a brief of the case completed to the extent possible and the service record of the individual concerned. In the event attempts to obtain a request for or waiver of privileges fail, make a page 13 entry of explanation and forward a copy of the page 13 along with the other processing papers to the Chief of Naval Personnel.

(d) Personnel processed in accordance with this section normally shall be retained on board pending instructions from the Chief of Naval Personnel. However, if the particular circumstances clearly indicate that the individual should be transferred, a request for transfer, indicating the reason therefor, may be submitted to the Chief of Naval Personnel.

(e) A letter of transmittal shall be prepared in the format given in paragraph (f) of this section and shall contain the following information:

(1) Circumstances of offense(s): Include a brief resume of the circumstances surrounding the offense (must include sufficient detail to clarify reasons for initial arrest).

(2) Action of civil authorities: Include citation of any civil statute(s) violated, charge on which tried and convicted, court in which convicted, sentence of court, and maximum punishment which could have been imposed for such a conviction under the UCMJ, D.C. Code, or U.S. Code as applicable.

(3) Previous civil convictions, if any, on the basis of information contained in the service record or otherwise readily available: List date and court in which convicted, offense, and sentence awarded.

(4) Summary of military offenses, if any: List in chronological order all disciplinary action during current enlistment. Include service record entry page numbers, date of nonjudicial punishment or court-martial by type, description of offense(s), nonjudicial punishment or sentence as approved and date of approval, and all violations of brig or disciplinary command regulations during the current confinement, with action taken thereon.

(5) Remarks: Include location of the individual and his records, any unauthorized absence involved, and disciplinary action taken or pending, identification of any other military personnel involved in the case and action taken or contemplated in regard thereto, and other information pertinent to the case.

(6) Findings and recommendation of field board, if held.

(f) Format of letter of transmittal:

January 15, 1963

From: Commanding Officer, U.S.S. EVERSAIL (DD–00).

To: Chief of Naval Personnel.

Subj: DOE, John Robert, 123 45 67, SN, USN; Recommendation for discharge by reason of misconduct.

Encl: (1) Subject's request for privileges; (2) Arrest report; (3) Page 9 (copy of); (4) Statement of subject; (5) Proceedings of field board, if held; (6) Other exhibits.

1. The following information is submitted in the case of subject man:

a. *Primary reason for processing.* (Civil conviction, fraudulent enlistment, or prolonged unauthorized absence).

b. *Basic record data.*

Date of current enlistment: November 15, 1960 for four years. EAOS: Undetermined. Marital status: Single. Dependents: 0. Months on board: 12. Age: 22. GCT: 45. Years education: 12. Total service (Active) 2 yrs. 2 mos. (Inactive) 0.

(Active) (Inactive)

c. *Circumstances of offense(s) in detail.* While on authorized leave on 1/1/63, arrested by the civil authorities of Colorado Springs, Colorado, on the charge of auto theft.

d. *Action of civil authorities.* Tried on 1/5/63 at Colorado Springs, Colorado, for violation of Title 29, Chapter 133.24 (Car theft) and convicted. Received an indeterminate term up to five years confinement. Presently serving his sentence at the Colorado State Prison, Canon City, Colorado. Maximum penalty—Article 121, UCMJ, 5 years.

e. *Summary of Military Offense(s).* 4/11/61; NJP; Pg 13–(5); UA 1 day—1 wk. extra duty.

f. *Remarks.* Records and effects located at this command. Other personnel involved: SMITH, T. H., 645 32 21, TN, USN. Commanding Officer, U.S.S. LEXINGTON, has been notified.

g. *Findings, recommendation and opinion of Board.* Convicted as indicated above. Discharge under other than honorable conditions (discharge under honorable conditions, retain, etc.).

h. *Comment and recommendation of Commanding Officer.* Concur in recommendation and opinion of field board. Recommend undesirable discharge by reason of misconduct (or other appropriate recommendation).

A. B. SEE,
*Commander, USN.*

(7) Comment and recommendation of the Commanding Officer: (If discharge is recommended, include type and reason.)

(8) Enclosures:

(i) Request for or waiver of privileges. Must include the following signed statement:

I understand that I am being considered for an administrative discharge because of (one of the reasons listed in § 730.13) and that I am subject to and may be separated with an undesirable discharge. I understand that an undesirable discharge is under other than honorable conditions and may deprive me of virtually all veteran's benefits based upon my current period of active service, and that I may expect to encounter substantial prejudice in civilian life in situations wherein the type of service rendered in any branch of the Armed Forces or the character of discharge received therefrom may have a bearing. I understand that I may request or waive the privileges listed below. Understanding all of the foregoing, I desire to avail myself of the privileges I have checked below.

- ☐ None of the privileges.
- ☐ To have my case heard by a board of not less than three officers.
- ☐ To appear in person before such board (unless in civil confinement or otherwise unavailable).
- ☐ To be represented by counsel who, if reasonably available, should be a lawyer.
- ☐ To submit statements in my own behalf.

ii. Statement of witnesses, arrest reports, copies of court records, probation orders, or any other pertinent documents.

iii. Copy of page 9 of the service record.

iv. Statements of subject, if made.

v. Proceedings of field board, if held.

vi. Other pertinent exhibits.

**§ 730.14 [Deleted]**

22. Section 730.14 is deleted.

23. Section 730.15 is revised to read as follows:

**§ 730.15 Field board of officers.**

(a) *Appointment and composition.* When a field board hearing is to be held, the commanding officer shall appoint a board of not less than three commissioned officers in an active duty status to consider the case. The board may be composed of Regular or Reserve Navy or Marine Corps officers, or a combination thereof. If the individual under consideration (hereinafter called respondent) is a woman, the board must include a woman officer. The commanding officer shall also appoint as recorder an officer in an active duty status. The senior member of the board presides at the hearing and is responsible for its proper conduct. Prior to the hearing, the senior member shall ensure that all members of the board are familiar with the provisions of pertinent sections of this part.

(1) *Reserve membership.* If the respondent is a Reservist the membership of the board shall, if available, include a majority of Reserve officers. In any instance where a majority of Reserve officers is not available, the board will include not less than one Reserve officer among its members.

(2) *Counsel for the respondent.* If the respondent requests in writing that he be represented by counsel but does not specify a particular person, the commanding officer shall appoint an officer he considers qualified to act as counsel for the respondent. When practicable, a person selected by the respondent will be appointed as his counsel. The respondent may retain civilian counsel at his own expense, and any previously appointed counsel may accordingly be excused. The hearing should not be unduly delayed to permit attendance by counsel. If undue delay appears likely, other counsel who is immediately available should be selected or appointed.

(3) *Recorder.* The recorder is responsible for the clerical and preliminary work of the hearing, but is not a member of the board. He conducts a preliminary review of available evidence and prior to the hearing interviews prospective witnesses after warning them of their rights under article 31, UCMJ, where appropriate. After consultation with the commanding officer and the senior member, he notifies the members, respondent, and counsel as to the time, date, and place of the hearing. Subject to the provisions of paragraph (2) of this section, the recorder arranges for the attendance at the hearing of the respondent, all witnesses for the government, and military witnesses for the respondent. He verifies the information contained in the brief concerning the respondent and assembles pertinent directives, regulations and records for use by the board. At the hearing he presents the case against the respondent. He is responsible for preparing the report of the hearing.

(4) *Reporter.* Although a summary of testimony will normally suffice, the recorder or senior member may request a reporter for the purpose of making a verbatim record of the testimony if it appears that a substantial number of witnesses will testify, that the testimony will be lengthy, or that other good reason exists for making a verbatim record.

(b) *Obtaining witnesses.* No authority exists for the issuance of subpoenas in connection with these hearings. Appearance as witnesses of civilians including members of the Armed Forces on inactive duty may be arranged for on a voluntary basis. Appropriations are not available to pay witnesses' fees or

reimbursement for travel and other expenses of such persons and this fact shall be made known to them if and when they are invited to appear and testify at the hearing. Attendance at the hearing of military personnel on active duty who are in the local area shall be arranged for by the recorder if reasonably available. Testimony of active duty military personnel not in the immediate area, if needed, should be obtained and presented in the form of written statements.

(c) *ONI reports.* If an ONI report is involved which cannot be made available to the respondent and his counsel, the commanding officer should request the District or Area Intelligence Officer to furnish a resume of the report which may be made available to the respondent and his counsel in accordance with current ONI instructions. The resume but not the ONI report may be considered by the field board. The purpose of this provision is to ensure that the field board considers only matters which are also available to the respondent and his counsel.

(d) *General procedural instructions.* The proceedings of boards of officers under the provisions of this section need not conform to provisions of the Manual for Courts Martial United States, or of the JAG Manual. Such provisions may, however, be followed in specific cases and, if followed, will satisfy the requirement of this section. Whenever applicable, article 31 of the Uniform Code of Military Justice (10 U.S.C. 831) is to be complied with. Attention is directed to the fact that (1) Military personnel on active duty may not be compelled to testify or produce evidence that will incriminate them, nor may they be required to answer questions not material to the issue which might tend to degrade them and (2) Civilians, including members of the Armed Forces on inactive duty, may not be compelled to testify or produce evidence at the hearing. The board should consider any matter presented which is relevant to the issue whether written or oral, sworn or unsworn. Real evidence as distinct from testimonial evidence may be exhibited to the board and should be accurately described or reproduced for the record. The board may refuse to consider or to consider further any oral or written matter presented if it is irrelevant, immaterial, or unnecessarily repetitive and cumulative, but no such matter should be rejected or withheld from consideration on the ground that it would be incompetent for presentation to a court of law. The board will rely on its own judgment and experience in determining the weight and credibility to be given material received in evidence. Board proceedings under this section should not be in the nature of a formal fact-finding tribunal, or judicial trial, but should be formalized to the extent of assuring full opportunity for presentation of the respondent's case. If an objection is made at any stage during the proceedings the senior member will ensure that the objection and the basis therefor are noted in the record but should not make a formal ruling thereon. Any member of the board may be challenged but only on grounds which show that the member cannot render a fair and impartial decision. The challenged member may be examined by the respondent, his counsel, and other members of the board. The commanding officer, upon being informed of the circumstances of the challenge and the recommendation of the other members, may appoint a substitute for the challenged member if he deems such action appropriate.

(e) *Conduct of hearing.* (1) The senior member, upon calling the meeting to order, should direct the recorder to make a record as to the time, date, and place of the hearing, the identity and presence of the appointed members of the board and of the recorder, the respondent, his counsel, and any witnesses. The senior member should then commence the hearing by explaining in substance that:

(i) The board has been convened for the purpose of considering the pertinent facts relating to the case of (name, service number, rate, and class), who it is alleged (state the specific allegations against the respondent). The board will make findings of fact, a recommendation as to the disposition to be made in this case, and will render an opinion as to character of separation to be given if separation is recommended by the board.

(ii) The proceedings are administrative in nature, and the board is not bound by formal rules of evidence.

(iii) The respondent has the right to present evidence, to cross-examine all witnesses who appear at the hearing and to hear all evidence against him. (If evidence is classified observe the provisions of Department of the Navy Security Manual for Classified Information.)

(iv) The respondent has the right to submit an oral or written statement in his own behalf.

(v) The respondent may testify in his own behalf or remain silent, and, if he testifies he may be examined on his testimony and on the question of his general credibility.

(vi) There is no right of peremptory challenge, but a member may be challenged for cause.

(vii) Objections will be heard and noted, but there should be no formal ruling thereon.

(2) After the preliminary procedures have been completed, the recorder will present the case against the respondent who will be afforded the opportunity for rebuttal and for presentation of evidence. The general procedural instruction stated in paragraph (d) of this section will be followed. Witnesses will be excluded except while testifying. Before testifying, each witness and the respondent will be asked whether or not he elects to give his testimony under oath or affirmation. After all evidence is in and questioning and oral argument, if any, are complete the hearing will be closed.

(f) *Report of board.* The board will make and render its findings, recommendation, and opinion in closed session. The report of the field board of officers shall be completed, using the form set forth in paragraph (h) of this section as a guide, and shall be signed by all members. The dissent of any member will be duly recorded therein. Where a verbatim record has been made, only so much of the verbatim oral testimony as bears upon the critical situations of the case should be incorporated into the record of proceedings. The remainder may be summarized. Written testimony and statements which have been furnished the board shall be attached to the record as exhibits. The complete record will be authenticated by the senior member or by another member if he is not immediately available. Upon request the respondent will be provided with a copy of the record of proceedings with all exhibits, but he will not be furnished a copy of the report of the board or brief accompanying the case.

(g) *Review and forwarding of reports.* After reviewing the record of the hearing and the report of the board, the commanding officer shall note on the report his concurrence or nonconcurrence in the findings, recommendation, and opinion of the board and enter any additional comment deemed appropriate. If the commanding officer determines that the respondent should be retained in the service, he may close the case except where sexual perversion or drug addiction within the purview of § 730.12 or any case within the purview of § 730.13 is an issue. Cases in which sexual perversion or drug addiction or misconduct within the purview of the aforesaid sections is an issue must be forwarded to the Chief of Naval Personnel for final action.

(h) *Format of report of field board of officers.*

REPORT OF FIELD BOARD OF OFFICERS IN THE CASE OF

Name, DOE, John Robert; Service number, 123 45 67; Rate, SN; Class, USN.

Findings of the Board: The respondent (has) (is)

(Use one or more of the following as appropriate):

a. Had frequent involvement of a discreditable nature with civil or military authorities.

b. Chronic alcoholism or addicted to alcohol.*

c. Without authority (used) (possessed) habit forming narcotic drugs or marijuana.

d. A sexual pervert.

e. Committed homosexual acts in current enlistment.

f. Homosexual tendencies.*

g. Committed homosexual acts not in current enlistment.

h. An established pattern showing dishonorable failure to pay just debts.

i. An established pattern of shirking.

j. Been convicted of a civil offense within the purview of § 730.13.

k. Prolonged unauthorized absence within the purview of § 730.13.

l. Perpetrated a fraudulent (enlistment) (induction).

m. Other (explain).

Board Recommendation: ☐ Discharge ☐ Retain ☐ Release to inactive duty.

Opinion of Board as to character of separation: ☐ Honorable ☐ Under honorable conditions ☐ Under conditions other than honorable.

* If discharge is recommended under this finding it should be for unsuitability rather than unfitness or misconduct and the provisions of § 730.10 must be complied with.

Signature of Board Members: (include name, grade, and component).

Dissent: (Reasons).

(Signature—Include name, grade, and component)

Findings, Recommendation and Opinion of Majority ☐ Concurrence ☐ Nonconcurrence

(Comment, if any)

(Commanding officer—include name, grade, and component)

(i) *Board of officers convened by the Chief of Naval Personnel.* There is established in the Bureau of Naval Personnel an Enlisted Performance Evaluation Board composed of not less than three officers which considers cases referred to it, including performance cases submitted under § 730.12 or § 730.13. The Board will examine all evidence submitted and will make recommendation to the Chief of Naval Personnel as to final disposition. The Board will consider each case on its individual merits. All matters of record, including such variables as the person's military record, civil record, age, GCT/AFQT, education, length of service, performance marks, psychiatric and medical determinations, duty stations, nature of offense and actions taken thereon, length of time since commission of last offense, individual's statement, the field board action (when applicable), commanding officer's comments and recommendations, and other pertinent factors are carefully considered, evaluated, and correlated in arriving at a decision.

(j) *Action by the Chief of Naval Personnel.* Final disposition of performance cases acted upon under the provisions of this section will be directed by the Chief of Naval Personnel. Disposition of each case will be based upon the recommendation of the Commanding Officer, field board of officers, and the Enlisted Performance Evaluation Board together with policy or legal considerations.

(2) The final action approved by the Chief of Naval Personnel in an individual case will not, as a matter of policy and/or law, include a discharge under other than honorable conditions unless such action is proposed by the Enlisted Performance Evaluation Board. If the final action approved is less favorable to the individual than that proposed by the field board, the Chief of Naval Personnel will generally afford the individual an opportunity to make representations in an effort to show cause why the less favorable action should not be taken. If the less favorable action is an undesirable discharge and the individual so requests in writing to his commanding officer, he will be offered an opportunity to appear in person, with or without counsel, before the Enlisted Performance Evaluation Board. Instructions incident to such appearance will be included in the letter directing discharge. Personal appearance before the Board will not be authorized in the cases of personnel in civil confinement or otherwise not available.

(3) When considered appropriate, the Chief of Naval Personnel will authorize or direct that the individual be retained in the service in a probationary status. In such a case, the action of the Chief of Naval Personnel will include instructions concerning the terms of the probation and will specify the type of discharge which is to be executed without reference to the Bureau of Naval Personnel in the event the individual does not fulfill the terms of his probation. A discharge other than the type specified will not be given the probationer unless his case is reproceased under the provisions of this section which govern discharge by reason of unsuitability, unfitness, or misconduct, as applicable, and such discharge is directed by the Chief of Naval Personnel.

24. Section 730.16 is revised to read as follows:

**§ 730.16 General provisions and restrictions relating to enlisted separations.**

(a) *Effective time of discharge.* Subject to any law providing otherwise, the discharge of an enlisted person on active duty, regardless of the reason for separation, takes effect upon delivery of the discharge certificate. In the case of a person discharged while absent without authority or in civil confinement, constructive delivery of the discharge certificate is accomplished at the time it is signed by proper authority. If a discharge is effected as a result of a person's immediate entry in the same or any other component of the Armed Forces in the same or any other status, the discharge will, for administrative purposes, be dated as of the date preceding such entry or re-entry.

(b) *Effective time of release to inactive duty.* Subject to any law providing otherwise, the release to inactive duty of a Reservist who was called to active duty as a Reservist takes effect at the actual time of his arrival home or at the expiration of his authorized travel time, whichever is earlier. The release to inactive duty of members of the Regular Navy transferred to the Naval Reserve and concurrently released to inactive duty takes effect upon delivery of the separation documents.

NOTE: When a discharged member is seriously injured while returning home and is taken to a Navy hospital, he may be eligible for hospitalization and other benefits from the Veterans Administration and should be advised to file an appropriate claim with that agency.

(c) *Civilian clothing.* An enlisted member who is discharged by reason of unsuitability, security, unfitness, or misconduct with an honorable or general discharge or who is discharged for any reason with a dishonorable, bad conduct, or undesirable discharge shall surrender the outer garments and distinctive parts of the uniform which are in the member's possession at time of discharge. When the items of clothing authorized to be retained by the dischargee are insufficient to provide the dischargee with one outfit of civilian clothing suitable for wearing home, necessary items of civilian clothing may be issued at no cost to the dischargee to augment the retained clothing. These clothes shall be furnished without regard to the state of member's accounts or amount of personal funds in the member's possession. However, no extra items of clothing such as a spare shirt or socks and no accessories such as an umbrella or luggage may be issued to the dischargee. The items procured for issuance must be moderately priced but need not be the lowest quality available. Members transferred prior to the actual execution of the discharge shall take all their uniforms with them to the place to which transferred. Issuance of the outfit of civilian clothing under this paragraph is subject to the following exceptions:

(1) The clothing may be issued to a person discharged in absentia pursuant to article C–10201 (6) of the Bureau of Naval Personnel Manual only if he requests the clothing, and all conditions set forth in the first two sentences of this paragraph are met.

(2) The clothing is not to be issued to a person who is discharged while on leave granted in accordance with current instructions (see Secretary of the Navy Instruction 1050.3 (§ 719.206 of this chapter) or revisions thereof) to await completion of appellate review of a court-martial sentence which includes punitive discharge.

(For detailed instructions regarding issuance of civilian clothing, its cost, and recovery of uniforms of dischargees, see Bureau of Supplies and Accounts Manual, paragraph 25940.)

(d) *Wearing of uniform after discharge.* Enlisted personnel discharged with an honorable or general discharge (except those discharged by reason of unsuitability, security, unfitness, or misconduct), are entitled to retain their uniforms and may within 3 months after discharge wear them from place of discharge to their homes, except that persons who have served less than 6 months on active duty subsequent to last authorization of an initial clothing allowance, unless discharged to accept a direct commission or appointment as an officer or warrant officer, are entitled to retain only one complete uniform appropriate to the season. The 3-month period relates to the period between the date of discharge and the date of the person's arrival home, and does not permit the wearing of the uniform after arrival home, even though the 3-month period has not expired. Enlisted personnel discharged to accept a commission or appointment as an officer or warrant officer may retain all clothing in their possession.

(e) *Cash allowance.* An enlisted person who is discharged for any reason with a dishonorable, bad conduct, or undesirable discharge and who would be otherwise without funds to meet his immediate needs shall, upon discharge, be paid a sum not to exceed $25 or such portion thereof as will, together with other funds available to the individual concerned, total $25. The cash allowance is not payable to a member who is discharged while on leave granted in accordance with current instructions (see Secretary of the Navy Instruction (§ 719.206 of this chapter) or revisions thereof) to await completion of appellate review of a court-martial sentence which includes punitive discharge.

(f) *Not recommended for reenlistment.* Every enlisted person discharged who is not recommended for reenlistment shall be informed orally that fraudulent enlistment in any branch of the service undoubtedly will be detected by fingerprints, and that if concealment of previous service and discharge results in reenlistment that person will be subject to disciplinary action.

(g) *Information concerning the Honorable Discharge Button.* Information concerning the Honorable Discharge Button is set forth in article B–2107 of the Bureau of Naval Personnel Manual.

(h) *Information concerning recoupment of reenlistment bonus.* Information concerning recoupment of reenlistment bonus is set forth in article A–4204 of the Bureau of Naval Personnel Manual.

(R.S. 161, secs. 280, 1162, 5031, 6291–6298, 70A Stat. 14, 89, 278, 391–393, as amended; 5 U.S.C. 22, 10 U.S.C. 280, 1162, 5031, 6291–6298)

By direction of the Secretary of the Navy.

## Chapter II—Agency for International Development, Department of State

[A.I.D. Reg. 1]

## PART 201—RULES AND PROCEDURES APPLICABLE TO COMMODITY TRANSACTIONS FINANCED BY A.I.D.

Part 201 of Chapter II, Title 22 (A.I.D. Regulation 1), is amended as follows:

In § 201.86 designate the present text as paragraph (a) and add the following new paragraph (b).

As amended § 201.86 reads as follows:

**§ 201.86 Continuation in effect of certain prior issuances.**

(a) The following documents, if issued or executed by A.I.D. or any predecessor agency or corporation prior to the effective date of this Part 201, will continue in effect subject to all the terms and conditions of such documents and, to the extent applicable, all the terms and conditions of Regulation 1 as in effect on the date of the issuance of such documents: Project agreements, procurement authorizations and project implementation orders, United States Government agency purchase requisitions, loan agreements and implementation letters, letters of commitment and letters of notification to banks, requests for the opening of a special letter of credit and letters of commitment to suppliers. Authorizations, bank contracts, letters of guaranty to banks or suppliers issued by A.I.D. or any predecessor agency or corporation prior to the effective date of this Part 201 will continue in effect in accordance with their terms. Amendments to any of the above documents may continue to be made in accordance with the procedures in effect prior to the effective date of this Part 201.

(b) Whenever a Supplier's Certificate A.I.D. Form 280 is required to be submitted under the provisions of this part as in effect prior to November 1, 1964, a Supplier's Certificate A.I.D. Form 281 completed and executed in accordance with the provisions of § 201.52(a) (6) and (b) may, at the election of the supplier, be submitted in lieu of such Supplier's Certificate A.I.D. Form 280, and, if such Supplier's Certificate A.I.D. Form 281 is submitted, the supplier executing the same shall be bound by the provisions thereof and by the provisions of this part as in effect at the time of his execution of such Supplier's Certificate.

Dated: December 9, 1964.

# Title 14—AERONAUTICS AND SPACE

## Chapter I—Federal Aviation Agency

[Docket No. 5066; Amdts. 1–6; 91–10]

## PART 1—DEFINITIONS AND ABBREVIATIONS [NEW]

## PART 4a—AIRPLANE AIRWORTHINESS

## PART 4b—AIRPLANE AIRWORTHINESS; TRANSPORT CATEGORIES

## PART 25—AIRWORTHINESS STANDARDS: TRANSPORT CATEGORY AIRPLANES [NEW]

## PART 91—GENERAL OPERATING AND FLIGHT RULES [NEW]

This amendment adds Part 25 [New] to the Federal Aviation Regulations to replace Part 4b of the Civil Air Regulations, and is a part of the Agency recodification program announced in Draft Release 61–25, published in the FEDERAL REGISTER on November 15, 1961 (26 F.R. 10698).

Part 25 [New] was published as a notice of proposed rule making in the FEDERAL REGISTER on June 2, 1964 (29 F.R. 7169), and given further distribution as Notice No. 64–28.

During the life of the recodification project, Chapter I of Title 14 may contain more than one part bearing the same number. To differentiate between the two, the recodified parts, such as this one, are labeled "[New]". The label will be dropped at the completion of the project as all of the regulations will be new.

Many of the comments received recommended specific substantive changes to the regulations. Many of these recommendations appear to be meritorious. However, they cannot be adopted as a part of the recodification program, since the purpose of the program is simply to streamline and clarify present regulatory language and delete obsolete or redundant provisions. To attempt substantive changes, other than relaxatory ones that are completely noncontroversial, would delay the project and be contrary to the ground rules specified for it in Draft Release 61–25. However, all comments of this nature will be preserved and considered in any later substantive revision of this part.

Present CAR Part 4b reflects the various writing styles used by those who have worked on it in the past. The recodification has allowed us to use one style throughout Part 25 [New]. The style changes that have been made do not affect substance. They have been made to ensure consistency in language throughout the new Federal Aviation Regulations, thereby making them easier to understand and apply. Part 25 [New] substitutes the word "must" for "shall". This has been done to reflect the fact that airworthiness standards are simply conditions precedent that are required to be met for the issue of a type certificate. The imperative "shall" would be inappropriate in this case. The failure to meet the standards simply results in a denial of the issue of the type certificate.

The sections in Part 25 [New] have been rearranged and renumbered so that the requirements of this part have the same number as comparable requirements in Parts 23 [New], 27 [New], and 29 [New]. Where there is no comparable requirement in Part 25, there is a gap in the section numbering (in addition to gaps from the use of odd section numbers only and the "growth" gaps between subtopics). In addition, some material has been rearranged in order to more logically place some requirements within the part. An example of this was the grouping of the parts of §§ 4b.117, 4b.361, 4b.362, 4b.437, 4b.640, 4b.719, 4b.736, 4b.740 through 4b.743, and SR 422B sections 4T.123 and 4T.743, dealing with recording of information and data in the Airplane Flight Manual, into the Airplane Flight Manual subdivision of this part. A similar rearrangement was made by combining the flutter requirements of §§ 4b.190(a), 4b.210(c)(3), and 4b.308 into § 25.629 and vibration requirements of these same sections into § 25.251.

The most significant changes to Part 25 since the notice are listed below. The numbers in parentheses refer to the section number in the notice and in former Part 4b, respectively.

Section 25.1001 (§ 25.733) (§ 4b.437) has been revised by changing the requirement for a placard to warn flight crewmembers against jettisoning fuel with flaps lowered (if it has not been shown that it is safe to do so with them lowered). It now reads "means (including flaps, slots, and slats) for changing the airflow across or around the wing" instead of the word flaps. This was done to update the language as these other devices (slats and slots) take the place of the flaps in some airplanes and are referred to in other regulations (particularly in ADs).

In § 25.611 (§ 25.401) (§ 4b.305) "periodic inspection" has been replaced with "recurring inspection". This avoids any potential conflict between the intent of the subject section, to cover all inspections that occur at regular intervals, and the more specific use of the term "periodic inspection" in Parts 43 [New] and 91 [New].

In response to a comment, a cross reference to § 25.1145(b) has been added to § 25.1307 (§ 25.947) (§ 4b.605) to make it clear that a ganged ignition switch may be used to satisfy the subject requirement.

Other minor changes of a technical clarifying nature have been made. They are not substantive and do not impose any burden on regulated persons. For example, the Agency is standardizing the language used to describe an aircraft, with respect to the type of engine installed, as follows:

An aircraft powered by a reciprocating engine is a "reciprocating engine powered aircraft".

An aircraft powered by a turbine engine is a "turbine engine powered aircraft".

An aircraft powered by a particular subtype of turbine engine is a "turbo-propeller powered aircraft" or "turbo-jet powered aircraft", whichever is appropriate.

In the notice, it was proposed to convert references to "miles" and "miles per hour" to their nautical equivalents. The only comment received was favorable. To make this part uniform and to conform to modern practice, "nautical miles" and "knots" have been used throughout. The associated values have been adjusted so that no increase in burden results.

This part incorporates Amendment 4b–15, Installation of Cockpit Voice Recorders, published in the FEDERAL REGISTER July 3, 1964, and Amendment 4b–16, Flutter Deformation and Vibration Requirements, published in the FEDERAL REGISTER on September 5, 1964.

The definitions, abbreviations, and rules of construction contained in Part 1 [New] of the Federal Aviation Regulations apply to Part 25 [New].

When Part 1 [New] was adopted, its preamble stated that it would be amended as necessary in order to apply to specific regulations as they were recodified. As part of this action, Part 1 [New] is being amended to incorporate definitions and abbreviations found to be necessary because of the adoption of subsequently issued Federal Aviation Regulations, including Subchapter C.

The definition of "accelerate-stop distance" has been incorporated from Parts 4b, 40, 41, and 42, that of "critical altitude", from Parts 3, 4b, 6, 7, and 13, and that of "load factor", from Parts 3, 4b, 6, and 7. The definitions of "clearway" and "stopway" have been incorporated from Special Civil Air Regulations 422A and 422B and, as a result, § 91.37 is being amended to delete the definitions of "clearway" and "stopway" in paragraph (d). Also, since SRs 422A and 422B, together, set forth the certification procedures for all turbine engine powered airplanes certificated after September 30, 1958, the references to the two SRs in § 91.37 have been replaced by references to their respective periods of effectiveness.

In addition to these definitions, Part 1 [New] is being amended to correctly reflect the "½" in the definition of "true airspeed" as a power rather than as a multiplicand.

The abbreviations and symbols set forth below have been incorporated from Parts 3, 4b, 6, and 7.

The performance and Airplane Flight Manual requirements of SR 422B are in this part. The corresponding requirements of SRs 422 and 422A are being deleted as they may no longer be used for airplanes to be certificated under this part. They will have the same status as any superseded section of a current rule. The operating rules of SRs 422, 422A, and 422B where current, will be put in the Air Carrier Operating rules.

As CAR Part 4a, "Airplane Airworthiness" has not been used for certification of new airplanes since 1947, it is being deleted. This action is consistent with the recodification aim of eliminating ob-

solete or unnecessary provisions and is similar to the action taken with Part 33 of the Civil Air Regulations and Parts 450, 560, and 580 of the Regulations of the Administrator. CAR 4a will have the same status as any superseded section of a current rule.

Interested persons have been afforded an opportunity to participate in the making of this regulation and due consideration has been given to all relevant matter presented. The Agency is particularly appreciative of the cooperative spirit in which the public's comments were submitted.

In consideration of the foregoing, Chapter I of Title 14 is amended as follows, effective February 1, 1965.

1. By deleting items 1 and 2 of SR 422.

2. By deleting items 1, 2, and 5 of SR 422A.

3. By deleting items 1, 2, and 5 of SR 422B.

4. By deleting Part 4a "Airplane Airworthiness".

5. By deleting Part 4b "Airplane Airworthiness, Transport Category".

6. By amending Part 1 "Definitions and Abbreviations" [New] as follows:

(a) By inserting the following new definitions in § 1.1:

"Accelerate-stop distance" means the distance required to accelerate an airplane to a specified speed and, assuming failure of the critical engine at the instant that speed ($V_1$) is attained, to bring the airplane to a stop.

"Clearway" means:

(1) For turbine engine powered airplanes certificated after August 29, 1959, an area beyond the runway, not less than 500 feet wide, centrally located about the extended centerline of the runway, and under the control of the airport authorities. The clearway is expressed in terms of a clearway plane, extending from the end of the runway with an upward slope not exceeding 1.25 percent, above which no object nor any terrain protrudes. However, threshold lights may protrude above the plane if their height above the end of the runway is 26 inches or less and if they are located to each side of the runway.

(2) For turbine engine powered airplanes certificated after September 30, 1958, but before August 30, 1959, an area beyond the takeoff runway extending no less than 300 feet on either side of the extended centerline of the runway, at an elevation no higher than the elevation of the end of the runway, clear of all fixed obstacles, and under the control of the airport authorities.

"Critical altitude" means the maximum altitude at which, in standard atmosphere, it is possible to maintain, at a specified rotational speed, a specified power or a specified manifold pressure. Unless otherwise stated, the critical altitude is the maximum altitude at which it is possible to maintain, at the maximum continuous rotational speed, one of the following:

(1) The maximum continuous power, in the case of engines for which this power rating is the same at sea level and at the rated altitude.

(2) The maximum continuous rated manifold pressure, in the case of engines, the maximum continuous power of which is governed by a constant manifold pressure.

"Load factor" means the ratio of a specified load to the total weight of the aircraft. The specified load is expressed in terms of any of the following: aerodynamic forces, inertia forces, or ground or water reactions.

"Stopway" means an area beyond the takeoff runway, no less wide than the runway and centered upon the extended centerline of the runway, able to support the airplane during an aborted takeoff, without causing structural damage to the airplane, and designated by the airport authorities for use in decelerating the airplane during an aborted takeoff.

(b) By amending the definition of "True airspeed" in § 1.1 to read as follows:

"True airspeed" means the airspeed of an aircraft relative to undisturbed air. True airspeed is equal to equivalent airspeed multiplied by $(\rho 0/\rho)^{1/2}$.

(c) By inserting the following new abbreviations and symbols in § 1.2:

EAS means equivalent airspeed.
IAS means indicated airspeed.
*M* means mach number.
PAR means precision approach radar.
TAS means true airspeed.
$V_A$ means design maneuvering speed.
$V_B$ means design speed for maximum gust intensity.
$V_C$ means design cruising speed.
$V_D$ means design diving speed.
$V_{DF}/M_{DF}$ means demonstrated flight diving speed.
$V_F$ means design flap speed.
$V_{FC}/M_{FC}$ means maximum speed for stability characteristics.
$V_{FE}$ means maximum flap extended speed.
$V_H$ means maximum speed in level flight with rated r.p.m. and power.
$V_{LE}$ means maximum landing gear extended speed.
$V_{LO}$ means maximum landing gear operating speed.
$V_{LOF}$ means lift-off speed.
$V_{MC}$ means minimum control speed with the critical engine inoperative.
$V_{MO}/M_{MO}$ means maximum operating limit speed.
$V_{MU}$ means minimum unstick speed.
$V_{NE}$ means never-exceed speed.
$V_R$ means rotation speed.
$V_S$ means the stalling speed or the minimum steady flight speed at which the airplane is controllable.
$V_{S_0}$ means the stalling speed or the minimum steady flight speed in the landing configuration.
$V_{S_1}$ means the stalling speed or the minimum steady flight speed obtained in a specified configuration.
$V_X$ means speed for best angle of climb.
$V_Y$ means speed for best rate of climb.
$V_1$ means critical-engine-failure speed.
$V_2$ means takeoff safety speed.
$V_{2\ min}$ means minimum takeoff safety speed.

7. By amending § 91.37 to read as follows:

**§ 91.37 Transport category civil airplane weight limitations.**

(a) No person may take off any transport category airplane (other than a turbine engine powered airplane certificated after September 30, 1958) unless—

(1) The takeoff weight does not exceed the authorized maximum takeoff weight for the elevation of the airport of takeoff;

(2) The elevation of the airport of takeoff is within the altitude range for which maximum takeoff weights have been determined;

(3) Normal consumption of fuel and oil in flight to the airport of intended landing will leave a weight on arrival not in excess of the authorized maximum landing weight for the elevation of that airport; and

(4) The elevations of the airport of intended landing and of all specified alternate airports are within the altitude range for which maximum landing weights have been determined.

(b) No person may operate a turbine engine powered transport category airplane certificated after September 30, 1958 contrary to the Airplane Flight Manual, nor take off that airplane unless—

(1) The takeoff weight does not exceed the takeoff weight specified in the Airplane Flight Manual for the elevation of the airport and for the ambient temperature existing at the time of takeoff;

(2) Normal consumption of fuel and oil in flight to the airport of intended landing and to the alternate airports will leave a weight on arrival not in excess of the landing weight specified in the Airplane Flight Manual for the elevation of each of the airports involved and for the ambient temperatures expected at the time of landing;

(3) The takeoff weight does not exceed the weight shown in the Airplane Flight Manual to correspond with the minimum distances required for takeoff considering the elevation of the airport, the runway to be used, the effective runway gradient, and the ambient temperature and wind component existing at the time of takeoff; and

(4) Where the takeoff distance includes a clearway, the clearway distance is not greater than one-half of—

(i) The takeoff run, in the case of airplanes certificated after September 30, 1958 and before August 30, 1959; or

(ii) The runway length, in the case of airplanes certificated after August 29, 1959.

(c) No person may take off a turbine engine powered transport category airplane certificated after August 29, 1959 unless, in addition to the requirements of paragraph (b) of this section—

(1) The accelerate-stop distance is no greater than the length of the runway plus the length of the stopway (if present);

(2) The takeoff distance is no greater than the length of the runway plus the length of the clearway (if present); and

(3) The takeoff run is no greater than the length of the runway.

8. By adding a Part 25 [New] reading as hereinafter set forth.

Issued in Washington, D.C., on November 3, 1964.

N. E. HALABY,
*Administrator.*

**Subpart A—General**

Sec.
25.1 Applicability.

**Subpart B—Flight**

GENERAL

25.21 Proof of compliance.
25.23 Load distribution limits.
25.25 Weight limits.
25.27 Center of gravity limits.
25.29 Empty weight and corresponding center of gravity.
25.31 Removable ballast.
25.33 Propeller speed and pitch limits.

PERFORMANCE: RECIPROCATING ENGINE POWERED AIRPLANES

25.45 General.
25.47 Wing flap position.
25.49 Stalling speeds.
25.51 Takeoff.
25.55 Takeoff speeds.
25.57 Accelerate-stop distance.
25.59 Takeoff path.
25.61 Temperature accountability.
25.65 Climb: all engines operating.
25.67 Climb: one engine inoperative.
25.69 Climb: two engines inoperative.
25.75 Landing.

PERFORMANCE: TURBINE ENGINE POWERED AIRPLANES

25.101 General.
25.103 Stalling speed.
25.105 Takeoff.
25.107 Takeoff speeds.
25.109 Accelerate-stop distance.
25.111 Takeoff path.
25.113 Takeoff distance and takeoff run.
25.115 Takeoff flight path.
25.117 Climb: general.
25.119 Landing climb: All-engine-operating.
25.121 Climb: One-engine-inoperative.
25.123 En route flight paths.
25.125 Landing.

CONTROLLABILITY AND MANEUVERABILITY

25.143 General.
25.145 Longitudinal control.
25.147 Directional and lateral control.
25.149 Minimum control speed.

TRIM

25.161 Trim.

STABILITY

25.171 General.
25.173 Static longitudinal stability.
25.175 Demonstration of static longitudinal stability.
25.177 Static directional and lateral stability.
25.181 Dynamic longitudinal, directional, and lateral stability.

STALLS

Sec.
25.201 Stall demonstration.
25.203 Stall characteristics.
25.205 Stalls: critical engine inoperative.
25.207 Stall warning.

GROUND AND WATER HANDLING CHARACTERISTICS

25.231 Longitudinal stability and control.
25.233 Directional stability and control.
25.235 Taxiing condition.
25.237 Wind velocities.
25.239 Spray characteristics and control and stability on water.

MISCELLANEOUS FLIGHT REQUIREMENTS

25.251 Vibration and buffeting.
25.253 High-speed characteristics.

**Subpart C—Structure**

GENERAL

25.301 Loads.
25.303 Factor of safety.
25.305 Strength and deformation.
25.307 Proof of structure.

FLIGHT LOADS

25.321 General.

FLIGHT MANEUVER AND GUST CONDITIONS

25.331 General.
25.333 Flight envelope.
25.335 Design airspeeds.
25.337 Limit maneuvering load factors.
25.341 Gust loads.
25.343 Design fuel and oil loads.
25.345 High lift devices.
25.349 Rolling conditions.
25.351 Yawing conditions.

SUPPLEMENTARY CONDITIONS

25.361 Engine torque.
25.363 Side load on engine mount.
25.365 Pressurized cabin loads.
25.367 Unsymmetrical loads due to engine failure.
25.371 Gyroscopic loads.
25.373 Speed control devices.

CONTROL SURFACE AND SYSTEM LOADS

25.391 Control surface loads; general.
25.393 Loads parallel to hinge line.
25.395 Control system.
25.397 Control system loads.
25.399 Dual control systems.
25.405 Secondary control system.
25.407 Trim tab effects.
25.409 Tabs.
25.415 Ground gust conditions.
25.427 Unsymmetrical loads.
25.445 Outboard fins.
25.457 Wing flaps.
25.459 Special devices.

GROUND LOADS

Sec.
25.471 General.
25.473 Ground load conditions and assumptions.
25.477 Landing gear arrangement.
25.479 Level landing conditions.
25.481 Tail-down landing conditions.
25.483 One-wheel landing conditions.
25.485 Side load conditions.
25.487 Rebound landing conditions.
25.489 Ground handling conditions.
25.491 Takeoff run.
25.493 Braked roll conditions.
25.495 Turning.
25.497 Tail-wheel yawing.
25.499 Nose-wheel yaw.
25.503 Pivoting.
25.507 Reversed braking.
25.509 Towing loads.
25.511 Ground loads: unsymmetrical loads on multiple-wheel units.

WATER LOADS

25.521 General.
25.523 Design weights and center of gravity positions.
25.525 Application of loads.
25.527 Hull and main float load factors.
25.529 Hull and main float landing conditions.
25.531 Hull and main float takeoff condition.
25.533 Hull and main float bottom pressures.
25.535 Auxiliary float loads.
25.537 Seawing loads.

EMERGENCY LANDING CONDITIONS

25.561 General.
25.563 Structural ditching provisions.

FATIGUE EVALUATION

25.571 Fatigue evaluation of flight structure.
25.573 Fatigue evaluation of landing gear.

Subpart D—Design and Construction

GENERAL

25.601 General.
25.603 Materials.
25.605 Fabrication methods.
25.607 Self-locking nuts.
25.609 Protection of structure.
25.611 Inspection provisions.
25.613 Material strength properties and design values.
25.615 Design properties.
25.619 Special factors.
25.621 Casting factors.
25.623 Bearing factors.
25.625 Fitting factors.
25.629 Flutter, deformation, and fail-safe criteria.

CONTROL SURFACES

Sec.
25.651 Proof of strength.
25.655 Installation.
25.657 Hinges.

CONTROL SYSTEMS

25.671 General.
25.673 Two-control airplanes.
25.675 Stops.
25.677 Trim systems.
25.679 Control system gust locks.
25.681 Limit load static tests.
25.683 Operation tests.
25.685 Control system details.
25.689 Cable systems.
25.693 Joints.
25.695 Power boost and power-operated control system.
25.697 Wing flap controls.
25.699 Wing flap position indicator.
25.701 Flap interconnection.

LANDING GEAR

25.721 General.
25.723 Shock absorption tests.
25.725 Limit drop tests.
25.727 Reserve energy absorption drop tests.
25.729 Retracting mechanism.
25.731 Wheels.
25.733 Tires.
25.735 Brakes.
25.737 Skis.

FLOATS AND HULLS

25.751 Main float buoyancy.
25.753 Main float design.
25.755 Hulls.

PERSONNEL AND CARGO ACCOMMODATIONS

25.771 Pilot compartment.
25.773 Pilot compartment view.
25.775 Windshields and windows.
25.777 Cockpit controls.
25.779 Motion and effect of cockpit controls.
25.781 Cockpit control knob shape.
25.783 Doors.
25.785 Seats, berths, safety belts, and harnesses.
25.787 Cargo and baggage compartments.

EMERGENCY PROVISIONS

25.801 Ditching.
25.803 Emergency evacuation.
25.805 Flight crew emergency exits.
25.807 Passenger emergency exits.
25.809 Emergency exit arrangement.
25.811 Emergency exit marking.
25.813 Emergency exit access.
25.815 Width of main aisle.

VENTILATION AND HEATING

25.831 Ventilation.
25.833 Heating systems.

PRESSURIZATION

Sec.
25.841 Pressurized cabins.
25.843 Tests for pressurized cabins.

FIRE PROTECTION

25.851 Fire extinguishers.
25.853 Compartment interiors.
25.855 Cargo and baggage compartments.
25.857 Cargo compartment classification.
25.859 Combustion heater fire protection.
25.863 Flammable fluid fire protection.

MISCELLANEOUS

25.871 Leveling marks.
25.875 Reinforcement near propellers.

Subpart E—Powerplant

GENERAL

25.901 Installation.
25.903 Engines.
25.905 Propellers.
25.907 Propeller vibration.
25.925 Propeller clearance.
25.929 Propeller deicing.
25.933 Reversing systems.
25.937 Turbopropeller-drag limiting systems.
25.939 Turbine engine powerplant operating characteristics.

FUEL SYSTEM

25.951 General.
25.953 Fuel system independence.
25.955 Fuel flow.
25.957 Flow between interconnected tanks.
25.959 Unusable fuel supply.
25.961 Fuel system hot weather operation.
25.963 Fuel tanks: general.
25.965 Fuel tank tests.
25.967 Fuel tank installations.
25.969 Fuel tank expansion space.
25.971 Fuel tank sump.
25.973 Fuel tank filler connection.
25.975 Fuel tank vents and carburetor vapor vents.
25.977 Fuel tank outlet.
25.979 Under-wing fueling provisions.

FUEL SYSTEM COMPONENTS

25.991 Fuel pumps.
25.993 Fuel system lines and fittings.
25.995 Fuel valves.
25.997 Fuel strainer or filter.
25.999 Fuel system drains.
25.1001 Fuel jettisoning system.

OIL SYSTEM

25.1011 General.
25.1013 Oil tanks.
25.1015 Oil tank tests.
25.1017 Oil lines and fittings.
25.1019 Oil strainer or filter.
25.1021 Oil drains.
25.1023 Oil radiators.
25.1025 Oil valves.
25.1027 Propeller feathering system.

COOLING

Sec.
25.1041 General.
25.1043 Cooling tests.
25.1045 Cooling test procedures.

INDUCTION SYSTEM

25.1091 Air induction.
25.1093 Induction system deicing and anti-icing provisions.
25.1101 Carburetor air preheater design.
25.1103 Induction system ducts.
25.1105 Induction system screens.
25.1107 Inter-coolers and after-coolers.

EXHAUST SYSTEM

25.1121 General.
25.1123 Exhaust piping.
25.1125 Exhaust heat exchangers.
25.1127 Exhaust driven turbo-superchargers.

POWERPLANT CONTROLS AND ACCESSORIES

25.1141 Powerplant controls: general.
25.1143 Throttle and antidetonant injection system controls.
25.1145 Ignition switches.
25.1147 Mixture controls.
25.1149 Propeller speed and pitch controls.
25.1153 Propeller feathering controls.
25.1155 Reverse thrust controls.
25.1157 Carburetor air temperature controls.
25.1159 Supercharger controls.
25.1161 Fuel jettisoning system controls.
25.1163 Powerplant accessories.
25.1165 Engine ignition systems.

POWERPLANT FIRE PROTECTION

25.1181 Designated fire zones; regions included.
25.1183 Lines and fittings.
25.1185 Flammable fluids.
25.1187 Drainage and ventilation of fire zones.
25.1189 Shutoff means.
25.1191 Firewalls.
25.1193 Cowling and nacelle skin.
25.1195 Fire extinguishing systems.
25.1197 Fire extinguishing agents.
25.1199 Extinguishing agent containers.
25.1203 Fire-detector system.
25.1205 Fire protection: other components.

Subpart F—Equipment

GENERAL

25.1301 Function and installation.
25.1303 Flight and navigation instruments.
25.1305 Powerplant instruments.
25.1307 Miscellaneous equipment.
25.1309 Equipment systems and installations.

INSTRUMENTS; INSTALLATION

25.1321 Arrangement and visibility.
25.1323 Airspeed indicating system.

Sec.
25.1325 Static air vent and pressure altimeter systems.
25.1327 Magnetic direction indicator.
25.1329 Automatic pilot system.
25.1331 Instruments using a power supply.
25.1333 Duplicate instrument systems.
25.1337 Powerplant instruments.

ELECTRICAL SYSTEMS AND EQUIPMENT

25.1351 General.
25.1353 Electrical equipment and installations.
25.1355 Distribution system.
25.1357 Circuit protective devices.
25.1359 Electrical system fire and smoke protection.
25.1363 Electrical system tests.
25.1369 Lightning strike protection.

LIGHTS

25.1381 Instrument lights.
25.1383 Landing lights.
25.1385 Position light system installation.
25.1387 Position light system dihedral angles.
25.1389 Position light distribution and intensities.
25.1391 Minimum intensities in the horizontal plane of forward and rear position lights.
25.1393 Minimum intensities in any vertical plane of forward and rear position lights.
25.1395 Maximum intensities in overlapping beams of forward and rear position lights.
25.1397 Color specifications.
25.1399 Riding light.
25.1401 Anticollision light system.

SAFETY EQUIPMENT

25.1411 General.
25.1413 Safety belts.
25.1415 Ditching equipment.
25.1419 Ice protection.

MISCELLANEOUS EQUIPMENT

25.1431 Electronic equipment.
25.1433 Vacuum systems.
25.1435 Hydraulic systems.
25.1439 Protective breathing equipment.
25.1441 Oxygen equipment and supply.
25.1443 Minimum mass flow of supplemental oxygen.
25.1445 Equipment standards for the oxygen distributing system.
25.1447 Equipment standards for oxygen dispensing units.
25.1449 Means for determining use of oxygen.
25.1451 Fire protection for oxygen equipment.
25.1453 Protection of oxygen equipment from rupture.

Sec.
25.1455 Draining of fluids subject to freezing.
25.1457 Cockpit voice recorders.

Subpart G—Operating Limitations and Information

25.1501 General.

OPERATING LIMITATIONS

25.1503 Airspeed limitations: general.
25.1505 Maximum operating limit speed.
25.1507 Maneuvering speed.
25.1511 Flap extended speed.
25.1513 Minimum control speed.

APPENDIXES

APPENDIX A

APPENDIX B

APPENDIX C

AUTHORITY: The provisions of this Part 25 issued under secs. 313(a), 601, 603, Federal Aviation Act of 1958; 49 U.S.C. 1354(a), 1421, and 1423.

## Subpart A—General

### § 25.1 Applicability.

(a) This part prescribes airworthiness standards for the issue of type certificates, and changes to those certificates, for transport category airplanes.

(b) Each person who applies under Part 21 [New] for such a certificate or change must show compliance with the applicable requirements in this part.

## Subpart B—Flight

GENERAL

### § 25.21 Proof of compliance.

(a) Each requirement of this subpart must be met at each appropriate combination of weight and center of gravity within the range of loading conditions for which certification is requested. This must be shown—

(1) By tests upon an airplane of the type for which certification is requested, or by calculations based on, and equal in accuracy to, the results of testing; and

(2) By systematic investigation of each probable combination of weight and center of gravity, if compliance cannot be reasonably inferred from combinations investigated.

(b) If there is less than a 2 knot difference in the forward and rearward c.g. stalling speeds, the flying qualities may be based upon the forward c.g. stalling speeds.

(c) The controllability, stability, trim, and stalling characteristics of the airplane must be shown for each altitude up to the maximum expected in operation.

(d) The following general tolerances from specified values are allowed during flight testing. However, greater tolerances may be allowed in particular tests. These tolerances are plus or minus variations unless otherwise noted in the particular test:

| *Item* | *Tolerance* |
|---|---|
| Weight | +5%, −10%. |
| Critical items affected by weight. | +5%, −1%. |
| C.G | 7% total travel. |
| Airspeed | 3 knots or 3%, whichever is higher. |
| Power | 5%. |
| Wind (takeoff and landing tests). | As low as possible but not to exceed approximately 12% $V_{S_1}$ or 10.0 knots, whichever is lower, along the runway—measured at a height of six feet above the runway surface. |

### § 25.23 Load distribution limits.

(a) Ranges of weights and centers of gravity within which the airplane may be safely operated must be established. If a weight and center of gravity combination is allowable only within certain load distribution limits (such as spanwise) that could be inadvertently exceeded, these limits and the corresponding weight and center of gravity combinations must be established.

(b) The load distribution limits may not exceed—

(1) The selected limits;

(2) The limits at which the structure is proven; or

(3) The limits at which compliance with each applicable flight requirement of this subpart is shown.

### § 25.25 Weight limits.

(a) *Maximum weight.* The maximum weight (the highest weight at which compliance with each applicable requirement of this part is shown) must be established so that it is not more than—

(1) The highest weight selected by the applicant;

(2) The design maximum weight (the highest weight at which compliance with each applicable structural loading condition of this part is shown; or

(3) The highest weight at which compliance with each applicable flight requirement is shown.

(b) *Minimum weight.* The minimum weight (the lowest weight at which compliance with each applicable requirement of this part is shown) must be established so that it is not less than—

(1) The lowest weight selected by the applicant;

(2) The design minimum weight (the lowest weight at which compliance with each structural loading condition of this part is shown); or

(3) The lowest weight at which compliance with each applicable flight requirement is shown.

### § 25.27 Center of gravity limits.

The extreme forward and the extreme aft center of gravity limitations must be established for each practicably separable operating condition. No such limit may lie beyond—

(a) The extremes selected by the applicant;

(b) The extremes within which the structure is proven; or

(c) The extremes within which compliance with each applicable flight requirement is shown.

**§ 25.29 Empty weight and corresponding center of gravity.**

(a) The empty weight and corresponding center of gravity must be determined by weighing the airplane with—

(1) Fixed ballast;

(2) Unusable fuel determined under § 25.959;

(3) Undrainable oil; and

(4) Hydraulic fluid.

(b) The condition of the airplane at the time of determining empty weight must be one that is well defined and can be easily repeated.

**§ 25.31 Removable ballast.**

Removable ballast may be used in showing compliance with the flight requirements of this subpart.

**§ 25.33 Propeller speed and pitch limits.**

(a) The propeller speed and pitch must be limited to values that will ensure—

(1) Safe operation under normal operating conditions; and

(2) Compliance with the performance requirements in §§ 25.45 through 25.75 for reciprocating engine powered airplanes, and §§ 25.101 through 25.125 for turbopropeller powered airplanes.

(b) There must be a propeller speed limiting means at the governor. It must limit the maximum possible governed engine speed to a value not exceeding the maximum allowable r.p.m.

(c) The low pitch blade stop, or other means used to limit the low pitch position of the propeller blades, must be set so that the engine speed does not exceed 103 percent of the maximum allowable engine r.p.m. with—

(1) The propeller blades at the low pitch limit and governor inoperative; and

(2) Takeoff manifold pressure with the airplane stationary under standard atmospheric conditions.

PERFORMANCE: RECIPROCATING ENGINE POWERED AIRPLANES

**§ 25.45 General.**

(a) For reciprocating engine powered airplanes, compliance with each applicable performance requirement of this subpart must be shown—

(1) For still air with a standard atmosphere; and

(2) Where engine power affects performance, with air at 80 percent relative humidity, in accordance with paragraph (c) of this section.

(b) Performance data required for a particular flight condition must be determined with each powerplant accessory absorbing the normal amount of power appropriate to that condition.

(c) Engine power corrections for vapor pressure must be made in accordance with the following table:

| Altitude $H$ (ft.) | Vapor pressure $e$ (in. Hg.) | Specific humidity $\omega$ (lb. moisture per lb. dry air) | Density ratio $\frac{\rho}{\rho_0}=\frac{0.0023769}{\rho}$ |
|---|---|---|---|
| 0 | 0.403 | 0.00849 | 0.99508 |
| 1,000 | .354 | .00773 | .96672 |
| 2,000 | .311 | .00703 | .93895 |
| 3,000 | .272 | .00638 | .91178 |
| 4,000 | .238 | .00578 | .88514 |
| 5,000 | .207 | .00523 | .85910 |
| 6,000 | .1805 | .00472 | .83361 |
| 7,000 | .1566 | .00425 | .80870 |
| 8,000 | .1356 | .00382 | .78434 |
| 9,000 | .1172 | .00343 | .76053 |
| 10,000 | .1010 | .00307 | .73722 |
| 15,000 | .0463 | .001710 | .62868 |
| 20,000 | .01978 | .000890 | .53293 |
| 25,000 | .00778 | .000436 | .44806 |

**§ 25.47 Wing flap position.**

Takeoff, en route, approach, and landing wing flap positions must be selected by the applicant. Flap positions may vary with weight and altitude.

**§ 25.49 Stalling speeds.**

(a) $V_{S_0}$ is the calibrated stalling speed, or the minimum steady speed, in knots, at which the airplane is controllable, with the—

(1) Engines idling, throttles closed (or at not more than the power necessary for zero thrust at a speed not more than 110 percent of the stalling speed);

(2) Propeller pitch in the takeoff position;

(3) Landing gear extended;

(4) Wing flaps in the landing position;

(5) Cowl flaps closed;

(6) Center of gravity in the most unfavorable position within the allowable landing range; and

(7) Weight used when $V_{S_0}$ is being used as a factor to determine compliance with a required performance standard.

(b) $V_{S_1}$ is the calibrated stalling speed, or the minimum steady speed, in knots, at which the airplane is controllable, with the—

(1) Engines idling, throttles closed (or at not more than the power necessary for zero thrust at a speed not more than 110 percent of the stalling speed);

(2) Propeller pitch in the takeoff position;

(3) Airplane in other respects (such as flaps and landing gear) in the condition existing in the test in which $V_{S_1}$ is being used; and

(4) Weight used when $V_{S_1}$ is being used as a factor to determine compliance with a required performance standard.

(c) The stalling speeds $V_{S_0}$ and $V_{S_1}$ are the minimum speeds obtained in flight tests conducted as follows:

(1) At a speed great enough above the probable stall speed to ensure steady conditions, apply the elevator control at a rate so that the airplane speed reduction does not exceed one knot per second.

(2) During these tests—

(i) The airplane must be trimmed at 1.4 $V_{S_1}$ except that airplanes with adjustable stabilizers may be trimmed at any speed from 1.2 $V_{S_1}$ to 1.4 $V_{S_1}$; and

(ii) The flight requirements of § 25.203 must be met.

**§ 25.51 Takeoff.**

(a) The takeoff speeds described in § 25.55, the accelerate-stop distance described in § 25.57, and the takeoff path described in § 25.59, must be determined—

(1) At each weight and altitude selected by the applicant;

(2) With a constant takeoff flap position for the weight and altitude; and

(3) With the operating engines within approved operating limitations.

(b) No takeoff made to determine the data required by this section may require exceptional piloting skill or alertness.

(c) The takeoff data must be based on—

(1) A smooth, dry, hard-surfaced runway, in the case of landplanes and amphibians;

(2) Smooth water, in the case of seaplanes and amphibians; and

(3) Smooth, dry snow, in the case of skiplanes.

(d) Temperature accountability corrections must be made in accordance with § 25.61.

**§ 25.55 Takeoff speeds.**

(a) $V_1$ must be selected by the applicant and must be at least the minimum calibrated airspeed at which controllability is shown (during the takeoff run) to be adequate to safely continue the takeoff, using normal piloting skill, when the critical engine is suddenly made inoperative. This need not be shown if the engine failure is assumed to occur at $V_2$ or above.

(b) $V_2$, in terms of calibrated airspeed, must be selected by the applicant to allow the rate of climb required in § 25.67 (a) and b). However, $V_2$ may not be less than—

(1) 1.2 $V_{S_1}$ for two-engine airplanes;

(2) 1.15 $V_{S_1}$ for airplanes with more than two engines; or

(3) 1.10 times $V_{MC}$ established under § 25.149.

**§ 25.57 Accelerate-stop distance.**

(a) Means other than wheel brakes may be used to determine the accelerate-stop distance if that means—

(1) Is safe and reliable;

(2) Is used so that consistent results can be expected under normal operating conditions; and

(3) Is such that exceptional skill is not required to control the airplane.

(b) The landing gear must remain extended throughout the accelerate-stop distance.

**§ 25.59 Takeoff path.**

(a) The takeoff path consists of the following elements:

(1) The distance required to accelerate to $V_2$, assuming the critical engine fails at $V_1$.

(2) The horizontal distance traversed, and the height reached, by the airplane in the time required to retract the landing gear at $V_2$, with the landing gear extended, the critical engine inoperative, and—

(i) The propeller of the inoperative engine windmilling and its control in a position normally used during takeoff until (if applicable) the rotation is stopped; and

(ii) The propeller of the inoperative engine feathered (if applicable) for the rest of the gear retraction time.

(3) If applicable, the horizontal distance traversed and the height reached by the airplane in the time elapsed from the end of the element in paragraph (a) (2) of this section until the rotation of the propeller of the inoperative engine is stopped—

(i) With the stopping of the propeller begun no earlier than the time at which the airplane is 50 feet above the takeoff surface;

(ii) At $V_2$;

(iii) With the landing gear retracted; and

(iv) With the propeller of the inoperative engine windmilling with the propeller control in the normal takeoff position.

(4) If applicable, the horizontal distance traversed and the height reached by the airplane in the time from the end of the element in paragraph (a) (3) until the time limit on the use of takeoff power is reached—

(i) At $V_2$;

(ii) With the propeller of the inoperative engine stopped; and

(iii) With the landing gear retracted.

(5) The slope of the flight path followed by the airplane in the configuration prescribed in paragraph (a) (4) with not more than maximum continuous power on the operating engines.

(b) For automatically feathering propellers for which the net work produced, from the instant of engine failure to completion of feathering under any kind of engine failure, is positive (using a datum based on feathered propeller drag), it may be assumed that the propeller of the failed engine is in the feathered drag condition from the instant $V_2$ is reached.

**§ 25.61 Temperature accountability.**

(a) Operating correction factors for temperatures above and below standard must be determined for takeoff weight and distance.

(b) The average full temperature accountability must be computed for the range of weights, altitudes above sea level, and ambient temperatures expected in operations. The effect of temperature on the aerodynamic characteristics and on engine power must be considered. Full temperature accountability, in terms of a weight correction, a takeoff distance correction, and a change, if any, in $V_1$, must be expressed per degree change in temperature.

(c) The operating correction factors for the weight and takeoff distance must be at least one-half of the full accountability values. The value of $V_1$ must be further corrected by the average amount necessary to ensure that the airplane can stop within the runway length at the ambient temperature. However, the corrected value of $V_1$ may not be less than the minimum at which the airplane can be controlled with the critical engine inoperative.

**§ 25.65 Climb: all engines operating.**

(a) *Cruising configuration.* The steady rate of climb in feet per minute at 5,000 feet, in the cruising configuration, must be at least 9.0 $V_{S_0}$ (that is, the number of feet per minute is obtained by multiplying the number of knots by 9.0). In addition, the steady rate of climb must be determined at any altitude at which the airplane is expected to operate and at any weight for which certification is requested. The steady rate of climb must be shown under the following conditions:

(1) Landing gear fully retracted.

(2) Wing flaps in the most favorable position.

(3) Cowl flaps (or other means of controlling the engine cooling air supply) in the position that provides adequate cooling in the hot-day condition.

(4) Most unfavorable center of gravity position.

(5) Engines operating within the maximum continuous power limitations.

(6) Maximum takeoff weight.

(b) *Landing configuration.* The steady rate of climb in feet per minute in the landing configuration must be at least 0.092 $V_{S_0}^2$ at any altitude within the range of altitudes in which landing weight is certificated, and must be shown under the following conditions:

(1) Landing gear extended.

(2) Wing flaps in the landing position.

(3) Cowl flaps in the position normally used in an approach to a landing.

(4) The most unfavorable center of gravity allowed for landing.

(5) Engines operating at the takeoff power available at that altitude.

(6) The weight equal to maximum landing weight for that altitude.

(7) A climb speed not more than 1.4 $V_{S_0}$.

**§ 25.67 Climb: one engine inoperative.**

(a) *Flaps in takeoff position; landing gear extended.* The steady rate of climb without ground effect must be at least 50 ft./min. at any altitude within the range of takeoff altitudes for which certification is requested, and must be shown at $V_2$ with—

(1) Wing flaps in the takeoff position;

(2) Cowl flaps in the normal takeoff position;

(3) The most unfavorable center of gravity allowed for takeoff;

(4) The critical engine inoperative and (except as provided in paragraph (c) of this section) its propeller windmilling with the propeller control in a normal takeoff position;

(5) The remaining engines operating at the available takeoff power;

(6) The maximum takeoff weight for the takeoff altitude; and

(7) Landing gear extended.

(b) *Flaps in takeoff position; landing gear retracted.* With the landing gear retracted, the steady rate of climb in feet per minute must be at least 0.046 $V_{S_1}^2$ under the conditions described in paragraph (a) of this section.

(c) *Automatic feathering.* The propeller of the inoperative engine may be in the feathered condition during the landing gear extended or retracted conditions if—

(1) The propeller would be completely feathered at the beginning of these segments of the takeoff flight path; or

(2) The net work produced by the feathering propeller during the segment is positive, using a datum based on feathered propeller drag.

(d) *Flaps in en route position.* The steady rate of climb in feet per minute, at any expected operating altitude and at any weight within the range of weights for which certification is requested, must be determined. At a standard altitude of 5,000 feet and at the maximum takeoff weight, this rate must be at least

$$\left(0.079-\frac{0.106}{N}\right)V_{S_0}^2,$$

where $N$ is the number of engines. The steady rate of climb must be shown with the—

(1) Landing gear retracted;

(2) Wing flaps in the most favorable position;

(3) Cowl flaps (or other means of controlling the engine-cooling air supply) in the position that provides adequate cooling in the hot-day condition;

(4) The most unfavorable center of gravity;

(5) Critical engine inoperative and its propeller stopped; and

(6) Remaining engines at the maximum continuous power available for the altitude.

(e) *Flaps in approach position.* The steady rate of climb in feet per minute must be at least 0.053 $V_{S_0}^2$ at any altitude within the range of altitudes for which landing weight is certificated, and must be shown with the—

(1) Landing gear retracted;

(2) Wing flaps set in position so that $V_{S_1}$ does not exceed 1.10 $V_{S_0}$;

(3) Cowl flaps in the normal approach position;

(4) The most unfavorable center of gravity position allowed for landing;

(5) Critical engine inoperative and its propeller stopped;

(6) Remaining engines at the available takeoff power;

(7) Weight equal to the maximum landing weight for the altitude; and

(8) Climb speed not more than 1.5 $V_{S_1}$.

**§ 25.69 Climb: two engines inoperative.**

For airplanes with four or more engines, the steady rate of climb at any expected operating altitude, and at any weight within the range of weights specified in the Airplane Flight Manual, must be determined with the—

(a) Landing gear retracted;

(b) Wing flaps in the most favorable position;

(c) Cowl flaps (or other means of controlling the engine cooling air supply) in the position that provides adequate cooling in the hot-day condition;

(d) The most unfavorable center of gravity;

(e) Two critical engines on one side of the airplane inoperative and their propellers stopped; and

(f) Remaining engines at the maximum continuous power available at each altitude.

No. 250

**§ 25.75 Landing.**

(a) The horizontal distance necessary to land and to come to a complete stop (or to a speed of approximately 3 knots for water landings) from a point 50 feet above the landing surface must be determined (for the range of weights and altitudes selected by the applicant) as follows:

(1) A steady gliding approach, with a calibrated airspeed of at least 1.3 $V_{S_0}$, must be maintained down to the 50 foot height.

(2) After reaching the 50 foot height—

(i) The nose may not be depressed; and

(ii) Forward thrust may not be increased by the application of power.

(3) The flaps must be in the landing position from a point immediately before landing to the point at which the airplane is on the landing surface and the calibrated airspeed is reduced to 0.9 $V_{S_0}$.

(4) The landing must be made without excessive vertical acceleration, tendency to bounce, nose over, ground loop, porpoise, or water loop.

(5) The landing may not require exceptionally favorable conditions.

(b) For landplanes and amphibians, the landing distance on land must be determined on a dry, hard-surfaced runway. In addition—

(1) The pressures on the wheel braking system may not exceed those specified by the brake manufacturer;

(2) The brakes may not be used so as to cause tire skidding or excessive heating requiring replacement during a series of five test landings; and

(3) Means other than wheel brakes may be used if that means—

(i) Is safe and reliable;

(ii) Is used so that consistent results can be expected in service; and

(iii) Is such that exceptional skill is not required to control the airplane.

(c) For seaplanes and amphibians, the landing distance on water must be determined on smooth water.

(d) For skiplanes, the landing distance on snow must be determined on smooth, dry snow.

## PERFORMANCE: TURBINE ENGINE POWERED AIRPLANES

**§ 25.101 General.**

(a) Unless otherwise prescribed, turbine powered airplanes must meet the applicable performance requirements of this subpart for ambient atmospheric conditions and still air.

(b) The performance, as affected by engine power or thrust, must be based on a relative humidity of—

(1) 80 percent, at and below standard temperatures; and

(2) 34 percent, at and above standard temperatures plus 50° F.

Between these two temperatures, the relative humidity must vary linearly.

(c) The performance must correspond to the propulsive thrust available under the particular ambient atmospheric conditions, the particular flight condition, and the relative humidity specified in paragraph (b) of this section. The available propulsive thrust must correspond to engine power or thrust, not exceeding the approved power or thrust, less—

(1) Installation losses; and

(2) The power or equivalent thrust absorbed by the accessories and services appropriate to the particular ambient atmospheric conditions and the particular flight condition.

(d) Unless otherwise prescribed, the applicant must select the takeoff, en route, approach, and landing configurations for the airplane.

(e) The airplane configurations may vary with weight, altitude, and temperature, to the extent they are compatible with the operating procedures required by paragraph (f) of this section.

(f) Unless otherwise prescribed, in determining the accelerate-stop distances, takeoff flight paths, takeoff distances, and landing distances, changes in the airplane's configuration, speed, power, and thrust, must be made in accordance with procedures established by the applicant for operation in service.

(g) Procedures for the execution of balked landings and missed approaches associated with the conditions prescribed in §§ 25.119 and 25.121(d) must be established.

(h) The procedures established under paragraphs (f) and (g) of this section must—

(1) Be able to be consistently executed in service by crews of average skill;

(2) Use methods or devices that are safe and reliable; and

(3) Include allowance for any time delays, in the execution of the procedures, that may reasonably be expected in service.

**§ 25.103 Stalling speed.**

(a) $V_S$ is the calibrated stalling speed, or the minimum steady flight speed, in knots, at which the airplane is controllable, with—

(1) Zero thrust at the stalling speed, or, if the resultant thrust has no appreciable effect on the stalling speed, with engines idling and throttles closed;

(2) Propeller pitch controls (if applicable) in the position necessary for compliance with subparagraph (1) of this paragraph and the airplane in other respects (such as flaps and landing gear) in the condition existing in the test in which $V_S$ is being used;

(3) The weight used when $V_S$ is being used as a factor to determine compliance with a required performance standard; and

(4) The most unfavorable center of gravity allowable.

(b) The stalling speed $V_S$ is the minimum speed obtained as follows:

(1) Trim the airplane for straight flight at any speed not less than 1.2 $V_S$ or more than 1.4 $V_S$. At a speed sufficiently above the stall speed to ensure steady conditions, apply the elevator control at a rate so that the airplane speed reduction does not exceed one knot per second.

(2) Meet the flight characteristics provisions of § 25.203.

**§ 25.105 Takeoff.**

(a) The takeoff speeds described in § 25.107, the accelerate-stop distance described in § 25.109, the takeoff path described in § 25.111, and the takeoff distance and takeoff run described in § 25.113, must be determined—

(1) At each weight, altitude, and ambient temperature within the operational limits selected by the applicant; and

(2) In the selected configuration for takeoff.

(b) No takeoff made to determine the data required by this section may require exceptional piloting skill or alertness.

(c) The takeoff data must be based on—

(1) A smooth, dry, hard-surfaced runway, in the case of land planes and amphibians;

(2) Smooth water, in the case of seaplanes and amphibians; and

(3) Smooth, dry snow, in the case of skiplanes.

(d) The takeoff data must include, within the established operational limits of the airplane, the following operational correction factors:

(1) Not more than 50 percent of nominal wind components along the takeoff path opposite to the direction of takeoff, and not less than 150 percent of nominal wind components along the takeoff path in the direction of takeoff.

(2) Effective runway gradients.

**§ 25.107 Takeoff speeds.**

(a) $V_1$ must be selected by the applicant and must be at least the minimum calibrated airspeed at which controllability by primary aerodynamic controls alone is shown (during the takeoff run) to be adequate to safely continue the takeoff, using normal piloting skill, when the critical engine is suddenly made inoperative.

(b) $V_{2\ min}$, in terms of calibrated airspeed, may not be less than—

(1) 1.2 $V_S$ for—

(i) Two-engine and three-engine turbopropeller powered airplanes; and

(ii) Turbojet powered airplanes without provisions for obtaining a significant reduction in the one-engine-inoperative power-on stalling speed;

(2) 1.15 $V_S$ for—

(i) Turbopropeller powered airplanes with more than three engines; and

(ii) Turbojet powered airplanes with provisions for obtaining a significant reduction in the one-engine-inoperative power-on stalling speed; and

(3) 1.10 times $V_{MC}$ established under § 25.149.

(c) $V_2$, in terms of calibrated airspeed, must be selected by the applicant to provide at least the gradient of climb required by § 25.121(b) but may not be less than—

(1) $V_{2\ min}$; and

(2) $V_R$ plus the speed increment attained (in accordance with § 25.111(c)(2)) before reaching a height of 35 feet above the takeoff surface.

(d) $V_{MU}$ is the calibrated airspeed at and above which the airplane can safely lift off the ground, and continue the takeoff. $V_{MU}$ speeds must be selected by the applicant for the all-engines-operating and the one-engine-inoperative conditions. These speeds may be established from free air data if these data are verified by ground takeoff tests.

(e) $V_R$, in terms of calibrated airspeed, must be selected in accordance with the conditions of subparagraphs (1) through (4) of this paragraph:

(1) $V_R$ may not be less than—

(i) $V_1$;

(ii) 105 percent of $V_{MC}$;

(iii) The speed (determined in accordance with § 25.111(c)(2)) that allows reaching $V_2$ before reaching a height of 35 feet above the takeoff surface; or

(iv) A speed that, if the airplane is rotated at its maximum practicable rate, will result in a $V_{LOF}$ of not less than 110 percent of $V_{MU}$ in the all-engines-operating condition or less than 105 percent of $V_{MU}$ in the one-engine-inoperative condition.

(2) For any given set of conditions (such as weight, configuration, and temperature), a single value of $V_R$, obtained in accordance with this paragraph, must be used to show compliance with both the one-engine-inoperative and the all-engines-operating takeoff provisions.

(3) It must be shown that the one-engine-inoperative takeoff distance, using a rotation speed of 5 knots less than $V_R$ established in accordance with subparagraphs (1) and (2) of this paragraph, does not exceed the corresponding one-engine-inoperative takeoff distance using the established $V_R$. The takeoff distances must be determined in accordance with § 25.113(a)(1).

(4) Reasonably expected variations in service from the established takeoff procedures for the operation of the airplane (such as over-rotation of the airplane and out-of-trim conditions) may not result in unsafe flight characteristics or in marked increases in the scheduled takeoff distances established in accordance with § 25.113(a).

(f) $V_{LOF}$ is the calibrated airspeed at which the airplane first becomes airborne.

**§ 25.109 Accelerate-stop distance.**

(a) The accelerate-stop distance is the sum of the distances necessary to—

(1) Accelerate the airplane from a standing start to $V_1$; and

(2) Come to a full stop from the point at which $V_1$ is reached, assuming that the critical engine fails at $V_1$.

(b) Means other than wheel brakes may be used to determine the accelerate-stop distance if that means—

(1) Is safe and reliable;

(2) Is used so that consistent results can be expected under normal operating conditions; and

(3) Is such that exceptional skill is not required to control the airplane.

(c) The landing gear must remain extended throughout the accelerate-stop distance.

(d) If the accelerate-stop distance includes a stopway with surface characteristics substantially different from those of a smooth hard-surfaced runway, the takeoff data must include operational correction factors for the accelerate-stop distance. The correction factors must account for the particular surface characteristics of the stopway and the variations in these characteristics with seasonal weather conditions (such as temperature, rain, snow, and ice) within the established operational limits.

**§ 25.111 Takeoff path.**

(a) The takeoff path extends from a standing start to a point in the takeoff at which the airplane is 1,500 feet above the takeoff surface, or at which the transition from the takeoff to the en route configuration is completed and a speed is reached at which compliance with § 25.121(c) is shown, whichever point is higher. In addition—

(1) The takeoff path must be based on the procedures prescribed in § 25.101(c);

(2) The airplane must be accelerated on the ground to $V_1$, at which point the critical engine must be made inoperative and remain inoperative for the rest of the takeoff; and

(3) After reaching $V_1$, the airplane must be accelerated to $V_2$.

(b) During the acceleration to speed $V_2$, the nose gear may be raised off the ground at a speed not less than $V_R$. However, landing gear retraction may not be begun until the airplane is airborne.

(c) During the takeoff path determination in accordance with paragraphs (a) and (b) of this section—

(1) The slope of the airborne part of the takeoff path must be positive at each point;

(2) The airplane must reach $V_2$ before it is 35 feet above the takeoff surface and must continue at a speed as close as practical to, but not less than $V_2$, until it is 400 feet above the takeoff surface;

(3) At each point along the takeoff path, starting at the point at which the airplane reaches 400 feet above the takeoff surface, the available gradient of climb may not be less than—

(i) 1.2 percent for two-engine airplanes;

(ii) 1.5 percent for three-engine airplanes; and

(iii) 1.7 percent for four-engine airplanes; and

(4) Except for gear retraction and propeller feathering, the airplane configuration may not be changed until the airplane is 400 feet above the takeoff surface.

(d) The takeoff path must be determined by a continuous demonstrated takeoff or by synthesis from segments. If the takeoff path is determined by the segmental method—

(1) The segments must be clearly defined and must be related to the distinct changes in the configuration, power or thrust, and speed;

(2) The weight of the airplane, the configuration, and the power or thrust must be constant throughout each segment and must correspond to the most critical condition prevailing in the segment;

(3) The flight path must be based on the airplane's performance without ground effect; and

(4) The takeoff path data must be checked by continuous demonstrated takeoffs up to the point at which the airplane is out of ground effect and its speed is stabilized, to ensure that the path is conservative relative to the continuous path.

The airplane is considered to be out of the ground effect when it reaches a height equal to its wing span.

**§ 25.113 Takeoff distance and takeoff run.**

(a) Takeoff distance is the greater of—

(1) The horizontal distance along the takeoff path from the start of the takeoff to the point at which the airplane is 35 feet above the takeoff surface, determined under § 25.111; or

(2) 115 percent of the horizontal distance along the takeoff path, with the engines operating, from the start of the takeoff to the point at which the airplane is 35 feet above the takeoff surface, as determined by a procedure consistent with § 25.111.

(b) If the takeoff distance includes a clearway, the takeoff run is the greater of—

(1) The horizontal distance along the takeoff path from the start of the takeoff to a point equidistant between the point at which $V_{LOF}$ is reached and the point at which the airplane is 35 feet above the takeoff surface, as determined under § 25.111; or

(2) 115 percent of the horizontal distance along the takeoff path, with the engines operating, from the start of the takeoff to a point equidistant between the point at which $V_{LOF}$ is reached and the point at which the airplane is 35 feet above the takeoff surface, determined by a procedure consistent with § 25.111.

**§ 25.115 Takeoff flight path.**

(a) The takeoff flight path begins 35 feet above the takeoff surface at the end of the takeoff distance determined in accordance with § 25.113(a).

(b) The net takeoff flight path data must be determined so that they represent the actual takeoff flight paths (determined in accordance with § 25.111 and with paragraph (a) of this section) reduced at each point by a gradient of climb equal to—

(1) 0.8 percent for two-engine airplanes;

(2) 0.9 percent for three-engine airplanes; and

(3) 1.0 percent for four-engine airplanes.

(c) The prescribed reduction in climb gradient may be applied as an equivalent reduction in acceleration along that part of the takeoff flight path at which the airplane is accelerated in level flight.

**§ 25.117 Climb: general.**

Compliance with the requirements of §§ 25.119 and 25.121 must be shown at each weight, altitude, and ambient temperature within the operational limits established for the airplane and with the most unfavorable center of gravity for each configuration.

**§ 25.119 Landing climb: All-engine-operating.**

In the landing configuration, the steady gradient of climb may not be less than 3.2 percent, with—

(a) The engines at the power or thrust that is available eight seconds after initiation of movement of the power or thrust controls from the minimum flight idle to the takeoff position; and

(b) A climb speed of not more than $1.3\ V_S$.

**§ 25.121 Climb: One-engine-inoperative.**

(a) *Takeoff; landing gear extended.* In the critical takeoff configuration existing along the flight path (between the points at which the airplane reaches $V_{LOF}$ and at which the landing gear is fully retracted) and in the configuration used in § 25.111 but without ground effect, the steady gradient of climb must be positive for two-engine airplanes, and not less than 0.3 percent for three-engine airplanes or 0.5 percent for four-engine airplanes, at $V_{LOF}$ and with—

(1) The critical engine inoperative and the remaining engines at the power or thrust available when retraction of the landing gear is begun in accordance with § 25.111 unless there is a more critical power operating condition existing later along the flight path but before the point at which the landing gear is fully retracted; and

(2) The weight equal to the weight existing when retraction of the landing gear is begun, determined under § 25.77.

(b) *Takeoff; landing gear retracted.* In the takeoff configuration existing at the point of the flight path at which the landing gear is fully retracted, and in the configuration used in § 25.111 but without ground effect, the steady gradient of climb may not be less than 2.4 percent for two-engine airplanes, 2.7 percent for three-engine airplanes, and 3.0 percent for four-engine airplanes, at $V_2$ and with—

(1) The critical engine inoperative, the remaining engines at the takeoff power or thrust available at the time the landing gear is fully retracted, determined under § 25.111, unless there is a more critical power operating condition existing later along the flight path but before the point where the airplane reaches a height of 400 feet above the takeoff surface; and

(2) The weight equal to the weight existing when the airplane's landing gear is fully retracted, determined under § 25.111.

(c) *Final takeoff.* In the en route configuration at the end of the takeoff path determined in accordance with § 25.111, the steady gradient of climb may not be less than 1.2 percent for two-engine airplanes, 1.5 percent for three-engine airplanes, and 1.7 percent for four-engine airplanes, at not less than $1.25\ V_S$ and with—

(1) The critical engine inoperative and the remaining engines at the available maximum continuous power or thrust; and

(2) The weight equal to the weight existing at the end of the takeoff path, determined under § 25.111.

(d) *Approach.* In the approach configuration corresponding to the normal all-engines-operating procedure in which $V_S$ for this configuration does not exceed 110 percent of the $V_S$ for the related landing configuration, the steady gradient of climb may not be less than 2.1 percent for two-engine airplanes, 2.4 percent for three-engine airplanes, and 2.7 percent for four-engine airplanes, with—

(1) The critical engine inoperative, the remaining engines at the available takeoff power or thrust;

(2) The maximum landing weight; and

(3) A climb speed established in connection with normal landing procedures, but not exceeding $1.5\ V_S$.

**§ 25.123 En route flight paths.**

(a) For the en route configuration, the flight paths prescribed in paragraphs (b) and (c) of this section must be determined at each weight, altitude, and ambient temperature, within the operating limits established for the airplane. The variation of weight along the flight path, accounting for the progressive consumption of fuel and oil by the operating engines, may be included in the computation. The flight paths must be determined at any selected speed, with—

(1) The most unfavorable center of gravity;

(2) The critical engines inoperative;

(3) The remaining engines at the available maximum continuous power or thrust; and

(4) The means for controlling the engine-cooling air supply in the position that provides adequate cooling in the hot-day condition.

(b) The one-engine-inoperative net flight path data must represent the actual climb performance diminished by a gradient of climb of 1.1 percent for two-engine airplanes, 1.4 percent for three-engine airplanes, and 1.6 percent for four-engine airplanes.

(c) For three- or four-engine airplanes, the two-engine-inoperative net flight path data must represent the actual climb performance diminished by a gradient of climb of 0.3 percent for three-engine airplanes and 0.5 percent for four-engine airplanes.

**§ 25.125 Landing.**

(a) The horizontal distance necessary to land and to come to a complete stop (or to a speed of approximately 3 knots for water landings) from a point 50 feet above the landing surface must be determined (for standard temperatures, at each weight, altitude, and wind within the operational limits established by the applicant for the airplane) as follows:

(1) The airplane must be in the landing configuration.

(2) A steady gliding approach, with a calibrated airspeed of not less than $1.3\ V_S$, must be maintained down to the 50 foot height.

(3) Changes in configuration, power or thrust, and speed, must be made in accordance with the established procedures for service operation.

(4) The landing must be made without excessive vertical acceleration, tendency to bounce, nose over, ground loop, porpoise, or water loop.

(5) The landings may not require exceptional piloting skill or alertness.

(b) For landplanes and amphibians, the landing distance on land must be determined on a level, smooth, dry, hard-surfaced runway. In addition—

(1) The pressures on the wheel braking systems may not exceed those specified by the brake manufacturer;

(2) The brakes may not be used so as to cause excessive wear of brakes or tires; and

(3) Means other than wheel brakes may be used if that means—

(i) Is safe and reliable;

(ii) Is used so that consistent results can be expected in service; and

(iii) Is such that exceptional skill is not required to control the airplane.

(c) For seaplanes and amphibians, the landing distance on water must be determined on smooth water.

(d) For skiplanes, the landing distance on snow must be determined on smooth, dry, snow.

(e) The landing distance data must include correction factors for not more than 50 percent of the nominal wind components along the landing path opposite to the direction of landing, and not less than 150 percent of the nominal wind components along the landing path in the direction of landing.

(f) If any device is used that depends on the operation of any engine, and if the landing distance would be noticeably increased when a landing is made with that engine inoperative, the landing distance must be determined with that engine inoperative unless the use of compensating means will result in a landing distance not more than that with each engine operating.

CONTROLLABILITY AND MANEUVERABILITY

**§ 25.143 General.**

(a) The airplane must be safely controllable and maneuverable during—

(1) Takeoff;
(2) Climb;
(3) Level flight;
(4) Descent; and
(5) Landing.

(b) It must be possible to make a smooth transition from one flight condition to any other without exceptional piloting skill, alertness, or strength and without danger of exceeding the limit-load factor under any probable operating conditions (including the sudden failure of any engine).

(c) If, during the testing required by paragraphs (a) and (b) of this section, marginal conditions exist with regard to required pilot strength, the "strength of pilots" limits may not exceed the limits prescribed in the following table:

| Values in pounds of force as applied to the control wheel or rudder pedals. | Pitch | Roll | Yaw |
|---|---|---|---|
| For temporary application | 75 | 60 | 180 |
| For prolonged application | 10 | 5 | 20 |

(d) In showing the temporary control force limitations of paragraph (c) of this section, approved operating procedures or conventional operating practices must be followed (including being as nearly trimmed as possible at the next preceding steady flight condition, except that, in the case of takeoff, the airplane must be trimmed in accordance with approved operating procedures).

(e) For the purpose of complying with the prolonged control force limitations of paragraph (c) of this section, the airplane must be as nearly trimmed as possible.

**§ 25.145 Longitudinal control.**

(a) It must be possible at any speed between the trim speed prescribed in § 25.49(c)(2)(i) and $V_{S_1}$ (for reciprocating engine powered airplanes), or at any speed between the trim speed prescribed in § 25.103(b)(i) and $V_S$ (for turbine engine powered airplanes), to pitch the nose downward so that the acceleration to this selected trim speed is prompt with—

(1) The airplane trimmed at the trim speed prescribed in § 25.49(c)(2)(i) (for reciprocating engine powered airplanes), or in § 25.103(b)(1) (for turbine engine powered airplanes);

(2) The landing gear extended;

(3) The wing flaps (i) retracted and (ii) extended; and

(4) Power (i) off and (ii) at maximum continuous power on the engines.

(b) With the landing gear extended, no change in trim control, or exertion of more than 50 pounds control force (representative of the maximum temporary force that readily can be applied by one hand) may be required for the following maneuvers:

(1) With power off, flaps retracted, and the airplane trimmed at $1.4\ V_{S_1}$, extend the flaps as rapidly as possible while maintaining the airspeed at approximately 40 percent above the stalling speed existing at each instant throughout the maneuver.

(2) Repeat subparagraph (1) except initially extend the flaps and then retract them as rapidly as possible.

(3) Repeat subparagraph (2) except with takeoff power.

(4) With power off, flaps retracted, and the airplane trimmed at $1.4\ V_{S_1}$, apply takeoff power rapidly while maintaining the same airspeed.

(5) Repeat subparagraph (4) except with flaps extended.

(6) With power off, flaps extended, and the airplane trimmed at $1.4\ V_{S_1}$, obtain and maintain airspeeds between $1.1\ V_{S_1}$ and $1.7\ V_{S_1}$ or $V_{FE}$, whichever is less.

(c) It must be possible, without exceptional piloting skill, to prevent loss of altitude when flap retraction from any position is begun during steady, straight, level flight at $1.1\ V_{S_1}$ with—

(1) Simultaneous application of not more than maximum continous power;

(2) The landing gear extended; and

(3) The maximum sea level landing weight.

**§ 25.147 Directional and lateral control.**

(a) *Directional control; general.* It must be possible, while holding the wings approximately level, to safely make reasonably sudden changes in heading in both directions. This must be shown at $1.4\ V_{S_1}$ for heading changes up to 15° (except that the heading change at which the rudder pedal force is 180 pounds need not be exceeded), and with—

(1) The critical engine inoperative and its propeller in the minimum drag position;

(2) The power required for level flight at $1.4\ V_{S_1}$, but not more than maximum continuous power;

(3) The most unfavorable center of gravity;

(4) Landing gear retracted;

(5) Flaps in the approach position; and

(6) Maximum landing weight.

(b) *Directional control; airplanes with four or more engines.* Airplanes with four or more engines must meet the requirements of paragraph (a) of this section except that—

(1) The two critical engines must be inoperative with their propellers (if applicable) in the minimum drag position;

(2) The center of gravity must be in the most forward position; and

(3) The flaps must be in the most favorable climb position.

(c) *Lateral control; general.* It must be possible to make 20° banked turns, with and against the inoperative engine, from steady flight at a speed equal to $1.4\ V_{S_1}$, with—

(1) The critical engine inoperative and its propeller (if applicable) in the minimum drag position;

(2) The remaining engines at maximum continuous power;

(3) The most unfavorable center of gravity;

(4) Landing gear (i) retracted and (ii) extended;

(5) Flaps in the most favorable climb position; and

(6) Maximum takeoff weight.

(d) *Lateral control; airplanes with four or more engines.* Airplanes with four or more engines must be able to make 20° banked turns, with and against the inoperative engines, from steady flight at a speed equal to $1.4\ V_{S_1}$, with maximum continuous power, and with the airplane in the configuration prescribed by paragraph (b) of this section.

(e) *Lateral control; all engines operating.* With the engines operating, roll response must allow normal maneuvers (such as recovery from upsets produced by gusts and the initiation of evasive maneuvers). There must be enough excess lateral control in sideslips (up to sideslip angles that might be required in normal operation), to allow a limited amount of maneuvering and to correct for gusts. Lateral control must be enough at any speed up to $V_{FC}/M_{FC}$ to provide a peak roll rate necessary for safety, without excessive control forces or travel.

**§ 25.149 Minimum control speed.**

(a) $V_{MC}$ is the calibrated airspeed, at which, when the critical engine is suddenly made inoperative, it is possible to recover control of the airplane with that engine still inoperative, and maintain straight flight either with zero yaw or, at the option of the applicant, with an angle of bank of not more than five degrees.

(b) For reciprocating engine powered airplanes, $V_{MC}$ may not exceed $1.2\ V_{S_1}$ with—

(1) Takeoff or maximum available power on the engines;

(2) The rearmost center of gravity;

(3) The airplane trimmed for takeoff;

(4) The maximum sea level takeoff weight (or any lesser weight necessary to show $V_{MC}$);

(5) Flaps in the takeoff position;

(6) Landing gear retracted;

(7) Cowl flaps in the normal takeoff position;

(8) The propeller of the inoperative engine—

(i) Windmilling;

(ii) In the most probable position for the specific design of the propeller control; or

(iii) Feathered, if the airplane has an automatic feathering device acceptable for showing compliance with the climb requirements of § 25.67; and

(9) The airplane airborne and the ground effect negligible.

(c) For turbine engine powered airplanes, $V_{MC}$ may not exceed $1.2\ V_S$ with—

(1) Maximum available takeoff power or thrust on the engines;

(2) The most unfavorable center of gravity;

(3) The airplane trimmed for takeoff;

(4) The maximum sea level takeoff weight (or any lesser weight necessary to show $V_{MC}$);

(5) The airplane in the most critical takeoff configuration existing along the flight path after the airplane becomes airborne, except with the landing gear retracted; and

(6) The airplane airborne and the ground effect negligible.

(d) The rudder forces required to maintain control at $V_{MC}$ may not exceed 180 pounds nor may it be necessary to reduce power or thrust of the operative engines. During recovery, the airplane may not assume any dangerous attitude or require exceptional piloting skill, alertness, or strength to prevent a heading change of more than 20 degrees.

### TRIM

**§ 25.161 Trim.**

(a) *General.* Each airplane must meet the trim requirements of this section after being trimmed, and without further pressure upon, or movement of, either the primary controls or their corresponding trim controls by the pilot or the automatic pilot.

(b) *Lateral and directional trim.* The airplane must maintain lateral and directional trim with the most adverse lateral displacement of the center of gravity within the relevant operating limitations, during normally expected conditions of operation (including operation at any speed from 1.4 $V_{S_1}$ to $V_{MO}/M_{MO}$).

(c) *Longitudinal trim.* The airplane must maintain longitudinal trim during—

(1) A climb with maximum continuous power at a speed not more than 1.4 $V_{S_1}$, with the landing gear retracted, and the flaps (i) retracted and (ii) in the takeoff position;

(2) A glide with power off at a speed not more than 1.4 $V_{S_1}$, with the landing gear extended, the wing flaps (i) retracted and (ii) extended, the most forward center of gravity position approved for landing with the maximum landing weight, and with the most forward center of gravity position approved for landing regardless of weight; and

(3) Level flight at any speed from 1.4 $V_{S_1}$ to $V_{MO}/M_{MO}$, with the landing gear and flaps retracted, and from 1.4 $V_{S_1}$ to $V_{LE}$ with the landing gear extended.

(d) *Longitudinal, directional, and lateral trim.* The airplane must maintain longitudinal, directional, and lateral trim (and for lateral trim, the angle of bank may not exceed five degrees) at 1.4 $V_{S_1}$ during climbing flight with—

(1) The critical engine inoperative;

(2) The remaining engines at maximum continuous power; and

(3) The landing gear and flaps retracted.

(e) *Airplanes with four or more engines.* Each airplane with four or more engines must maintain trim in rectilinear flight—

(1) At the climb speed, configuration, and power required by § 25.69 for the purpose of establishing the rate of climb;

(2) With the most unfavorable center of gravity position; and

(3) At the weight at which the two-engine-inoperative climb is equal to at least 0.013 $V_{S_0}^2$ at an altitude of 5,000 feet.

### STABILITY

**§ 25.171 General.**

The airplane must be longitudinally, directionally, and laterally stable in accordance with the provisions of §§ 25.173 through 25.177. In addition, suitable stability is required in any condition normally encountered in service, if flight tests show it is necessary for safe operation.

**§ 25.173 Static longitudinal stability.**

Under the conditions specified in § 25.175, the characteristics of the elevator control forces (including friction) and the elevator control surface displacement must be as follows:

(a) A pull must be required to obtain and maintain speeds below the specified trim speed, and a push must be required to obtain and maintain speeds above the specified trim speed. In addition, if the elevator control forces are not dependent upon the hinge moments of the elevator control surface, it must also be shown that upward displacement of the elevator trailing edge is required to obtain and maintain speeds below the specified trim speed, and a downward displacement of the elevator trailing edge is required to obtain and maintain speeds above the specified trim speed. This must be shown at any speed that can be obtained except speeds higher than the landing gear or wing flap operating limit speeds or $V_{FC}/M_{FC}$, whichever is appropriate, or lower than the minimum speed for steady, unstalled flight.

(b) The airspeed must return to within 10 percent of the original trim speed when the control force is slowly released from any speed within the range specified in paragraph (a) of this section.

(c) The stable slope of the stick force versus speed curve may not be less than 0.5 pound for each three knots or exceed a value beyond which control of the airplane is difficult.

**§ 25.175 Demonstration of static longitudinal stability.**

Static longitudinal stability must be shown as follows:

(a) *Climb.* The stick force curve and, if required by § 25.173(a), the elevator angle curve must have stable slopes at speeds between 85 and 115 percent of the speed at which the airplane—

(1) Is trimmed, with—

(i) Wing flaps retracted;

(ii) Landing gear retracted;

(iii) Maximum takeoff weight; and

(iv) 75 percent of maximum continuous power for reciprocating engines or the maximum power or thrust selected by the applicant as an operating limitation for use during climb for turbine engines; and

(2) Is trimmed at the speed for best rate-of-climb except that the speed need not be less than 1.4 $V_{S_1}$.

(b) *Cruise.* Static longitudinal stability must be shown in the cruise condition as follows:

(1) With the landing gear retracted at high speed, the stick force curve and, if required by § 25.173(a), the elevator angle curve must have stable slopes at speeds from $V_{FC}/M_{FC}$ to the lower of $V_{FC}-\left(\frac{V_{FC}-1.4\,V_{S_1}}{2}\right)$, or 50 knots less than the trim speed specified in subdivision (iv) of this subparagraph (however, the speed need not be less than 1.4 $V_{S_1}$) and the stick force may not exceed 50 pounds with—

(i) Flaps retracted;

(ii) The most critical weight between maximum landing weight and maximum takeoff weight;

(iii) 75 percent of maximum continuous power for reciprocating engines or, for turbine engines, the maximum cruising power (though it need not exceed that power required at $V_{MO}/M_{MO}$) selected by the applicant as an operating limitation; and

(iv) The airplane trimmed for level flight with the power required in subdivision (iii) of this subparagraph.

(2) With the landing gear retracted at low speed, the stick force curve and, if required by § 25.173(a) the elevator angle curve must have stable slopes at speeds from a speed equal to $V_{FC}-\left(\frac{V_{FC}-1.4\,V_{S_1}}{2}\right)$ to 1.4 $V_{S_1}$, and the stick force may not exceed 50 pounds, with—

(i) Flaps retracted;

(ii) The most critical weight between the maximum landing weight and maximum takeoff weight;

(iii) Power required for level flight at a speed equal to $V_{FC}-\left(\frac{V_{FC}-1.4\,V_{S_1}}{2}\right)$; and

(iv) The airplane trimmed for level flight with the power required in subdivision (iii) of this subparagraph.

At altitudes where Mach number is critical, the calibrated airspeed corresponding to $M_{FC}$ may be used to calculate the speed $V_{FC}-\left(\frac{V_{FC}-1.4\,V_{S_1}}{2}\right)$.

(3) With the landing gear extended, the stick force curve and, if required by § 25.173(a), the elevator angle curve must have stable slopes at speeds between 1.4 $V_{S_1}$ and $V_{LE}$, and the stick force may not exceed 50 pounds with—

(i) Wing flaps retracted;

(ii) The most critical weight between the maximum landing weight and maximum takeoff weight;

(iii) Power required for level flight at $V_{LE}$; and

(iv) The airplane trimmed for level flight with the power required in subparagraph (3)(iii) of this paragraph.

(c) *Approach.* The stick force curve and, if required by § 25.173(a), the elevator angle curve must have stable slopes at speeds between 1.1 $V_{S_1}$ and 1.8 $V_{S_1}$, with—

(1) Wing flaps in the approach position;

(2) Landing gear retracted;

(3) Maximum landing weight; and

(4) The airplane trimmed at 1.4 $V_{S_1}$ with enough power to maintain level flight at this speed.

(d) *Landing.* The stick force curve and, if required by § 25.173(a), the elevator angle curve must have stable slopes, and the stick force may not exceed 80 pounds, at speeds between 1.1 $V_{S_0}$ and 1.8 $V_{S_0}$ with—

(1) Wing flaps in the landing position;

(2) Landing gear extended;

(3) Maximum landing weight;

(4) Power or thrust off on the engines; and

(5) The airplane trimmed at 1.4 $V_{S_0}$ with power or thrust off.

**§ 25.177 Static directional and lateral stability.**

(a) The static directional stability (as shown by the tendency to recover from a skid with the rudder free) must be positive for any landing gear and flap position and symmetrical power condition, at speeds from 1.2 $V_{S_1}$ up to $V_{FE}$, $V_{LE}$, or $V_{FC}/M_{FC}$ (as appropriate).

(b) The static lateral stability (as shown by the tendency to raise the low wing in a sideslip with the aileron controls free and for any landing gear and flap position and symmetrical power condition) must be positive at $V_{FE}$, $V_{LE}$, or $V_{FC}/M_{FC}$ (as appropriate) and may not be negative at 1.2 $V_{S_1}$.

(c) In straight, steady, sideslips (unaccelerated forward slips) the aileron and rudder control movements and forces must be substantially proportional to the angle of sideslip, and the factor of proportionality must lie between limits found necessary for safe operation throughout the range of sideslip angles appropriate to the operation of the airplane. At greater angles, up to the angle at which full rudder control is used or a rudder pedal force of 180 pounds is obtained, the rudder pedal forces may not reverse and increased rudder deflection must produce increased angles of sideslip. Unless the airplane has a yaw indicator, there must be enough bank accompanying sideslipping to clearly indicate any departure from steady unyawed flight.

**§ 25.181 Dynamic longitudinal, directional, and lateral stability.**

Any short period oscillation occurring between stalling speed and maximum allowable speed appropriate to the configuration of the airplane (for example, $V_{FE}$, $V_{LE}$, or $V_{FC}/M_{FC}$) must be heavily damped with the primary controls (1) free and (2) in a fixed position.

### STALLS

**§ 25.201 Stall demonstration.**

(a) Stalls must be shown in straight flight and in 30 degree banked turns with—

(1) Power off; and

(2) The power necessary to maintain level flight at 1.6 $V_{S_1}$ (where $V_{S_1}$ corresponds to the stalling speed with flaps in the approach position, the landing gear retracted, and maximum landing weight).

(b) In either condition required by paragraph (a) of this section, it must be possible to meet the applicable requirements of § 25.203 with—

(1) Flaps and landing gear in any likely combination of positions;

(2) Representative weights within the range for which certification is requested; and

(3) The most adverse center of gravity for recovery.

(c) The following procedure must be used to show compliance with § 25.203:

(1) With the airplane trimmed for straight flight at the speed prescribed in § 25.49(c)(2)(i) for reciprocating engine powered airplanes, or in § 25.103(b)(1) for turbine engine powered airplanes, reduce the speed with the elevator control until it is steady at slightly above stalling speed. Apply elevator control so that the speed reduction does not exceed one knot per second until (i) the airplane is stalled, or (ii) the control reaches the stop.

(2) The airplane is considered stalled when, at an angle of attack measurably greater than that of maximum lift, the inherent flight characteristics give a clear indication to the pilot that the airplane is stalled. Typical indications of a stall are a nose-down pitch, or a roll, that cannot be readily arrested, or, if clear enough, a loss of control effectiveness, an abrupt change in control force or motion, characteristic buffeting, or a distinctive vibration of the pilot's controls. However, for airplanes with unmistakable inherent aerodynamic warning (such as buffeting, small amplitude pitch or roll oscillations, or distinctive shaking of the pilot's control) associated with the stall in each required configuration, the speed need not be reduced below a value providing an adequate stall warning margin as specified in § 25.207.

(3) As soon as the airplane is stalled, recover by normal recovery techniques.

**§ 25.203 Stall characteristics.**

(a) It must be possible to produce and to correct roll and yaw by unreversed use of the aileron and rudder controls, up to the time the airplane is stalled. No abnormal nose-up pitching may occur. The longitudinal control force must be positive up to and throughout the stall. In addition, it must be possible to promptly prevent stalling and to recover from a stall by normal use of the controls.

(b) For level wing stalls, the roll occurring between the stall and the completion of the recovery may not exceed approximately 20 degrees.

(c) For turning flight stalls, the action of the airplane after the stall may not be so violent or extreme as to make it difficult, with normal piloting skill, to effect a prompt recovery and to regain control of the airplane.

**§ 25.205 Stalls: Critical engine inoperative.**

(a) It must be possible to safely recover from a stall with the critical engine inoperative—

(1) Without applying power to the inoperative engine;

(2) With flaps and landing gear retracted; and

(3) With the remaining engines at up to 75 percent of maximum continuous power, or up to the power at which the wings can be held level with the use of maximum control travel, whichever is less.

(b) The operating engines may be throttled back during stall recovery from stalls with the critical engine inoperative.

**§ 25.207 Stall warning.**

(a) Stall warning with sufficient margin to prevent inadvertent stalling with the flaps and landing gear in any normal position must be clear and distinctive to the pilot in straight and turning flight.

(b) The warning may be furnished either through the inherent aerodynamic qualities of the airplane or by a device that will give clearly distinguishable indications under expected conditions of flight. However, a visual stall warning device that requires the attention of the crew within the cockpit is not acceptable by itself.

(c) The stall warning must begin at a speed exceeding the stalling speed by seven percent or at any lesser margin if the stall warning has enough clarity, duration, distinctiveness, or similar properties.

### GROUND AND WATER HANDLING CHARACTERISTICS

**§ 25.231 Longitudinal stability and control.**

(a) Landplanes may have no uncontrollable tendency to nose over in any reasonably expected operating condition or when rebound occurs during landing or takeoff. In addition—

(1) Wheel brakes must operate smoothly and may not cause any undue tendency to nose over; and

(2) If a tail-wheel landing gear is used, it must be possible, during the takeoff ground run on concrete, to maintain any attitude up to thrust line level, at 80 percent of $V_{S_1}$.

(b) For seaplanes and amphibians, the most adverse water conditions safe for takeoff, taxiing, and landing, must be established.

**§ 25.233 Directional stability and control.**

(a) There may be no uncontrollable ground-looping tendency in 90° cross winds, up to a wind velocity of 0.2 $V_{S_0}$ at any speed at which the airplane may be expected to be operated on the ground. This may be shown while establishing the cross wind component velocity required by § 25.237.

(b) Landplanes must be satisfactorily controllable, without exceptional piloting skill or alertness, in power-off landings at normal landing speed, without using brakes or engine power to maintain a straight path. This may be shown during power-off landings made in conjunction with other tests.

(c) The airplane must have adequate directional control during taxiing. This may be shown during taxiing prior to takeoffs made in conjunction with other tests.

**§ 25.235 Taxiing condition.**

The shock absorbing mechanism may not damage the structure of the airplane when the airplane is taxied on the roughest ground that may reasonably be expected in normal operation.

**§ 25.237 Wind velocities.**

(a) For landplanes, a cross component of wind velocity, shown to be safe for takeoff and landing, must be established.

(b) For seaplanes and amphibians, the following wind velocities must be established:

(1) A lateral wind component, not less than 0.2 $V_{S_0}$, up to which takeoff and landing is safe under any water condition that may reasonably be expected in normal operation.

(2) A wind velocity up to which taxiing is safe in any direction under water conditions that may reasonably be expected in normal operation.

**§ 25.239 Spray characteristics and control stability on water.**

(a) For seaplanes and amphibians, during takeoff, taxiing, and landing, and in the conditions set forth in paragraph (b) of this section, there may be no—

(1) Spray characteristics that would impair the pilot's view, cause damage, or result in the taking in of an undue quantity of water;

(2) Dangerously uncontrollable porpoising, bounding, or swinging tendency; or

(3) Immersion of auxiliary floats or sponsons, wing tips, propeller blades, or other parts not designed to withstand the resulting water loads.

(b) Compliance with the requirements of paragraph (a) of this section must be shown—

(1) In water conditions, from smooth to the most adverse condition established in accordance with § 25.231;

(2) In wind and cross-wind velocities, water currents, and associated waves and swells that may reasonably be expected in operation on water;

(3) At speeds that may reasonably be expected in operation on water;

(4) With sudden failure of the critical engine at any time while on water; and

(5) At each weight and center of gravity position, relevant to each operating condition, within the range of loading conditions for which certification is requested.

(c) In the water conditions of paragraph (b) of this section, and in the corresponding wind conditions, the seaplane or amphibian must be able to drift for five minutes with engines inoperative, aided, if necessary, by a sea anchor.

MISCELLANEOUS FLIGHT REQUIREMENTS

**§ 25.251 Vibration and buffeting.**

(a) The airplane must be designed to withstand any vibration and buffeting that might occur in any likely operating condition. This must be shown by calculations, resonance tests, or other tests found necessary by the Administrator.

(b) Each part of the airplane must be shown in flight to be free from excessive vibration, under any appropriate speed and power conditions up to at least the minimum value of $V_D$ allowed in § 25.335. The maximum speeds shown must be used in establishing the operating limitations of the airplane in accordance with § 25.1505. In addition, it must be shown by analysis or tests, that the airplane is free from such vibration that would prevent safe flight under the conditions in § 25.629(d).

(c) There may be no buffeting condition, in normal flight, severe enough to interfere with the control of the airplane, to cause excessive fatigue to the crew, or to cause structural damage. Stall warning buffeting within these limits is allowable.

**§ 25.253 High-speed characteristics.**

(a) *Speed increase and recovery characteristics.* The following speed increase and recovery characteristics must be met:

(1) Operating conditions and characteristics likely to cause inadvertent speed increases (including upsets in pitch and roll) must be simulated with the airplane trimmed at any likely cruise speed up to $V_{MO}/M_{MO}$. These conditions and characteristics include gust upsets, inadvertent control movements, low stick force gradient in relation to control friction, passenger movement, leveling off from climb, and descent from Mach to airspeed limit altitudes.

(2) Allowing for pilot reaction time after effective inherent or artificial speed warning occurs, it must be shown that the airplane can be recovered to a normal altitude and its speed reduced to $V_{MO}/M_{MO}$, without—

(i) Exceptional piloting strength or skill;

(ii) Exceeding $V_D/M_D$, $V_{DF}/M_{DF}$, or the structural limitations; and

(iii) Buffeting that would cause structure damage.

(3) There may be no control reversal about any axis at any speed up to $V_{DF}/M_{DF}$. Any reversal of elevator control force or tendency of the airplane to pitch, roll, or yaw must be mild and readily controllable, using normal piloting techniques.

(b) *Maximum speed for stability characteristics, $V_{FC}/M_{FC}$.* $V_{FC}/M_{FC}$ is the maximum speed at which the requirements of §§ 25.147(e), 25.175(b)(1), 25.177, 25.181, and 25.187 must be met with flaps and landing gear retracted. It may not be less than a speed midway between $V_{MO}/M_{MO}$ and $V_{DF}/M_{DF}$, except that, for altitudes where Mach number is the limiting factor, $M_{FC}$ need not exceed the Mach number at which effective speed warning occurs.

## Subpart C—Structure

GENERAL

**§ 25.301 Loads.**

(a) Strength requirements are specified in terms of limit loads (the maximum loads to be expected in service) and ultimate loads (limit loads multiplied by prescribed factors of safety). Unless otherwise provided, prescribed loads are limit loads.

(b) Unless otherwise provided, the specified air, ground, and water loads must be placed in equilibrium with inertia forces, considering each item of mass in the airplane. These loads must be distributed to conservatively approximate or closely represent actual conditions.

(c) If deflections under load would significantly change the distribution of external or internal loads, this redistribution must be taken into account.

**§ 25.303 Factor of safety.**

Unless otherwise provided, a factor of safety of 1.5 must be used.

**§ 25.305 Strength and deformation.**

(a) The structure must be able to support limit loads without detrimental permanent deformation. At any load up to limit loads, the deformation may not interfere with safe operation.

(b) The structure must be able to support ultimate loads without failure for at least three seconds. However, when proof of strength is shown by dynamic tests simulating actual load conditions, the three second limit does not apply.

(c) Where structural flexibility is such that any rate of load application likely to occur in the operating conditions might produce transient stresses appreciably higher than those corresponding to static loads, the effects of this rate of application must be considered.

**§ 25.307 Proof of structure.**

(a) Compliance with the strength and deformation requirements of this subpart must be shown for each critical loading condition. Structural analysis may be used only if the structure conforms to those for which experience has shown this method to be reliable. In other cases, substantiating load tests must be made.

(b) Compliance with the fatigue evaluation requirements of §§ 25.571 and 25.573 must be shown.

(c) Certain parts of the structure must be tested as specified in § 25.601.

FLIGHT LOADS

**§ 25.321 General.**

(a) Flight load factors represent the ratio of the aerodynamic force component (acting normal to the assumed longitudinal axis of the airplane) to the weight of the airplane. A positive load factor is one in which the aerodynamic force acts upward with respect to the airplane.

(b) Considering compressibility effects at each speed, compliance with the flight load requirements of this subpart must be shown—

(1) At each critical altitude within the range of altitudes selected by the applicant;

(2) At each weight from the design minimum weight to the design maximum weight; and

(3) For each required altitude and weight, for any practicable distribution of disposable load within the operating limitations recorded in the Airplane Flight Manual.

FLIGHT MANEUVER AND GUST CONDITIONS

**§ 25.331 General.**

(a) *Procedure.* The analysis of symmetrical flight must include at least the conditions specified in paragraphs (b) through (d) of this section. The following procedure must be used:

(1) Enough points on the maneuvering and gust envelopes must be investigated to ensure that the maximum load for each part of the airplane structure is obtained. A conservative combined envelope may be used.

(2) The significant forces acting on the airplane must be placed in equilibrium in a rational or conservative manner. The linear inertia forces must be considered to be in equilibrium with wing and horizontal tail surface loads, while the angular (pitching) inertia forces must be considered to be in equilibrium with wing and fuselage aerodynamic moments and horizontal tail surface loads.

(3) Where sudden displacement of a control is specified, the assumed rate of displacement need not exceed the rate that could be applied by the pilot.

(4) In determining elevator angles and chordwise load distribution (in the maneuvering conditions of paragraphs (b) and (c) of this section) in turns and pullups, the effect of corresponding pitching velocities must be taken into account.

(b) *Maneuvering balanced conditions.* Assuming the airplane to be in equilibrium with zero pitching acceleration, the maneuvering conditions A through I on the maneuvering envelope in § 25.333(b) must be investigated.

(c) *Maneuvering pitching conditions.* The following conditions involving pitching acceleration must be investigated:

(1) *Maximum elevator displacement at $V_A$.* The airplane is assumed to be flying in steady level flight (point $A_1$, § 25.333(b)) and, except as limited by pilot effort in accordance with § 25.397(b), the pitching control is suddenly moved to obtain extreme positive pitching (nose up).

(2) *Checked maneuver at speeds between $V_A$ and $V_D$.* The airplane is assumed to be subjected to a checked maneuver (a maneuver in which the pitching control is suddenly displaced in one direction and then suddenly moved in the opposite direction) from steady level flight (points $A_1$ to $D_1$, § 25.333(b)), and from the positive load factor (points $A_2$ to $D_2$, § 25.333(b)) as follows:

(i) Unless lesser values could not be exceeded, a positive pitching acceleration (nose up) is assumed to be reached concurrently with the airplane load factor of 1.0 (points $A_1$ to $D_1$, § 25.333(b)). This positive acceleration must be equal to at least $\frac{39}{V}n$ (n—1.5) (radians/sec.$^2$), where—

(a) $n$ is the positive load factor at the speed under consideration; and

(b) $V$ is the airplane equivalent speed in knots.

(ii) Unless lesser values could not be exceeded, a negative pitching acceleration (nose down) is assumed to be reached concurrently with the positive maneuvering load factor (points $A_2$ to $D_2$, § 25.333(b)). This negative pitching acceleration must be equal to at least

$$-\frac{26}{V}n\ (n-1.5)\ \text{(radians/sec.}^2\text{)}$$

where—

(a) $n$ is the positive load factor at the speed under consideration; and

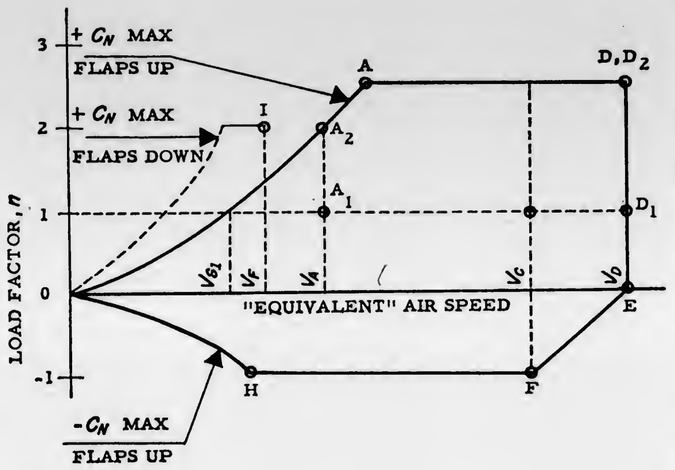
(b) $V$ is the airplane equivalent speed in knots.

(3) *Specified control displacement.* Instead of the conditions in subparagraph (2) of this paragraph, a checked maneuver, based on a rational pitching control motion vs. time profile, may be established in which the design limit load factor specified in § 25.337 will not be exceeded. Unless lesser values cannot be exceeded, the airplane response must result in pitching accelerations not less than those specified in subparagraph (2).

(d) *Gust conditions.* The gust conditions B' through J', § 25.333(c), must be investigated. The following provisions apply:

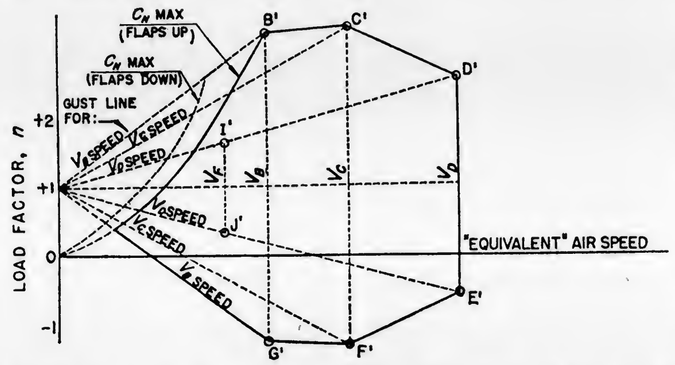
(1) The air load increment due to a specified gust must be added to the initial balancing tail load corresponding to steady level flight.

(2) The alleviating effect of wing down-wash and of the airplane's motion in response to the gust may be included in computing the tail gust load increment.



(3) Instead of a rational investigation of the airplane response, the gust alleviation factor $K_g$ may be applied to the specified gust intensity for the horizontal tail.

**§ 25.333 Flight envelope.**



(a) *General.* The strength requirements must be met at each combination of airspeed and load factor on and within the boundaries of the representative maneuvering and gust envelopes ($V$–$n$ diagrams) of paragraphs (b) and (c) of this section. These envelopes must also be used in determining the airplane structural operating limitations as specified in § 25.1501.

(b) *Maneuvering envelope.*

No. 250—6

(c) *Gust envelope.*

**§ 25.335 Design airspeeds.**

The selected design airspeeds are equivalent airspeeds (EAS). Estimated values of $V_{S_0}$ and $V_{S_1}$ must be conservative.

(a) *Design cruising speed, $V_C$.* For $V_C$, the following apply:

(1) The minimum value of $V_C$ must be sufficiently greater than $V_B$ to provide for inadvertent speed increases likely to occur as a result of severe atmospheric turbulence.

(2) In the absence of a rational investigation substantiating the use of other values, $V_C$ may not be less than $V_B+43$ knots. However, it need not exceed the maximum speed in level flight at maximum continuous power for the corresponding altitude.

(3) At altitudes where $V_D$ is limited by Mach number, $V_C$ may be limited to a selected Mach number.

(b) *Design dive speed, $V_D$.* The selected design dive speed must be used in determining the maximum operating limit speed for the airplane in accordance with § 25.1505.

(c) *Design maneuvering speed $V_A$.* For $V_A$, the following apply:

(1) $V_A$ may not be less than $V_{S_1}\sqrt{n}$ where—

(i) $n$ is the limit positive maneuvering load factor at $V_C$; and

(ii) $V_{S_1}$ is the stalling speed with flaps retracted.

(2) $V_A$ and $V_S$ must be evaluated at the design weight and altitude under consideration.

(3) $V_A$ need not be more than $V_C$ or the speed at which the positive $C_{N\ max}$ curve intersects the positive maneuver load factor line, whichever is less.

(d) *Design speed for maximum gust intensity, $V_B$.* For $V_B$, the following apply:

(1) $V_B$ may not be less than the speed determined by the intersection of the line representing the maximum positive lift $C_{N\ max}$ and the line representing the rough air gust velocity on the gust $V$-$n$ diagram, or $(\sqrt{n_g})\ V_{S_1}$, whichever is less, where—

(i) $n_g$ is the positive airplane gust load factor due to gust, at speed $V_C$ (in accordance with § 25.341), and at the particular weight under consideration; and

(ii) $V_{S_1}$ is the stalling speed with the flaps retracted at the particular weight under consideration.

(2) $V_B$ need not be greater than $V_C$.

(e) *Design flap speeds, $V_F$.* For $V_F$, the following apply:

(1) The design flap speed for each flap position (established in accordance with § 25.697(a)) must be sufficiently greater than the operating speed recommended for the corresponding stage of flight (including balked landings) to allow for probable variations in control of airspeed and for transition from one flap position to another.

(2) If an automatic flap positioning or load limiting device is used, the speeds and corresponding flap positions programmed or allowed by the device may be used.

(3) $V_F$ may not be less than—

(i) 1.6 $V_{S_1}$ with the flaps in takeoff position at maximum takeoff weight;

(ii) 1.8 $V_{S_1}$ with the flaps in approach position at maximum landing weight; and

(iii) 1.8 $V_{S_0}$ with the flaps in landing position at maximum landing weight.

**§ 25.337 Limit maneuvering load factors.**

(a) Except where limited by maximum (static) lift coefficients, the airplane is assumed to be subjected to symmetrical maneuvers resulting in the limit maneuvering load factors prescribed in this section. Pitching velocities appropriate to the corresponding pull-up and steady turn maneuvers must be taken into account.

(b) The positive limit maneuvering load factor $n$ for any speed up to $V_D$ may not be less than 2.5.

(c) The negative limit maneuvering load factor—

(1) May not be less than −1.0 at speeds up to $V_C$, and

(2) Must vary linearly with speed from the value at $V_C$ to zero at $V_D$.

(d) Maneuvering load factors lower than those specified in this section may be used if the airplane has design features that make it impossible to exceed these values in flight.

**§ 25.341 Gust loads.**

(a) The airplane is assumed to be subjected to symmetrical vertical gusts in level flight. The resulting limit load factors must correspond to the conditions determined as follows:

(1) Positive (up) and negative (down) rough air gusts of 66 fps at $V_B$ must be considered at altitudes between sea level and 20,000 feet. The gust velocity may be reduced linearly from 66 fps at 20,000 feet to 38 fps at 50,000 feet.

(2) Positive and negative gusts of 50 fps at $V_C$ must be considered at altitudes between sea level and 20,000 feet. The gust velocity may be reduced linearly from 50 fps at 20,000 feet to 25 fps at 50,000 feet.

(3) Positive and negative gusts of 25 fps at $V_D$ must be considered at altitudes between sea level and 20,000 feet. The gust velocity may be reduced linearly from 25 fps at 20,000 feet to 12.5 fps at 50,000 feet.

(b) The following assumptions must be made:

(1) The shape of the gust is

$$U=\frac{U_{ds}}{2}\left(1-\cos\frac{2\pi s}{25\bar{C}}\right)$$

where—

$s$ = distance penetrated into gust (ft);
$\bar{C}$ = mean geometric chord of wing (ft); and
$U_{ds}$ = derived gust velocity referred to in paragraph (a) (fps).

(2) Gust load factors vary linearly between the specified conditions B' through G', as shown on the gust envelope in § 25.333(c).

(c) In the absence of a more rational analysis, the gust load factors must be computed as follows:

$$n=1+\frac{K_g\,U_{ds}\,Va}{498\,(W/S)}$$

where—

$K_g=\frac{0.88\mu_g}{5.3+\mu_g}$ = gust alleviation factor;

$\mu_g=\frac{2(W/S)}{\rho\bar{C}ag}$ = airplane mass ratio;

$U_{ds}$ = derived gust velocities referred to in paragraph (a) (fps);

$\rho$ = density of air (slugs/cu. ft.);

$W/S$ = wing loading (psf);

$\bar{C}$ = mean geometric chord (ft.);

$g$ = acceleration due to gravity (ft/sec.²);

$V$ = airplane equivalent speed (knots); and

$a$ = slope of the airplane normal force coefficient curve $C_{N_A}$ per radian if the gust loads are applied to the wings and horizontal tail surfaces simultaneously by a rational method. The wing lift curve slope $C_L$ per radian may be used when the gust load is applied to the wings only and the horizontal tail gust loads are treated as a separate condition.

**§ 25.343 Design fuel and oil loads.**

(a) The disposable load combinations must include each fuel and oil load in the range from zero fuel and oil to the selected maximum fuel and oil load. A structural reserve fuel condition, not exceeding 45 minutes of fuel under the operating conditions in § 25.1001(c), may be selected.

(b) If a structural reserve fuel condition is selected, it must be used as the minimum fuel weight condition for showing compliance with the flight load requirements as prescribed in this subpart. In addition—

(1) The structure must be designed for a condition of zero fuel and oil in the wing at limit loads corresponding to—

(i) A maneuvering load factor of +2.25; and

(ii) Gust intensities equal to 85 percent of the values prescribed in § 25.341; and

(2) Fatigue evaluation of the structure must account for any increase in operating stresses resulting from the design condition of subparagraph (b)(1) of this paragraph; and

(3) The flutter, deformation, and vibration requirements must also be met with zero fuel.

**§ 25.345 High lift devices.**

(a) If flaps are to be used during takeoff, approach, or landing, at the design flap speeds established for these stages of flight under § 25.335(e) and with the flaps in the corresponding positions, the airplane is assumed to be subjected to symmetrical maneuvers and gusts within the range determined by—

(1) Maneuvering to a positive limit load factor of 2.0; and

(2) Positive and negative 25 fps derived gusts acting normal to the flight path in level flight.

(b) The airplane must be designed for the conditions prescribed in paragraph (a) of this section, except that the airplane load factor need not exceed 1.0, taking into account, as separate conditions, the effects of—

(1) Propeller slipstream corresponding to maximum continuous power at the design flap speeds $V_F$, and with takeoff power at not less than 1.4 times the stalling speed for the particular flap position and associated maximum weight; and

(2) A head-on gust of 25 feet per second velocity (EAS).

(c) If flaps or similar high lift devices are to be used as speed brakes in en route conditions, and with flaps in the appropriate position at speeds up to the flap design speed chosen for these conditions, the airplane is assumed to be subjected to symmetrical maneuvers and gusts within the range determined by—

(1) Maneuvering to a positive limit load factor of 2.5; and

(2) Positive and negative derived gusts as prescribed in § 25.341 acting normal to the flight path in level flight.

**§ 25.349 Rolling conditions.**

The airplane must be designed for rolling loads resulting from the conditions specified in paragraphs (a) and (b) of this section. Unbalanced aerodynamic moments about the center of gravity must be reacted in a rational or conservative manner, considering the principal masses furnishing the reacting inertia forces.

(a) *Maneuvering.* The following conditions, speeds, and aileron deflections (except as the deflections may be limited by pilot effort) must be considered in combination with an airplane load factor of zero and of two-thirds of the positive maneuvering factor used in design. In determining the required aileron deflections, the torsional flexibility of the wing must be considered in accordance with § 25.301(b):

(1) Conditions corresponding to steady rolling velocities must be investigated. In addition, conditions corresponding to maximum angular acceleration must be investigated for airplanes with engines or other weight concentrations outboard of the fuselage. For the angular acceleration conditions, zero rolling velocity may be assumed in the absence of a rational time history investigation of the maneuver.

(2) At $V_A$, a sudden deflection of the aileron to the stop is assumed.

(3) At $V_C$, the aileron deflection must be that required to produce a rate of roll not less than that obtained in subparagraph (2) of this paragraph.

(4) At $V_D$, the aileron deflection must be that required to produce a rate of roll not less than one-third of that in subparagraph (2) of this paragraph.

(b) *Unsymmetrical gusts.* The condition of unsymmetrical gusts must be considered by modifying the symmetrical flight conditions B' or C' (in § 25.333(c)) whichever produces the greater load factor. It is assumed that 100 percent of the wing air load acts on one side of the airplane and 80 percent acts on the other side.

**§ 25.351 Yawing conditions.**

The airplane must be designed for loads resulting from the conditions specified in paragraphs (a) and (b) of this section. Unbalanced aerodynamic moments about the center of gravity must be reacted in a rational or conservative manner considering the principal masses furnishing the reacting inertia forces:

(a) *Maneuvering.* At speeds from $V_{MC}$ to $V_A$, the following maneuvers must be considered. In computing the tail loads, the yawing velocity may be assumed to be zero:

(1) With the airplane in unaccelerated flight at zero yaw, it is assumed that the rudder control is suddenly displaced to the maximum deflection, as limited by the control stops or by a 300 lb. rudder pedal force, whichever is critical.

(2) With the rudder deflected as specified in subparagraph (1) of this paragraph, it is assumed that the airplane yaws to the resulting sideslip angle.

(3) With the airplane yawed to the static sideslip angle corresponding to the rudder deflection specified in subparagraph (1) of this paragraph, it is assumed that the rudder is returned to neutral.

(b) *Lateral gusts.* The airplane is assumed to encounter derived gusts normal to the plane of symmetry while in unaccelerated flight. The derived gusts and airplane speeds corresponding to conditions B' through J' (in § 25.333(c)) (as determined by §§ 25.341 and 25.345(a)(2) or 25.345(c)(2)) must be investigated. The shape of the gust must be as specified in § 25.341. In the absence of a rational investigation of the airplane's response to a gust, the gust

loading on the vertical tail surfaces must be computed as follows:

$$L_t = \frac{K_{g_t} U_{de} V a_t S_t}{498}$$

where—

$L_t$ = vertical tail load (lbs.);

$K_{g_t} = \frac{0.88 \mu_{g_t}}{5.3 + \mu_{g_t}}$ = gust alleviation factor;

$\mu_{g_t} = \frac{2W}{\rho \bar{C}_t g a_t S_t \left(\frac{K}{l_t}\right)^2}$ = lateral mass ratio;

$U_{de}$ = derived gust velocity (fps);

$\rho$ = air density (slugs/cu. ft.);

$W$ = airplane weight (lbs.);

$S_t$ = area of vertical tail (ft.²);

$\bar{C}_t$ = mean geometric chord of vertical surface (ft.);

$a_t$ = lift curve slope of vertical tail (per radian);

$K$ = radius of gyration in yaw (ft.);

$l_t$ = distance from airplane c.g. to lift center of vertical surface (ft.);

$g$ = acceleration due to gravity (ft./sec.²); and

$V$ = airplane equivalent speed (knots).

SUPPLEMENTARY CONDITIONS

**§ 25.361 Engine torque.**

(a) Each engine mount and its supporting structures must be designed for engine torque effects combined with—

(1) The limit engine torque corresponding to takeoff power and propeller speed acting simultaneously with 75 percent of the limit loads from flight condition A of § 25.333(b);

(2) The limit engine torque corresponding to maximum continuous power and propeller speed acting simultaneously with the limit loads from flight condition A of § 25.333(b); and

(3) For turbopropeller installations, in addition to the conditions specified in subparagraphs (1) and (2) of this paragraph, the limit engine torque corresponding to takeoff power and propeller speed multiplied by a factor of 1.6 acting simultaneously with 1$g$ level flight loads.

(b) For turbine engine installations, the limit engine torque load imposed by sudden engine stoppage due to malfunction or structural failure (such as compressor jamming) must be considered in the design of the engine mounts and supporting structure.

(c) The limit engine torque is obtained by multiplying the mean torque for maximum continuous power by a factor of—

(1) 1.25 for turbopropeller installations;

(2) 1.33 for reciprocating engines with five or more cylinders; or

(3) Two, three, or four, for engines with four, three, or two cylinders, respectively.

**§ 25.363 Side load on engine mount.**

(a) Each engine mount and its supporting structure must be designed for a limit load factor in a lateral direction, for the side load on the engine mount, at least equal to the maximum load factor obtained in the yawing conditions but not less than—

(1) 1.33; or

(2) One-third of the limit load factor for flight condition A.

(b) The side load prescribed in paragraph (a) of this section may be assumed to be independent of other flight conditions.

**§ 25.365 Pressurized cabin loads.**

For each pressurized compartment for occupants, the following apply:

(a) The airplane structure must be strong enough to withstand the flight loads combined with pressure differential loads from zero up to the maximum relief valve setting.

(b) The external pressure distribution in flight, and stress concentrations and fatigue effects must be accounted for.

(c) If landings may be made with the cabin pressurized, landing loads must be combined with pressure differential loads from zero up to the maximum allowed during landing.

(d) The airplane structure must be strong enough to withstand the pressure differential loads corresponding to the maximum relief valve setting multiplied by a factor of 1.33, omitting other loads.

(e) If a pressurized cabin has two or more compartments separated by partitions, bulkheads, or floors, the structure supporting the prescribed flight and grounds loads (and any other structure that, if it failed, could interfere with continued safe flight and landing) must be designed to withstand the effects of sudden release of pressure in any compartment through an opening resulting from the failure or penetration of an external door, window, or windshield panel, or from structural fatigue or penetration of the fuselage in this compartment, unless it is shown that the probability of failure or penetration is extremely remote.

(f) In determining the probability of failure or penetration and probable size of openings, the fail-safe features of the design may be considered if possible improper operation of closure devices and inadvertent door openings are also considered. The pressure relief provided by intercompartment venting may also be considered.

(g) Reasonable design precautions must be taken to minimize the probability of parts becoming detached and injuring occupants while in their seats.

**§ 25.367 Unsymmetrical loads due to engine failure.**

(a) The airplane must be designed for the unsymmetrical loads resulting from the failure of the critical engine. Turbopropeller airplanes must be designed for the following conditions in combination with a single malfunction of the propeller drag limiting system, considering the probable pilot corrective action on the flight controls:

(1) At speeds between $V_{MC}$ and $V_D$, the loads resulting from power failure because of fuel flow interruption are considered to be limit loads.

(2) At speeds between $V_{MC}$ and $V_C$, the loads resulting from the disconnection of the engine compressor from the turbine or from loss of the turbine blades are considered to be ultimate loads.

(3) The time history of the thrust decay and drag build-up occurring as a result of the prescribed engine failures must be substantiated by test or other data applicable to the particular engine-propeller combination.

(4) The timing and magnitude of the probable pilot corrective action must be conservatively estimated, considering the characteristics of the particular engine-propeller-airplane combination.

(b) Pilot corrective action may be assumed to be initiated at the time maximum yawing velocity is reached, but not earlier than two seconds after the engine failure. The magnitude of the corrective action may be based on the control forces specified in § 25.397(b) except that lower forces may be assumed where it is shown by analysis or test that these forces can control the yaw and roll resulting from the prescribed engine failure conditions.

**§ 25.371 Gyroscopic loads.**

The structure supporting the engines must be designed for gyroscopic loads associated with the conditions specified in §§ 25.331, 25.349, and 25.351, with the engines at maximum continuous r.p.m.

**§ 25.373 Speed control devices.**

If speed control devices (such as spoilers and drag flaps) are installed for use in en route conditions—

(a) The airplane must be designed for the symmetrical maneuvers and gusts prescribed in §§ 25.333, 25.337, and 25.341, and the yawing maneuvers and lateral gusts in § 25.351, with the device extended at speeds up to the placard device extended speed; and

(b) If the device has automatic operating or load limiting features, the airplane must be designed for the maneuver and gust conditions prescribed in paragraph (a) of this section, at the speeds and corresponding device positions that the mechanism allows.

CONTROL SURFACE AND SYSTEM LOADS

**§ 25.391 Control surface loads: general.**

The control surfaces must be designed for the limit loads resulting from the flight conditions in §§ 25.331, 25.349, and 25.351 and the ground gust conditions in § 25.415, considering the requirements for—

(a) Loads parallel to hinge line, in § 25.393;

(b) Pilot effort effects, in § 25.397;

(c) Trim tab effects, in § 25.407;

(d) Unsymmetrical loads, in § 25.427; and

(e) Outboard fins, in § 25.445.

**§ 25.393 Loads parallel to hinge line.**

(a) Control surfaces and supporting hinge brackets must be designed for inertia loads acting parallel to the hinge line.

(b) In the absence of more rational data, the inertia loads may be assumed to be equal to $KW$, where—

(1) $K$=24 for vertical surfaces;

(2) $K$=12 for horizontal surfaces; and

(3) $W$=weight of the movable surfaces.

**§ 25.395 Control system.**

(a) Elevator, aileron, and rudder control systems and their supporting structures must be designed for loads corresponding to 125 percent of the computed hinge moments of the movable control surface in the conditions prescribed in § 25.391.

(b) The system limit loads, except the loads resulting from ground gusts, need not exceed the loads that can be produced by the pilot (or pilots) and by automatic devices operating the controls. The loads must be great enough to provide a rugged system for service use, considering jamming, ground gusts, taxiing tail to wind, control inertia, and friction.

**§ 25.397 Control system loads.**

(a) *General.* The maximum and minimum pilot forces, specified in paragraph (c) of this section, are assumed to act at the appropriate control grips or pads (in a manner simulating flight conditions) and to be reacted at the attachment of the control system to the control surface horn.

(b) *Pilot effort effects.* In the control surface flight loading condition, the air loads on movable surfaces and the corresponding deflections need not exceed those that would result in flight from the application of any pilot force within the ranges specified in paragraph (c) of this section. Two-thirds of the maximum values specified for the aileron and elevator may be used if control surface hinge moments are based on reliable data. In applying this criterion, the effects of servo mechanisms, tabs, and automatic pilot systems, must be considered.

(c) *Limit pilot forces.* The limit pilot forces are as follows:

| Control | Maximum forces | Minimum forces |
|---|---|---|
| Aileron: | | |
| Stick | 100 lbs. | 40 lbs. |
| Wheel* | 80 $D$ in.-lbs.** | 40 $D$ in.-lbs. |
| Elevator: | | |
| Stick | 250 lbs. | 100 lbs. |
| Wheel | 300 lbs. | 100 lbs. |
| Rudder | 300 lbs. | 130 lbs. |

*The critical parts of the aileron control system must be designed for a single tangential force with a limit value equal to 1.25 times the couple force determined from these criteria.

**$D$=wheel diameter (inches).

**§ 25.399 Dual control system.**

(a) Each dual control system must be designed for the pilots operating in opposition, using individual pilot forces not less than—

(1) 0.75 times those obtained under § 25.395; or

(2) The minimum forces specified in § 25.397(c).

(b) The control system must be designed for pilot forces applied in the same direction, using individual pilot forces not less than 0.75 times those obtained under § 25.395.

**§ 25.405 Secondary control system.**

Secondary controls, such as wheel brake, spoiler, and tab controls, must be designed for the maximum forces that a pilot is likely to apply to those controls. The following values may be used:

PILOT CONTROL FORCE LIMITS (SECONDARY CONTROLS)

| Control | Limit pilot forces |
|---|---|
| Miscellaneous: | |
| *Crank, wheel, or lever. | $\left(\frac{1+R}{3}\right) \times 50$ lbs., but not less than 50 lbs. nor more than 150 lbs. ($R$=radius). (Applicable to any angle within 20° of plane of control). |
| Twist | 133 in.-lbs. |
| Push-pull | To be chosen by applicant. |

*Limited to flap, tab, stabilizer, spoiler, and landing gear operation controls.

**§ 25.407 Trim tab effects.**

The effects of trim tabs on the control surface design conditions must be accounted for only where the surface loads are limited by maximum pilot effort. In these cases, the tabs are considered to be deflected in the direction that would assist the pilot, and the deflections are—

(a) For elevator trim tabs, those required to trim the airplane at any point within the positive portion of the pertinent flight envelope in § 25.333(b), except as limited by the stops; and

(b) For aileron and rudder trim tabs, those required to trim the airplane in the critical unsymmetrical power and loading conditions, with appropriate allowance for rigging tolerances.

**§ 25.409 Tabs.**

(a) *Trim tabs.* Trim tabs must be designed to withstand loads arising from all likely combinations of tab setting, primary control position, and airplane speed (obtainable without exceeding the flight load conditions prescribed for the airplane as a whole), when the effect of the tab is opposed by pilot effort forces up to those specified in § 25.397(b).

(b) *Balancing tabs.* Balancing tabs must be designed for deflections consistent with the primary control surface loading conditions.

(c) *Servo tabs.* Servo tabs must be designed for deflections consistent with the primary control surface loading conditions obtainable within the pilot maneuvering effort, considering possible opposition from the trim tabs.

**§ 25.415 Ground gust conditions.**

(a) The control system must be designed as follows for control surface loads due to ground gusts and taxiing downwind:

(1) The control system between the stops nearest the surfaces and the cockpit controls must be designed for loads corresponding to the limit hinge moments $H$ of subparagraph (2) of this paragraph. These loads need not exceed—

(i) The loads corresponding to the maximum pilot loads in § 25.397(c) for each pilot alone; or

(ii) 0.75 times these maximum loads for each pilot when the pilot forces are applied in the same direction.

(2) The control system stops nearest the surfaces, the control system locks, and the parts of the systems (if any) between these stops and locks and the control surface horns, must be designed for limit hinge moments $H$ obtained from the formula, $H=KcSq$, where—

$H$=limit hinge moment (ft. lbs.);

$c$=mean chord of the control surface aft of the hinge line (ft.);

$S$=area of the control surface aft of the hinge line (sq. ft.);

$q$=dynamic pressure (p.s.f.) based on a design speed not less than $14.6\sqrt{W/S}+14.6$ (f.p.s.), except that the design speed need not exceed 88 f.p.s.; and

$K$=limit hinge moment factor for ground gusts derived in paragraph (b) of this section.

(b) The limit hinge moment factor $K$ for ground gusts must be derived as follows:

| Surface | $K$ | Position of controls |
|---|---|---|
| (a) Aileron | 0.75 | Control column locked or lashed in mid-position. |
| (b) Aileron | *±0.50 | Ailerons at full throw. |
| (c) Elevator | *±0.75 | (c) Elevator full down. |
| (d) Elevator | *±0.75 | (d) Elevator full up. |
| (e) Rudder | 0.75 | (e) Rudder in neutral. |
| (f) Rudder | 0.75 | (f) Rudder at full throw. |

*A positive value of $K$ indicates a moment tending to depress the surface, while a negative value of $K$ indicates a moment tending to raise the surface.

**§ 25.427 Unsymmetrical loads.**

(a) Horizontal tail surfaces and their supporting structure must be designed for unsymmetrical loads arising from yawing and slipstream effects, in combination with the prescribed flight conditions.

(b) In the absence of more rational data, the following apply:

(1) For airplanes that are conventional in regard to location of propellers, wings, tail surfaces, and fuselage shape—

(i) 100 percent of the maximum loading from the symmetrical flight conditions may be assumed to act on the surface on one side of the plane of symmetry; and

(ii) 80 percent of this loading may be assumed to act on the other side.

(2) For airplanes that are not conventional (such as where the horizontal tail surfaces have appreciable dihedral or are supported by the vertical tail surfaces), the surfaces and supporting structures may be designed for combined vertical and horizontal surface loads resulting from the prescribed maneuvers.

**§ 25.445 Outboard fins.**

(a) If outboard fins are on the horizontal tail surface, the tail surfaces must be designed for the maximum horizontal surface load in combination with the corresponding loads induced on the vertical surfaces by endplate effects. These induced effects need not be combined with other vertical surface loads.

(b) To provide for unsymmetrical loading when outboard fins extend above and below the horizontal surface, the critical vertical surface loading (load per unit area) determined under § 25.391 must also be applied as follows:

(1) 100 percent to the area of the vertical surfaces above (or below) the horizontal surface.

(2) 80 percent to the area below (or above) the horizontal surface.

**§ 25.457 Wing flaps.**

Wing flaps, their operating mechanisms, and their supporting structures must be designed for critical loads occurring in the conditions prescribed in § 25.345, accounting for the loads occurring during transition from one flap position and airspeed to another.

**§ 25.459 Special devices.**

The loading for special devices using aerodynamic surfaces (such as slots and spoilers) must be determined from test data.

GROUND LOADS

**§ 25.471 General.**

(a) *Loads and equilibrium.* For limit ground loads—

(1) Limit ground loads obtained under this subpart are considered to be external forces applied to the airplane structure; and

(2) In each specified ground load condition, the external loads must be placed in equilibrium with the linear and angular inertia loads in a rational or conservative manner.

(b) *Critical centers of gravity.* The critical centers of gravity within the range for which certification is requested must be selected so that the maximum design loads are obtained in each landing gear element.

(c) *Design weights.* Design weights may be used for structural design only.

(d) *Landing gear dimension data.* Figure (1) of Appendix A contains the basic landing gear dimension data.

**§ 25.473 Ground load conditions and assumptions.**

(a) For the landing conditions specified in §§ 25.479 through 25.485, the following apply:

(1) The selected limit vertical inertia load factors at the center of gravity of the airplane may not be less than the values that would be obtained—

(i) In the attitude and subject to the drag loads associated with the particular landing condition;

(ii) With a limit descent velocity of 10 f.p.s. at the design landing weight (the maximum weight for landing conditions at the maximum descent velocity); and

(iii) With a limit descent velocity of 6 f.p.s. at the design takeoff weight (the maximum weight for taxiing conditions and landing conditions at a reduced descent velocity).

(2) A wing lift, not exceeding the airplane weight, may be assumed to exist throughout the landing impact and to act through the center of gravity of the airplane.

(b) The prescribed descent velocities may be modified if it is shown that the airplane has design features that make it impossible to develop these velocities.

(c) The minimum limit inertia load factors corresponding to the required limit descent velocities must be determined in accordance with § 25.723(a).

**§ 25.477 Landing gear arrangement.**

Sections 25.479 through 25.485 apply to airplanes with conventional arrangements of main and nose gears, or main and tail gears, when normal operating techniques are used.

**§ 25.479 Level landing conditions.**

(a) In the level attitude, the airplane is assumed to contact the ground at forward velocity components, ranging from $V_{L_1}$ to 1.25 $V_{L_2}$, parallel to the ground, and to be subjected to the load factors prescribed in § 25.473(a)(1) with—

(1) $V_{L_1}$ equal to $V_{S_0}$ (TAS) at the appropriate landing weight and in standard sea level conditions; and

(2) $V_{L_2}$ equal to $V_{S_0}$ (TAS) at the appropriate landing weight and altitudes in a hot day temperature of 41 degrees F. above standard.

(b) The effects of increased contact speeds must be investigated if approval of downwind landings exceeding 10 knots is desired.

(c) Assuming that the following combinations of vertical and drag components act at the axle centerline, the following apply:

(1) For the condition of maximum wheel spin-up load, drag components simulating the forces required to accelerate the wheel rolling assembly up to the specified ground speed must be combined with the vertical ground reactions existing at the instant of peak drag loads. The coefficient of friction between the tires and the ground may be established by considering the effects of skidding velocity and tire pressure. However, this coefficient of friction need not be more than 0.8. This condition must be applied to the landing gear, directly affected attaching structure, and large mass items such as external fuel tanks and nacelles.

(2) For the condition of maximum wheel vertical load, an aft acting drag component of not less than 25 percent of the maximum vertical ground reaction must be combined with the maximum ground reaction of § 25.473.

(3) For the condition of maximum springback load, forward-acting horizontal loads resulting from a rapid reduction of the spin-up drag loads must be combined with the vertical ground reactions at the instant of the peak forward load. This condition must be applied to the landing gear, directly affected attaching structure, and large mass items such as external fuel tanks and nacelles.

(d) For the level landing attitude for airplanes with tail wheels, the conditions specified in paragraph (a) of this section must be investigated with the airplane horizontal reference line horizontal in accordance with figure 2 of Appendix A.

(e) For the level landing attitude for airplanes with nose wheels, shown in Figure 2 of Appendix A, the conditions specified in paragraphs (a) through (c) of this section must be investigated, assuming the following attitudes:

(1) An attitude in which the main wheels are assumed to contact the ground with the nose wheel just clear of the ground.

(2) If reasonably attainable at the specified descent and forward velocities, an attitude in which the nose and main wheels are assumed to contact the ground simultaneously. For this attitude—

(i) The nose and main gear may be separately investigated under the conditions in paragraph (c)(1) and (3) of this section; and

(ii) The pitching moment is assumed, under the condition in paragraph (c)(2) of this section, to be resisted by the nose gear.

**§ 25.481 Tail-down landing conditions.**

(a) In the tail-down attitude, the airplane is assumed to contact the ground at forward velocity components, ranging from $V_{L_1}$ to $V_{L_2}$, parallel to the ground, and is subjected to the load factors prescribed in § 25.473(a)(1) with—

(1) $V_{L_1}$ equal to $V_{S_0}$ (TAS) at the appropriate landing weight and in standard sea level conditions; and

(2) $V_{L_2}$ equal to $V_{S_0}$ (TAS) at the appropriate landing weight and altitudes in a hot day temperature of 41 degrees F. above standard.

The combination of vertical and drag components specified in § 25.479(c) (1) and (3) is considered to be acting at the main wheel axle centerline.

(b) For the tail-down landing condition for airplanes with tail wheels, the main and tail wheels are assumed to contact the ground simultaneously, in accordance with figure 3 of Appendix A. Ground reaction conditions on the tail wheel are assumed to act—

(1) Vertically; and

(2) Up and aft through the axle at 45 degrees to the ground line.

(c) For the tail-down landing condition for airplanes with nose wheels, the airplane is assumed to be at an attitude corresponding to either the stalling angle or the maximum angle allowing clearance with the ground by each part of the airplane other than the main wheels, in accordance with figure 3 of Appendix A, whichever is less.

**§ 25.483 One-wheel landing conditions.**

For the one-wheel landing condition, the airplane is assumed to be in the level attitude and to contact the ground on one side of the main landing gear, in accordance with Figure 4 of Appendix A. In this attitude—

(a) The ground reactions must be the same as those obtained on that side under § 25.479(c)(2); and

(b) Each unbalanced external load must be reacted by airplane inertia in a rational or conservative manner.

**§ 25.485 Side load conditions.**

(a) For the side load condition, the airplane is assumed to be in the level attitude with only the main wheels contacting the ground, in accordance with figure 5 of Appendix A.

(b) Side loads of 0.8 of the vertical reaction (on one side) acting inward and 0.6 of the vertical reaction (on the other side) acting outward must be combined with one-half of the maximum vertical ground reactions obtained in the level landing conditions. These loads are assumed to be applied at the ground contact point and to be resisted by the inertia of the airplane. The drag loads may be assumed to be zero.

**§ 25.487 Rebound landing condition.**

(a) The landing gear and its supporting structure must be investigated for the loads occurring during rebound of the airplane from the landing surface.

(b) With the landing gear fully extended and not in contact with the ground, a load factor of 20.0 must act on the unsprung weights of the landing gear. This load factor must act in the direction of motion of the unsprung weights as they reach their limiting positions in extending with relation to the sprung parts of the landing gear.

**§ 25.489 Ground handling conditions.**

Unless otherwise prescribed, the landing gear and airplane structure must be investigated for the conditions in §§ 25.491 through 25.509 with the airplane at the design takeoff weight. No wing lift may be considered. The shock absorbers and tires may be assumed to be in their static position.

**§ 25.491 Takeoff run.**

The landing gear and the airplane structure are assumed to be subjected to loads not less than those obtained under conditions described in § 25.235.

**§ 25.493 Braked roll conditions.**

(a) An airplane with a tail wheel is assumed to be in the level attitude with the load on the main wheels, in accordance with figure 6 of Appendix A. The limit vertical load factor is 1.2 at the design landing weight, and 1.0 at the design takeoff weight. A drag reaction equal to the vertical reaction multiplied by a coefficient of friction of 0.8, must be combined with the vertical ground reaction and applied at the ground contact point.

(b) For an airplane with a nose wheel, the limit vertical load factor is 1.2 at the design landing weight, and 1.0 at the design takeoff weight. A drag reaction equal to the vertical reaction, multiplied by a coefficient of friction of 0.8, must be combined with the vertical reaction and applied at the ground contact point of each wheel with brakes. The following two attitudes, in accordance with figure 6 of Appendix A, must be considered:

(1) The level attitude with the wheels contacting the ground and the loads distributed between the main and nose gear. Zero pitching acceleration is assumed.

(2) The level attitude with only the main gear contacting the ground and with the pitching moment resisted by angular acceleration.

(c) A drag reaction lower than that prescribed in paragraphs (a) and (b) of this section may be used if it is substantiated that an effective drag force of 0.8 times the vertical reaction cannot be attained under any likely loading condition.

**§ 25.495 Turning.**

In the static position, in accordance with figure 7 of Appendix A, the airplane is assumed to execute a steady turn by nose gear steering, or by application of sufficient differential power, so that the limit load factors applied at the center of gravity are 1.0 vertically and 0.5 laterally. The side ground reaction of each wheel must be 0.5 of the vertical reaction.

**§ 25.497 Tail-wheel yawing.**

(a) A vertical ground reaction equal to the static load on the tail wheel, in combination with a side component of equal magnitude, is assumed.

(b) If there is a swivel, the tail wheel is assumed to be swiveled 90° to the airplane longitudinal axis with the resultant load passing through the axle.

(c) If there is a lock, steering device, or shimmy damper the tail wheel is also assumed to be in the trailing position with the side load acting at the ground contact point.

**§ 25.499 Nose-wheel yaw.**

(a) A vertical load factor of 1.0 at the airplane center of gravity, and a side component at the nose wheel ground contact equal to 0.8 of the vertical ground reaction at that point, are assumed.

(b) With the airplane assumed to be in static equilibrium with the loads resulting from the use of brakes on one side of the main landing gear, the nose gear, its attaching structure, and the fuselage structure must be designed for the following loads:

(1) A vertical load factor at the center of gravity of 1.0.

(2) A forward acting load at the airplane center of gravity of 0.8 times the vertical load on one main gear.

(3) Side and vertical loads at the ground contact point on the nose gear that are required for static equilibrium.

(4) A side load factor at the airplane center of gravity of zero.

(c) If the loads prescribed in paragraph (a) of this section result in a nose gear side load higher than 0.8 times the vertical nose gear load, the design nose gear side load may be limited to 0.8 times the vertical load, with unbalanced yawing moments assumed to be resisted by airplane inertia forces.

(d) For the landing gear and airplane structure, the loading conditions are those prescribed in paragraph (b) of this section, except that—

(1) A lower drag reaction may be used if an effective drag force of 0.8 times the vertical reaction cannot be reached under any likely loading condition; and

(2) The forward acting load at the center of gravity need not exceed the maximum drag reaction on one main gear, determined in accordance with § 25.493(b).

**§ 25.503 Pivoting.**

(a) The airplane is assumed to pivot about one side of the main gear with the brakes on that side locked. The limit vertical load factor must be 1.0 and the coefficient of friction 0.8.

(b) The airplane is assumed to be in static equilibrium, with the loads being applied at the ground contact points, in accordance with figure 8 of Appendix A.

**§ 25.507 Reversed braking.**

(a) The airplane must be in a three point static ground attitude. Horizontal reactions parallel to the ground and directed forward must be applied at the ground contact point of each wheel with brakes. The limit loads must be equal to 0.55 times the vertical load at each wheel or to the load developed by 1.2 times the nominal maximum static brake torque, whichever is less.

(b) For airplanes with nose wheels, the pitching moment must be balanced by rotational inertia.

(c) For airplanes with tail wheels, the resultant of the ground reactions must pass through the center of gravity of the airplane.

**§ 25.509 Towing loads.**

(a) The towing loads specified in paragraph (d) of this section must be considered separately. These loads must be applied at the towing fittings and must act parallel to the ground. In addition—

(1) A vertical load factor equal to 1.0 must be considered acting at the center of gravity;

(2) The shock struts and tires must be in their static positions; and

(3) With $W_T$ as the design maximum takeoff weight, the towing load, $F_{TOW}$, is—

(i) 0.3 $W_T$ for $W_T$ less than 30,000 pounds;

(ii) $\frac{6W_T+450,000}{70}$ for $W_T$ between 30,000 and 100,000 pounds; and

(iii) 0.15 $W_T$ for $W_T$ over 100,000 pounds.

(b) For towing points not on the landing gear but near the plane of symmetry of the airplane, the drag and side tow load components specified for the auxiliary gear apply. For towing points located outboard of the main gear, the drag and side tow load components specified for the main gear apply. Where the specified angle of swivel cannot be reached, the maximum obtainable angle must be used.

(c) The towing loads specified in paragraph (d) of this section must be reacted as follows:

(1) The side component of the towing load at the main gear must be reacted by a side force at the static ground line of the wheel to which the load is applied.

(2) The towing loads at the auxiliary gear and the drag components of the towing loads at the main gear must be reacted as follows:

(i) A reaction with a maximum value equal to the vertical reaction must be applied at the axle of the wheel to which the load is applied. Enough airplane inertia to achieve equilibrium must be applied.

(ii) The loads must be reacted by airplane inertia.

(d) The prescribed towing loads are as follows:

| Tow point | Position | Load | | |
|---|---|---|---|---|
| | | Magnitude | No. | Direction |
| Main gear. | | 0.75 $F_{TOW}$ per main gear unit. | 1<br>2<br>3<br>4 | Forward, parallel to drag axis.<br>Forward, at 30° to drag axis.<br>Aft, parallel to drag axis.<br>Aft, at 30° to drag axis. |
| Auxiliary gear. | Swiveled forward. | 1.0 $F_{TOW}$. | 5<br>6 | Forward.<br>Aft. |
| | Swiveled aft. | | 7<br>8 | Forward.<br>Aft. |
| | Swiveled 45° from forward. | 0.5 $F_{TOW}$. | 9<br>10 | Forward, in plane of wheel.<br>Aft, in plane of wheel. |
| | Swiveled 45° from aft. | | 11<br>12 | Forward, in plane of wheel.<br>Aft, in plane of wheel. |

**§ 25.511 Ground load; unsymmetrical loads on multiple-wheel units.**

(a) *General.* Multiple-wheel landing gear units are assumed to be subjected to the limit ground loads prescribed in this subpart under paragraphs (b) through (f) of this section. In addition—

(1) A tandem strut gear arrangement is a multiple-wheel unit; and

(2) In determining the total load on a gear unit with respect to the provisions of paragraphs (b) through (f) of this section, the transverse shift in the load centroid, due to unsymmetrical load distribution on the wheels, may be neglected.

(b) *Distribution of limit loads to wheels; tires inflated.* The distribution of the limit loads among the wheels of the landing gear must be established for each landing, taxiing, and ground handling condition, taking into account the effects of the following factors:

(1) The number of wheels and their physical arrangements. For truck type landing gear units, the effects of any see-saw motion of the truck during the landing impact must be considered in determining the maximum design loads for the fore and aft wheel pairs.

(2) Any differentials in tire diameters resulting from a combination of manufacturing tolerances, tire growth, and tire wear. A maximum tire-diameter differential equal to ⅔ of the most unfavorable combination of diameter variations that is obtained when taking into account manufacturing tolerances, tire growth, and tire wear, may be assumed.

(3) Any unequal tire inflation pressure, assuming the maximum variation to be ±5 percent of the nominal tire inflation pressure.

(4) A runway crown of zero and a runway crown having a convex upward shape that may be approximated by a slope of 1½ percent with the horizontal. Runway crown effects must be considered with the nose gear unit on either slope of the crown.

(5) The airplane attitude.

(6) Any structural deflections.

(c) *Deflated tires.* The effect of deflated tires on the structure must be considered with respect to the loading conditions specified in paragraphs (d) through (f) of this section, taking into account the physical arrangement of the gear components. In addition—

(1) The deflation of any one tire for each multiple wheel landing gear unit, and the deflation of any two critical tires for each landing gear unit using four or more wheels per unit, must be considered; and

(2) The ground reactions must be applied to the wheels with inflated tires except that, for multiple-wheel gear units with more than one shock strut, a rational distribution of the ground reactions between the deflated and inflated tires, accounting for the differences in shock strut extensions resulting from a deflated tire, may be used.

(d) *Landing conditions.* For one and for two deflated tires, the applied load to each gear unit is assumed to be 60 percent and 50 percent, respectively, of the limit load applied to each gear for each of the prescribed landing conditions. However, for the drift landing condition of § 25.485, 100 percent of the vertical load must be applied.

(e) *Taxiing and ground handling conditions.* For one and for two deflated tires—

(1) The applied side or drag load factor, or both factors, at the center of gravity must be the most critical value up to 50 percent and 40 percent, respectively, of the limit side or drag load factors, or both factors, corresponding to the most severe condition resulting from consideration of the prescribed taxiing and ground handling conditions;

(2) For the braked roll conditions of § 25.493(a) and (b)(2), the drag loads on each inflated tire may not be less than those at each tire for the symmetrical load distribution with no deflated tires;

(3) The vertical load factor at the center of gravity must be 60 percent and 50 percent, respectively, of the factor with no deflated tires, except that it may not be less than 1g; and

(4) Pivoting need not be considered.

(f) *Towing conditions.* For one and for two deflated tires, the towing load, $F_{TOW}$, must be 60 percent and 50 percent, respectively, of the load prescribed.

## WATER LOADS

**§ 25.521 General.**

(a) Seaplanes must be designed for the water loads developed during takeoff and landing, with the seaplane in any attitude likely to occur in normal operation, and at the appropriate forward and sinking velocities under the most severe sea conditions likely to be encountered.

(b) Unless a more rational analysis of the water loads is made, or the standards in ANC-3 are used, §§ 25.523 through 25.537 apply.

(c) The requirements of this section and §§ 25.523 through 25.537 apply also to amphibians.

**§ 25.523 Design weights and center of gravity positions.**

(a) *Design weights.* The water load requirements must be met at each operating weight up to the design landing weight except that, for the takeoff condition prescribed in § 25.531, the design takeoff weight must be used.

(b) *Center of gravity positions.* The critical centers of gravity within the limits for which certification is requested must be considered to reach maximum design loads for each part of the seaplane structure.

**§ 25.525 Application of loads.**

(a) Unless otherwise prescribed, the seaplane as a whole is assumed to be subjected to the loads corresponding to the load factors specified in § 25.527.

(b) In applying the loads resulting from the load factors prescribed in § 25.527, the loads may be distributed over the hull or main float bottom (in order to avoid excessive local shear loads and bending moments at the location of water load application) using pressures not less than those prescribed in § 25.533 (b).

(c) For twin float seaplanes, each float must be treated as an equivalent hull on a fictitious seaplane with a weight equal to one-half the weight of the twin float seaplane.

(d) Except in the takeoff condition of § 25.531, the aerodynamic lift on the seaplane during the impact is assumed to be ⅔ of the weight of the seaplane.

**§ 25.527 Hull and main float load factors.**

(a) Water reaction load factors $n_w$ must be computed in the following manner:

(1) For the step landing case

$$n_w = \frac{C_1 V_{S_0}^2}{\tan^{2/3}\beta W^{1/3}}$$

(2) For the bow and stern landing cases

$$n_w = \frac{C_1 V_{S_0}^2}{\tan^{2/3}\beta W^{1/3}} \times \frac{K_1}{(1+r_x^2)^{2/3}}.$$

(b) The following values are used:

(1) $n_w$=water reaction load factor (that is, the water reaction divided by seaplane weight).

(2) $C_1$=empirical seaplane operations factor equal to 0.012 (except that this factor may not be less than that necessary to obtain the minimum value of step load factor of 2.33).

(3) $V_{S_0}$=seaplane stalling speed with flaps extended in the appropriate landing position and with no slipstream effect.

(4) $\beta$=angle of dead rise at the longitudinal station at which the load factor is being determined, in accordance with figure 1 of Appendix B.

(5) $W$=seaplane design landing weight in pounds.

(6) $K_1$=empirical hull station weighing factor, in accordance with figure 2 of Appendix B.

(7) $r_x$=ratio of distance, measured parallel to hull reference axis, from the center of gravity of the seaplane to the hull longitudinal station at which the load factor is being computed to the radius of gyration in pitch of the seaplane, the hull reference axis being a straight line, in the plane of symmetry, tangential to the keel at the main step.

(c) For a twin float seaplane, because of the effect of flexibility of the attachment of the floats to the seaplane, the factor $K_1$ may be reduced at the bow and stern to 0.8 of the value shown in figure 2 of Appendix B. This reduction applies only to the design of the carry-through and seaplane structure.

**§ 25.529 Hull and main float landing conditions.**

(a) *Symmetrical step, bow, and stern landing.* For symmetrical step, bow, and stern landings, the limit water reaction load factors are those computed under § 25.527. In addition—

(1) For symmetrical step landings, the resultant water load must be applied at the keel, through the center of gravity, and must be directed perpendicularly to the keel line;

(2) For symmetrical bow landings, the resultant water load must be applied at the keel, one-fifth of the longitudinal distance from the bow to the step, and must be directed perpendicularly to the keel line; and

(3) For symmetrical stern landings, the resultant water load must be applied at the keel, at a point 85 percent of the longitudinal distance from the step to the stern post, and must be directed perpendicularly to the keel line.

(b) *Unsymmetrical landing for hull and single float seaplanes.* Unsymmetrical step, bow, and stern landing conditions must be investigated. In addition—

(1) The loading for each condition consists of an upward component and a side component equal, respectively, to 0.75 and 0.25 tan $\beta$ times the resultant load in the corresponding symmetrical landing condition; and

(2) The point of application and direction of the upward component of the load is the same as that in the symmetrical condition, and the point of application of the side component is at the same longitudinal station as the upward component but is directed inward perpendicularly to the plane of symmetry at a point midway between the keel and chine lines.

(c) *Unsymmetrical landing; twin float seaplanes.* The unsymmetrical loading consists of an upward load at the step of each float of 0.75 and a side load of 0.25 tan $\beta$ at one float times the step landing load reached under § 25.527. The side load is directed inboard, perpendicularly to the plane of symmetry midway between the keel and chine lines of the float, at the same longitudinal station as the upward load.

**§ 25.531 Hull and main float takeoff condition.**

For the wing and its attachment to the hull or main float—

(a) The aerodynamic wing lift is assumed to be zero; and

(b) A downward inertia load, corresponding to a load factor computed from the following formula, must be applied:

$$n = \frac{C_{TO} V_{S_1}^2}{\tan^{2/3}\beta W^{1/3}}$$

where—

$n$=inertia load factor;

$C_{TO}$=empirical seaplane operations factor equal to 0.004;

$V_{S_1}$=seaplane stalling speed at the design takeoff weight with the flaps extended in the appropriate takeoff position;

$\beta$=angle of dead rise at the main step (degrees); and

$W$=seaplane design takeoff weight in pounds.

**§ 25.533 Hull and main float bottom pressures.**

(a) *General.* The hull and main float structure, including frames and bulkheads, stringers, and bottom plating, must be designed under this section.

(b) *Local pressures.* For the design of the bottom plating and stringers and their attachments to the supporting structure, the following pressure distributions must be applied:

(1) For an unflared bottom, the pressure at the chine is 0.75 times the pressure at the keel, and the pressures between the keel and chine vary linearly, in accordance with figure 3 of Appendix B. The pressure at the keel (psi) is computed as follows:

$$P_k = C_2 \frac{K_2 V_{S_1}^2}{\tan \beta_k}$$

where—

$P_k$=pressure at the keel;

$C_2$=0.00213;

$K_2$=hull station weighing factor, in accordance with figure 2 of Appendix B;

$V_{S_1}$=seaplane stalling speed at the design takeoff weight with flaps extended in the appropriate takeoff position; and

$\beta_k$=angle of dead rise at keel, in accordance with figure 1 of Appendix B.

(2) For a flared bottom, the pressure at the beginning of the flare is the same as that for an unflared bottom, and the pressure between the chine and the beginning of the flare varies linearly, in accordance with figure 3 of Appendix B. The pressure distribution is the same as that prescribed in subparagraph (1) of this paragraph for an unflared bottom except that the pressure at the chine is computed as follows:

$$P_{ch} = C_3 \frac{K_2 V_{S_1}^2}{\tan \beta}$$

where—

$P_{ch}$=pressure at the chine;

$C_3$=0.0016;

$K_2$=hull station weighing factor, in accordance with figure 2 of Appendix B;

$V_{S_1}$=seaplane stalling speed at the design takeoff weight with flaps extended in the appropriate takeoff position; and

$\beta$=angle of dead rise at appropriate station.

The area over which these pressures are applied must simulate pressures occurring during high localized impacts on the hull or float, but need not extend over an area that would induce critical stresses in the frames or in the overall structure.

(c) *Distributed pressures.* For the design of the frames, keel, and chine structure, the following pressure distributions apply:

(1) Symmetrical pressures are computed as follows:

$$P = C_4 \frac{K_2 V_{S_0}^2}{\tan \beta}$$

where—

$P$=pressure;

$C_4$=0.078 $C_1$ (with $C_1$ computed under § 25.527);

$K_2$=hull station weighing factor, determined in accordance with figure 2 of Appendix B;

$V_{S_0}$=seaplane stalling speed with landing flaps extended in the appropriate position and with no slipstream effect; and

$\beta$=angle of dead rise at appropriate station.

(2) The unsymmetrical pressure distribution consists of the pressures prescribed in subparagraph (1) of this paragraph on one side of the hull or main float centerline and one-half of that pressure on the other side of the hull or main float centerline, in accordance with figure 3 of Appendix B.

These pressures are uniform and must be applied simultaneously over the entire hull or main float bottom. The loads obtained must be carried into the sidewall structure of the hull proper, but need not be transmitted in a fore and aft direction as shear and bending loads.

**§ 25.535 Auxiliary float loads.**

(a) *General.* Auxiliary floats and their attachments and supporting structures must be designed for the conditions prescribed in this section. In the cases specified in paragraphs (b) through (e) of this section, the prescribed water loads may be distributed over the float bottom to avoid excessive local loads, using bottom pressures not less than those prescribed in paragraph (g) of this section.

(b) *Step loading.* The resultant water load must be applied in the plane of symmetry of the float at a point three-fourths of the distance from the bow to the step and must be perpendicular to the keel. The resultant limit load is computed as follows, except that the value of $L$ need not exceed three times the weight of the displaced water when the float is completely submerged:

$$L = \frac{C_5 V_{S_0}^2 W^{2/3}}{\tan^{2/3}\beta_s (1+r_y^2)^{2/3}}$$

where—

$L$=limit load;

$C_5$=0.0053;

$V_{S_0}$=seaplane stalling speed with landing flaps extended in the appropriate position and with no slipstream effect;

$W$=seaplane design landing weight in pounds;

$\beta_s$=angle of dead rise at a station ¾ of the distance from the bow to the step, but need not be less than 15 degrees; and

$r_y$=ratio of the lateral distance between the center of gravity and the plane of symmetry of the float to the radius of gyration in roll.

(c) *Bow loading.* The resultant limit load must be applied in the plane of symmetry of the float at a point one-fourth of the distance from the bow to the step and must be perpendicular to the tangent to the keel line at that point. The magnitude of the resultant load is that specified in paragraph (b) of this section.

(d) *Unsymmetrical step loading.* The resultant water load consists of a component equal to 0.75 times the load specified in paragraph (a) of this section and a side component equal to 0.25 tan $\beta$ times the load specified in paragraph (b) of this section. The side load must be applied perpendicularly to the plane of symmetry of the float at a point midway between the keel and the chine.

(e) *Unsymmetrical bow loading.* The resultant water load consists of a component equal to 0.75 times the load specified in paragraph (b) of this section and a side component equal to 0.25 tan $\beta$ times the load specified in paragraph (c) of this section. The side load must be applied perpendicularly to the plane of symmetry at a point midway between the keel and the chine.

(f) *Immersed float condition.* The resultant load must be applied at the centroid of the cross section of the float at a point one-third of the distance from the bow to the step. The limit load components are as follows:

$$\text{vertical} = \rho g V,$$

$$\text{aft} = C_x \frac{\rho}{2} V^{2/3} (K V_{S_0})^2$$

$$\text{side} = C_y \frac{\rho}{2} V^{2/3} (K V_{S_0})^2$$

where—

$\rho$=mass density of water;

$V$=volume of float;

$C_x$=coefficient of drag force, equal to 0.133;

$C_y$=coefficient of side force, equal to 0.106;

$K$=0.8, except that lower values may be used if it is shown that the floats are incapable of submerging at a speed of 0.8 $V_{S_0}$ in normal operations;

$V_{S_0}$=seaplane stalling speed with landing flaps extended in the appropriate position and with no slipstream effect; and

$g$=acceleration due to gravity (ft/sec²).

(g) *Float bottom pressures.* The float bottom pressures must be established under § 25.533. The angle of dead rise to be used in determining the float bottom pressures is set forth in paragraph (b) of this section.

**§ 25.537 Seawing loads.**

Seawing design loads must be based on applicable test data.

EMERGENCY LANDING CONDITIONS

**§ 25.561 General.**

(a) The airplane, although it may be damaged in emergency landing conditions on land or water, must be designed as prescribed in this section to protect each occupant under those conditions.

(b) The structure must be designed to give each occupant every reasonable chance of escaping serious injury in a minor crash landing when—

(1) Proper use is made of seats, belts, and all other safety design provisions;

(2) The wheels are retracted (where applicable); and

(3) The occupant experiences the following ultimate inertia forces relative to the surrounding structure:

(i) Upward—2.0 $g$.

(ii) Forward—9.0 $g$.

(iii) Sideward—1.5 $g$.

(iv) Downward—4.5 $g$, or any lesser force that will not be exceeded when the airplane absorbs the landing loads resulting from impact with an ultimate descent velocity of five f.p.s. at design landing weight.

(c) The supporting structure must be designed to restrain, under all loads up to those specified in paragraph (b)(3) of this section, each item of mass that could injure an occupant if it came loose in a minor crash landing.

**§ 25.563 Structural ditching provisions.**

Structural strength considerations of ditching provisions must be in accordance with § 25.801(e).

FATIGUE EVALUATION

**§ 25.571 Fatigue evaluation of flight structure.**

(a) *Strength, detail design, and fabrication.* Those parts of the structure (including wings, fixed and movable control surfaces, the fuselage, and their related primary attachments), whose failure could result in catastrophic failure of the airplane, must be evaluated under the provisions of either paragraph (b) or (c) of this section.

(b) *Fatigue strength.* The structure must be shown by analysis, tests, or both, to be able to withstand the repeated loads of variable magnitude expected in service. In addition, the following apply:

(1) The evaluation must include—

(i) The typical loading spectrum expected in service;

(ii) Identification of principal structural elements and detail design points, the fatigue failure of which could cause catastrophic failure of the airplane; and

(iii) An analysis or repeated load tests, or a combination of analysis and load tests, of principal structural elements and detail design points identified in subdivision (ii) of this subparagraph.

(2) The service history of airplanes of similar structural design, taking due account of differences in operating conditions and procedures, may be used.

(3) If substantiation of the pressure cabin by fatigue tests is required, the cabin, or representative parts of it, must be cycle-pressure tested, using the normal operating pressure plus the effects of external aerodynamic pressure combined with the flight loads. The effects of flight loads may be represented by an increased cabin pressure or may be omitted if they are shown to have no significant effect upon fatigue.

(c) *Fail safe strength.* It must be shown by analysis, tests, or both, that catastrophic failure or excessive structural deformation, that could adversely affect the flight characteristics of the airplane, are not probable after fatigue failure or obvious partial failure of a single principal structural element. After these types of failure of a single principal structural element, the remaining structure must be able to withstand static loads corresponding to the following:

(1) An ultimate maneuvering load factor of 2.0 at $V_C$.

(2) Gust loads as specified in §§ 25.341 and 25.351(b) except that these gust loads are considered to be ultimate loads and the gust velocities are—

(i) At speed $V_B$, 49 fps from sea level to 20,000 feet, thereafter decreasing linearly to 28 fps at 50,000 feet;

(ii) At speed $V_C$, 33 fps from sea level to 20,000 feet, thereafter decreasing linearly to 16.5 fps at 50,000 feet; and

(iii) At speed $V_D$, 15 fps from sea level to 20,000 feet, thereafter decreasing linearly to 6 fps at 50,000 feet.

(3) Eighty percent of the limit loads resulting from the conditions specified in § 25.427. These loads are considered to be ultimate loads.

(4) Eighty percent of the limit maneuvering loads resulting from the conditions specified in § 25.351(a), except that the load need not exceed 100 percent of the critical load obtained in compliance with § 25.351(a), using a pilot effort of 180 pounds. This load is an ultimate load.

The loads prescribed in this paragraph must be multiplied by a factor of 1.15 unless the dynamic effects of failure under static load are otherwise considered. For a pressurized cabin, the normal operating pressures combined with the expected external aerodynamic pressures must be applied simultaneously with the flight loading conditions specified in this paragraph.

**§ 25.573 Fatigue evaluation of landing gear.**

(a) The strength, detail design, and fabrication of those parts of the airplane landing gear and its attachment fittings in which fatigue may be critical, must be evaluated under either the provisions of paragraph (b) or (c) of this section.

(b) The fatigue strength of the landing gear must be evaluated as follows:

(1) The evaluation must include—

(i) The typical loading spectrum expected in service;

(ii) Identification of principal structural elements and detail design points, the fatigue failure of which could cause catastrophic failure of the landing gear; and

(iii) Analysis or repeated load testing of the principal structural elements and detail design points identified in subdivision (ii) of this subparagraph.

(2) Where the evaluation indicates its necessity, inspection or other procedures must be established to prevent catastrophic fatigue failure.

(3) The service history of airplanes of similar structural design, taking due account of differences in operating conditions and procedures, may be used.

(c) The fail-safe strength of the landing gear must be shown as follows:

(1) It must be shown by analysis or tests that catastrophic failure is not probable after fatigue failure, or obvious partial failure, of any single principal structural element.

(2) After these kinds of failure, the remaining structure must be able to withstand static loads corresponding to 80 percent of the limit loads resulting from the conditions prescribed in § 25.473. These static loads are ultimate loads.

## Subpart D—Design and Construction

GENERAL

**§ 25.601 General.**

The airplane may not have design features or details that experience has shown to be hazardous or unreliable. The suitability of each questionable design detail and part must be established by tests.

**§ 25.603 Materials.**

The suitability and durability of materials used in the structure must—

(a) Be established on the basis of experience or tests; and

(b) Conform to approved specifications (such as industry or military specifications, or Technical Standard Orders) that ensure their having the strength and other properties assumed in the design data.

**§ 25.605 Fabrication methods.**

The methods of fabrication used must produce a consistently sound structure. If a fabrication process (such as gluing, spot welding, or heat treating) requires close control to reach this objective, the process must be performed under an approved process specification.

**§ 25.607 Self-locking nuts.**

No self-locking nut may be used on any bolt subject to rotation during airplane operation.

**§ 25.609 Protection of structure.**

Each part of the structure must—

(a) Be suitably protected against deterioration or loss of strength in service due to any cause, including—

(1) Weathering;

(2) Corrosion; and

(3) Abrasion; and

(b) Have provisions for ventilation and drainage where necessary for protection.

**§ 25.611 Inspection provisions.**

There must be means to allow close examination of each part requiring recurring inspection, adjustment for proper alignment and function, or lubrication.

**§ 25.613 Material strength properties and design values.**

(a) Material strength properties must be based on enough tests of material meeting approved specifications to establish design values on a statistical basis.

(b) Design values must be chosen so that the probability of any structure being understrength because of material variations is extremely remote.

(c) The effects of temperature on allowable stresses used for design in an essential component or structure must be considered where thermal effects are significant under normal operating conditions.

(d) The strength, detail design, and fabrication of the structure must minimize the probability of disastrous fatigue failure, particularly at points of stress concentration.

(e) Unless they are shown to be inapplicable in a particular case, the design values must be those contained in the following publications (obtainable from the Superintendent of Documents, Government Printing Office, Washington, D.C., 20402):

MIL-HDBK-5, "Metallic Materials and Elements for Flight Vehicle Structure";

MIL-HDBK-17, "Plastics for Flight Vehicles";

ANC-18, "Design of Wood Aircraft Structures"; and

MIL-HDBK-23, "Composite Construction for Flight Vehicles".

**§ 25.615 Design properties.**

(a) Design properties outlined in MIL-HDBK-5 may be used subject to the following conditions:

(1) Where applied loads are eventually distributed through a single member within an assembly, the failure of which would result in the loss of the structural integrity of the component involved, the guaranteed minimum design mechanical properties ("A" values) listed in MIL-HDBK-5 must be met.

(2) Redundant structures, in which the failure of individual elements would result in applied loads being safely distributed to other load-carrying members, may be designed on the basis of the "90 percent probability ("B" values)" listed in MIL-HDBK-5.

(b) Design values greater than the guaranteed minimums required by paragraph (a) of this section may be used where only guaranteed minimum values are normally allowed if a "premium selection" of the material is made in which a specimen of each individual item is

tested before use to determine that the actual strength properties of that particular item will equal or exceed those used in design.

**§ 25.619 Special factors.**

The factors of safety prescribed in § 25.303 must be multiplied by the special factors of safety prescribed in §§ 25.621 through 25.625 for each part of the structure whose strength is—

(a) Uncertain;

(b) Likely to deteriorate in service before normal replacement; or

(c) Subject to appreciable variability because of uncertainties in manufacturing processes or inspection methods.

**§ 25.621 Casting factors.**

(a) *General.* The factors, tests, and inspections specified in paragraphs (b) through (d) of this section must be applied in addition to those necessary to establish foundry quality control. The inspections must meet approved specifications. Paragraphs (c) and (d) of this section apply to any structural castings except castings that are pressure tested as parts of hydraulic or other fluid systems and do not support structural loads.

(b) *Bearing stresses and surfaces.* The casting factors specified in paragraphs (c) and (d) of this section—

(1) Need not exceed 1.25 with respect to bearing stresses regardless of the method of inspection used; and

(2) Need not be used with respect to the bearing surfaces of a part whose bearing factor is larger than the applicable casting factor.

(c) *Critical castings.* For each casting whose failure would preclude continued safe flight and landing of the airplane or result in serious injury to occupants, the following apply:

(1) Each critical casting must—

(i) Have a casting factor of not less than 1.25; and

(ii) Receive 100 percent inspection by visual, radiographic, and magnetic particle or penetrant inspection methods or approved equivalent nondestructive inspection methods.

(2) For each critical casting with a casting factor less than 1.50, three sample castings must be static tested and shown to meet—

(i) The strength requirements of § 25.305 at an ultimate load corresponding to a casting factor of 1.25; and

(ii) The deformation requirements of § 25.305 at a load of 1.15 times the limit load.

(3) Examples of these castings are structural attachment fittings, parts of flight control systems, control surface hinges and balance weight attachments, seat, berth, safety belt, and fuel and oil tank supports and attachments, and cabin pressure valves.

(d) *Noncritical castings.* For each casting other than those specified in paragraph (c) of this section, the following apply:

(1) Except as provided in subparagraphs (2) and (3) of this paragraph, the casting factors and corresponding inspections must meet the following table:

| *Casting factor* | *Inspection* |
|---|---|
| 2.0 or more---- | 100 percent visual. |
| Less than 2.0 but more than 1.5. | 100 percent visual, and magnetic particle or penetrant or equivalent nondestructive inspection methods. |
| 1.25 through 1.50. | 100 percent visual, magnetic particle or penetrant, and radiographic, or approved equivalent nondestructive inspection methods. |

(2) The percentage of castings inspected by nonvisual methods may be reduced below that specified in subparagraph (1) of this paragraph when an approved quality control procedure is established.

(3) For castings procured to a specification that guarantees the mechanical properties of the material in the casting and provides for demonstration of these properties by test of coupons cut from the castings on a sampling basis—

(i) A casting factor of 1.0 may be used; and

(ii) The castings must be inspected as provided in subparagraph (1) of this paragraph for casting factors of "1.25 through 1.50" and tested under paragraph (c) (2) of this section.

**§ 25.623 Bearing factors.**

(a) Except as provided in paragraph (b) of this section, each part that has clearance (free fit), and that is subject to pounding or vibration, must have a bearing factor large enough to provide for the effects of normal relative motion.

(b) No bearing factor need be used for a part for which any larger special factor is prescribed.

**§ 25.625 Fitting factors.**

For each fitting (a part or terminal used to join one structural member to another), the following apply:

(a) For each fitting whose strength is not proven by limit and ultimate load tests in which actual stress conditions are simulated in the fitting and surrounding structures, a fitting factor of at least 1.15 must be applied to each part of—

(1) The fitting;

(2) The means of attachment; and

(3) The bearing on the joined members.

(b) No fitting factor need be used—

(1) For joints made under approved practices and based on comprehensive test data (such as continuous joints in metal plating, welded joints, and scarf joints in wood); or

(2) With respect to any bearing surface for which a larger special factor is used.

(c) For each integral fitting, the part must be treated as a fitting up to the point at which the section properties become typical of the member.

**§ 25.629 Flutter, deformation, and fail-safe criteria.**

(a) *General.* Compliance with this section must be shown by calculations, resonance tests, or other tests found necessary by the Administrator.

(b) *Flutter and divergence prevention.* The dynamic evaluation of the airplane must include an investigation of the significant elastic, inertia, and aerodynamic forces associated with the rotations and displacements of the plane of the propeller. In addition the following apply:

(1) The airplane must be designed to be free from flutter and divergence (unstable structural distortion due to aerodynamic loading) at speeds up to 1.2 $V_D$.

(2) A smaller margin above $V_D$ may be used if—

(i) The characteristics of the airplane (including the effects of compressibility) make a speed of 1.2 $V_D$ unlikely to be reached;

(ii) A proper margin of damping exists at $V_D$; and

(iii) There is no large and rapid reduction in damping as $V_D$ is approached.

(3) If concentrated balance weights are used on control surfaces, their effectiveness and strength, including supporting structure, must be substantiated.

For the purposes of subparagraph (2) of this paragraph, in the absence of more accurate data, the terminal velocity in a dive of 30 degrees to the horizontal may be used as the maximum speed likely to be reached.

(c) *Loss of control due to structural deformation.* The airplane must be designed to be free from control reversal and from undue loss of longitudinal, lateral, and directional stability and control, as a result of structural deformation (including that of the control surface covering) at speeds up to the speed prescribed in paragraph (b) of this section for flutter prevention.

(d) *Fail-safe criteria.* The following fail-safe criteria must be met:

(1) It must be shown, by analysis or tests, that the airplane is free from such flutter or divergence that would preclude safe flight, at any speed up to $V_D$, after—

(i) Each of the failures, malfunctions, or adverse conditions listed in subparagraph (4) of this paragraph; and

(ii) Any other reasonably probable single failure, malfunction, or adverse condition affecting flutter or divergence.

(2) If a failure, malfunction, or adverse condition described in subparagraph (4) of this paragraph is simulated during a flight test in showing compliance with this paragraph, the maximum speed investigated need not exceed $V_{FC}$ if it is shown, by correlation of the flight test data with other test data or analyses, that hazardous flutter or divergence will not occur at any speed up to $V_D$.

(3) The structural failures described in subparagraph (4) (i) and (4) (ii) of this paragraph need not be considered in showing compliance with this paragraph if engineering data substantiate that the probability of their occurrence is negligible by showing that the structural element is designed with—

(i) Conservative static strength margins for each ground and flight loading condition specified in this part; or

(ii) Sufficient fatigue strength for the loading spectrum expected in operation.

(4) The failures, malfunctions, or adverse conditions used to show compliance with this paragraph are as follows:

(i) Failure of any single element of the structure supporting any engine, independently mounted propeller shaft, large auxiliary power unit, or large externally mounted aerodynamic body (such as an external fuel tank).

(ii) Any single failure of the engine structure, on turbopropeller airplanes, that would reduce the yaw or pitch rigidity of the propeller rotational axis.

(iii) Absence of propeller aerodynamic forces resulting from the feathering of any single propeller, and, for airplanes with four or more engines, the feathering of the critical combination of two propellers. In addition, any single feathered propeller must be paired with the failures, specified in subdivision (i) of this subparagraph, involving failure of any single element of the structure supporting any engine or independently mounted propeller shaft, and the failures specified in subdivision (ii) of this subparagraph.

(iv) Any single propeller rotating at the highest likely overspeed.

(v) Failure of each principal structural element for which compliance with the alternative provisions of § 25.571(c) is selected. Safety following a failure may be substantiated by showing that possible losses in rigidity or changes in frequency, modal form, or damping, resulting from the failure, are within the general parameter variations covered in the flutter and divergence investigations.

(vi) Failure, malfunction, or disconnection of any single element in the main flight control system (including automatic flight control systems, if installed), in any tab control system, or in any flutter damper connected to a control surface or tab. Investigation of the forced structural vibrations, other than flutter resulting from failures, malfunctions, or adverse conditions in the automatic flight control system, may be limited to airspeeds up to $V_C$.

CONTROL SURFACES

**§ 25.651 Proof of strength.**

(a) Limit load tests of control surfaces are required. These tests must include the horn or fitting to which the control system is attached.

(b) Compliance with the special factors requirements of §§ 25.619 through 25.625, and 25.657 for control surface hinges must be shown by analysis or individual load tests.

**§ 25.655 Installation.**

(a) Movable tail surfaces must be installed so that there is no interference between any surfaces when one is held in its extreme position and the others are operated through their full angular movement.

(b) If an adjustable stabilizer is used, it must have stops that will limit its range of travel to the maximum for which the airplane is shown to meet the trim requirements of § 25.161.

**§ 25.657 Hinges.**

(a) Control surface hinges, except ball and roller bearing hinges, must have a factor of safety of not less than 6.67 with respect to the ultimate bearing strength of the softest material used as a bearing.

(b) For ball or roller bearing hinges, the approved rating of the bearing may not be exceeded.

(c) Hinges must have enough strength and rigidity for loads parallel to the hinge line.

CONTROL SYSTEMS

**§ 25.671 General.**

(a) Each control and control system must operate with the ease, smoothness, and positiveness appropriate to its function.

(b) Each element of each flight control system must be designed, or distinctively and permanently marked, to minimize the probability of incorrect assembly that could result in the malfunctioning of the system.

(c) Each tab control system must be designed so that disconnection or failure of any element at speeds up to $V_C$ cannot jeopardize safety.

(d) Each adjustable stabilizer must have means to allow any adjustment necessary for continued safety of the flight after the occurrence of any reasonably probable single failure of the actuating system.

**§ 25.673 Two-control airplanes.**

Two-control airplanes must be able to continue safely in flight and landing if any one connecting element in the directional-lateral flight control system fails.

**§ 25.675 Stops.**

(a) Each control system must have stops that positively limit the range of motion of the control surfaces.

(b) Each stop must be located so that wear, slackness, or take-up adjustments will not adversely affect the control characteristics of the airplane because of a change in the range of surface travel.

(c) Each stop must be able to withstand any loads corresponding to the design conditions for the control system.

**§ 25.677 Trim systems.**

(a) Trim controls must be designed to prevent inadvertent or abrupt operation and to operate in the plane, and with the sense of motion, of the airplane.

(b) There must be means adjacent to the trim control to indicate the direction of the control movement relative to the airplane motion. In addition, there must be clearly visible means to indicate the position of the trim device with respect to the range of adjustment.

(c) Trim devices must be able to continue normal operation if any one connecting or transmitting element of the primary flight control system fails. Trim control systems must be designed to prevent creeping in flight. Trim tab controls must be irreversible unless the tab is appropriately balanced and shown to be free from flutter.

(d) If an irreversible tab control system is used, the part from the tab to the attachment of the irreversible unit to the airplane structure must consist of a rigid connection.

**§ 25.679 Control system gust locks.**

(a) There must be a device to prevent damage to the control surfaces (including tabs), and to the control system, from gusts striking the airplane while it is on the ground or water. If the device, when engaged, prevents normal operation of the control surfaces by the pilot, it must—

(1) Automatically disengage when the pilot operates the primary flight controls in a normal manner; or

(2) Limit the operation of the airplane so that the pilot receives unmistakable warning at the start of takeoff.

(b) The device must have means to preclude the possibility of it becoming inadvertently engaged in flight.

**§ 25.681 Limit load static tests.**

(a) Compliance with the limit load requirements of this Part must be shown by tests in which—

(1) The direction of the test loads produces the most severe loading in the control system; and

(2) Each fitting, pulley, and bracket used in attaching the system to the main structure is included.

(b) Compliance must be shown (by analyses or individual load tests) with the special factor requirements for control system joints subject to angular motion.

**§ 25.683 Operation tests.**

It must be shown by operation tests that, when the controls are operated from the pilot compartment with the system loaded to correspond to 80 percent of the limit load specified for the system, the system is free from—

(a) Jamming;

(b) Excessive friction; and

(c) Excessive deflection.

**§ 25.685 Control system details.**

(a) Each detail of each control system must be designed and installed to prevent jamming, chafing, and interference from cargo, passengers, or loose objects.

(b) There must be means in the cockpit to prevent the entry of foreign objects into places where they would jam the system.

(c) There must be means to prevent the slapping of cables or tubes against other parts.

(d) Sections 25.689 and 25.693 apply to cable systems and joints.

**§ 25.689 Cable systems.**

(a) Each cable, cable fitting, turnbuckle, splice, and pulley must be approved. In addition—

(1) No cable smaller than ⅛ inch in diameter may be used in the aileron, elevator, or rudder systems; and

(2) Each cable system must be designed so that there will be no hazardous change in cable tension throughout the

range of travel under operating conditions and temperature variations.

(b) Each kind and size of pulley must correspond to the cable with which it is used. Pulleys and sprockets must have closely fitted guards to prevent the cables and chains from being displaced or fouled. Each pulley must lie in the plane passing through the cable so that the cable does not rub against the pulley flange.

(c) Fairleads must be installed so that they do not cause a change in cable direction of more than three degrees.

(d) Clevis pins subject to load or motion and retained only by cotter pins may not be used in the control system.

(e) Turnbuckles must be attached to parts having angular motion in a manner that will positively prevent binding throughout the range of travel.

(f) There must be provisions for visual inspection of fairleads, pulleys, terminals, and turnbuckles.

**§ 25.693 Joints.—**

Control system joints (in push-pull systems) that are subject to angular motion, except those in ball and roller bearing systems must have a special factor of safety of not less than 3.33 with respect to the ultimate bearing strength of the softest material used as a bearing. This factor may be reduced to 2.0 for joints in cable control systems. For ball or roller bearings, the approved ratings, including those established in MIL-HDBK-5 "Metallic Materials and Elements for Flight Vehicle Structure", may not be exceeded.

**§ 25.695 Power-boost and power-operated control system.**

(a) If a power-boost or power-operated control system is used, an alternate system must be immediately available to allow continued safe flight and landing in the event of a single failure in the power portion.

(b) Each alternate system may be a duplicate power portion or a manually operated mechanical system. The power portion includes the power source, such as hydraulic pumps, and such items as valves, lines, and actuators.

(c) The failure of mechanical parts (such as piston rods and links) and the jamming of power cylinders must be considered unless they are extremely remote.

(d) Both the primary and alternate systems must be operable if any engine fails. For airplanes with more than two engines, at least one system must be operable if any two engines fail. It must be shown by analysis that the airplane is controllable if all engines fail.

**§ 25.697 Wing flap controls.**

(a) Each wing flap control must be designed so that the flight crew can place the flaps in any takeoff, en route, approach, and landing position established under § 25.47. The flaps must maintain these positions, except for flap movement produced by an automatic flap positioning or load limiting device, without further attention by the flight crew.

(b) The wing flap control must be designed and located to make inadvertent operation improbable.

(c) The rate of motion of the flaps in response to the operation of the control and the characteristics of the automatic flap positioning or load limiting device must give satisfactory flight and performance characteristics under steady or changing conditions of airspeed, engine power, and airplane attitude.

(d) The wing flap control must be designed to retract the flaps from the fully extended position, during steady flight at maximum continuous engine power, at any speed below $V_F+8.5$ (knots).

**§ 25.699 Wing flap position indicator.**

(a) There must be means to indicate the takeoff, en route, approach, and landing flap positions.

(b) If any extension of the flaps beyond the landing position is possible, the flap control must be clearly marked to identify this range of extension.

**§ 25.701 Flap interconnection.**

(a) The motion of flaps on opposite sides of the plane of symmetry must be synchronized by a mechanical interconnection unless the airplane has safe flight characteristics with the flaps retracted on one side and extended on the other.

(b) If a mechanical interconnection is used, there must be means to prevent hazardous unsymmetrical operation of the wing flaps after any reasonably possible single failure of the flap actuating system.

(c) If a wing flap interconnection is used, it must be designed to account for the applicable unsymmetrical loads, including those resulting from flight with the engines on one side of the plane of symmetry inoperative and the remaining engines at takeoff power.

(d) For airplanes with flaps that are not subjected to slipstream conditions, the structure must be designed for the loads imposed when the wing flaps on one side are carrying the most severe load occurring in the prescribed symmetrical conditions and those on the other side are carrying not more than 80 percent of that load.

## LANDING GEAR

**§ 25.721 General.**

(a) The landing gear must meet the requirements of this section and §§ 25.723 through 25.737.

(b) The shock absorbing elements for the main, nose, and tail wheel units must be substantiated by the tests specified in §§ 25.723 through 25.727. The shock absorbing ability of the landing gear in taxiing must be shown by the tests prescribed in § 25.235.

(c) The landing gear must withstand the tests prescribed in §§ 25.723 through 25.727.

**§ 25.723 Shock absorption tests.**

(a) It must be shown by energy absorption tests that the limit load factors selected for design in accordance with § 25.471(c) for takeoff and landing weights, respectively, will not be exceeded.

(b) The landing gear may not fail in a test, demonstrating its reserve energy absorption capacity, simulating a descent velocity of 12 f.p.s. at design landing weight, assuming wing lift not greater than the airplane weight acting during the landing impact.

**§ 25.725 Limit drop tests.**

(a) If compliance with § 25.723(a) is shown by free drop tests, these tests must be made on the complete airplane, or on units consisting of a wheel, tire, and shock absorber, in their proper positions, from free drop heights not less than—

(1) 18.7 inches for the design landing weight conditions; and

(2) 6.7 inches for the design takeoff weight conditions.

(b) If wing lift is simulated in free drop tests, the landing gear must be dropped with an effective weight equal to

$$W_e=W\left(\frac{h+(1-L)d}{h+d}\right)$$

where—

$W_e$ = the effective weight to be used in the drop test (lbs.);

$h$ = specified free drop height (inches);

$d$ = deflection under impact of the tire (at the approved inflation pressure) plus the vertical component of the axle travel relative to the drop mass (inches);

$W=W_M$ for main gear units (lbs.), equal to the static weight on that unit with the airplane in the level attitude (with the nose wheel clear in the case of nose wheel type airplanes);

$W=W_T$ for tail gear units (lbs.), equal to the static weight on the tail unit with the airplane in the tail-down attitude;

$W=W_N$ for nose wheel units (lbs.), equal to the vertical component of the static reaction that would exist at the nose wheel, assuming that the mass of the airplane acts at the center of gravity and exerts a force of $1.0g$ downward and $0.25g$ forward; and

$L$ = the ratio of the assumed wing lift to the airplane weight, but not more than 1.0.

(c) The attitude in which a landing gear unit is drop tested must simulate the critical airplane landing conditions for the unit.

(d) The value of $d$ used in the computation of $W_e$ in paragraph (b) of this section may not exceed the value actually obtained in the drop test.

(e) The limit inertia load factor $n$ must be determined from the free drop test in paragraph (b) of this section according to the following formula:

$$n=n_j\frac{W_e}{W}+L$$

where—

$n_j$ = the load factor developed in the drop test (that is, the acceleration $dv/dt$ in $g$'s recorded in the drop test) plus 1.0; and

$W_e$, $W$, and $L$ are the same as in the drop test computation.

(f) The value of $n$ determined in paragraph (e) of this section may not be more than the limit inertia load factor used in the landing conditions in § 25.473.

**§ 25.727 Reserve energy absorption drop tests.**

(a) If compliance with the reserve energy absorption condition specified in § 25.723(b) is shown by free drop tests, the drop height may not be less than 27 inches.

(b) If wing lift equal to the airplane weight is simulated, the units must be dropped with an effective mass equal to $W_e=W\left(\frac{h}{h+d}\right)$ where the symbols and other details are the same as in § 25.725(b).

**§ 25.729 Retracting mechanism.**

(a) *General.* For airplanes with retractable landing gear, the following apply:

(1) The landing gear retracting mechanism, wheel well doors, and supporting structure, must be designed for—

(i) The loads occurring in the flight conditions when the gear is in the retracted position;

(ii) The combination of friction, inertia, brake torque, and air loads, occurring during retraction and extension at any airspeed up to 1.6 $V_{S_1}$ (with the flaps in the approach position at design landing weight); and

(iii) Any load factor up to those specified in § 25.345 for the flaps extended condition.

(2) Unless there are other means to decelerate the airplane in flight at this speed, the landing gear, the retracting mechanism, and the airplane structure (including wheel well doors) must be designed to withstand the flight loads occurring with the landing gear in the extended position at any speed up to 0.67 $V_C$.

(3) Landing gear doors, their operating mechanism, and their supporting structures must be designed for the yawing maneuvers prescribed for the airplane in addition to the conditions of airspeed and load factor prescribed in subparagraphs (1) and (2) of this paragraph.

(b) *Landing gear lock.* There must be positive means to keep the landing gear extended, in flight and on the ground.

(c) *Emergency operation.* There must be an emergency means for extending the landing gear in the event of—

(1) Any reasonably probable failure in the normal retraction system; or

(2) The failure of any single source of hydraulic, electric, or equivalent energy supply.

(d) *Operation test.* The proper functioning of the retracting mechanism must be shown by operation tests.

(e) *Position indicator and warning device.* If a retractable landing gear is used, there must be a landing gear position indicator (as well as necessary switches to actuate the indicator) or other means to inform the pilot that the gear is secured in the extended (or retracted) position. This means must be designed as follows:

(1) If switches are used, they must be located and coupled to the landing gear mechanical systems in a manner that prevents an erroneous indication of "down and locked" if the landing gear is not in a fully extended position, or of "up and locked" if the landing gear is not in the fully retracted position. The switches may be located where they are operated by the actual landing gear locking latch or device.

(2) Landplanes must have an aural warning device that will function continuously when one or more throttles are closed, if the landing gear is not fully extended and locked.

(3) If there is a manual shutoff for the warning device prescribed in subparagraph (2) of this paragraph, it must be installed so that reopening the throttles will reset the warning mechanism.

(4) Landplanes must have an aural warning device that will function continuously, when the wing flaps are extended beyond the maximum approach position determined under § 25.67(e), if the gear is not fully extended and locked. There may not be a manual shutoff for this warning device. The flap position sensing unit may be installed at any suitable location. The system for this device may use any part of the system (including the aural warning device) for the device required in subparagraph (2) of this paragraph.

(f) *Protection of equipment in wheel wells.* Equipment that is essential to safe operation of the airplane and that is located in wheel wells must be protected from the damaging effects of—

(1) A bursting tire, unless it is shown that a tire cannot burst from overheat; and

(2) A loose tire tread, unless it is shown that a loose tire tread cannot cause damage.

**§ 25.731 Wheels.**

(a) Each main and nose wheel must be approved.

(b) The maximum static load rating of each wheel may not be less than the corresponding static ground reaction with—

(1) Design takeoff weight; and

(2) Critical center of gravity.

(c) The maximum limit load rating of each wheel must equal or exceed the maximum radial limit load determined under the applicable ground load requirements of this part.

**§ 25.733 Tires.**

(a) Each landing gear wheel must have a tire—

(1) That is a proper fit on the rim of the wheel; and

(2) Whose load rating is not exceeded under—

(i) Equal static loads, corresponding to the most critical combination of maximum takeoff weight and center of gravity position, on each main wheel tire; and

(ii) Equal loads corresponding to the ground reactions in paragraph (b) of this section, on each nose wheel tire.

(b) The applicable ground reactions are as follows:

(1) The static ground reaction for the tire with the most critical combination of takeoff weight and center of gravity position. This load may not exceed the static rating of the tire.

(2) The dynamic ground reaction for the tire at maximum landing weight, assuming that the mass of the airplane is concentrated at the most critical location of the center of gravity for this weight and is exerting a force of $1.0g$ downward and $0.31g$ forward with the reactions being distributed to the nose and main wheels by the principles of statics and with a $0.31g$ drag reaction at the ground applied at each wheel with brakes. This load may not exceed the dynamic rating of the tire.

(3) The dynamic ground reaction for the tire at design takeoff weight, assuming that the mass of the airplane is concentrated at the most critical location of the center of gravity for this weight and is exerting a force of $1.0g$ downward and $0.20g$ forward. The reactions in this case must be distributed to the nose and main wheels by the principles of statics and a $0.20g$ drag reaction at the ground is applied at each wheel with brakes. This load may not exceed the dynamic rating of the tire.

**§ 25.735 Brakes.**

(a) Each brake must be approved.

(b) The brake system must be designed and constructed so that, if any connecting or transmitting element (excluding the operating pedal or handle) fails, or if any single source of hydraulic or other brake operating energy supply is lost, it is possible to bring the airplane to rest under conditions specified in § 25.75, with a mean deceleration during the landing roll of at least 50 percent of that obtained in determining the landing distance as prescribed in that section. Unless the leakage of hydraulic fluid resulting from failure of the sealing elements in hydraulic brakes, the brake drum, shoes, and actuators, (or their equivalents) does not reduce the braking effectiveness below that required by this paragraph, these units are considered to be connecting or transmitting elements.

(c) Brake controls may not require excessive control force in their operation.

(d) The airplane must have a parking control that, when set by the pilot, will without further attention, prevent the airplane from rolling on a paved, level runway with takeoff power on the critical engine.

(e) If antiskid devices are installed, the devices and associated systems must be designed so that no single probable malfunction will result in a hazardous loss of braking ability or directional control of the airplane. Antiskid devices meeting the airworthiness portions of Military Specification MIL-B-8075 (ASG) and any amendments thereto, are acceptable.

(f) The brake kinetic energy capacity rating of each main wheel-brake assembly may not be less than the kinetic energy absorption requirements determined under either of the following methods:

(1) The brake kinetic energy absorption requirements must be based on a

rational analysis of the sequence of events expected during operational landings at maximum landing weight. This analysis must include conservative values of airplane speed at which the brakes are applied, braking coefficient of friction between tires and runway, aerodynamic drag, propeller drag or powerplant forward thrust, and (if more critical) the most adverse single engine or propeller malfunction.

(2) Instead of a rational analysis, the kinetic energy absorption requirements for each main wheel brake assembly may be derived from the following formula, which assumes an equal distribution of braking between main wheels:

$$KE = \frac{0.0444\, W V_{S_0}{}^2}{N}$$

where—

$KE$ = kinetic energy per wheel (ft. lb.);
$W$ = design landing weight (lb.);
$V_{S_0}$ = power-off stalling speed of the airplane at sea level, at the design landing weight, and in the landing configuration; and
$N$ = number of main wheels.

The formula must be modified in cases of unequal braking distribution.

(g) The minimum stalling speed rating of each main wheel-brake assembly (that is, the initial speed used in the dynamometer tests) may not be more than the $V_{S_0}$ used in the determination of kinetic energy in accordance with paragraph (f) of this section, assuming that the test procedures for wheel-brake assemblies involve a specified rate of deceleration, and, therefore, for the same amount of kinetic energy, the rate of energy absorption (the power absorbing ability of the brake) varies inversely with the initial speed.

**§ 25.737 Skis.**

Each ski must be approved. The maximum limit load rating of each ski must equal or exceed the maximum limit load determined under the applicable ground load requirements of this Part.

FLOATS AND HULLS

**§ 25.751 Main float buoyancy.**

Each main float must have—

(a) A buoyancy of 80 percent in excess of that required to support the maximum weight of the seaplane or amphibian in fresh water; and

(b) Not less than five watertight compartments approximately equal in volume.

**§ 25.753 Main float design.**

Each main float must be approved and must meet the requirements of § 25.521.

**§ 25.755 Hulls.**

(a) Each hull must have enough watertight compartments so that, with any two adjacent compartments flooded, the buoyancy of the hull and auxiliary floats (and wheel tires, if used) provides a margin of positive stability great enough to minimize the probability of capsizing in rough, fresh water.

(b) Bulkheads with watertight doors may be used for communication between compartments.

PERSONNEL AND CARGO ACCOMMODATIONS

**§ 25.771 Pilot compartment.**

(a) Each pilot compartment and its equipment must allow the minimum flight crew (established under § 25.1523) to perform their duties without unreasonable concentration fatigue.

(b) The primary controls listed in § 25.779(a), excluding cables and control rods, must be located with respect to the propellers so that no member of the minimum flight crew (established under § 25.1523), or part of the controls, lies in the region between the plane of rotation of any inboard propeller and the surface generated by a line passing through the center of the propeller hub making an angle of five degrees forward or aft of the plane of rotation of the propeller.

(c) If provision is made for a second pilot, the airplane must be controllable with equal safety from either pilot seat.

(d) The pilot compartment must be constructed so that, when flying in rain or snow, it will not leak in a manner that will distract the crew or harm the structure.

(e) The airplane must have a door, between the passenger and pilot compartments, that has a locking means to prevent passengers from opening it without the pilot's permission.

(f) Vibration and noise characteristics of cockpit equipment may not interfere with safe operation of the airplane.

**§ 25.773 Pilot compartment view.**

(a) *Nonprecipitation conditions.* For nonprecipitation conditions, the following apply:

(1) Each pilot compartment must be arranged to give the pilots a sufficiently extensive, clear, and undistorted view, to enable them to safely perform any maneuvers within the operating limitations of the airplane, including taxiing, takeoff, approach, and landing.

(2) Each pilot compartment must be free of glare and reflection that could interfere with the normal duties of the minimum flight crew (established under § 25.1523). This must be shown in day and night flight tests under nonprecipitation conditions.

(b) *Precipitation conditions.* For precipitation conditions, the following apply:

(1) The airplane must have a means to maintain a clear portion of the windshield, during precipitation conditions, sufficient for both pilots to have a sufficiently extensive view along the flight path in normal flight attitudes of the airplane. This means must be designed to function, without continuous attention on the part of the crew, in—

(i) Heavy rain at speeds up to 1.6 $V_{S_1}$, with flaps retracted; and

(ii) The icing conditions specified in § 25.1419 if certification with ice protection provisions is requested.

(2) The first pilot must have a window that—

(i) When the cabin is not pressurized, is openable under the conditions prescribed in subparagraph (1) of this paragraph and provides the view specified in that paragraph; and

(ii) Gives sufficient protection from the elements against impairment of the pilot's vision.

**§ 25.775 Windshields and windows.**

(a) Nonsplintering safety glass must be used in internal glass panes.

(b) Windshield panes directly in front of the pilots in the normal conduct of their duties, and the supporting structures for these panes, must withstand, without penetration, the impact of a four-pound bird when the velocity of the airplane (relative to the bird along the airplane's flight path) is equal to the value of $V_C$, at sea level, selected under § 25.335(a).

(c) Unless it can be shown by analysis or tests that the probability of occurrence of a critical windshield fragmentation condition is of a low order, the airplane must have a means to minimize the danger to the pilots from flying windshield fragments due to bird impact. This must be shown for each transparent pane in the cockpit that—

(1) Appears in the front view of the airplane;

(2) Is inclined 15 degrees or more to the longitudinal axis of the airplane; and

(3) Has any part of the pane located where its fragmentation will constitute a hazard to the pilots.

(d) The design of windshields and windows in pressurized airplanes must be based on factors peculiar to high altitude operation, including the effects of continuous and cyclic pressurization loadings, the inherent characteristics of the material used, and the effects of temperatures and temperature differentials. The windshield and window panels must be strong enough to withstand the maximum cabin pressure differential loads combined with critical aerodynamic pressure and temperature effects, after failure of any load-carrying element of the windshield or window. It may be assumed that, after a single failure that is obvious to the flight crew (established under § 25.1523), the cabin pressure differential is reduced from the maximum, in accordance with appropriate operating limitations, to allow continued safe flight of the airplane with a cabin pressure altitude of not more than 15,000 feet.

**§ 25.777 Cockpit controls.**

(a) Each cockpit control must be located to provide convenient operation and to prevent confusion and inadvertent operation.

(b) The direction of movement of cockpit controls must meet the requirements of § 25.779. Wherever practicable, the sense of motion involved in the operation of other controls must correspond to the sense of the effect of the operation upon the airplane or upon the part operated. Controls of a variable nature using a rotary motion must move clockwise from the off position, through an increasing range, to the full on position.

(c) The controls must be located and arranged, with respect to the pilots' seats,

so that there is full and unrestricted movement of each control without interference from the cockpit structure or the clothing of the minimum flight crew (established under § 25.1523) when any member of this flight crew, from 5'2" to 6'0" in height, is seated with the seat belt fastened.

(d) Identical powerplant controls for each engine must be located to prevent confusion as to the engines they control.

(e) Wing flap controls and other auxiliary lift device controls must be located on top of the pedestal, aft of the throttles, centrally or to the right of the pedestal centerline, and not less than 10 inches aft of the landing gear control.

(f) The landing gear control must be located forward of the throttles and must be operable by each pilot when seated with seat belts fastened.

(g) Control knobs must be shaped in accordance with § 25.781. In addition, the knobs must be of the same color, and this color must contrast with the color of control knobs for other purposes and the surrounding cockpit.

(h) If a flight engineer is required as part of the minimum flight crew (established under § 25.1523), the airplane must have a flight engineer station located and arranged so that the flight crewmembers can perform their functions efficiently and without interfering with each other.

**§ 25.779 Motion and effect of cockpit controls.**

Cockpit controls must be designed so that they operate in accordance with the following movement and actuation:

(a) Aerodynamic controls:

(1) *Primary.*

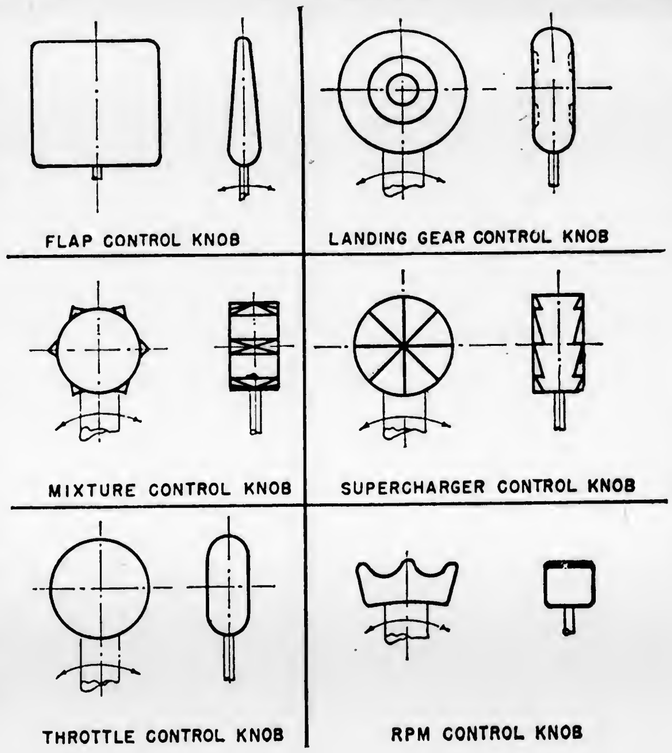
| *Controls* | *Motion and effect* |
|---|---|
| Aileron | Right (clockwise) for right wing down. |
| Elevator | Rearward for nose up. |
| Rudder | Right pedal forward for nose right. |

(2) *Secondary.*

| *Controls* | *Motion and effect* |
|---|---|
| Flaps (or auxiliary lift devices). | Forward for flaps up; rearward for flaps down. |
| Trim tabs (or equivalent). | Rotate to produce similar rotation of the airplane about an axis parallel to the axis of the control. |

(b) Powerplant and auxiliary controls:

(1) *Powerplant.*



| *Controls* | *Motion and effect* |
|---|---|
| Throttles | Forward to increase forward thrust and rearward to increase rearward thrust. |
| Propellers | Forward to increase rpm. |
| Mixture | Forward or upward for rich. |
| Carburetor air heat. | Forward or upward for cold. |
| Supercharger. | Forward or upward for low blower. For turbosuperchargers, forward, upward, or clockwise, to increase pressure. |

(2) *Auxiliary.*

| *Controls* | *Motion and effect* |
|---|---|
| Landing gear | Down to extend. |

**§ 25.781 Cockpit control knob shape.**

Cockpit control knobs must conform to the general shapes (but not necessarily the exact sizes or specific proportions) in the following figure:

**§ 25.783 Doors.**

(a) Each cabin must have at least one easily accessible external door.

(b) There must be a means to lock and safeguard each external door against opening in flight (either inadvertently by persons or as a result of mechanical failure). Each external door must be openable from both the inside and the outside, even though persons may be crowded against the door on the inside of the airplane. Inward opening doors may be used if there are means to prevent occupants from crowding against the door to an extent that would interfere with the opening of the door. The means of opening must be simple and obvious and must be arranged and marked so that it can be readily located and operated, even in darkness. Auxiliary locking devices may be used.

(c) Each external door must be reasonably free from jamming as a result of fuselage deformation in a minor crash.

(d) Each external door must be located where persons using them will not be endangered by the propellers when appropriate operating procedures are used.

(e) There must be a provision for direct visual inspection of the locking mechanism by crewmembers to determine whether external doors, for which the initial opening movement is outward (including passenger, crew, service, and cargo doors), are fully locked. In addition, there must be a visual means to signal to appropriate crewmembers when normally used external doors are closed and fully locked.

(f) Cargo and service doors not suitable for use as an exit in an emergency need only meet paragraph (e) of this section and be safeguarded against opening in flight as a result of mechanical failure.

**§ 25.785 Seats, berths, safety belts, and harnesses.**

(a) Each seat, berth, safety belt, harness, and adjacent part of the airplane at each station designated as occupiable during takeoff and landing must be designed so that a person making proper use of these facilities will not suffer serious injury in an emergency landing as a result of the inertia forces specified in § 25.561.

(b) Each seat and berth must be approved.

(c) Each occupant must be protected from head injury by—

(1) A safety belt and shoulder harness that will prevent the head from contacting any injurious object;

(2) A safety belt plus the elimination of any injurious object within striking radius of the head; or

(3) A safety belt plus a cushioned rest that will support the arms, shoulders, head, and spine.

(d) If the seat backs do not have a firm hand hold, there must be a hand grip or rail along each aisle to enable occupants to steady themselves while using the aisles in moderately rough air.

(e) Each projecting object that would injure persons seated or moving about the airplane in normal flight must be padded.

(f) Each berth must be designed so that the forward part has a padded end board, canvas diaphragm, or equivalent means, that can withstand the static load reaction of the occupant when subjected to the forward inertia force specified in § 25.561. Berths must be free from corners and protuberances likely to cause serious injury to a person occupying the berth during emergency conditions.

(g) Each crewmember seat at flight deck stations must have provisions for a shoulder harness. These seats must meet the strength requirements of paragraph (i) of this section.

(h) Cabin attendant seats must be in the passenger compartment near approved floor level emergency exits.

(i) Each seat berth, and its supporting structure, must be designed for an occupant weight of 170 pounds, considering the maximum load factors, inertia forces, and reactions between the occupant, seat, and safety belt or harness, at each relevant flight and ground load condition (including the emergency landing conditions prescribed in § 25.561). For berths, the forward inertia force must be considered in accordance with paragraph (f) of this section and need not be considered with respect to the safety belt. In addition—

(1) The structural analysis and testing of the seats, berths, and their supporting structures may be determined by—

(i) Assuming that the critical load in the forward, sideward, downward, and rearward directions (as determined from the prescribed flight, ground, and emergency landing conditions) acts separately; and

(ii) Using selected combinations of loads if the required strength in each specified direction is substantiated;

(2) Each pilot seat must be designed for the reactions resulting from the application of the pilot forces prescribed in § 25.395; and

(3) The inertia forces specified in § 25.561 must be multiplied by a factor of 1.33 (instead of the fitting factor prescribed in § 25.625) in determining the strength of the attachment of—

(i) Each seat to the structure; and

(ii) Each belt or harness to the seat or structure.

**§ 25.787 Cargo and baggage compartments.**

(a) Each cargo and baggage compartment must be designed for its placarded maximum weight of contents and for the critical load distributions at the appropriate maximum load factors corresponding to the specified flight and ground load conditions, except the emergency landing conditions of § 25.561.

(b) There must be a means to prevent the contents in the compartments from becoming a hazard by shifting, under the loads specified in paragraph (a) of this section.

(c) There must be a means to protect the occupants from injury by the contents of any compartment, under the emergency landing conditions of § 25.561.

EMERGENCY PROVISIONS

**§ 25.801 Ditching.**

(a) If certification with ditching provisions is requested, the airplane must meet the requirements of this section and §§ 25.807(d), 25.1411, and 25.1415(a).

(b) Each practicable design measure, compatible with the general characteristics of the airplane, must be taken to minimize the probability that in an emergency landing on water, the behavior of the airplane would cause immediate injury to the occupants or would make it impossible for them to escape.

(c) The probable behavior of the airplane in a water landing must be investigated by model tests or by comparison with airplanes of similar configuration for which the ditching characteristics are known. Scoops, flaps, projections, and any other factor likely to affect the hydrodynamic characteristics of the airplane, must be considered.

(d) It must be shown that, under reasonably probable water conditions, the flotation time and trim of the airplane will allow the occupants to leave the airplane and enter the liferafts required by § 25.1415. If compliance with this provision is shown by buoyancy and trim computations, appropriate allowances must be made for probable structural damage and leakage. If the airplane has fuel tanks (with fuel jettisoning provisions) that can reasonably be expected to withstand a ditching without leakage, the jettisonable volume of fuel may be considered as buoyancy volume.

(e) Unless the effects of the collapse of external doors and windows are accounted for in the investigation of the probable behavior of the airplane in a water landing (as prescribed in paragraphs (c) and (d) of this section), the external doors and windows must be designed to withstand the probable maximum local pressures.

**§ 25.803 Emergency evacuation.**

(a) Each crew and passenger area must have emergency means to allow rapid evacuation in crash landings, with the landing gear extended and retracted, considering the possibility of the airplane being on fire.

(b) The passenger and crew access doors and service doors may be considered as emergency exits if they meet the applicable requirements of this section and §§ 25.805 through 25.813.

(c) If the airplane is divided into separate compartments without the minimum unobstructed passageway between compartments required by § 25.813, this section and §§ 25.805 through 25.815 apply to each compartment independently.

**§ 25.805 Flight crew emergency exits.**

Except for airplanes with a passenger capacity of 20 or less in which the proximity of passenger emergency exits to the flight crew area offers a convenient and readily accessible means of evacuation for the flight crew, the following apply:

(a) There must be either one exit on each side of the airplane or a top hatch, in the flight crew area.

(b) Each exit must be of sufficient size and must be located so as to allow rapid evacuation of the crew. An exit size and shape of other than at least 19 by 20 inches unobstructed rectangular opening may be used only if exit utility is satisfactorily shown, by a typical flight crewmember, to the Administrator.

**§ 25.807 Passenger emergency exits.**

(a) *Type and location.* For the purpose of this part, the types and locations of exits are as follows:

(1) *Type I:* This type must have a rectangular opening of not less than 24 inches wide by 48 inches high, with corner radii not greater than ⅓ the width of the exit. The first Type I exit on each side of the fuselage must be in the rearward part of the passenger compartment unless another location affords a more effective means of passenger evacuation. Type I exits must be floor level exits.

(2) *Type II:* This type must have a rectangular opening of not less than 20 inches wide by 44 inches high, with corner radii not greater than ⅓ the width of the exit. Unless Type I exits are required, one Type II exit on each side of the fuselage must be in the rearward part of the passenger compartment unless another location affords a more effective means of passenger evacuation. Type II exits must be floor level exits unless located over the wing, in which case they may not have a step-up inside the airplane of more than 10 inches nor a step-down outside the airplane of more than 17 inches.

(3) *Type III:* This type must have a rectangular opening of not less than 20 inches wide by 36 inches high, with corner radii not greater than ⅓ the width of the exit, located over the wing, with a step-up inside the airplane of not more than 20 inches and a step-down outside the airplane of not more than 27 inches.

(4) *Type IV:* This type must have a rectangular opening of not less than 19 inches wide by 26 inches high, with corner radii not greater than ⅓ the width of the exit, located over the wing, with a step-up inside the airplane of not more than 29 inches and a step-down outside the airplane of not more than 36 inches. Step-down distance as used in this section means the actual distance between the bottom of the required opening and a usable foothold, extending out from the fuselage, that is large enough to be effective without searching by sight or feel.

(b) *Accessibility.* Each required passenger emergency exit must be accessible to the passengers and located where it will afford the most effective means of passenger evacuation. Openings larger than those specified in this section, whether or not of rectangular shape, may be used if—

(1) The specified rectangular opening can be inscribed within the opening; and

(2) The base of the inscribed rectangular opening meets the specified step-up and step-down heights.

(c) *Passenger emergency exits; side-of-fuselage.* The exits prescribed in this paragraph need not be diametrically opposite each other, but must be provided as follows:

(1) Except as provided in subparagraphs (2) through (5) of this paragraph, the number and type of passenger emergency exits must be in accordance with the following table:

| Passenger seating capacity | Emergency exits for each side of the fuselage | | | |
|---|---|---|---|---|
| | Type I | Type II | Type III | Type IV |
| 1 through 10 | | | | 1 |
| 11 through 19 | | | 1 | |
| 20 through 39 | | 1 | | 1 |
| 40 through 59 | 1 | | | 1 |
| 60 through 79 | 1 | | 1 | |
| 80 through 109 | 1 | | 1 | 1 |
| 110 through 139 | 2 | | 1 | |
| 140 through 179 | 2 | | 2 | |
| 180 through 219 | 2 | 2 | | |

(2) Two Type IV exits may be installed instead of each required Type III exit.

(3) Additional exits, providing an effective means of passenger evacuation consistent with the minimum number prescribed in subparagraph (1) of this paragraph, are required for airplanes with a passenger capacity of 220 or more.

(4) If, there are additional emergency evacuation means on the airplane, the passenger/emergency exit relationship may be increased by not more than 10 passengers beyond the limits specified in subparagraph (1) of this paragraph. If this means is an approved inflatable slide installed at each floor level exit (other than over-the-wing exits), the passenger/emergency exit relationship may be increased by—

(i) Not more than five passengers on airplanes with at least two of these exits; and

(ii) Not more than 10 passengers on airplanes with at least four of these exits.

(5) For airplanes on which the vertical location of the wing does not allow the installation of over-the-wing exits, an exit of at least the dimensions of a Type III must be installed instead of each Type III and each Type IV exit required by subparagraph (1) of this paragraph.

(d) *Ditching emergency exits.* In addition to the requirements of paragraph (c) of this section, the following apply:

(1) There must be at least one emergency exit for each unit (or part of a unit) of 35 passengers, but no less than two such exits, both above the waterline with one on each side of the airplane, meeting the minimum dimensions of—

(i) A Type IV exit for airplanes with a passenger seating capacity of 10 or less; and

(ii) A Type III exit for airplanes with a passenger seating capacity of 11 or more.

(2) If side exits cannot be above the waterline, the side exits must be replaced by an equal number of overhead hatches of not less than the dimensions of a Type III exit except that, for airplanes with a passenger capacity of 35 or less, the two required Type III side exits need be replaced by only one overhead hatch.

(3) Two Type IV exits may be installed instead of each required Type III exit.

**§ 25.809 Emergency exit arrangement.**

(a) Each emergency exit, including a flight crew emergency exit, must be a movable door or hatch in the external walls of the fuselage, allowing unobstructed opening to the outside.

(b) Each emergency exit must be openable from the inside and the outside except that sliding window emergency exits in the flight crew area need not be openable from the outside if other approved exits are convenient and readily accessible to the flight crew area.

(c) The means of opening emergency exits must be simple and obvious and may not require exceptional effort. Internal exit-opening means involving sequence operations (such as operation of two handles or latches or the release of safety catches) may be used for flight crew emergency exits if it can be reasonably established that these means are simple and obvious to crewmembers trained in their use.

(d) There must be a means to lock each emergency exit and to safeguard against its opening in flight, either inadvertently by persons or as a result of mechanical failure. In addition, there must be a means for direct visual inspection of the locking mechanism by crewmembers to determine that each emergency exit, for which the initial opening movement is outward, is fully locked.

(e) There must be provisions to minimize the probability of jamming of the emergency exits resulting from fuselage deformation in a minor crash landing.

(f) Each landplane emergency exit (other than exits located over the wing) more than six feet from the ground with the airplane on the ground and the landing gear extended, must have an approved means to assist the occupants in descending to the ground. In addition—

(1) The assist device for crew exits may be a rope or any other device demonstrated to be suitable for the purpose;

(2) The assist device for passenger exits may be an inflatable slide, a non-inflatable slide, or other approved device; and

(3) Ropes and ladders may not be used at passenger floor level exits.

(g) The proper functioning of each emergency exit must be shown by tests.

**§ 25.811 Emergency exit marking.**

(a) Each passenger emergency exit, its means of access, and its means of opening must be conspicuously marked.

(b) The identity and location of each emergency exit must be recognizable from a distance equal to the width of the cabin.

(c) The location of each emergency exit operating handle and the instructions for opening must be marked on or

adjacent to the emergency exit, and this marking must be readable from a distance of 30 inches.

(d) A source of light, independent of the main lighting system, must be installed to illuminate each passenger emergency exit marking.

(e) Each exit light must be designed to function automatically in a crash landing and to operate manually.

(f) Each emergency exit that is required to be openable from the outside, and its means of opening, must be marked on the outside of the airplane.

(g) Exits marked as emergency exits, though in excess of the required number of emergency exits, must meet the requirements for emergency exits of the particular type. Emergency exits customarily used in entering or leaving the airplane need only be marked with the word "EXIT".

### § 25.813 Emergency exit access.

(a) Except as provided in § 25.803(c) with regard to passageways between individual compartments, each passageway between individual passenger areas, and passageways leading to Type I and Type II emergency exits, must be unobstructed and at least 20 inches wide.

(b) For each emergency exit covered by § 25.809(f), there must be enough space adjacent to that exit to allow a crewmember to assist in the evacuation of passengers without reducing the unobstructed width of the passageway below that required for that exit.

(c) There must be access from the main aisle to each Type III and Type IV exit. The access may not be obstructed by seats, berths, or other protrusions, to an extent that would reduce the effectiveness of the exit. However, there may be minor obstructions if there are compensating factors to maintain the effectiveness of the exit.

(d) If it is necessary to pass through a doorway to reach any required emergency exit from any seat in the passenger cabin, the door must have a means to latch it in the open position.

### § 25.815 Width of main aisle.

The main passenger aisle width at any point between seats must equal or exceed the values in the following table:

| Passenger seating capacity | Minimum main passenger aisle width | |
|---|---|---|
| | Less than 25 inches from floor | 25 inches and more from floor |
| | *Inches* | *Inches* |
| 10 or less | 12 | 18 |
| 11 through 19 | 12 | 20 |
| 20 or more | 15 | 20 |

VENTILATION AND HEATING

### § 25.831 Ventilation.

(a) Each passenger and crew compartment must be ventilated, and each crew compartment must have enough fresh air (but not less than 10 cu. ft. per minute per crewmember) to enable crewmembers to perform their duties without undue discomfort or fatigue.

(b) Crew and passenger compartment air must be free from harmful or hazardous concentrations of gases or vapors. In meeting this requirement, the following apply:

(1) Carbon monoxide concentrations in excess of one part in 20,000 parts of air are considered hazardous. For test purposes, any acceptable carbon monoxide detection method may be used.

(2) Carbon dioxide in excess of three percent by volume (sea level equivalent) is considered hazardous in the case of crewmembers. Higher concentrations of carbon dioxide may be allowed in crew compartments if appropriate protective breathing equipment is available.

(c) There must be provisions made to ensure that the conditions prescribed in paragraph (b) of this section are met after reasonably probable failures or malfunctioning of the ventilating, heating, pressurization, or other systems and equipment.

(d) If accumulation of hazardous quantities of smoke in the cockpit area is reasonably probable, smoke evacuation must be readily accomplished, starting with full pressurization and without depressurizing beyond safe limits.

(e) There must be a means to enable the crew to control the temperature and quantity of ventilating air supplied to the crew compartment, independently of the temperature and quantity of ventilating air supplied to other compartments.

### § 25.833 Heating systems.

(a) Combustion heaters must be approved and must meet the fire protection requirements of § 25.859.

(b) Engine exhaust heaters must meet the provisions of § 25.1125.

PRESSURIZATION

### § 25.841 Pressurized cabins.

(a) Pressurized cabins and compartments to be occupied must be equipped to provide a cabin pressure altitude of not more than 8,000 feet at the maximum operating altitude of the airplane under normal operating conditions. If certification for operation over 25,000 feet is requested, the airplane must be able to maintain a cabin pressure altitude of not more than 15,000 feet in the event of any reasonably probable failure or malfunction in the pressurization system.

(b) Pressurized cabins must have at least the following valves, controls, and indicators for controlling cabin pressure:

(1) Two pressure relief valves (at least one of which is the normal regulating valve) to automatically limit the positive pressure differential to a predetermined value at the maximum rate of flow delivered by the pressure source. The combined capacity of the relief valves must be large enough so that the failure of any one valve would not cause an appreciable rise in the pressure differential. The pressure differential is positive when the internal pressure is greater than the external.

(2) Two reverse pressure differential relief valves (or their equivalents) to automatically prevent a negative pressure differential that would damage the structure. One valve is enough, however, if it is of a design that reasonably precludes its malfunctioning.

(3) A means by which the pressure differential can be rapidly equalized.

(4) An automatic or manual regulator for controlling the intake or exhaust airflow, or both, for maintaining the required internal pressures and airflow rates.

(5) Instruments at the pilot or flight engineer station to show the pressure differential, the absolute pressure in the cabin, and the rate of change of the absolute pressure.

(6) Warning indication at the pilot or flight engineer station to indicate when the safe or preset pressure differential and absolute cabin pressure limits are exceeded. Appropriate warning markings on the cabin pressure differential indicator meet the warning requirement for pressure differential limits and an aural or visual signal (in addition to cabin altitude indicating means) meets the warning requirement for absolute cabin pressure limits if it warns the flight crew when the cabin absolute pressure is below that equivalent to 10,000 feet.

(7) A warning placard at the pilot or flight engineer station if the structure is not designed for pressure differentials up to the maximum relief valve setting in combination with landing loads.

### § 25.843 Tests for pressurized cabins.

(a) *Strength test.* The complete pressurized cabin, including doors, windows, and valves, must be tested as a pressure vessel for the pressure differential specified in § 25.365(d).

(b) *Functional tests.* The following functional tests must be performed:

(1) Tests of the functioning and capacity of the positive and negative pressure differential valves, and of the emergency release valve, to simulate the effects of closed regulator valves.

(2) Tests of the pressurization system to show proper functioning under each possible condition of pressure, temperature, and moisture, up to the maximum altitude for which certification is requested.

(3) Flight tests, to show the performance of the pressure supply, pressure and flow regulators, indicators, and warning signals, in steady and stepped climbs and descents at rates corresponding to the maximum attainable within the operating limitations of the airplane, up to the maximum altitude for which certification is requested.

(4) Tests of each door and emergency exits, to show that they operate properly after being subjected to the flight tests prescribed in subparagraph (3) of this paragraph.

FIRE PROTECTION

### § 25.851 Fire extinguishers.

(a) *Hand fire extinguishers.* For hand fire extinguishers the following apply:

(1) Each hand fire extinguisher must be approved.

(2) The types and quantities of each extinguishing agent used must be appropriate to the kinds of fires likely to occur where used.

(3) Each extinguisher for use in a personnel compartment must be designed to minimize the hazard of toxic gas concentrations.

(4) A readily accessible hand fire extinguisher must be available for use in each Class A or Class B cargo compartment.

(b) *Built-in fire extinguishers.* If a built-in fire extinguishing system is required—

(1) The capacity of each system, in relation to the volume of the compartment where used and the ventilation rate, must be adequate for any fire likely to occur in that compartment; and

(2) Each system must be installed so that—

(i) No extinguishing agent likely to enter personnel compartments will be hazardous to the occupants; and

(ii) No discharge of the extinguisher can cause structural damage.

### § 25.853 Compartment interiors.

For each compartment to be used by the crew or passengers—

(a) The materials must be at least flash-resistant;

(b) The wall and ceiling linings, and the covering of upholstery, floors, and furnishings must be at least flame resistant;

(c) Each compartment where smoking is to be allowed must have self-contained, removable, ash trays, and each other compartment must be placarded against smoking;

(d) Each receptacle for towels, paper, or waste must be at least fire resistant and must have means for containing possible fires;

(e) There must be at least one hand fire extinguisher for use by the flight crewmembers; and

(f) There must be at least the following number of hand fire extinguishers conveniently located in passenger compartments:

| Passenger capacity: | *Minimum number of hand fire extinguishers* |
|---|---|
| 7 through 30 | 1 |
| 31 through 60 | 2 |
| 61 or more | 3 |

### § 25.855 Cargo and baggage compartments.

(a) Each cargo and baggage compartment (including tie-down equipment) must be constructed of materials that are at least flame resistant.

(b) No compartment may contain any controls, wiring, lines, equipment, or accessories whose damage or failure would affect safe operation, unless those items are protected so that—

(1) They cannot be damaged by the movement of cargo in the compartment; and

(2) Their breakage or failure will not create a fire hazard.

(c) There must be means to prevent cargo or baggage from interfering with the functioning of the fire-protective features of the compartment.

(d) Sources of heat within the compartment must be shielded and insulated to prevent igniting the cargo.

(e) Cargo compartments must meet one of the class requirements of § 25.857. In addition, flight tests must be conducted to show compliance with the provisions of § 25.857 concerning—

(1) Compartment accessibility;

(2) The entry of hazardous quantities of smoke or extinguishing agent into compartments occupied by the crew or passengers; and

(3) The dissipation of the extinguishing agent in Class C compartments.

During these tests, it must be shown that no inadvertent operation of smoke or fire detectors in any compartment would occur as a result of fire contained in any one compartment, either during or after extinguishment, unless the extinguishing system floods each such compartment simultaneously.

### § 25.857 Cargo compartment classification.

(a) *Class A.* A Class A cargo or baggage compartment is one in which—

(1) The presence of a fire would be easily discovered by a crewmember while at his station; and

(2) Each part of the compartment is easily accessible in flight.

(b) *Class B.* A Class B cargo or baggage compartment is one in which—

(1) There is sufficient access in flight to enable a crew member to effectively reach any part of the compartment with the contents of a hand fire extinguisher;

(2) When the access provisions are being used, no hazardous quantity of smoke, flames, or extinguishing agent, will enter any compartment occupied by the crew or passengers;

(3) There is a separate approved smoke detector or fire detector system to give warning at the pilot or flight engineer station; and

(4) There is a fire-resistant lining.

(c) *Class C.* A Class C cargo or baggage compartment is one not meeting the requirements for either a Class A or B compartment but in which—

(1) There is a separate approved smoke detector or fire detector system to give warning at the pilot or flight engineer station;

(2) There is an approved built-in fire-extinguishing system controllable from the pilot or flight engineer stations;

(3) There are means to exclude hazardous quantities of smoke, flames, or extinguishing agent, from any compartment occupied by the crew or passengers;

(4) There are means to control ventilation and drafts within the compartment so that the extinguishing agent used can control any fire that may start within the compartment; and

(5) There is a fire-resistant lining.

(d) *Class D.* A Class D cargo or baggage compartment is one in which—

(1) A fire occurring in it will be completely confined without endangering the safety of the airplane or the occupants;

(2) There are means to exclude hazardous quantities of smoke, flames, or other noxious gases, from any compartment occupied by the crew or passengers;

(3) Ventilation and drafts are controlled within each compartment so that any fire likely to occur in the compartment will not progress beyond safe limits;

(4) There is a fire-resistant lining; and

(5) Consideration is given to the effect of heat within the compartment on adjacent critical parts of the airplane.

For compartments of 500 cu. ft. or less, an airflow of 1500 cu. ft. per hour is acceptable.

(e) *Class E.* A Class E cargo compartment is one on airplanes used only for the carriage of cargo and in which—

(1) There is a fire-resistant lining;

(2) There is a separate approved smoke or fire detector system to give warning at the pilot or flight engineer station;

(3) There are means to shut off the ventilating airflow to, or within, the compartment, and the controls for these means are accessible to the flight crew in the crew compartment;

(4) There are means to exclude hazardous quantities of smoke, flames, or noxious gases, from the flight crew compartment; and

(5) The required crew emergency exists are accessible under any cargo loading condition.

### § 25.859 Combustion heater fire protection.

(a) *Combustion heater fire zones.* The following combustion heater fire zones must be protected from fire in accordance with the applicable provisions of §§ 25.1181 through 25.1191 and 25.1195 through 25.1203:

(1) The region surrounding the heater, if this region contains any flammable fluid system components (excluding the heater fuel system), that could—

(i) Be damaged by heater malfunctioning; or

(ii) Allow flammable fluids or vapors to reach the heater in case of leakage.

(2) The region surrounding the heater, if the heater fuel system has fittings that, if they leaked, would allow fuel or vapors to enter this region.

(3) The part of the ventilating air passage that surrounds the combustion chamber. However, no fire extinguishment is required in cabin ventilating air passages.

(b) *Ventilating air ducts.* Each ventilating air duct passing through any fire zone must be fireproof. In addition—

(1) Unless isolation is provided by fireproof valves or by equally effective means, the ventilating air duct downstream of each heater must be fireproof

for a distance great enough to ensure that any fire originating in the heater can be contained in the duct; and

(2) Each part of any ventilating duct passing through any region having a flammable fluid system must be constructed or isolated from that system so that the malfunctioning of any component of that system cannot introduce flammable fluids or vapors into the ventilating airstream.

(c) *Combustion air ducts.* Each combustion air duct must be fireproof for a distance great enough to prevent damage from backfiring or reverse flame propagation. In addition—

(1) No combustion air duct may have a common opening with the ventilating airstream unless flames from backfires or reverse burning cannot enter the ventilating airstream under any operating condition, including reverse flow or malfunctioning of the heater or its associated components; and

(2) No combustion air duct may restrict the prompt relief of any backfire that, if so restricted, could cause heater failure.

(d) *Heater controls; general.* Provision must be made to prevent the hazardous accumulation of water or ice on or in any heater control component, control system tubing, or safety control.

(e) *Heater safety controls.* For each combustion heater there must be the following safety control means:

(1) There must be means for each heater, independent of the components provided for the normal continuous control of air temperature, airflow, and fuel flow, to automatically shut off the ignition and fuel supply to that heater at a point remote from that heater, when—

(i) The heat exchanger temperature or ventilating air temperature exceeds safe limits; or

(ii) Either the combustion airflow or the ventilating airflow becomes inadequate for safe operation.

(2) The means of complying with subparagraph (1) of this paragraph for any individual heater must be independent of any component serving any other heater whose heat output is essential for safe operation.

(3) There must be means to warn the crew when any heater whose heat output is essential for safe operation has been shut off by the automatic means prescribed in subparagraph (1) of this paragraph.

(f) *Air intakes.* Each combustion and ventilating air intake must be located so that no flammable fluids or vapors can enter the heater system under any operating condition—

(1) During normal operation; or

(2) As a result of the malfunctioning of any other component.

(g) *Heater exhaust.* Heater exhaust systems must meet the provisions of §§ 25.1121 and 25.1123. In addition, there must be provisions in the means exhaust system to safely expel the products of combustion to prevent the occurrence of—

(1) Fuel leakage from the exhaust to surrounding compartments;

(2) Exhaust gas impingement on surrounding equipment or structure;

(3) Ignition of flammable fluids by the exhaust, if the exhaust is in a compartment containing flammable fluid lines; and

(4) Restriction by the exhaust of the prompt relief of backfires that, if so restricted, could cause heater failure.

(h) *Heater fuel systems.* Each heater fuel system must meet each powerplant fuel system requirement affecting safe heater operation. Each heater fuel system component within the ventilating airstream must be protected by shrouds so that no leakage from those components can enter the ventilating airstream.

(i) *Drains.* There must be means to safely drain fuel that might accumulate within the combustion chamber or the heat exchanger. In addition—

(1) Each part of any drain that operates at high temperatures must be protected in the same manner as heater exhausts; and

(2) Each drain must be protected from hazardous ice accumulation under any operating condition.

**§ 25.863 Flammable fluid fire protection.**

If flammable fluids or vapors might be liberated by the leakage of fluid systems, there must be means to—

(a) Prevent the ignition of those fluids or vapors by any other equipment; or

(b) Control any fire resulting from that ignition.

MISCELLANEOUS

**§ 25.871 Leveling marks.**

There must be reference marks for leveling the airplane on the ground.

**§ 25.875 Reinforcement near propellers.**

(a) Each part of the airplane near the propeller tips must be strong and stiff enough to withstand the effects of the induced vibration and of ice thrown from the propeller.

(b) No window may be near the propeller tips unless it can withstand the most severe ice impact likely to occur.

## Subpart E—Powerplant

GENERAL

**§ 25.901 Installation.**

(a) For the purpose of this part, the airplane powerplant installation includes each component that—

(1) Is necessary for propulsion;

(2) Affects the control of the major propulsive units; or

(3) Affects the safety of the major propulsive units between normal inspections or overhauls.

(b) For each powerplant—

(1) The engine installation must meet the applicable provisions of this subpart;

(2) The components of the installation must be constructed, arranged, and installed so as to ensure their continued safe operation between normal inspections or overhauls;

(3) The installation must be accessible for necessary inspections and maintenance; and

(4) The major components of the installation must be electrically bonded to the other parts of the airplane.

**§ 25.903 Engines.**

(a) *Engine type certification.* Each engine must be type certificated under Part 33 [New].

(b) *Engine isolation.* The powerplants must be arranged and isolated from each other to allow operation, in at least one configuration, so that the failure or malfunction of any engine, or of any system that can affect the engine, will not—

(1) Prevent the continued safe operation of the remaining engines; or

(2) Require immediate action by any crewmember for continued safe operation.

(c) *Control of engine rotation.* There must be a means to individually stop and restart the rotation of any engine in flight unless, for turbine engine installations, continued rotation could not jeopardize the safety of the airplane. Each component of the stopping and restarting system on the engine side of the firewall, and that might be exposed to fire, must be at least fire resistant. If hydraulic propeller feathering systems are used for this purpose, the feathering lines must be at least fire resistant under the operating conditions that may be expected to exist during feathering.

(d) *Turbine engine installations.* Unless the engine type certificate specifies that the engine rotor cases can contain damage resulting from rotor blade failure, turbine engine powerplant installations must have a protection means so that rotor blade failure in any engine will not affect the operation of remaining engines or jeopardize continued safety. In addition, design precautions must be taken to minimize the probability of jeopardizing safety if an engine turbine rotor fails, unless—

(1) The engine type certificate specifies that the turbine rotors can withstand damage-inducing factors (such as those that might result from abnormal rotor speed, temperature, or vibration); and

(2) The powerplant systems associated with engine control devices, systems, and instrumentation give reasonable assurance that those engine operating limitations that adversely affect turbine rotor structural integrity will not be exceeded in service.

**§ 25.905 Propellers.**

(a) Each propeller must be type certificated under Part 35 [New].

(b) Engine power and propeller shaft rotational speed may not exceed the limits for which the propeller is certificated.

**§ 25.907 Propeller vibration.**

(a) The magnitude of the propeller blade vibration stresses under any normal condition of operation must be determined by actual measurement or by comparison with similar installations for which these measurements have been made.

(b) The determined vibration stresses may not exceed values that have been shown to be safe for continuous operation.

**§ 25.925 Propeller clearance.**

Unless smaller clearances are substantiated, propeller clearances with the airplane at maximum weight, with the most adverse center of gravity, and with the propeller in the most adverse pitch position, may not be less than the following:

(a) *Ground clearance.* There must be a clearance of at least seven inches (for each airplane with nose wheel landing gear) or nine inches (for each airplane with tail wheel landing gear) between each propeller and the ground with the landing gear statically deflected and in the level takeoff, or taxiing attitude, whichever is most critical. In addition, there must be positive clearance between the propeller and the ground when in the level takeoff attitude with the critical tire completely deflated and the corresponding landing gear strut bottomed.

(b) *Water clearance.* There must be a clearance of at least 18 inches between each propeller and the water, unless compliance with § 25.239(a) can be shown with a lesser clearance.

(c) *Structural clearance.* There must be—

(1) At least one inch radial clearance between the blade tips and the airplane structure, plus any additional radial clearance necessary to prevent harmful vibration;

(2) At least one-half inch longitudinal clearance between the propeller blades or cuffs and stationary parts of the airplane; and

(3) Positive clearance between other rotating parts of the propeller or spinner and stationary parts of the airplane.

**§ 25.929 Propeller deicing.**

(a) For airplanes intended for use where icing may be expected, there must be a means to prevent or remove hazardous ice accumulation on propellers or on accessories where ice accumulation would jeopardize engine performance.

(b) If combustible fluid is used for propeller deicing, §§ 25.1181 through 25.1185 and 25.1189 apply.

**§ 25.933 Reversing systems.**

(a) Reversing systems intended for ground operation only must be designed so that no single failure or malfunction of the system will result in unwanted reverse thrust under any expected operating condition. Failure of structural elements need not be considered if the probability of this kind of failure is extremely remote.

(b) Turbojet reversing systems intended for inflight use must be designed so that no unsafe condition will result during normal operation of the system, or from any failure (or reasonably likely combination of failures) of the reversing system, under any anticipated condition of operation of the airplane. Failure of structural elements need not be considered if the probability of this kind of failure is extremely remote.

(c) Compliance with this section may be shown by failure analysis, testing, or both, for propeller systems that allow propeller blades to move from the flight low-pitch position to a position that is substantially less than that at the normal flight low-pitch stop position. The analysis may include or be supported by the analysis made to show compliance with the requirements of § 35.21 for the propeller and associated installation components.

**§ 25.937 Turbopropeller-drag limiting systems.**

Turbopropeller powered airplane propeller-drag limiting systems must be designed so that no single failure or malfunction of any of the systems during normal or emergency operation results in propeller drag in excess of that for which the airplane was designed under § 25.367. Failure of structural elements of the drag limiting systems need not be considered if the probability of this kind of failure is extremely remote.

**§ 25.939 Turbine engine powerplant operating characteristics.**

Turbine engine powerplant operating characteristics must be investigated in flight to determine that no adverse characteristics (such as stall, surge, or flameout) are present to a hazardous degree, during normal and emergency operation within the range of operating limitations of the airplane and of the engine.

FUEL SYSTEM

**§ 25.951 General.**

(a) Each fuel system must be constructed and arranged to ensure a flow of fuel at a rate and pressure established for proper engine functioning under each likely operating condition, including any maneuver for which certification is requested.

(b) Each fuel system must be arranged so that—

(1) No fuel pump can draw fuel from more than one tank at a time; or

(2) There are means to prevent introducing air into the system.

**§ 25.953 Fuel system independence.**

Each fuel system must meet the requirements of § 25.903(b) by—

(a) Allowing the supply of fuel to each engine through a system independent of each part of the system supplying fuel to any other engine; or

(b) Any other acceptable method.

**§ 25.955 Fuel flow.**

(a) Each fuel system must provide at least 100 percent of the fuel flow required under each intended operating condition and maneuver. Compliance must be shown as follows:

(1) Fuel must be delivered to each engine at a pressure within the limits specified in the engine type certificate.

(2) The quantity of fuel in the tank may not exceed the amount established as the unusable fuel supply for that tank under the requirements of § 25.959 plus that necessary to show compliance with this section.

(3) Each main pump must be used that is necessary for each operating condition and attitude for which compliance with this section is shown, and the appropriate emergency pump must be substituted for each main pump so used.

(4) If there is a fuel flowmeter, it must be blocked and the fuel must flow through the meter or its bypass.

(b) If an engine can feed from more than one fuel tank, the fuel system must supply the full fuel pressure to that engine in not more than 20 seconds after switching to any other fuel tank when engine malfunctioning becomes apparent due to the depletion of the fuel supply in any tank from which the engine can be fed.

**§ 25.957 Flow between interconnected tanks.**

If fuel can be pumped from one tank to another in flight, the fuel tank vents and the fuel transfer system must be designed so that no structural damage to the tanks can occur because of overfilling.

**§ 25.959 Unusable fuel supply.**

The unusable fuel supply for each tank must be established as not less than that quantity at which the first evidence of malfunctioning occurs under the most adverse fuel feed condition occurring under each intended operation and flight maneuver involving that tank.

**§ 25.961 Fuel system hot weather operation.**

(a) The fuel system must perform satisfactorily in hot weather operation. This must be shown by climbing from the altitude of the airport elected by the applicant to the altitude corresponding to that at which the one-engine-inoperative best rate of climb is not more than the en route climb with the configuration and weight specified in § 25.67(d). There may be no evidence of vapor lock or other malfunctioning during the climb test conducted under the following conditions:

(1) For reciprocating engine powered airplanes, the engines must operate at maximum continuous power, except that takeoff power must be used for the altitudes from 1,000 feet below the critical altitude through the critical altitude. The time interval during which takeoff power is used may not be less than the takeoff time limitation.

(2) For turbine engine powered airplanes, the engines must operate at takeoff power for the time interval selected for showing the takeoff flight path, and at maximum continuous power for the rest of the climb.

(3) The weight of the airplane must be the weight with full fuel tanks, minimum crew, and the ballast necessary to maintain the center of gravity within allowable limits.

(4) The speed of climb may not exceed that allowing compliance with the minimum climb requirement specified in § 25.65(a).

(5) The fuel temperature must be at least 110° F.

(b) The test prescribed in paragraph (a) of this section may be performed in flight or on the ground under closely simulated flight conditions. If a flight test is performed in weather cold enough to interfere with the proper conduct of the test, the fuel tank surfaces, fuel lines, and other fuel system parts subject to cold air must be insulated to simulate, insofar as practicable, flight in hot weather.

**§ 25.963 Fuel tanks: general.**

(a) Each fuel tank must be able to withstand, without failure, the vibration, inertia, fluid, and structural loads that it may be subjected to in operation.

(b) Flexible fuel tank liners must be approved or must be shown to be suitable for the particular application.

(c) Integral fuel tanks must have facilities for interior inspection and repair.

(d) Fuel tanks within the fuselage contour must be able to resist rupture, and to retain fuel, under the inertia forces prescribed for the emergency landing conditions in § 25.561. In addition, these tanks must be in a protected position so that exposure of the tanks to scraping action with the ground is unlikely.

(e) The augmentation liquid tank capacity available for the use of each engine must be large enough to allow operation of the airplane under the approved procedures for the use of liquid-augmented power. The computation of liquid consumption must be based on the maximum approved rate appropriate for the desired engine output, and must include the effect of temperature on engine performance as well as any other factors that might vary the amount of liquid required.

**§ 25.965 Fuel tank tests.**

(a) It must be shown by tests that the fuel tanks, as mounted in the airplane, can withstand, without failure or leakage, the more critical of the pressures resulting from the conditions specified in subparagraphs (1) and (2) of this paragraph. In addition, it must be shown by either analysis or tests, that tank surfaces subjected to more critical pressures resulting from the condition of subparagraphs (3) and (4) of this paragraph, are able to withstand the following pressures:

(1) An internal pressure of 3.5 psi.

(2) 125 percent of the maximum air pressure developed in the tank from ram effect.

(3) Fluid pressures developed during maximum limit accelerations, and deflections, of the airplane with a full tank.

(4) Fluid pressures developed during the most adverse combination of airplane roll and fuel load.

(b) Each metallic tank with large unsupported or unstiffened flat surfaces, whose failure or deformation could cause fuel leakage, must be able to withstand the following test, or its equivalent, without leakage or excessive deformation of the tank walls:

(1) Each complete tank assembly and its supports must be vibration tested while mounted to simulate the actual installation.

(2) Except as specified in subparagraph (4) of this paragraph, the tank assembly must be vibrated for 25 hours at an amplitude of not less than ½2 of an inch (unless another amplitude is substantiated) while ⅔ filled with water or other suitable test fluid.

(3) The test frequency of vibration must be as follows:

(i) If no frequency of vibration resulting from any r.p.m. within the normal operating range of engine speeds is critical, the test frequency of vibration, in number of cycles per minute, must be the number obtained by multiplying the maximum continuous engine speed (r.p.m.) by 0.9.

(ii) If only one frequency of vibration resulting from any r.p.m. within the normal operating range of engine speeds is critical, that frequency of vibration must be the test frequency.

(iii) If more than one frequency of vibration resulting from any r.p.m. within the normal operating range of engine speeds is critical, the most critical of these frequencies must be the test frequency.

(4) Under subparagraph (3) (ii) and (iii) of this paragraph, the time of test must be adjusted to accomplish the same number of vibration cycles that would be accomplished in 25 hours at the frequency specified in subparagraph (3) (i) of this paragraph.

(5) During the test, the tank assembly must be rocked at the rate of 16 to 20 complete cycles per minute, through an angle of 15° on both sides of the horizontal (30° total), about the most critical axis, for 25 hours. If motion about more than one axis is likely to be critical, the tank must be rocked about each critical axis for 12½ hours.

(c) Except where satisfactory operating experience with a similar tank in a similar installation is shown, nonmetallic tanks must withstand the test specified in paragraph (b) (5) of this section, with fuel at a temperature of 110° F. During this test, a representative specimen of the tank must be installed in a supporting structure simulating the installation in the airplane.

**§ 25.967 Fuel tank installations.**

(a) Each fuel tank must be supported so that tank loads (resulting from the weight of the fuel in the tanks) are not concentrated on unsupported tank surfaces. In addition—

(1) There must be pads, if necessary, to prevent chafing between the tank and its supports;

(2) Padding must be nonabsorbent or treated to prevent the absorption of fluids;

(3) If a flexible tank liner is used, it must be supported so that it is not required to withstand fluid loads; and

(4) Each interior surface of the tank compartment must be smooth and free of projections that could cause wear of the liner unless—

(i) Provisions are made for protection of the liner at these points; or

(ii) The construction of the liner itself provides that protection.

(b) Spaces adjacent to tank surfaces must be ventilated to avoid fume accumulation due to minor leakage. If the tank is in a sealed compartment, ventilation may be limited to drain holes large enough to prevent excessive pressure resulting from altitude changes.

(c) The location of each tank must meet the requirements of § 25.1185(a).

(d) No engine nacelle skin immediately behind a major air outlet from the engine compartment may act as the wall of an integral tank.

(e) Each fuel tank must be isolated from personnel compartments by a fumeproof and fuelproof enclosure.

**§ 25.969 Fuel tank expansion space.**

Each fuel tank must have an expansion space of not less than two percent of the tank capacity. It must be impossible to fill the expansion space inadvertently with the airplane in the normal ground attitude.

**§ 25.971 Fuel tank sump.**

(a) Each fuel tank must have a sump with an effective capacity, in the normal ground attitude, of not less than the greater of 0.10 percent of the tank capacity or one-sixteenth of a gallon unless operating limitations are established to ensure that the accumulation of water in service will not exceed the sump capacity.

(b) Each fuel tank must allow drainage of any hazardous quantity of water from any part of the tank to its sump with the airplane in the ground attitude.

(c) Each fuel tank sump must have an accessible drain that—

(1) Allows complete drainage of the sump on the ground;

(2) Discharges clear of each part of the airplane; and

(3) Has manual or automatic means for positive locking in the closed position.

**§ 25.973 Fuel tank filler connection.**

Each fuel tank filler connection must prevent the entrance of fuel into any part of the airplane other than the tank itself. In addition—

(a) Each filler must be marked as prescribed in § 25.1557(c);

(b) Each recessed filler connection that can retain any appreciable quantity of fuel must have a drain that discharges clear of each part of the airplane; and

(c) Each filler cap must provide a fuel-tight seal.

**§ 25.975 Fuel tank vents and carburetor vapor vents.**

(a) *Fuel tank vents.* Each fuel tank must be vented from the top part of the expansion space so that venting is effective under any normal flight condition. In addition—

(1) Each vent must be arranged to avoid stoppage by dirt or ice formation;

(2) The vent arrangement must prevent siphoning of fuel during normal operation;

(3) The venting capacity and vent pressure levels must maintain acceptable differences of pressure between the interior and exterior of the tank, during—

(i) Normal flight operation;

(ii) Maximum rate of ascent and descent; and

(iii) Refueling and defueling (where applicable);

(4) Airspaces of tanks with interconnected outlets must be interconnected;

(5) There may be no point in any vent line where moisture can accumulate with the airplane in the ground attitude or the level flight attitude, unless drainage is provided; and

(6) No vent or drainage provision may end at any point—

(i) Where the discharge of fuel from the vent outlet would constitute a fire hazard; or

(ii) From which fumes could enter personnel compartments.

(b) *Carburetor vapor vents.* Each carburetor with vapor elimination connections must have a vent line to lead vapors back to one of the fuel tanks. In addition—

(1) Each vent system must have means to avoid stoppage by ice; and

(2) If there is more than one fuel tank, and it is necessary to use the tanks in a definite sequence, each vapor vent return line must lead back to the fuel tank used for takeoff and landing.

**§ 25.977 Fuel tank outlet.**

There must be a fuel strainer with 8 to 16 meshes per inch for the fuel tank outlet or for the booster pump. In addition—

(a) The clear area of each fuel tank outlet strainer must be at least five times the area of the outlet line;

(b) The diameter of each strainer must be at least that of the fuel tank outlet; and

(c) Each finger strainer must be accessible for inspection and cleaning.

**§ 25.979 Under-wing fueling provisions.**

(a) Each under-wing fuel tank connection must have means to prevent the escape of hazardous quantities of fuel from that tank, while the cover plate is removed, if the fuel entry valve malfunctions.

(b) A means, in addition to the normal means for limiting the tank content, must be installed to prevent damage to the tank if the normal means fails.

## Fuel System Components

**§ 25.991 Fuel pumps.**

(a) *Main pumps.* Each fuel pump required for proper engine operation, or required to meet the fuel system requirements of this subpart (other than those in paragraph (b) of this section), is a main pump. For each main pump, provision must be made to allow the bypass of each positive displacement fuel pump other than a fuel injection pump (a pump that supplies the proper flow and pressure for fuel injection when the injection is not accomplished in a carburetor) approved as part of the engine.

(b) *Emergency pumps.* There must be emergency pumps or another main pump to feed each engine immediately after failure of any main pump (other than a fuel injection pump approved as part of the engine).

**§ 25.993 Fuel system lines and fittings.**

(a) Each fuel line must be installed and supported to prevent excessive vibration and to withstand loads due to fuel pressure and accelerated flight conditions.

(b) Each fuel line connected to components of the airplane between which relative motion could exist must have provisions for flexibility.

(c) Each flexible connection in fuel lines that may be under pressure and subjected to axial loading must use flexible hose assemblies.

(d) Flexible hose must be approved or must be shown to be suitable for the particular application.

(e) No flexible hose that might be adversely affected by exposure to high temperatures may be used where excessive temperatures will exist during operation or after engine shut-down.

**§ 25.995 Fuel valves.**

In addition to the requirements of § 25.1189 for shutoff means, each fuel valve must—

(a) Have positive stops or suitable index provisions in the "on" and "off" positions; and

(b) Be supported so that no loads resulting from their operation or from accelerated flight conditions are transmitted to the lines attached to the valve.

**§ 25.997 Fuel strainer or filter.**

(a) There must be a fuel strainer or filter between the tank outlet and the fuel metering device of the engine. In addition, the fuel strainer or filter must be—

(1) Between the tank outlet and the engine-driven pump inlet, if there is an engine-driven fuel pump;

(2) Accessible for drainage and cleaning and, for the strainer screen, easily removable; and

(3) Mounted so that its weight is not supported by the connecting lines or by the inlet or outlet connections of the strainer or filter itself.

(b) Unless there are means in the fuel system to prevent the accumulation of

ice on the filter, there must be means to automatically maintain the fuel flow if ice-clogging of the filter occurs.

(c) The fuel strainer or filter must be of adequate capacity (with respect to operating limitations established to ensure proper service) and of appropriate mesh to ensure proper engine operation, with the fuel contaminated to a degree (with respect to particle size and density) that can be reasonably expected in service. The degree of fuel filtering may not be less than that established for the engine under Part 33 [New].

**§ 25.999 Fuel system drains.**

(a) Drainage of the fuel system must be accomplished by the use of fuel strainer and fuel tank sump drains.

(b) Each drain must discharge clear of each part of the airplane and must have manual or automatic means for positive locking in the closed position.

**§ 25.1001 Fuel jettisoning system.**

(a) If the maximum takeoff weight is more than 105 percent of the maximum landing weight, there must be a fuel jettisoning system able to jettison enough fuel to bring the takeoff weight down to the maximum landing weight. The average rate of fuel jettisoning must be at least 1 percent of the maximum takeoff weight per minute, except that the time required to jettison the fuel need not be less than 10 minutes. This must be shown at maximum takeoff weight, with flaps and landing gear up, and in—

(1) A power-off glide at 1.4 $V_{S_1}$;

(2) A climb at the one-engine-inoperative best rate-of-climb speed, with the critical engine inoperative and the remaining engines at maximum continuous power; and

(3) Level flight at 1.4 $V_{S_1}$, if the results of the tests in the conditions specified in subparagraphs (1) and (2) of this paragraph show that this condition could be critical.

(b) During the flight tests prescribed in paragraph (a) of this section, it must be shown that—

(1) The fuel jettisoning system and its operation are free from fire hazard;

(2) The fuel discharges clear of any part of the airplane;

(3) Fuel or fumes do not enter any parts of the airplane; and

(4) The jettisoning operation does not adversely affect the controllability of the airplane.

(c) For reciprocating engine powered airplanes, the jettisoning system must be designed so that it is not possible to jettison the fuel in the tanks used for takeoff and landing below the level allowing 45 minutes flight at 75 percent maximum continuous power. However, if there is an auxiliary control independent of the main jettisoning control, the system may be designed to jettison all the fuel.

(d) For turbine engine powered airplanes the jettisoning system must be designed so that it is not possible to jettison fuel in the tanks used for takeoff and landing below the level allowing climb from sea level to 10,000 feet and thereafter allowing 45 minutes cruise at a speed for maximum range.

(e) The fuel jettisoning valve must be designed to allow flight personnel to close the valve during any part of the jettisoning operation.

(f) Unless it is shown that using any means (including flaps, slots, and slats) for changing the airflow across or around the wings does not adversely affect fuel jettisoning, there must be a placard, adjacent to the jettisoning control, to warn flight crewmembers against jettisoning fuel while the means that change the airflow are being used.

(g) The fuel jettisoning system must be designed so that any reasonably probable single malfunction in the system will not result in a hazardous condition due to unsymmetrical jettisoning of, or inability to jettison, fuel.

OIL SYSTEM

**§ 25.1011 General.**

(a) Each engine must have an independent oil system that can supply it with an appropriate quantity of oil at a temperature not above that safe for continuous operation.

(b) The usable oil capacity may not be less than the product of the endurance of the airplane under critical operating conditions and the approved maximum allowable oil consumption of the engine under the same conditions, plus a suitable margin to ensure system circulation. Instead of a rational analysis of airplane range for the purpose of computing oil requirements for reciprocating engine powered airplanes, the following fuel/oil ratios may be used:

(1) For airplanes without a reserve oil or oil transfer system, a fuel/oil ratio of 30:1 by volume.

(2) For airplanes with either a reserve oil or oil transfer system, a fuel/oil ratio of 40:1 by volume.

(c) Fuel/oil ratios higher than those prescribed in paragraphs (b) (1) and (2) of this section may be used if substantiated by data on actual engine oil consumption.

**§ 25.1013 Oil tanks.**

(a) *Installation.* Each oil tank installation must meet the requirements of § 25.967. However, an engine oil tank may be in a designated fire zone if the tank and its supports are fireproof to the extent that damage by fire to any non-fireproof part will not cause leakage or spillage of oil.

(b) *Expansion space.* Oil tank expansion space must be provided as follows:

(1) Each oil tank must have an expansion space of not less than the greater of—

(i) 10 percent of the tank capacity; or

(ii) 0.5 gallon.

(2) Each reserve oil tank not directly connected to any engine may have an expansion space of not less than two percent of the tank capacity.

(3) It must be impossible to fill the expansion space inadvertently with the airplane in the normal ground attitude.

(c) *Filler connection.* Each recessed oil tank filler connection that can retain any appreciable quantity of oil must have a drain that discharges clear of each part of the airplane. In addition—

(1) Each oil tank filler cap must provide an oil-tight seal; and

(2) Each oil filler must be marked under § 25.1557(c).

(d) *Vent.* Oil tanks must be vented as follows:

(1) Each oil tank must be vented from the top part of the expansion space so that venting is effective under any normal flight condition.

(2) Oil tank vents must be arranged so that condensed water vapor that might freeze and obstruct the line cannot accumulate at any point.

(e) *Outlet.* There must be means to prevent entrance into the tank itself, or into the tank outlet, of any object that might obstruct the flow of oil through the system. No oil tank outlet may be enclosed by any screen or guard that would reduce the flow of oil below a safe value at any operating temperature.

(f) *Flexible oil tank liners.* Each flexible oil tank liner must be approved or must be shown to be suitable for the particular application.

**§ 25.1015 Oil tank tests.**

Each oil tank must be designed and installed so that—

(a) It can withstand, without failure, each vibration, inertia, and fluid load that it may be subjected to in operation; and

(b) It meets the provisions of § 25.965, except—

(1) The test pressure must be five p.s.i. instead of the pressure specified in § 25.965(a); and

(2) The test fluid must be oil at 250° F. instead of the fluid specified in § 25.965(c).

**§ 25.1017 Oil lines and fittings.**

(a) Each oil line must meet the requirements of § 25.993 and each oil line and fitting in any designated fire zone must meet the requirements of § 25.1183.

(b) Breather lines must be arranged so that—

(1) Condensed water vapor that might freeze and obstruct the line cannot accumulate at any point;

(2) The breather discharge does not constitute a fire hazard if foaming occurs or causes emitted oil to strike the pilot's windshield; and

(3) The breather does not discharge into the engine air induction system.

**§ 25.1019 Oil strainer or filter.**

Each oil strainer or filter in the powerplant installation must be constructed and installed so that oil will flow at the normal rate through the rest of the system with the strainer or filter element completely blocked.

**§ 25.1021 Oil drains.**

There must be at least one accessible drain that—

(a) Allows safe drainage of the entire oil system; and

(b) Has manual or automatic means for positive locking in the closed position.

**§ 25.1023 Oil radiators.**

(a) Each oil radiator must be able to withstand, without failure, any vibration, inertia, and oil pressure load to which it would be subjected in operation.

(b) Each oil radiator air duct must be located so that, in case of fire, flames coming from normal openings of the engine nacelle cannot impinge directly upon the radiator.

**§ 25.1025 Oil valves.**

(a) Each oil shutoff must meet the requirements of § 25.1189.

(b) The closing of oil shutoff means may not prevent propeller feathering.

(c) Each oil valve must have positive stops or suitable index provisions in the "on" and "off" positions and must be supported so that no loads resulting from its operation or from accelerated flight conditions are transmitted to the lines attached to the valve.

**§ 25.1027 Propeller feathering system.**

(a) If the propeller feathering system depends on engine oil, there must be means to trap an amount of oil in the tank if the supply becomes depleted due to failure of any part of the lubricating system other than the tank itself.

(b) The amount of trapped oil must be enough to accomplish the feathering operation and must be available only to the feathering pump.

(c) The ability of the system to accomplish feathering with the trapped oil must be shown. This may be done on the ground using an auxiliary source of oil for lubricating the engine during operation.

COOLING

**§ 25.1041 General.**

The powerplant cooling provisions must be able to maintain the temperatures of powerplant components and engine fluids within the temperature limits established for these components and fluids, under ground, water, and flight operating conditions.

**§ 25.1043 Cooling tests.**

(a) *General.* Compliance with § 25.1041 must be shown by tests, under critical ground, water, and flight operating conditions. For these tests, the following apply:

(1) If the tests are conducted under conditions deviating from the maximum ambient atmospheric temperature, the recorded powerplant temperatures must be corrected under paragraphs (c) and (d) of this section.

(2) No corrected temperatures determined under subparagraph (1) of this paragraph may exceed established limits.

(3) For reciprocating engines, the fuel used during the cooling tests must be the minimum grade approved for the engines, and the mixture settings must be those normally used in the flight stages for which the cooling tests are conducted. The test procedures must be as prescribed in § 25.1045.

(b) *Maximum ambient atmospheric temperature.* A maximum ambient atmospheric temperature corresponding to sea level conditions must be established as a limitation on the operation of the airplane. The temperature lapse rate is 3.6° F. per thousand feet of altitude above sea level until a temperature of −69.7° F. is reached, above which altitude, the temperature is considered constant at −69.7° F.

(c) *Correction factor (except cylinder barrels).* Unless a more rational correction applies, temperatures of engine fluids and powerplant components (except cylinder barrels) for which temperature limits are established, must be corrected by adding to them the difference between the maximum ambient atmospheric temperature and the temperature of the ambient air at the time of the first occurrence of the maximum component or fluid temperature recorded during the cooling test.

(d) *Correction factor for cylinder barrel temperatures.* Unless a more rational correction applies, cylinder barrel temperatures must be corrected by adding to them 0.7 times the difference between the maximum ambient atmospheric temperature and the temperature of the ambient air at the time of the first occurrence of the maximum cylinder barrel temperature recorded during the cooling test.

**§ 25.1045 Cooling test procedures.**

(a) Compliance with § 25.1041 must be shown for the takeoff, climb, en route, and landing stages of flight that correspond to the applicable performance requirements. The cooling tests must be conducted with the airplane in the configuration, and operating under the conditions, that are critical relative to cooling during each stage of flight. For the cooling tests, a temperature is "stabilized" when its rate of change is less than two degrees F. per minute.

(b) Temperatures must be stabilized under the conditions from which entry is made into each stage of flight being investigated, unless the entry condition normally is not one during which component and engine fluid temperatures would stabilize (in which case, operation through the full entry condition must be conducted before entry into the stage of flight being investigated in order to allow temperatures to reach their natural levels at the time of entry). The takeoff cooling test must be preceded by a period during which the powerplant component and engine fluid temperatures are stabilized with the engines at ground idle.

(c) Cooling tests for each stage of flight must be continued until—

(1) The component and engine fluid temperatures stabilize;

(2) The stage of flight is completed; or

(3) An operating limitation is reached.

(d) For reciprocating engine powered airplanes, it may be assumed, for cooling test purposes, that the takeoff stage of flight is complete when the airplane reaches an altitude of 1,500 feet above the takeoff surface or reaches a point in the takeoff where the transition from the takeoff to the en route configuration is completed and a speed is reached at which compliance with § 25.67(d) is shown, whichever point is at a higher altitude.

(e) For hull seaplanes and amphibians, cooling must be shown during taxiing downwind for 10 minutes, at five knots above step speed.

INDUCTION SYSTEM

**§ 25.1091 Air induction.**

(a) The air induction system for each engine must supply—

(1) The air required by that engine under each operating condition for which certification is requested; and

(2) The air for proper fuel metering and mixture distribution with the induction system valves in any position.

(b) Each reciprocating engine must have an alternate air source that prevents the entry of rain, ice, or any other foreign matter.

(c) Air intakes may not open within the cowling, unless—

(1) That part of the cowling is isolated from the engine accessory section by means of a fireproof diaphragm; or

(2) There are means to prevent the emergence of backfire flames.

(d) For turbine engine powered airplanes—

(1) There must be means to prevent hazardous quantities of fuel leakage or overflow from drains, vents, or other components of flammable fluid systems from entering the engine intake system; and

(2) The air inlet ducts must be located or protected so as to minimize the ingestion of foreign matter during takeoff, landing, and taxiing.

**§ 25.1093 Induction system deicing and anti-icing provisions.**

(a) *Reciprocating engines.* Each reciprocating engine air induction system must have means to prevent and eliminate icing. Unless this is done by other means, it must be shown that, in air free of visible moisture at a temperature of 30° F., each airplane with altitude engines using—

(1) Conventional venturi carburetors has a preheater that can provide a heat rise of 120° F. with the engine at 60 percent of maximum continuous power; or

(2) Carburetors tending to reduce the probability of ice formation has a preheater that can provide a heat rise of 100° F. with the engine at 60 percent of maximum continuous power.

(b) *Turbine engines.* Each turbine engine must be able to operate throughout its flight power range without adverse effect on engine operation or serious loss of power or thrust, under the icing conditions specified in Appendix C. In addition, there must be means to indicate to appropriate flight crewmembers the functioning of the powerplant ice protection system.

**§ 25.1101 Carburetor air preheater design.**

Each carburetor air preheater must be designed and constructed to—

(a) Ensure ventilation of the preheater when the engine is operated in cold air;

(b) Allow inspection of the exhaust manifold parts that it surrounds; and

(c) Allow inspection of critical parts of the preheater itself.

**§ 25.1103 Induction system ducts.**

(a) Each induction system duct upstream of the first stage of the supercharger must have a drain to prevent the hazardous accumulation of fuel and moisture in the ground attitude. The drains may not discharge in locations that might cause a fire hazard.

(b) Each induction system duct must be—

(1) Strong enough to prevent induction system failures resulting from normal backfire conditions; and

(2) Fire-resistant if it is in any fire zone for which a fire-extinguishing system is required.

(c) Each duct connected to components between which relative motion could exist must have means for flexibility.

**§ 25.1105 Induction system screens.**

If induction system screens are used—

(a) Each screen must be upstream of the carburetor;

(b) No screen may be in any part of the induction system that is the only passage through which air can reach the engine, unless it can be deiced by heated air;

(c) No screen may be deiced by alcohol alone; and

(d) It must be impossible for fuel to strike any screen.

**§ 25.1107 Inter-coolers and after-coolers.**

Each inter-cooler and after-cooler must be able to withstand any vibration, inertia, and air pressure load to which it would be subjected in operation.

EXHAUST SYSTEM

**§ 25.1121 General.**

(a) Each exhaust system must ensure safe disposal of exhaust gases without fire hazard or carbon monoxide contamination in any personnel compartment. For test purposes, any acceptable carbon monoxide detection method may be used to show the absence of carbon monoxide.

(b) Unless suitable precautions are taken, no exhaust system part may be dangerously close to parts of any system carrying flammable fluids or vapors, or under parts of such a system that may leak.

(c) Each component that hot exhaust gases could strike, or that could be subjected to high temperatures from exhaust system parts, must be fireproof. All exhaust system components must be separated by fireproof shields from adjacent parts of the airplane that are outside the engine compartment.

(d) No exhaust gases may discharge so as to cause a fire hazard with respect to any flammable fluid vent or drain.

(e) No exhaust gases may discharge where they will cause a glare seriously affecting pilot vision at night.

(f) Each exhaust system component must be ventilated to prevent points of excessively high temperature.

(g) Each exhaust shroud must be ventilated or insulated to avoid, during normal operation, a temperature high enough to ignite any flammable fluids or vapors external to the shroud.

**§ 25.1123 Exhaust piping.**

(a) Exhaust piping must be heat and corrosion resistant, and must have provisions to prevent failure due to expansion by operating temperatures.

(b) Piping must be supported to withstand any vibration and inertia loads to which it would be subjected in operation; and

(c) Piping connected to components between which relative motion could exist must have means for flexibility.

**§ 25.1125 Exhaust heat exchangers.**

(a) Each exhaust heat exchanger must be constructed and installed to withstand each vibration, inertia, and other load to which it would be subjected in operation. In addition—

(1) Each exchanger must be suitable for continued operation at high temperatures and resistant to corrosion from exhaust gases;

(2) There must be means for the inspection of the critical parts of each exchanger;

(3) Each exchanger must have cooling provisions wherever it is subject to contact with exhaust gases; and

(4) No exhaust heat exchanger or muff may have any stagnant areas or liquid traps that would increase the probability of ignition of flammable fluids or vapors that might be present in case of the failure or malfunction of components carrying flammable fluids.

(b) If an exhaust heat exchanger is used for heating ventilating air—

(1) There must be a secondary heat exchanger between the primary exhaust gas heat exchanger and the ventilating air system; or

(2) Other means must be used to preclude the harmful contamination of the ventilating air.

**§ 25.1127 Exhaust driven turbo-superchargers.**

(a) Each exhaust driven turbo-supercharger must be approved or shown to be suitable for the particular application. It must be installed and supported to ensure safe operation between normal inspections and overhauls. In addition, there must be provisions for expansion and flexibility between exhaust conduits and the turbine.

(b) There must be provisions for lubricating the turbine and for cooling turbine parts where temperatures are critical.

(c) If the normal turbo-supercharger control system malfunctions, the turbine speed may not exceed its maximum allowable value. Except for the waste gate operating components, the components provided for meeting this requirement must be independent of the normal turbo-supercharger controls.

POWERPLANT CONTROLS AND ACCESSORIES

**§ 25.1141 Powerplant controls: general.**

Each powerplant control must be located, arranged, and designed under §§ 25.777 through 25.781 and marked under § 25.1555. In addition, it must meet the following requirements:

(a) Each control must be located so that it cannot be inadvertently operated by persons entering, leaving, or moving normally in, the cockpit.

(b) Each flexible control must be approved or must be shown to be suitable for the particular application.

(c) Each control must have sufficient strength and rigidity to withstand operating loads without failure and without excessive deflection.

(d) Each control must be able to maintain any set position without constant attention by flight crewmembers and without creep due to control loads or vibration.

**§ 25.1143 Throttle and antidetonant injection system controls.**

(a) There must be a separate throttle control for each engine.

(b) Throttle controls must be arranged to allow—

(1) Separate control of each engine; and

(2) Simultaneous control of all engines.

(c) Each throttle control must provide a positive and immediately responsive means of controlling its engine.

(d) If there is an antidetonant injection system, the flow of A.D.I. fluid must be automatically controlled with relation to the amount of power produced by the engine. In addition to the automatic control, there must be a separate control for the A.D.I. pumps.

**§ 25.1145 Ignition switches.**

(a) Ignition switches must control each engine ignition circuit on each engine.

(b) There must be means to quickly shut off all ignition by the grouping of switches or by a master ignition control.

(c) Each master ignition control must have a guard to prevent its inadvertent operation.

**§ 25.1147 Mixture controls.**

(a) If there are mixture controls, each engine must have a separate control. The controls must be grouped and arranged to allow—

(1) Separate control of each engine; and

(2) Simultaneous control of all engines.

(b) Each intermediate position of the mixture controls that corresponds to a normal operating setting must be identifiable by feel and sight.

(c) The mixture controls must be accessible to both pilots. However, if there is a separate flight engineer station with a control panel, the controls need be accessible only to the flight engineer.

**§ 25.1149 Propeller speed and pitch controls.**

(a) There must be a separate propeller speed and pitch control for each propeller.

(b) The controls must be grouped and arranged to allow—

(1) Separate control of each propeller; and

(2) Simultaneous control of all propellers.

(c) The controls must allow synchronization of all propellers.

(d) The propeller speed and pitch controls must be to the right of, and at least one inch below, the pilot's throttle controls.

**§ 25.1153 Propeller feathering controls.**

(a) There must be a separate propeller feathering control for each propeller. The control must have means to prevent its inadvertent operation.

(b) If feathering is accomplished by movement of the propeller pitch or speed control lever, there must be means to prevent the movement of this lever to the feathering position during normal operation.

**§ 25.1155 Reverse thrust controls.**

Reverse thrust controls must have a means to prevent their inadvertent operation. The means must have a positive lock or stop at the flight idle position and must require a separate and distinct operation by the crew to displace the control from the flight regime (forward thrust regime for turbojet powered airplanes).

**§ 25.1157 Carburetor air temperature controls.**

There must be a separate carburetor air temperature control for each engine.

**§ 25.1159 Supercharger controls.**

Each supercharger control must be accessible to the pilots or, if there is a separate flight engineer station with a control panel, to the flight engineer.

**§ 25.1161 Fuel jettisoning system controls.**

Each fuel jettisoning system control must have guards to prevent inadvertent operation. No control may be near any fire extinguisher control or other control used to combat fire.

**§ 25.1163 Powerplant accessories.**

(a) Engine-mounted accessories must be approved for installation on the engine concerned and use the provisions on the engine for mounting.

(b) Electrical equipment subject to arcing or sparking must be installed to minimize the probability of contact with any flammable fluids or vapors that might be present in a free state.

(c) If continued rotation of an engine-driven cabin supercharger or of any remote accessory driven by the engine is hazardous if malfunctioning occurs, there must be means to prevent rotation without interfering with the continued operation of the engine.

**§ 25.1165 Engine ignition systems.**

(a) Each battery ignition system must be supplemented by a generator that is automatically available as an alternate source of electrical energy to allow continued engine operation if any battery becomes depleted.

(b) The capacity of batteries and generators must be large enough to meet the simultaneous demands of the engine ignition system and the greatest demands of any electrical system components that draw electrical energy from the same source.

(c) The design of the engine ignition system must account for—

(1) The condition of an inoperative generator;

(2) The condition of a completely depleted battery with the generator running at its normal operating speed; and

(3) The condition of a completely depleted battery with the generator operating at idling speed, if there is only one battery.

(d) Magneto ground wiring (for separate ignition circuits) that lies on the engine side of the fire wall, must be installed, located, or protected, to minimize the probability of simultaneous failure of two or more wires as a result of mechanical damage, electrical faults, or other cause.

(e) No ground wire for any engine may be routed through a fire zone of another engine unless each part of that wire within that zone is fireproof.

(f) Each ignition system must be independent of any electrical circuit not used for analyzing the operation of that system.

(g) There must be means to warn appropriate flight crewmembers if the malfunctioning of any part of the electrical system is causing the continuous discharge of any battery necessary for engine ignition.

POWERPLANT FIRE PROTECTION

**§ 25.1181 Designated fire zones: regions included.**

(a) Designated fire zones are—

(1) The engine power section;

(2) The engine accessory section;

(3) Any complete powerplant compartment in which no isolation is provided between the engine power section and the engine accessory section;

(4) Any auxiliary power unit compartment;

(5) Any fuel-burning heater and other combustion equipment installation described in § 25.859;

(6) The compressor and accessory sections of turbine engines; and

(7) Combustor, turbine, and tailpipe sections of turbine engine installations that contain lines or components carrying flammable fluids or gases.

(b) Each designated fire zone must meet the requirements of §§ 25.1185 through 25.1205.

(c) The nacelle area immediately behind the fire wall must meet the requirements of §§ 25.863, 25.1103(b), 25.1165 (d) and (e), 25.1183, 25.1185(c), 25.1187, 25.1189, and 25.1195 through 25.1203. If there is a retractable landing gear in this area, compliance with this paragraph need be shown only with the landing gear retracted.

**§ 25.1183 Lines and fittings.**

(a) Except as provided in paragraph (b), each line and fitting carrying flammable fluids in any area subject to engine fire conditions, and each fuel line or fitting in a designated fire zone, must meet the following requirements:

(1) The line and fitting must be at least fire resistant.

(2) Flexible hose assembly (hose and end fitting) must be approved.

(b) Paragraph (a) of this section does not apply to—

(1) Lines and fittings forming an integral part of an engine; and

(2) Vent and drain lines, and their fittings, whose failure will not result in, or add to, a fire hazard.

**§ 25.1185 Flammable fluids.**

(a) No tank or reservoir that is part of a system containing flammable fluids or gases may be in a designated fire zone unless the fluid contained, the design of the system, the materials used in the tank, the shutoff means, and all connections, lines, and control provide a degree of safety equal to that which would exist if the tank or reservoir were outside such a zone.

(b) There must be at least one-half inch of clear airspace between each tank or reservoir and each firewall or shroud isolating a designated fire zone.

(c) Absorbent materials close to flammable fluid system components that might leak must be covered or treated to prevent the absorption of hazardous quantities of fluids.

**§ 25.1187 Drainage and ventilation of fire zones.**

(a) There must be complete drainage of each part of each designated fire zone to minimize the hazards resulting from failure or malfunctioning of any component containing flammable fluids. The drainage means must be—

(1) Effective under conditions expected to prevail when drainage is needed; and

(2) Arranged so that no discharged fluid will cause an additional fire hazard.

(b) Each designated fire zone must be ventilated to prevent the accumulation of flammable vapors.

(c) No ventilation opening may be where it would allow the entry of flammable fluids, vapors, or flame from other zones.

(d) Each ventilation means must be arranged so that no discharged vapors will cause an additional fire hazard.

(e) Unless the extinguishing agent capacity and rate of discharge are based on maximum air flow through a zone, there must be means to allow the crew to shut off sources of forced ventilation to any fire zone except the engine power section of the nacelle and the combustion heater ventilating air ducts.

**§ 25.1189 Shutoff means.**

(a) Except for lines forming an integral part of an engine, each engine and each fire zone specified in § 25.1181(a) (4) and (5) must have a means to shut off or otherwise prevent hazardous quantities of fuel, oil, deicer, and other flammable fluids, from flowing into, within, or through any designated fire zone.

(b) The closing of any fuel shutoff valve for any engine may not make fuel unavailable to the remaining engines.

(c) Operation of any shutoff may not interfere with the later emergency operation of other equipment, such as the means for feathering the propeller.

(d) Each shutoff must be outside of designated fire zones, unless an equal degree of safety is otherwise provided.

(e) No hazardous quantity of flammable fluid may drain into any designated fire zone after shutoff.

(f) There must be means to guard against inadvertent operation of the shutoff means and to make it possible for the crew to reopen the shutoff means in flight after it has been closed.

**§ 25.1191 Firewalls.**

(a) Each engine, auxiliary power unit, fuel-burning heater, other combustion equipment intended for operation in flight, and the combustion, turbine, and tailpipe sections of turbine engines, must be isolated from the rest of the airplane by firewalls, shrouds, or equivalent means.

(b) Each firewall and shroud must be—

(1) Fireproof;

(2) Constructed so that no hazardous quantity of air, fluid, or flame can pass from the compartment to other parts of the airplane;

(3) Constructed so that each opening is sealed with close fitting fireproof grommets, bushings, or firewall fittings; and

(4) Protected against corrosion.

**§ 25.1193 Cowling and nacelle skin.**

(a) Each cowling must be constructed and supported so that it can resist any vibration, inertia, and air load to which it may be subjected in operation.

(b) Cowling must meet the drainage and ventilation requirements of § 25.1187.

(c) On airplanes with a diaphragm isolating the engine power section from the engine accessory section, each part of the accessory section cowling subject to flame in case of fire in the engine power section of the powerplant must—

(1) Be fireproof; and

(2) Meet the requirements of § 25.1191.

(d) Each part of the cowling subject to high temperatures due to its nearness to exhaust system parts or exhaust gas impingement must be fireproof.

(e) Each airplane must—

(1) Be designed and constructed so that no fire originating in any fire zone can enter, either through openings or by burning through external skin, any other zone or region where it would create additional hazards;

(2) Meet subparagraph (1) of this paragraph with the landing gear retracted (if applicable); and

(3) Have fireproof skin in areas subject to flame if a fire starts in the engine power or accessory sections.

**§ 25.1195 Fire extinguishing systems.**

(a) Except for combustor, turbine, and tail pipe sections of turbine engine installations that contain lines or components carrying flammable fluids or gases for which it is shown that a fire originating in these sections can be controlled, there must be a fire extinguisher system serving each designated fire zone.

(b) An individual "one shot" fire extinguishing system may be used for auxiliary power units, fuel-burning heaters, and other combustion equipment. The fire extinguishing system, the quantity of extinguishing agent, and the rate of discharge, in other designated fire zones must be able to provide two adequate discharges. It must be possible to direct both discharges to any main engine installation.

(c) The fire-extinguishing system for a nacelle must be able to simultaneously protect each zone of the nacelle for which protection is provided.

**§ 25.1197 Fire extinguishing agents.**

(a) Extinguishing agents must be methyl bromide, carbon dioxide, or any other agent with equal extinguishing action.

(b) If methyl bromide, carbon dioxide, or any other toxic extinguishing agent is used, provisions must be made to prevent harmful concentrations of fluid or fluid vapors (from leakage during normal operation of the airplane or as a result of discharging the fire extinguisher on the ground or in flight) from entering any personnel compartment, even though a defect may exist in the extinguishing system. This must be shown by test except for built-in carbon dioxide fuselage compartment fire extinguishing systems for which—

(1) Five pounds or less of carbon dioxide will be discharged, under established fire control procedures, into any fuselage compartment; or

(2) There is protective breathing equipment for each flight crewmember on flight deck duty.

(c) Each methyl bromide container must be charged with a dry agent and sealed. This must be done by the fire extinguisher manufacturer or any person using appropriate recharging equipment.

**§ 25.1199 Extinguishing agent containers.**

(a) Each extinguishing agent container must have a pressure relief to prevent bursting of the container by excessive internal pressures.

(b) Each discharge line from a relief connection must terminate outside the airplane in a location convenient for inspection on the ground.

(c) There must be a visual discharge indicator at the discharge end of each discharge line.

(d) The temperature of each container must be maintained, under intended operating conditions, to prevent the pressure in the container from—

(1) Falling below that necessary to provide an adequate rate of discharge; or

(2) Rising high enough to cause premature discharge.

**§ 25.1201 Fire extinguishing system materials.**

(a) No material in any fire extinguishing system may react chemically with any extinguishing agent so as to create a hazard.

(b) Each system component in an engine compartment must be fireproof.

**§ 25.1203 Fire-detector system.**

(a) There must be approved, quick acting fire or overheat detectors in each designated fire zone, and in the combustion, turbine, and tailpipe sections of turbine engine installations, in numbers and locations ensuring prompt detection of fire in those zones.

(b) Each fire detector must be constructed and installed to withstand the vibration, inertia, and other loads to which it may be subjected to in operation.

(c) No fire detector may be affected by any oil, water, other fluids, or fumes that might be present.

(d) There must be means to allow the crew to check, in flight, the functioning of each fire-detector electric circuit.

(e) Wiring and other components of each fire-detector system in a fire zone must be at least fire-resistant.

(f) No fire-detector system component for any fire zone may pass through another fire zone, unless—

(1) It is protected against the possibility of false warnings resulting from fires in zones through which its passes; or

(2) Each zone involved is simultaneously protected by the same detector and extinguishing system.

**§ 25.1205 Fire protection: other components.**

(a) Surfaces to the rear of the nacelles, within one nacelle diameter of the nacelle centerline, must be at least fire-resistant.

(b) Paragraph (a) of this section does not apply to tail surfaces to the rear of the nacelles that could not be readily affected by heat, flames, or sparks coming from a designated fire zone or engine compartment of any nacelle.

## Subpart F—Equipment

### General

**§ 25.1301 Function and installation.**

Each item of installed equipment must—

(a) Be of a kind and design appropriate to its intended function;

(b) Be labeled as to its identification, function, or operating limitations, or any applicable combination of these factors;

(c) Be installed according to limitations specified for that equipment; and

(d) Function properly when installed.

**§ 25.1303 Flight and navigation instruments.**

(a) The following are required flight and navigation instruments:

(1) An airspeed indicating system. If airspeed limitations vary with altitude, the indicator must have a maximum allowable airspeed indication showing the variation of $V_{MO}/M_{MO}$ with (i) altitude and (ii) compressibility limitations.

(2) An altimeter (sensitive or precision).

(3) A rate-of-climb indicator (vertical speed).

(4) A free air temperature indicator.

(5) A clock (sweep-second pointer).

(6) A rate-of-turn indicator (gyroscopic, with integral bank or slip indicator).

(7) A bank and pitch indicator (gyroscopically stabilized).

(8) A direction indicator (gyroscopically stabilized, magnetic or nonmagnetic).

(9) A direction indicator (nonstabilized magnetic compass).

(10) A machmeter (for airplanes with compressibility limitations not otherwise indicated under § 25.1545 to the pilot).

(11) A speed warning device (for each turbine engine powered airplane and each other airplane with $V_{MO}/M_{MO}$ greater than 0.8 $V_{DF}/M_{DF}$ or 0.8 $V_D/M_D$).

(b) The speed warning device required by subparagraph (a) (11) of this section must give effective aural warning (differing distinctively from aural warnings used for other purposes) to the pilots, whenever the speed exceeds $V_{MO}$ plus six knots or $M_{MO}+0.01$. The upper limit of the production tolerance for the warning device may not exceed the prescribed warning speed.

**§ 25.1305 Powerplant instruments.**

The following are required powerplant instruments:

(a) A carburetor air temperature indicator for each reciprocating engine.

(b) A cylinder head temperature indicator for each air-cooled reciprocating engine.

(c) A gas temperature indicator for each turbine engine.

(d) A manifold pressure indicator for each reciprocating engine.

(e) A fuel pressure indicator (to indicate the pressure at which the fuel is supplied) for each reciprocating engine.

(f) A fuel pressure warning means for each engine, or a master warning means for all engines with provision for isolating the individual warning means from the master warning means.

(g) A fuel flowmeter indicator for each turbine engine.

(h) A fuel flowmeter, or fuel mixture indicator, for each reciprocating engine without an automatic altitude mixture control.

(i) A fuel quantity indicator for each fuel tank.

(j) An augmentation liquid quantity indicator (appropriate for the manner in which the liquid is to be used in operation) for each tank.

(k) An oil quantity indicator for each oil tank.

(l) An oil pressure indicator for each independent pressure oil system of each engine.

(m) An oil pressure warning means for each engine, or a master warning means for all engines with provision for isolating the individual warning means from the master warning means.

(n) An oil temperature indicator for each engine.

(o) A tachometer for each reciprocating engine.

(p) A tachometer (to indicate the speed of the rotors with established limiting speeds) for each turbine engine.

(q) Fire-warning indicators.

(r) An indicator to indicate a change in thrust resulting from any deficiency in the engine, or to indicate a gas stream pressure that can be related to thrust, for each turbojet engine.

(s) A torque indicator for each turbopropeller engine.

(t) A device that indicates, to the flight crew (during flight), any change in the power output, for each reciprocating engine with—

(1) An automatic propeller feathering system, whose operation is initiated by a power output measuring system; or

(2) A total engine piston displacement of 2,000 cubic inches or more.

(u) Position indicating means to indicate to the flight crew when the propeller blade angle is below the flight low pitch position, for each turbopropeller engine propeller.

(v) A means to indicate to the pilot when the propeller is in reverse pitch, for each reversing propeller of reciprocating engines.

(w) A position indicating means to indicate to the flight crew when the thrust reversing device is in the reverse thrust position, for each turbine engine using a thrust reversing device.

**§ 25.1307 Miscellaneous equipment.**

The following is required miscellaneous equipment:

(a) An approved seat for each occupant.

(b) An approved safety belt for each occupant.

(c) An adequate source of electrical energy.

(d) Electrical protective devices.

(e) A two way radio communication system.

(f) A radio navigation system.

(g) A windshield wiper, or equivalent, for each pilot station.

(h) An ignition switch for each engine meeting the requirements of § 25.1145(b).

(i) An approved portable fire extinguisher.

**§ 25.1309 Equipment systems and installations.**

(a) The equipment systems and installations whose functioning is required by this subchapter, must be designed and installed to ensure that they perform their intended functions under any foreseeable operating condition.

(b) The equipment systems and installations must be designed to prevent hazards to the airplane if they malfunction or fail.

(c) Each installation whose functioning is required by this subchapter, and that requires a power supply, is an "essential load" on the power supply. The power sources and the system must be able to supply the following power loads in probable operating combinations and for probable durations:

(1) Loads connected to the system with the system functioning normally.

(2) Essential loads, after failure of any one prime mover, power converter, or energy storage device.

(3) Essential loads after failure of—

(i) Any one engine, on two- or three-engine airplanes; and

(ii) Any two engines on four-or-more-engine airplanes.

(d) In determining compliance with paragraph (c) (2) and (3) of this section, the power loads may be assumed to be reduced under a monitoring procedure consistent with safety in the kinds of operation authorized. Loads not required in controlled flight need not be considered for the two-engine-inoperative condition on airplanes with four or more engines.

(e) In showing compliance with paragraphs (a) and (b) of this section with regard to the electrical system and equipment design and installation, critical environmental conditions must be considered. For electrical generation, distribution, and utilization equipment required by or used in complying with this chapter, except equipment covered by Technical Standard Orders containing environmental test procedures, the ability to provide continuous, safe service under foreseeable environmental conditions may be shown by environmental tests, design analysis, or reference to previous comparable service experience on other aircraft.

### Instruments: Installation

**§ 25.1321 Arrangement and visibility.**

(a) Duplicate instrument arrangements at two or more crew stations may be used—

(1) To meet the instrument visibility requirements of this section; and

(2) If required by the operating rules of this chapter for reliability, or cross-check purposes, in particular kinds of operations.

(b) Each flight, navigation, and powerplant instrument for use by any pilot

must be plainly visible to him from his station with the minimum practicable deviation from his normal position and line of vision when he is looking forward along the flight path.

(c) The flight instruments required by § 25.1303 must be grouped on the instrument panel and centered as nearly as practicable about the vertical plane of the pilot's forward vision. In addition—

(1) The instrument that most effectively indicates attitude must be on the panel in the top center position;

(2) The instrument that most effectively indicates airspeed must be adjacent to and directly to the left of the instrument in the top center position;

(3) The instrument that most effectively indicates altitude must be adjacent to and directly to the right of the instrument in the top center position; and

(4) The instrument that most effectively indicates direction of flight must be adjacent to and directly below the instrument in the top center position.

(d) Required powerplant instruments must be closely grouped on the instrument panel. In addition—

(1) The location of identical powerplant instruments for the engines must prevent confusion as to which engine each instrument relates; and

(2) Powerplant instruments vital to the safe operation of the airplane must be plainly visible to the appropriate crewmembers.

(e) Instrument panel vibration may not damage or impair the accuracy of any instrument.

**§ 25.1323 Airspeed indicating system.**

For each airspeed indicating system, the following apply:

(a) Each airspeed indicating instrument must be approved and must be calibrated to indicate true airspeed (at sea level with a standard atmosphere) with a minimum practicable instrument calibration error when the corresponding pitot and static pressures are applied.

(b) Each system must be calibrated to determine the system error (that is, the relation between IAS and CAS) in flight and during the accelerated takeoff ground run. The ground run calibration must be determined—

(1) From 0.8 of the minimum value of $V_1$ to the maximum value of $V_2$, considering the approved ranges of altitude and weight; and

(2) With the flaps and power settings corresponding to the values determined in the establishment of the takeoff path under § 25.59 or § 25.111 assuming that the critical engine fails at the minimum value of $V_1$.

(c) The airspeed error of the installation, excluding the airspeed indicator instrument calibration error, may not exceed three percent or five knots, whichever is greater, throughout the speed range, from—

(1) $V_{MO}$ to 1.3 $V_{S_1}$ with flaps retracted; and

(2) 1.3 $V_{S_0}$ to $V_{FE}$ with flaps in the landing position.

(b) Each system must be arranged, so far as practicable, to prevent malfunction or serious error due to the entry of moisture, dirt, or other substances.

(e) Each system must have a heated pitot tube or an equivalent means of preventing malfunction due to icing.

(f) Where duplicate airspeed indicators are required, their respective pitot tubes must be far enough apart to avoid damage to both tubes in a collision with a bird.

**§ 25.1325 Static air vent and pressure altimeter systems.**

(a) Each instrument with static air case connections must be vented to the outside atmosphere through an appropriate piping system.

(b) Each vent must be located where its orifices are least affected by airflow variation moisture, or other foreign matter.

(c) Except for the vent into the atmosphere, each system must be airtight.

(d) Each pressure altimeter must be approved and must be calibrated to indicate pressure altitude in a standard atmosphere, with a minimum practicable calibration error when the corresponding static pressures are applied.

(e) Each system must be designed and installed so that the error in indicated pressure altitude, at sea level, with a standard atmosphere, excluding instrument calibration error, does not result in an error of more than ±30 feet per 100 knots speed for the appropriate configuration in the speed range between 1.3 $V_{S_0}$ with flaps extended and 1.8 $V_{S_1}$ with flaps retracted. However, the error need not be less than ±30 feet.

**§ 25.1327 Magnetic direction indicator.**

(a) Each magnetic direction indicator must be installed so that its accuracy is not excessively affected by the airplane's vibration or magnetic fields.

(b) The compensated installation may not have a deviation, in level flight, greater than 10 degrees on any heading.

**§ 25.1329 Automatic pilot system.**

(a) Each automatic pilot system must be approved and must be designed so that the automatic pilot can be quickly and positively disengaged by the pilots to prevent it from interfering with their control of the airplane.

(b) Unless there is automatic synchronization, each system must have a means to readily indicate to the pilot the alignment of the actuating device in relation to the control system it operates.

(c) Each manually operated control for the system must be readily accessible to the pilots.

(d) Quick release (emergency) controls must be on both control wheels, on the side of each wheel opposite the throttles.

(e) Attitude controls must operate in the plane and sense of motion specified in §§ 25.777(b) and 25.779(a) for cockpit controls. The direction of motion must be plainly indicated on, or adjacent to, each control.

(f) The system must be designed and adjusted so that, within the range of adjustment available to the human pilot, it cannot produce hazardous loads on the airplane, or create hazardous deviations in the flight path, under any condition of flight appropriate to its use, either during normal operation or in the event of a malfunction, assuming that corrective action begins within a reasonable period of time.

(g) If the automatic pilot integrates signals from auxiliary controls or furnishes signals for operation of other equipment, there must be positive interlocks and sequencing of engagement to prevent improper operation. Protection against adverse interaction of integrated components, resulting from a malfunction, is also required.

**§ 25.1331 Instruments using a power supply.**

(a) For each rate-of-turn, bank and pitch, and direction indicator required by § 25.1303(a) (6), (7), and (8), that uses a power supply, the following apply:

(1) Each instrument must have a visual means integral with, or adjacent to, the instrument, to indicate when power adequate to sustain proper instrument performance is not being supplied. The power must be measured at or near the point where it enters the instruments. For electric instruments, the power is considered to be adequate when the voltage is within approved limits.

(2) Each instrument must have two independent power sources and a means for selecting either source. For duplicate independent instruments with independent power sources, source selection is not required.

(3) Each instrument and its related power supply system must be designed and installed so that failure of one instrument, or the failure of the energy supply from one source, or a fault in any part of the power distribution system, does not interfere with the proper supply of energy from the other source.

(b) As used in this section, "instrument" includes devices that are physically contained in one unit, and devices that are composed of two or more physically separate units or components connected together (such as a remote indicating gyroscopic direction indicator that includes a magnetic sensing element, a gyroscopic unit, an amplifier, and an indicator connected together).

**§ 25.1333 Duplicate instrument systems.**

If duplicate flight instruments are required by any operating rule in this chapter—

(a) Each operating system for flight instruments for the first pilot, and required to be duplicated at other flight crew stations, must be independent of the operating system for other flight crew stations;

(b) Only the required flight instruments, and duplicates of required instruments, provided for the first pilot may be connected to the operating system provided for the first pilot; and

(c) If instruments other than required instruments and their duplicates are connected to systems other than the first pilot's operating system, there must be means to disconnect or isolate these instruments in flight.

**§ 25.1337 Powerplant instruments.**

(a) *Instrument lines.* Each powerplant instrument line must meet the requirements of §§ 25.993 and 25.1183. Each line carrying flammable fluids or gases under pressure must have restricting orifices or equivalent safety devices, at the source of the pressure, to prevent the escape of excessive fluid or gas if the line fails.

(b) *Fuel quantity indicator.* There must be means to indicate to the flight crewmembers, the quantity, in gallons or equivalent units, of usable fuel in each tank during flight. In addition—

(1) Each fuel quantity indicator must be calibrated to read "zero" during level flight when the quantity of fuel remaining in the tank is equal to the unusable fuel supply determined under § 25.959;

(2) Tanks with interconnected outlets and airspaces may be treated as one tank and need not have separate indicators; and

(3) Each exposed sight gauge, used as a fuel quantity indicator, must be protected against damage.

(c) *Fuel flowmeter system.* If a fuel flowmeter system is installed, each metering component must have a means for bypassing the fuel supply if malfunction of that component severely restricts fuel flow.

(d) *Oil quantity indicator.* There must be a stick gauge or equivalent means to indicate the quantity of oil in each tank. If an oil transfer or reserve oil supply system is installed, there must be a means to indicate to the flight crew, in flight, the quantity of oil in each tank.

(e) *Turbopropeller blade position indicator.* Required turbopropeller blade position indicators must begin indicating before the blade moves more than eight degrees below the flight low pitch stop. The source of indication must directly sense the blade position.

(f) *Fuel pressure indicator.* There must be means to measure fuel pressure, in each system supplying reciprocating engines, at a point downstream of any fuel pump except fuel injection pumps. In addition—

(1) If necessary for the maintenance of proper fuel delivery pressure, there must be a connection to transmit the carburetor air intake static pressure to the proper pump relief valve connection; and

(2) If a connection is required under subparagraph (1) of this paragraph, the gauge balance lines must be independently connected to the carburetor inlet pressure to avoid erroneous readings.

ELECTRICAL SYSTEMS AND EQUIPMENT

**§ 25.1351 General.**

(a) *Electrical system capacity.* The required generating capacity, and number and kinds of power sources must—

(1) Be determined by an electrical load analysis; and

(2) Meet the requirements of § 25.1309.

(b) *Generating system.* The generating system includes electrical power sources, main power busses, transmission cables, and associated control, regulation, and protective devices. It must be designed so that—

(1) Power sources function properly when independent and when connected in combination;

(2) No failure or malfunction of any power source can create a hazard or impair the ability of remaining sources to supply essential loads;

(3) The system voltage and frequency (as applicable) at the terminals of all essential load equipment can be maintained within the limits for which the equipment is designed, during any probable operating condition; and

(4) System transients due to switching, fault clearing, or other causes do not make essential loads inoperative, and do not cause a smoke or fire hazard.

(5) There are means accessible, in flight, to appropriate crewmembers for the individual and collective disconnection of the electrical power sources from the system.

(6) There are means to indicate to appropriate crewmembers the generating system quantities essential for the safe operation of the system, such as the voltage and current supplied by each generator.

**§ 25.1353 Electrical equipment and installations.**

(a) Electrical equipment, controls, and wiring must be installed so that operation of any one unit or system of units will not adversely affect the simultaneous operation of any other electrical unit or system essential to the safe operation.

(b) Cables must be grouped, routed, and spaced so that damage to essential circuits will be minimized if there are faults in heavy current-carrying cables.

(c) Storage batteries must be designed and installed as follows:

(1) Safe cell temperatures and pressures must be maintained during any probable charging or discharging condition. No uncontrolled increase in cell temperature may result when the battery is recharged (after previous complete discharge)—

(i) At maximum regulated voltage;

(ii) During a flight of maximum duration; and

(iii) Under the most adverse cooling condition likely to occur in service.

(2) Compliance with subparagraph (1) of this paragraph must be shown by test unless experience with similar batteries and installations has shown that maintaining safe cell temperatures and pressures presents no problem.

(3) No explosive or toxic gases emitted by any battery in normal operation, or as the result of any probable malfunction in the charging system or battery installation, may accumulate in hazardous quantities within the airplane.

(4) No corrosive fluids or gases that may escape from the battery may damage surrounding airplane structures or adjacent essential equipment.

**§ 25.1355 Distribution system.**

(a) The distribution system includes the distribution busses, their associated feeders, and each control and protective device.

(b) Each system must be designed so that essential load circuits can be supplied in the event of reasonably probable faults or open circuits.

(c) If two independent sources of electrical power for particular equipment or systems are required by this chapter, their electrical energy supply must be ensured by means such as duplicate electrical equipment, throwover switching, or multi-channel or loop circuits separately routed.

**§ 25.1357 Circuit protective devices.**

(a) Automatic protective devices must be used to minimize distress to the electrical system and hazard to the airplane in the event of wiring faults or serious malfunction of the system or connected equipment.

(b) The protective and control devices in the generating system must be designed to de-energize and disconnect faulty power sources and power transmission equipment from their associated busses with sufficient rapidity to provide protection from hazardous over-voltage and other malfunctioning.

(c) Each resettable circuit protective device must be designed so that, when an overload or circuit fault exists, it will open the circuit irrespective of the position of the operating control.

(d) If the ability to reset a circuit breaker or replace a fuse is essential to safety in flight, that circuit breaker or fuse must be located and identified so that it can be readily reset or replaced in flight.

(e) Each circuit for essential loads must have individual circuit protection. However, individual protection for each circuit in an essential load system (such as each position light circuit in a system) is not required.

(f) If fuses are used, there must be spare fuses for use in flight equal to at least 50 percent of the number of fuses of each rating required for complete circuit protection.

(g) Automatic reset circuit breakers may be used as integral protectors for electrical equipment (such as thermal cut-outs) if there is circuit protection to protect the cable to the equipment.

**§ 25.1359 Electrical system fire and smoke protection.**

(a) Components of the electrical system must meet the applicable fire and smoke protection requirements of §§ 25.831(c), 25.863, and 25.1205.

(b) Electrical cables, terminals, and equipment in designated fire zones, that are used during emergency procedures, must be at least fire-resistant.

**§ 25.1363 Electrical system tests.**

(a) When laboratory tests of the electrical system are conducted—

(1) The tests must be performed on a mock-up using the same generating equipment used in the airplane;

(2) The equipment must simulate the electrical characteristics of the distribution wiring and connected loads to the extent necessary for valid test results; and

(3) Laboratory generator drives must simulate the actual prime movers on the airplane with respect to their reaction to generator loading, including loading due to faults.

(b) For each flight condition that cannot be simulated adequately in the laboratory or by ground tests on the airplane, flight tests must be made.

**§ 25.1369 Lightning strike protection.**

Parts that are electrically insulated from the basic airframe must be connected to it through lightning arrestors unless a lightning strike on the insulated part—

(a) Is improbable because of shielding by other parts; or

(b) Is not hazardous.

LIGHTS

**§ 25.1381 Instrument lights.**

(a) The instrument lights must—

(1) Make each instrument, switch, and other device for which they are provided easily readable; and

(2) Be installed so that—

(i) Their direct rays are shielded from the pilot's eyes; and

(ii) No objectionable reflections are visible to the pilot.

(b) Unless undimmed instrument lights are satisfactory under each expected flight condition, there must be a means to control the intensity of illumination.

**§ 25.1383 Landing lights.**

(a) Each landing light must be approved, and must be installed so that—

(1) No objectionable glare is visible to the pilot;

(2) The pilot is not adversely affected by halation; and

(3) It provides enough light for night landing.

(b) Except when one switch is used for the lights of a multiple light installation at one location, there must be a separate switch for each light.

(c) There must be a means to indicate to the pilots when the landing lights are extended.

**§ 25.1385 Position light system installation.**

(a) *General.* Each part of each position light system must meet the applicable requirements of this section and each system as a whole must meet the requirements of §§ 25.1387 through 25.1397.

(b) *Forward position lights.* Forward position lights must consist of a red and a green light spaced laterally as far apart as practicable and installed forward on the airplane so that, with the airplane in the normal flying position, the red light is on the left side and the green light is on the right side. Each light must be approved.

(c) *Rear position light.* The rear position light must be a white light mounted as far aft as practicable, and must be approved.

(d) *Light covers and color filters.* Each light cover or color filter must be at least flame resistant and may not change color or shape or lose any appreciable light transmission during normal use.

(e) *Passing light.* If an additional steady red light (commonly known as a passing light) is installed, it must be—

(1) Within the left landing light unit;

(2) On the centerline of the airplane nose; or

(3) In the leading edge of the left wing, outboard of the propeller disc.

**§ 25.1387 Position light system dihedral angles.**

(a) Each forward and rear position light must, as installed, show unbroken light within the dihedral angles described in this section.

(b) Dihedral angle *L* (left) is formed by two intersecting vertical planes, the first parallel to the longitudinal axis of the airplane, and the other at 110 degrees to the left of the first, as viewed when looking forward along the longitudinal axis.

(c) Dihedral angle *R* (right) is formed by two intersecting vertical planes, the first parallel to the longitudinal axis of the airplane, and the other at 110 degrees to the right of the first, as viewed when looking forward along the longitudinal axis.

(d) Dihedral angle *A* (aft) is formed by two intersecting vertical planes making angles of 70 degrees to the right and to the left, respectively, to a vertical plane passing through the longitudinal axis, as viewed when looking aft along the longitudinal axis.

**§ 25.1389 Position light distribution and intensities.**

(a) *General.* The intensities prescribed in this section must be provided by new equipment with light covers and color filters in place. Intensities must be determined with the light source operating at a steady value equal to the average luminous output of the source at the normal operating voltage of the airplane. The light distribution and intensity of each position light must meet the requirements of paragraph (b) of this section.

(b) *Forward and rear position lights.* The light distribution and intensities of forward and rear position lights must be expressed in terms of minimum intensities in the horizontal plane, minimum intensities in any vertical plane, and maximum intensities in overlapping beams, within dihedral angles *L*, *R*, and *A*, and must meet the following requirements:

(1) *Intensities in the horizontal plane.* Each intensity in the horizontal plane (the plane containing the longitudinal axis of the airplane and perpendicular to the plane of symmetry of the airplane) must equal or exceed the values in § 25.1391.

(2) *Intensities in any vertical plane.* Each intensity in any vertical plane (the plane perpendicular to the horizontal plane) must equal or exceed the appropriate value in § 25.1393, where *I* is the minimum intensity prescribed in § 25.1391 for the corresponding angles in the horizontal plane.

(3) *Intensities in overlaps between adjacent signals.* No intensity in any overlap between adjacent signals may exceed the values given in § 25.1395, except that higher intensities in overlaps may be used with main beam intensities substantially greater than the minima specified in §§ 25.1391 and 25.1393 if the overlap intensities in relation to the main beam intensities do not adversely affect signal clarity. When the peak intensity of the forward position lights is more than 100 candles, the maximum overlap intensities between them may exceed the values given in § 25.1395 if the overlap intensity in Area A is not more than 10 percent of peak position light intensity and the overlap intensity in Area B is not greater than 2.5 percent of peak position light intensity.

**§ 25.1391 Minimum intensities in the horizontal plane of forward and rear position lights.**

Each position light intensity must equal or exceed the applicable values in the following table:

| Dihedral angle (light included) | Angle from right or left of longitudinal axis, measured from dead ahead | Intensity (candles) |
|---|---|---|
| *L* and *R* (forward red and green) | 0° to 10° | 40 |
| | 10° to 20° | 30 |
| | 20° to 110° | 5 |
| *A* (rear white) | 110° to 180° | 20 |

**§ 25.1393 Minimum intensities in any vertical plane of forward and rear position lights.**

Each position light intensity must equal or exceed the applicable values in the following table:

| Angle above or below the horizontal plane: | *Intensity* |
|---|---|
| 0° | 1.00 *I*. |
| 0° to 5° | 0.90 *I*. |
| 5° to 10° | 0.80 *I*. |
| 10° to 15° | 0.70 *I*. |
| 15° to 20° | 0.50 *I*. |
| 20° to 30° | 0.30 *I*. |
| 30° to 40° | 0.10 *I*. |
| 40° to 90° | 0.05 *I*. |

**§ 25.1395 Maximum intensities in overlapping beams of forward and rear position lights.**

No position light intensity may exceed the applicable values in the following table, except as provided in § 25.1389 (b) (3).

| Overlaps | Maximum intensity | |
|---|---|---|
| | Area A (candles) | Area B (candles) |
| Green in dihedral angle *L* | 10 | 1 |
| Red in dihedral angle *R* | 10 | 1 |
| Green in dihedral angle *A* | 5 | 1 |
| Red in dihedral angle *A* | 5 | 1 |
| Rear white in dihedral angle *L* | 5 | 1 |
| Rear white in dihedral angle *R* | 5 | 1 |

Where—

(a) Area A includes all directions in the adjacent dihedral angle that pass through the light source and intersect the common boundary plane at more than 10 degrees but less than 20 degrees; and

(b) Area B includes all directions in the adjacent dihedral angle that pass through the light source and intersect the common boundary plane at more than 20 degrees.

**§ 25.1397 Color specifications.**

Each position light color must have the applicable International Commission on Illumination chromaticity coordinates as follows:

(a) *Aviation red*—

"*y*" is not greater than 0.335; and
"*z*" is not greater than 0.002.

(b) *Aviation green*—

"*x*" is not greater than $0.440-0.320y$;
"*x*" is not greater than $y-0.170$; and
"*y*" is not less than $0.390-0.170x$.

(c) *Aviation white*—

"*x*" is not less than 0.350;
"*x*" is not greater than 0.540; and
"$y-y_0$" is not numerically greater than 0.01, "$y_0$" being the *y* coordinate of the Planckian radiator for which $x_0=x$.

**§ 25.1399 Riding light.**

(a) Each riding (anchor) light required for a seaplane or amphibian must be installed so that it can—

(1) Show a white light for at least two nautical miles at night under clear atmospheric conditions; and

(2) Show the maximum unbroken light practicable when the airplane is moored or drifting on the water.

(b) Externally hung lights may be used.

**§ 25.1401 Anticollision light system.**

(a) *General.* The airplane must have an anticollision light system that—

(1) Consists of one or more approved anticollision lights located so that their light will not impair the crew's vision or detract from the conspicuity of the position lights; and

(2) Meets the requirements of paragraphs (b) through (f) of this section.

(b) *Field of coverage.* The system must consist of enough lights to illuminate the vital areas around the airplane considering the physical configuration and flight characteristics of the airplane. The field of coverage must extend in each direction within at least 30 degrees above and 30 degrees below the horizontal plane of the airplane, except that a solid angle or angles of obstructed visibility totaling not more than 0.03 steradians is allowable within a solid angle equal to 0.15 steradians centered about the longitudinal axis in the rearward direction.

(c) *Flashing characteristics.* The arrangement of the system, that is, the number of light sources, beam width, speed of rotation, and other characteristics, must give an effective flash frequency of not less than 40, nor more than 100, cycles per minute. The effective flash frequency is the frequency at which the airplane's complete anticollision light system is observed from a distance, and applies to each sector of light including any overlaps that exist when the system consists of more than one light source. In overlaps, flash frequencies may exceed 100, but not 180, cycles per minute.

(d) *Color.* Each anticollision light must be aviation red and must meet the requirements of § 25.1397(a).

(e) *Light intensity.* The minimum light intensities in all vertical planes, measured with the red filter and expressed in terms of "effective" intensities, must meet the requirements of paragraph (f) of this section. The following relation must be assumed:

$$I_e=\frac{\int_{t_1}^{t_2} I(t)\,dt}{0.2+(t_2-t_1)};$$

where:

$I_e$ = effective intensity (candles).
$I(t)$ = instantaneous intensity as a function of time.
$t_2-t_1$ = flash time interval (seconds).

Normally, the maximum value of effective intensity is obtained when $t_2$ and $t_1$ are chosen so that the effective intensity is equal to the instantaneous intensity at $t_2$ and $t_1$.

(f) *Minimum effective intensities for anticollision lights.* Each anticollision light effective intensity must equal or exceed the applicable values in the following table.

| *Angle above or below the horizontal plane:* | *Effective intensity (candles)* |
|---|---|
| 0° to 5° | 100 |
| 5° to 10° | 60 |
| 10° to 20° | 20 |
| 20° to 30° | 10 |

SAFETY EQUIPMENT

**§ 25.1411 General.**

(a) *Accessibility.* Required safety equipment to be used by the crew in an emergency, such as automatic liferaft releases, must be readily accessible.

(b) *Stowage provisions.* Stowage provisions for required emergency equipment must be furnished and must—

(1) Be arranged so that the equipment is directly accessible and its location is obvious; and

(2) Protect the safety equipment from inadvertent damage.

(c) *Emergency exit descent device.* The stowage provisions for the emergency exit descent device required by § 25.807(c)(4) must be at the exits for which they are intended.

(d) *Liferafts.* The stowage provisions for the liferafts described in § 25.1415 must accommodate enough rafts for the maximum number of occupants for which certification for ditching is requested. Liferafts must be stowed near exits through which the rafts can be launched during an unplanned ditching. Rafts automatically or remotely released outside the airplane must be attached to the airplane by means of the static line prescribed in § 25.1415.

(e) *Long-range signaling device.* The stowage provisions for the long-range signaling device required by § 25.1415 must be near an exit available during an unplanned ditching.

(f) *Life preserver stowage provisions.* The stowage provisions for life preservers described in § 25.1415 must accommodate one life preserver for each occupant for which certification for ditching is requested. Each life preserver must be within easy reach of each seated occupant.

(g) *Life line stowage provisions.* If certification for ditching under § 25.801 is requested, there must be provisions to store life lines. These provisions must—

(1) Allow one life line to be attached to each side of the fuselage; and

(2) Be arranged to allow the life lines to be used to enable the occupants to stay on the wing after ditching.

**§ 25.1413 Safety belts.**

(a) If there are means to indicate to the passengers when safety belts should be fastened, they must be installed to be operated from either pilot seat.

(b) The rated strength of safety belts may not be less than that required to withstand the ultimate load factors specified in § 25.561, considering the dimensional characteristics of the belt installation for the specific seat or berth arrangement.

(c) Each belt must be attached so that no part of the anchorage can fail at a load lower than that which would result from the application of ultimate load factors equal to those specified in § 25.561, multiplied by a factor of 1.33. This factor must be used instead of the fitting factor prescribed in § 25.625. The forward load factor need not be applied to safety belts for berths.

**§ 25.1415 Ditching equipment.**

(a) Ditching equipment used in airplanes to be certificated for ditching under § 25.801, and operated under the operating rules of this chapter, must meet the requirements of this section.

(b) Each liferaft and each life preserver must be approved. In addition—

(1) Unless excess rafts of enough capacity are provided, the buoyancy and seating capacity beyond the rated capacity of the rafts must accommodate all occupants of the airplane in the event of a loss of one raft of the largest rated capacity; and
